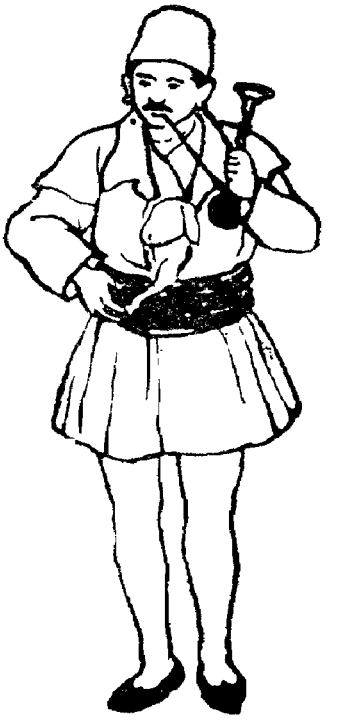
GADDI MITR BHOLA

(MOTIF ON THE COVER)



The cover page on the right hand bottom shows a Gaddi-Scheduled Tribe-enjoying mini *hooka* while carrying a lamb in his bosom.

The Gaddi people of the Himalayas are found mostly in the Chamba District and along certain foot-hills of the Dhar in the Kangra District of Himachal Pradesh. Their area is frequently described as 'Gadaren' the land of the Gaddis or as Shiva *bhumi*, the land of Shiva. Administratively they are indigenous to the Brahmaur Sub-Tahsil of Chamba District and have spread southward across the Dhaula Dhar into the northern part of Kangra District. The Gaddis are a semi-pastoral and semi-agricultural tribe and own flocks of sheep and goats which are their chief source of wealth. The Gaddis are interesting people and offer a striking contrast in several respects to the other inhabitants of Chamba. Their dress is conspicuous, wearing a patti coat called chola, reaching below the knee. The *chola* is tightened round the waiste by a black woollen rope called dora. The legs are generally bare. They are robust of frame and accustomed to exposure in all weathers owing to the migratory life lead by so many of them. In their manners they are so simple, frank and open, deferential to their superior and yet manly and dignified. As the saying goes in the hills "Gaddi Mitr Bhola, denda top to mangda Chola." "The Gaddi is a simple friend, he offers his cap and asks a coat in exchange."

Census of India 1971

LIST OF PUBLICATIONS

Central Government Publications—Census of India 1971—Series—7—Himachal Pradesh is being published in the following parts :

Part Number	*Subject covered*
I—A	General Report.
I—B	Detailed Analysis of the Demographic, Social, Cultural and Migration Patterns.
I—C	Subsidiary Tables.
II—A	General Population Tables ('A' Series).
II—B	Economic Tables ('B' Series).
II—C (i)	Distribution of Population, Mother Tongue and Religion, Scheduled Castes and Scheduled Tribes.
II—C (ii)	Other Social and Cultural Tables and Fertility Tables, Tables on Household Composition, Single Year Age, Marital Status, Educational Levels, Scheduled Castes and Scheduled Tribes, etc., Bilingualism.
III	Establishment Report and Tables ('E' Series).
IV—A & B	Housing Report and Housing Subsidiary Tables.
V	Special Tables and Ethnographic Notes on Scheduled Castes and Scheduled Tribes.
VI—A	Town Directory.
VI—B	Special Survey Reports on Selected Towns.
VI—C	Special Survey Reports on Selected Villages.
VII	Special Report on Graduate and Technical Personnel.
VIII—A	Administration Report—Enumeration. For official use only.
VIII—B	Administration Report—Tabulation
IX	Census Atlas.
IX—A	Administrative Atlas.

GOVERNMENT OF HIMACHAL PRADESH PUBLICATIONS—

DISTRICT CENSUS HANDBOOKS :

X—A	Town and Village Directory.
X—B	Village and Townwise Primary Census Abstract.
X—C	Analytical Report, Departmental Statistics and District Census Tables.

(District Census Hand books in respect of 10 districts of Himachal Pradesh are being published in 20 volumes i.e. two volumes for each district. Parts X—A and X—B are being combined and parts X—C are being brought out independently).

	Station/Out Posts	—	326
Table No. 65	Strength of Police force during 1961-70	—	327
Table No. 69	Local bodies and organs of democratic decentralisation	—	328
Table No. 73	Receipt and expenditure of Gram Panchayats	—	330-33

PREFACE

It is now the third decade of bringing out the District Census Handbooks which contain valuable statistics in respect of each district of the State. There have been a slight deviation and improvement in the pattern of Handbooks since 1951 when this publication was brought out as a pioneering effort. Since then a number of attempts have been made to bring improvements in its coverage so as to make it more useful to the data users. District Census Handbook of 1951 Census contained statistics upto tahsil/town level. In 1961 Census the coverage of the District Census Handbook was further enhanced so as to contain elaborate data down to the village level in rural areas and enumerator block in urban areas. In addition, an attempt was also made to incorporate the maximum available non-census data also. The census data used to be readily available in this organisation for incorporation in the Handbook, while the collection of non-census data from the various departments of the State Government is a time consuming process. This resulted into inordinate delay in bringing out the District Census Handbooks within the reasonable time lag. The 1961 experience made us wiser and keeping in view the immense demand for this publication, it was decided at 1971 Census publication programme to bring out these District Census Handbooks in two volumes covering Parts A & B and Part C. Parts A &B contain Town and Village Directory and Primary Census Abstract which have been brought out since long to make available the data to the various agencies and the present volume which has been spelled as Part C contains important departmental statistics and full count census tables. These tables pertain to the district regarding area, houses and population, economic tables, social and cultural tables, migration tables and tables on religions, languages etc., and data generated on the computer for each district/tahsil/sub-tahsil with regard to the amenities available in the village.

I do confess that this publication has been considerably delayed but it was beyond my means because of the non-availability of the data. I am grateful to the various departments of the State Government for supplying the detailed information which has been incorporated in this publication.

I owe my sincere gratitude to Shri A. Chandra Sekhar, the then Registrar General, India and his successors Sarvshri R. B. Chari and P. Padmanatha for their valuable guidance and help which I received promptly whenever I needed it. Dr. B.K.Roy Burman, the then Deputy Registrar General (Social Studies) had provided elaborate instructions and valuable suggestions from time to time all these topics especially the testing of hypothesis which was originally intended to be tested could not be done in order to avoid further delay. I am grateful to him as well. I shall be failing in my duty if I do not mention Shri S. K. Agarwal my predecessor who initiated the work and finalised the report.

My thanks are due to Sarvshri C.D. Bhatt and S.L. Bahl, Assistant Directors under whose supervision the work was completed.

Sarvshri C. L. Sharma, Investigator; P. K. Abrol and P. C. Naini Statistical Assistants have worked with a dedicated spirit and deserve my appreciations. I am also grateful to Shri K. C. Rajput, Controller of Printing & Stationery, Himachal Pradesh who got this publication printed nicely.

I will consider my task accomplished if the readers are benefitted by this book and it is my earnest hope that this publication like other census publications will be of valuable help to the census data users.

K. C. SURI
Deputy Director of Census Operations,
Himachal Pradesh.

SIMLA
Dated 24th May, 1979.

INTRODUCTION

District Census Handbook is an innovation of the 1951 Census. Prior to 1951 Census publications and reports contained data upto Tahsil Sub-Tahsil, Town and District level. Micro level data i.e. statistical data for smaller territorial units-villages in rural areas and enumerator's blocks in urban areas were not published in any Census report. With the rapid development and socio-eccnomic changes in the society necessity of data at micro level was felt considerably by the Government, Economists, Scholars and various data using agencies. With a view to make available these statistics at micro level, selected Census data was given in the District Census Handbook of 1951 Census and as such these Handbooks contained important Census data as well as general information relating to history, physical aspects, geology, archaeology, climate, rainfall, administration, medical and public health, education and literacy, agriculture and co-operation, industries, local bodies and places of interest etc. relating to a particular district.

The District Census Handbooks for 1961 Census underwent complete transformation and attempts were made to make them more comprehensive and informative. Each District Census Handbook in 1961 Census comprised of four parts, as discussed below :

Part I : This Part comprised mainly of write up supported by tables on all the important topics such as physical aspects, population, the people, district administration, education and public health, agriculture, fisheries, animal husbandry, panchayats, local bodies, co-operative, banking, industry, employment, service, communications and road development, land revenue and land tenure, price trends and community development, flora and fauna etc.

Part II : All the Census Tables pertaining to a district were incorporated in this section.

Part III : This part of the Handbooks contained the administrative statistics on agriculture, administration, medical and public health, local bodies, trasport and communications, livestock, forests and other government departments.

Part IV : Village Directory which rendered an account of each village and Town in the district was given in this part of the Handbook. The Census information in this part was given under 36 columns. In addition the information with regard to the level of development and amenities available in each village was also incorporated.

At 1971 Census, efforts have been made to make available both census as well as non-census data in a uniform manner under an enlarged perspective. The District Census Handbook of 1971 Census has been split into three parts and is being brought out in two indepdent volumes with a view to make census and non-census statistics available to the data users, as early as possible.

Just after census intake there is always increasing demand for census data by the administrators, planners, scholars and other agencies and as such the utility of the District Census Handbook giving data upto village level for rural areas and enumerator's block in urban areas becomes all the more significant. It was with this end in view that for the 1971 census, priorities have been fixed for publication of different sets of information in separate volumes. This would, beyond doubt, result in reduction of time-lag that usually occurs in making the information available to government and other data users. In order to avoid delay at various stages it was decided to bring out District Census Handbooks for 1971 Census into three parts X-A, X-B and X-C for Himachal Pradesh. Parts X-A and X-B have been combined and printed and Part X-C the present volume is being brought out independently. The details of the contents of each of the parts are as follow:-

Part A-Town Directory And Village Directory :

Data relating to important characteristics alongwith other information for each town in a district

have been compiled in the form of seven statements. The first six statments contain non-census statistics on a variety of subjects like status, growth history and functional category of towns; physical aspects and location of towns; municipal finance; civic and other amenities; medical, educational, recreational and cultural facilities in towns; trade commerce, industry and banking. The seventh statement contains census data on religion in respect of each town.

The Village Directory, another section of part A, gives particulars of amenities available in each census village relating to availability of educational and medical institution, power supply, drinking water, communications, particular of staple food, land use patterns, weekly markets and places of religious, historical or archaeological interest in the village. The distance of each village from the nearest town also form a part of Village Directory.

Part B–Villagewise and Townwise Primary Census Abstract :

Part B of the District Census Handbook contains primary census data for each census village in rural areas and block/ward in urban areas. This micro type data pertain to area, occupied, residential houses, number of households, totalpopulation and its sexwise breakup, sexwise population of Scheduled Castes and Scheduled Tribes, sexwise literate and educated person and working and non-working population. The workers have further been classified into nine broad industrial categories i e. (a) cultivators, (b) agricultural labourer, (c) livestock, forestry, fishing, hunting and plantations, orchards and allied activities; (d) mining and quarrying (e) manufacturing, processing, servicing and repairs with two sub categories as (i) household industry and (ii) other than houshold industry, (f) construction, (g) trade and commerce, (h) transport, storage and communications and (i) other services and the non-working population with sexwise breakup has also been presented in this volume.

Part C-Administrative Statistics and Report :-

Part C of the District Census Handbook is an important step in the direction of dissemination of useful socio-economic information about each district. As mentioned in the preceding paragraphs, there has been a general demand from the administrators, public and research workers for authentic information on various aspects of the district. Keeping in view this growing demand from various quarters the Census Organisation initiated to compile this part of the publication giving comprehensive and detailed information relating to economic and social aspects of the people of the district.

In this section of the Handbook attempts have been made to include administrative statistics pertaining to the district in various fields of development. The general population tables pertaining to the district with regard to area, houses and population; decadal variation in population; classification of villages by population size; towns and urban agglomerations classified by population and its variation since 1901 form an important part of this publication.

Economic Tables under prescribed headings such as workers and non-workers according to main activity classified by sex and age-groups; workers and non-workers in urban areas according, to main activity classified by sex and age-groups; classification of workers and non-workers according to main activity by educational levels in urban areas; industrial classification of persons at work other than cultivation as main activity by sex and industrial categories; industrial clasification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service as main activity; occupational classification of persons at work according to main activity other than cultivation classified by sex, age-groups and educational levels in the urban and rural areas separately; Secondary work i e. persons having main activity (i) cultivators (ii) agricultural labourers (iii) household industry (iv) non- household industry, trade, business or service and (v) non-workers classified by sex and by secondary work; non-working population according to main activity cross-classified by sex, age-groups and type of activity have been given in this report.

Social and cultural tables representing composition of households by relationship to head of household; age, sex and education; speakers of different languages; religion and classification of scheduled castes and scheduled tribes by literacy and industrial category of workers and non-workers according to main

activity have also been incorporated in this publication.

Migration tables also find place in this publication and covers population classified by their place of birth; migrant workers and non-workers according to main activity classified by place of last residence and migrants classified by place of last residence, age-group, duration of residence and marital status.

Establishment and housing tables have also been included in this publication. These tables contain information about distribution of establishments by broad types, distribution of manufacturing, processing or servicing establishments other than household industry classified by registered factories, unregistered workshops and size of employment, distribution of manufacturing, processing or servicing establishments other than household industries classified by industry, fuel power or manual used and size of employment; distribution of household industry establishments classified by industry, fuel/power used and size of employment; distribution of trade/commercial establishments classified by the type of business or trade and size of employment, distribution of establishments (other than manufacturing, processing or servicing or business and trade establishments) by size of employment census houses and the uses to which they are put, distribution of census houses by predominant material of roof and wall; households classified by number of members and rooms occupied.

Special tables on Scheduled Castes and Scheduld Tribes are also included in this publication. These tables give the industrial classification of persons at work and non-workers by sex for rural and urban areas separately; age and marital status, education in urban and rural areas and persons not at work classified by sex, type of activity and educational levels of Scheduled Castes and Scheduled Tribes separately.

CONCEPTS AND DEFINITIONS

In all the Censuses throughout the world the dichotomy of rural and urban areas is recognised and the data are generally presented for rural and urban areas separately. So it would be better to know the census concept of villages and towns as adopted for the 1971 Census in Himachal Pradesh.

(i) *Concept of Census Village* :

In 1961 Census, a Census village was the same as a Revenue village. After reorganisation of states of Punjab, Haryana and Himachal Pradesh and Union Territory of Chandigarh on 1st November, 1956, some areas were transferred from the composite state of Punjab to Himachal Pradesh. Whereas in some of these newly merged districts/tahsils etc. the revenue village was comparable in population size and area to the revenue villages of the old districts yet in most of the cases the average revenue village was much bigger in area and population than its counterpart in the old districts. The difference was so marked that it rendered comparison of the villagewise statistics an exercise in futility. Therefore smaller rural units were considered as Census unit in most of the newly merged areas of Himachal Pradesh. It may be relevant to detail here areawise, the names of the smallest Census Rural Units considered as Census Villages in Himachal Pradesh. This information is as under

Nane of smallest Census Rural Unit considered as Census village	Areas where considered
1	2
1. Revenue Village	(i) In the Districts of Chamba, Mandi, Bilaspur, Mahasu, Sirmaur, Kinnaur and Simla
	(ii) Una Tahsil and Amb Sub-Tahsil of Kangra District.
2. "Tikka," having a distinct Sub-hadbast number.	Kangra District excepting Una Tahsil and Amb Sub-Tahsil,
3. "Phatti," having a distinct sub-hadbast number	Kulu District.
4. Village Hamlet (with/without distinct sub-hadbast number)	Lahul & Spiti District,

(ii) *Census Defination of Town* ; The standards laid down for considering a place as an urban area were broadly the same as in 1951 Census. The criteria adopted for determining an area as urban areas in 1971 Census was as follows :

"To qualify for recognition as an urban area a place should first be either a Municipal Corporation Area or a Municipal Area or under a Town Committee or a Notified Area Committee or a Cantonment Board. If it did not have any of these urban local bodies to administer the affairs then the following empirical tests should be applied:

(i) A minimum population of 5,000 (Estimated for 1971)

(ii) A density of not less than 400 per Sq. Km. (1,000 per Sq. Mile)

(iii) 3/4th of the occupations of the male working population should be outside agriculture and,

(iv) the place should have, according to the Director of Census Operations, of the state, a few pronounced urban characteristics and amenities".

Thus, all the places having an urban local body such as Municipal Corporation or a Municipal Committee or a Notified Area Committee or a Cantonment Board were obviously treated as towns in this district. No place which did not have a statutory urban local body was treated as an urban area in Chamba district.

An important feature of 1971 Census is the concept of URBAN AGGLOMERATION which was adopted as a substitute for the concept of 'town group' of 1961. An Urban Agglomeration may be made up of more than one statutory town adjoining one another such as a Municipality and the adjoining Cantonment and other adjoining urban outgrowths. In other words an Urban Agglomeration should form a continuous spread comprising of a town and its adjoining urban outgrowths, or two or more contiguous towns, having common boundary together with contiguous urban spills, if any of such towns. However the area consisting an Urban Agglomeration may keep on changing from Census to Census depending upon the changing statutory jurisdictions of the main urban units as well as of other urban outgrowths.

The only Urban Agglomeration in the State, which incidentally falls in Chamba district, is the Dalhousie Urban Agglomeration consisting of Dalhousie and its adjoining town of Dalhousie Cantonment. No other area was considered fit to be included in this Urban Agglomeration as urban outgrowths

The following extracts from the manual of instructions to enumerators and other relevant records on the basis of which these tables are compiled will be useful for proper understanding and appreciation of the data contained in this publication.

CENSUS HOUSE :

A Census House is a building or a part of a building inhabited or vacant and having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be used for residential or non-residential purpose or both. If a building has a number of flats or blocks which are independent of one another having separate entrance of their own from the road or a common staircase or a common courtyard leading to a main gate, they are considered as separate Census Houses. If within a large enclosed area there are separate buildings then each such building is also considered as a separate House. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance is treated as separate Census House.

CENSUS HOUSEHOLD :

A Household is a group of persons who commonly live together and would take their meals from a common kitchen unless exigencies of work prevented any of them from doing so. A Household may be made up of related or unrelated persons

HEAD OF HOUSEHOLD :

The Head of the Household for Census purposes is a person who is recognised as such in the household. He is generally the person who bears the chief responsibility for the maintenance of the household and takes decisions on behalf of the household. The Head of the household need not necessarily be the eldest male member, but may even be a female or a younger member of either sex.

In the case of institutional household like messes, boarding houses or friends living together, the Manager or Superintendent or the person who has administrative responsibility or who by common consent is regarded as the head should be recorded as the Head of the household.

HOUSELESS POPULATION :

Houseless population refers to that section of population which have no house to live in such as persons living on the road side, pavements or in open temple mandaps and the like.

INSTITUTIONAL POPULATION :

It refers to group unrelated persons living together in institutions such as boarding house, hostel, hotel, Chummery, jails and hospitals etc.

ESTABLISHMENT :

An Establishment is a place where goods are produced or manufactured not solely for domestic consumption or where servicing and/or repairing is done such as factory, workshop or household industry or servicing and/or repair workshop or a place where retail or wholesale business is carried on or commercial services are rendered or an office public or private or a place of entertainment or where educational, religious, social or entertainment services are rendered. It is necessary that in all these places one or more persons should be actually working. Thus an establishment will cover manufacturing, trade and other establishments where people work.

MOTHER TONGUE :

Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the persons home in childhood will be the mother tongue. In the case of infants and deaf mutes the language usually spoken by the mother was recorded as mother tongue.

MARITAL STATUS :

All persons were divided into four major categories of marital status namely (i) Never Married (ii) Currently Married (iii) Widowed (iv) Separated or Divorced.

A person who has never been married at any time before is considered as Never Married. A person currently married, whether for the first time or another time and whose marriage is subsisting at the time of enumeration with the spouse living is taken as Married. A widowed person whose husband or wife is dead and who has not been married again is considered as Widow. A person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been divorced either by a decree of a law court or by an accepted social or religious custom but who has not remarried is taken as Separated.

LITERATE AND EDUCATED PERSONS :

A person who can both read and write with understanding in any language is considered as literate. A person who can merely read but cannot write is not taken as literate. It is not, however, necessary that a person who is literate should have received any formal education or should have had passed any minimum educational standard.

MAIN ACTIVITY :

Every person was asked what his main activity that is how he engages himself mostly. All persons were divided into two broad streams of main activity namely (i) as worker and (ii) as non-worker, as discussed below :

Workers :- In 1971 Census a person whose main activity was participation in any economically productive work by his physical or mental activity was treated as worker. Main activity is the one in which one engages oneself mostly. Work involves not only actual work but effective supervision and direction of work. The reference period was one week prior to the date of enumeration, in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and that work was returned as his main activity the person was categorised accordingly. Further the main activity in case of seasonal work such as Cultivation, Livestock keeping etc.' was ascertained with reference to such work in the preceding one year. Total population having been divided into the two groups of "Workers" and "Non-Workers" the workers have further been classified by 9 broad categories according to their main activities. The 9 categories are briefly described hereunder:--

I. Cultivator:-- For the purposes of the Census a person was considered as a Cultivator if he or she was engaged in cultivation by himself/herself or by supervision or direction in his or her capacity as the owner or lessee of land held from Government or as a tenant of land held from private persons or institutions for payment of money, kind or share. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra ragi, etc., pulses, rawquite and kindred, fibre crop cotton etc., and other crop such as sugarcane, groundnuts, Tapioca etc. and does not include fruit growing, vegetable growing or keeping orchards or groves or

working of plantation like tea, coffee, rubber, cinchona and other medicinal plants.

II Agricultural Labourer :-

A person who worked in another person's land for wages in money, kind or share was regarded as an Agricultural labourer. Such as a person has no risk in the cultivation but he merely works in another persons land for wages.

The labourer could have no right of lease or contract on land on which he works.

III. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities :—Those engaged in Livestock production Agricultural services, Hunting, Trapping and Game propagation, Forestry and Logging, Fishing, Plantations, Orchards etc., are included in this category.

IV. Mining and Quarrying :—This category includes all those who are working in only Mining or Quarrying activities.

V. Manufacturing, Processing, Servicing and Repairs :—This category has two sub-categories as below :—

(a) Household Industry :—A household industry is defined as an industry conducted by the Head of the Household himself/herself and/or mainly by the members of the household at home or within the village n rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory, Further, according to the census concept a Household Industry relates to production, processing, servicing, repairing or making and selling of goods.

(b) Other than Household Industry : This sub-category includes manufacturing, processing, servicing and repairs, other than Household industry as described above.

VI. Construction : Those engaged in any type of construction and allied activities are included in this category.

VII. Trade and Commerce : This category includes ll those persons who are engaged in wholesale or retail rade in any goods. Those working in Restaurants and Hotels, Banking, Financing, Insurance, Real Estate and Business services are also classified under this category.

VIII. Transport, Storages, and Communications :— This category includes Land, Water and Air Transport. All activities connected with storage and ware-housing and Communications like Postal, Telegraphy and Telephone etc., are also included in this category.

IX. Other Services :—Those engaged in community, social and personal services, including public administration, medical and health services, recreational and cultural services, community services are included in this category. Persons who happen not to adequately described their activities or those whose services are not classified elsewhere also form part of this category of workers.

X Non-Worker :

This group consists of those persons whose main activity is returned as one of the following :

(i) Household duties.

(ii) Students.

(iii) Retired persons or rentiers.

(iv) Dependents.

(v) Beggers etc.

(vi) Institutions-inmates of,

(vii) Other Non-Workers (those seeking work).

SECONDARY WORK :

Details of secondary work were recorded for all workers as also for the non-workers. This will cover cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically performing household duties or student etc.' for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation or in household industry or in looking after the cattle, in attending to family business etc., but not to the extent as a full time worker. Such participation will be considered as secondary work of these persons. Mere rendering of service for ones own home or production of goods, for purely domestic consumption are not to be treated as economic activity. Participation in work that goes to augment the income of the household will only be treated as economic activity. A person whose main activity is shown as, say' a clerk in a Government Office or a teacher, also

attends to cultivation by his direct supervision or undertakes some tution work, this will be shown as his/her secondary work. A person's main activity may be cultivation and his subsidiary activity as money lending. Again main activity may be agricultural labourer and subsidiary work factory labourer and so on and so forth.

CLASS OF WORKER :

Employer: An Employer is a person who has to employ other persons in order to perform the work entered in question 16 (e) (Description of work) of individual slip. That is to say such a person is not only responsible for his own personal work but also for giving work to others in business mentioned in question 16 (e). But a person who employs domestic servants for household duties or has subordinates under him/her in an office where he/she is employed by others, is not an employer, even if he she has the power to employ another person in his/her office on behalf of his/her own employer or employers.

Employee: An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons, who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

Single Worker :

A Single Worker refers to a person who works by him self/herself. He/She is not employed by any one else and in his/her turn does not employ any body else, not even members of his/her household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of a producers co-operative. Each one of the partners or members of such producers, co-operatives have been taken as 'Single' Worker.'

Family Worker :

A Family Worker is a person who works without receiving wages in cash or kind in an industry, business, trade or service. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage: The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the household or other relative.

Member of the house hold who help solely in household duties should not be treated as family workers.

SCHEDULED CASTES AND SCHEDULED TRIBES.

Scheduled Castes belong only to the Hindu or Sikh religions whereas Scheduled Tribes may belong to any religion.

The Castes and Tribes listed as Scheduled Castes/ Scheduled Tribes in Himachal Pradesh under the Government of India, Ministry of Home Affairs, Scheduled Castes and Schelduled Tribes list Modification Order, 1956, constitute the Scheduled population in Census. It may be of interest to note here that, infact, two different lists were utilised in the different areas of Himachal Pradesh. Such a course was necessitated in view of the merger of certain areas from the erstwhile State of Punjab in Himachal Pradesh on Ist November, 1966, when the three States of Punjab, Haryana, Himachal Pradesh and Union Territory of Chandigarh were re-organised. The lists pertaining to Punjab were utilized in the newly merged areas where as the lists pertaining to Himachal Pradesh were utilised in the old areas of the State. These lists are given hereunder:

LIST-I

List of Schelduled Castes and Scheduled Tribes for the Disricts of Chamba (excluding the towns of Dalhousie M.C., Dalhousie C.B. and Bakloh C.B) Mandi, Bilaspur, Mahasu, Sirmaur and Kinnaur.

SCHEDULED CASTES

1. Ad-dharmi.
2. Badhi or Nagalu.
3. Bandhela.
4. Balmiki, Chura or Bhangi.
5. Bangali.
6. Banjara.
7. Bansi.
8. Barad.
9. Barar.
10. Batwal.
11. Bawaria.
12. Bazigar.
13. Bhanjra.
14. Chamar, Mochi, Ramdasi, Ravidasi, or Ramdasia.
15. Chanal.

16. Chhimbe.
17. Chuhre.
18. Dagi.
19. Daole.
20. Darai or Daryai.
21. Daule.
22. Dhaki or Toori.
23. Dhaogri or Dhuai.
24. Doom or Doomna.
25. Dumne.
26. Hali.
27. Hesi.
28. Jogi.
29. Julahe.
30. Kabirpanthi, Julaha or Keer.
31. Kamoh or Dagoli.
32. Karoack.
33. Khatik.
34. Koli.
35. Lohar.
36. Mazhabi.
37. Megh.
38. Nat.
39. Od.
40. Pasi.
41. Phrera.
42. Rehar.
43. Rehara.
44. Sansi.
45. Sapela.
46. Sarde, Sarare or Siryare.
47. Sarehde.
48. Sikligar.
49. Sipi.
50. Sirkiband.
51. Teli.
52. Thathiar or Thathera.

SCHEDULED TRIBES

1. Gaddi.
2. Gujjar.
3. Jad, Lamba, Khampa and Bhot or Bodh.
4. Kanaura or Kinnara.
5. Lahaula.
6. Pangwala.

LIST-2

List of Scheduled Castes for the Districts of (1) Kangra (2) Kulu (3) Lahul & Spiti and (4) Simla and (5) Towns of Dalhousie (M. C.) Dalhousie C. B) and Bakloh (C.B.) of Chamba District.

SCHEDULED CASTES

1. Ad Dharmi.
2. Balmiki, Chura or Bhangi.
3. Bangali.
4. Barar, Burar or Berar.
5. Batwal.
6. Bauria or Bawaria.
7. Bazigar.
8. Bhanjra.
9. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi.
10. Chanal.
11. Dagi.
12. Dhanak.
13. Dumne, Mahasha or Doom.
14. Gagra.
15. Gandhila or Gandil Gondola.
16. Kabirpanthi or Julaha.
17. Khatik.
18. Kori or Koli.
19. Marija or Marecha.
20. Mazhabi.
21. Megh,
22. Nat.
23. Od.
24. Pasi.
25. Perna.
26. Pherera.
27. Sanhai.
28. Sanhal.
29. Sansi, Bhedkut or Manesh.
30. Sapela.
31. Sarera.
32. Sikligar.
33. Sirkiband.
34. Darain.
35. Dhogri, Dhangri or Siggi.
36. Sansoi.

List of Scheduled Tribes for Lahul and Spithi District only.

1. Bhot or Bodh.
2. Gaddi and
3. Swangla.

Note :—There are no Scheduled Tribes in Kangra District Kulu District, Simla District and Towns of Dalhousie (M. C.), Dalhousie (C. B.) and Bakloh (C. B) of Chamba District.

Computerised tables based on villagewise data given in village Directory and Primary Census Abstract of District Census Handbook Parts XA & B have also been included in this part. These tables are helpful to test certain hypothesis on the oasis of data given therein.

Departmental statistics have been presented in 26 tables. The data have been collected from the concerned departments such as Local Self Government Observatories (Climatology and Geophysic, Poona), Land Records, Transport, Economics & Statistics, Panchayats, Education, Animal Husbandry, Forests, banks Co-operative, Police, High Court, and Revenue of the State and Central Government and Statutory Corporations.

The present volume relates to District Chamba of Himachal Pradesh. Efforts have been made to collect and compile administrative data made available by various State Government. Offices and this information has been incorporated in this colume to enable the readers to find relevant statistics pertaining to the District at one place. It is left to the readers who are the best judges to know how far it serves them.

A GLIMPSE INTO THE DISTRICT

Chamba district lies in the North-west corner of Himachal Pradesh. It is surrounded by Jammu & Kashmir on the North-west, Bara Bhangal and Lahul areas of the State on the North-east, Kangra district of Himachal Pradesh and Gurdaspur district of Punjab on the South-east and South It is more or less oblong in shape contracted towards North. It is wholly mountaineous with altitude ranging from 610 metres to 6,401 metres. The abruptness of the slopes and the narrowness of the ravines are characteric features of the topography of the district The district has habitation upto the altitude of 3,048 metres. A variety of climate is found in the district from semi-tropical to the semi-arctic. In the lower parts of Bhattiyat tahsil, the climate conditions are similar to those of Kangra and Shivalik areas. The temperature begins to increase rapidly after the middle of April and continues till the start of rainy season in July. May and June are the pleasant months for the tourists. The rainy season is heavy and prolonged one. The monsoon starts between middle of June or first week of July and lasts till about the middle of September. The district remains in the grip of severe cold till about the end of February except the higher reaches where the winter lingers on till the end of March. The annual rainfall during the decade under report (1961-1970) for the district as a whole varies between 822.6 mm. to 1618.0 mm. Almost half of the rainfall is recorded during monsoon months while the winter rains account for only about 1/3rd of the total rainfall. The regions of higher altitude experience heavy snow-fall during winter.

As compared to 1961 Census figures the jurisdictions of the district had undergone change on the reorganisation of Punjab on the linguistic pattern on the Ist November, 1966, as a result 14.3 Sq. Kms. of area comprising of Dalhousie, M.C.; Dalhousie Cantonment Board and Bakloh Cantonment Board became part of the district.

The district now constitutes of four tahsils and one sub-tahsil and has in all 1,696 villages (including 570 uninhabited villages), two towns and one urban agglomeration comprising of two towns. According to Surveyor General of India, the geographical area of the district come to 8,195 Sq. Kms. A population of 255,233 persons (131, 232 males and 123,910 females) was returned in the district at the 1971 Census as against 219, 158, in 1961. The density of population works out to be 31 persons per square kilometre as against the corresponding figure of 62 for the State. As per 1971 Census 28 percent of total inhabitants of Chamba district are Scheduled Tribes mainly comprising of Gaddis, Pangwalas and Gujjars. These have largest concentration in Pangi tahsil and Brahmaur sub-tahsil where 91.07% and 73.19% respectively of the people are Scheduled Tribes. The percentage of Scheduled Caste population in the district is 14.99 which is almost in proportion to the percentage of the Scheduled Caste population of the country (14.60). Hindus constitute 92.90 percent of the total population of the district and the remaining 7.10 percent are Muslims, Sikhs, Buddhists and Christians. In the absence of any industries in the district and being hilly area like the State the population (92.62%) has been mainly reported from the rural areas. The sex ratio for the district has been returned at 944 females per thousand males. The workers constitute 40.32 percent of the total population of the district as against the corresponding State proportion of 36.95 percent.

The bulk of the population of the district is dependent mainly on agriculture. The soil is generally loamy in texture with a little more percentage of clay on the high tops as well as at lower elevations in the valleys of Bhattiyat and Chamba tahsils. At higher elevations the soil is low at mid elevations and minimum in the low lying valleys. Out of total holdings numbering 48,655, holdings below one hectare are 29,012 or 60% of the total holdings. Thus the size of the holdings is small and due to hilly terrain these are in terraces and scattered which make the

consolidation of holdings work most difficult. Only 4.47% of the total geographical area of the district is under cultivation. Due to increased pressure of population on the land as well as reclamation the total cropped area has increased from 57,524 hectares in 1961-62 to 60,478 hectares in 1970-71. There is hardly any cash crop grown in the area hence wheat, maize, barley and rice account for more than 82% of the total gross area cropped in the district. Irrigation is available to a limited area. About 10 percent of the net area sown have irrigational facilities in the district. Kharif is the main crop of the district and its major crops are maize, potatos paddy and some area under pulses and millets. Wheat and barley are important crops of Rabi. In the absence of irrigational facilities, most of the area is single cropped. Due to the economic backwardness of the people coupled with hilly terrains and lack of transport facilities, the agriculture operations are still being carried out on most primitive basis. In the last two decades concerted efforts have been made by the State Government to introduce the improved agricultural practices on large scale through the extension service and making easy availability of the inputs. Horticultural development could not make much headway in the district bacause of lack of means of communications. With the construction of roads in the interior of the district, sufficient area has been brought under orchards during the last two decades. This change in the land utilization pattern has changed the economy of the area.

The development of animal husbandry is of added importance in the predominantly agricultural based economy. The animal power not only provide nutritious diet to the people but also cattle for ploughing, compost for the fields and fuel for the hearths. In other words agriculture and animal husbandry are so interlinked that the improvement in one field will result into some improvement in the other. Under the various plan programmes, steps were taken to improve the bread of cattle and sheep by providing facilities of hospitals and dispensaries and starting of cattle farms. The poultry rearing was also encouraged by advancing suitable loans and providing exotic birds to the interested persons. As a result of these development activities, 11 veterinary hospitals, 41 dispensaries, 11 artificial insemination centres and 4 sub-centres in addition to the various poultry farms were functioning in the district at the end of 1970-71.

The district is rich in forest resources and according to Forest Departmant 4,154 Square Kms. or 51 per cent of the total area of the district fell under the category of forests during 1970-71. The forests lie in the Shivalik and Himalayas at the height varying between 1,067 to 3,658 metres. The composition and kind of the species varies considerably with altitudes. The district is known for its medicinal herbs which are commonly used in ayurvedic and other unani medicines. With the rapid construction of roads efforts have been made to exploit the forest resources on more scientific basis which had resulted into manifold increase in the income of the State from this source.

Much progress could not be made in respect of the setting up of industries although the district is rich in forest wealth and mineral resources and can provide adequate raw material for the setting up of forest and mineral based industries. However, handloom weaving, wood working, carpentry, pottery, spinning, leather works and handicarfts are some of the important cottage and small scale industries being carried out in the district In the recent years, the Himachal Pradesh State Small Industries and Export Corporation has been running the various institutions for the promotion of various industries in the district.

Due to its natural scenery and snow-covered peaks and with the availability of more road transport facilities the district provides ample scope for the development of tourism. Chamba and Dalhousie are the beautiful tourist resorts in the district. Besides these Khajiar Lake, Lama Dal Lake, Trilokinath Temple, Manimahesh also attract thousands of tourists and pilgrims by virtue of their scenic beauty, scientific study and religious background. In order to promote this industry in the district, the Govt. has taken adequate steps by setting up information centres, providing cheap and good accomodation and cafeteria facilities to the tourists.

In the present era of modern technology life can hardly be imagined without the facility of electricity

made available to the people. Electricity not only provide minimum facility to the people but is also an important factor in promoting the industrial activivities of the area. At the time of merger of Chamba State with Himachal Pradesh in 1948 there was hardly any electricity facility worth the name available in the district. Due emphasis was laid by the State Government by providing electricity facilities in the district. During the decade (1961-71) 147 villages were electrified thus bringing the cumulative total to 214 villages in the district at the end of 1970-71.

With a view to provide the medical facilities to the people, 4 civil hospitals, 8 primary health centres, 42 civil dispensaries, 6 maternity and child welfare centres and 32 special institutions (Leprosy clinic, V.D. clinic, T.B. clinic, family planning centres) were functioning in the district at the end of the period under decade.

Eversince the beginning of the era of planning, the district has recorded the tremendous growth of educational institutions. At the end of the year 1971, 427 Primary, 60 Middle, 17 High and Higher Secondary Schools, 1 Degree College in addition to the Industrial Training Institute were functioning in the district. As a result of the spread of education the literacy rate has increased from 11.2 in 1961 to 18.9 in 1971.

In the absence of rail transport the economy of the district is entirely dependent upon the availability of road facilities in the district. Under the various Five Year Plan programmes of the State the highest priority had been given for the construction and improvement of roads facilities both in the State as well as in the district.

SECTION I

CENSUS TABLES

(Based on Full Count)

FLY-LEAF–CENSUS TABLES

1971 Census which was the eleventh decennial Census of India marked the centenary of this gigantic operation which began in 1872. Originally the reference date fixed for the 1971 Census was Ist March, 1971 but later on in order to avoid a clash between the Census programme and the mid-term elections to the Lok Sabha, this had to be postponed and was fixed on sunrise of Ist April, 1971. The enumeration started from 10th March, 1971 and continued till 31st March, 1971 in the synchronous areas. In the snow bound areas of Himachal Pradesh, the census count was taken from 1st September, 1970 to 30th September, 1970. For the conduct of 1971 Census, in all 2,444 census villages spread over in 7 out of the total 10 districts of Himachal Pradesh were treated as non-synchronous (snow bound areas). It is worth mentioning here that Kinnaur and Lahul & Spiti districts and Pangi tahsil and Brahmaur sub-tahsil of chamba district were completely treated as non-synchronous.

Keeping in view the demand of various data users and experts this organisation decided to compile plethora of tables under various headings such as general population, economic, social and cultural, migration, establishment, fertility, housing and special tables for degree holders and technical personnel. In addition it was also decided to reproduce following census tables based on full count in the present publication. These tables are as follows:

A GENERAL POPULATION TABLES

Table A-I	Area, Houses and Population
Appendix I to Table A-I	Statement showing 1961 Territorial Units constituting the present set up of Chamba district
Appendix II to Table A-I	Number of villages with a population of 5,000 and over and towns with a population under 5,000.
Appendix III to Table A-I	Houseless and Institutional population
Table A-II	Decadal variation in population since 1901
Appendix to Table A-II	Districts showing 1961 population according to its territorial jurisdiction in 1961, change in area and the population of 1961 adjusted to jurisdiction of 1971.
Table A-III	Villages classified by population
Appendix to Table A-III	Villages classified by population. Summary
Table A-IV	Towns and Urban Agglomerations classified by population in 1971 with variation since 1901.
Appendix II to Table A-I	Changes in area and population of towns between 1961 and 1971 and reasons for change in area

3- ECONOMIC TABLES

Table B-I Part A	Workers and Non-workers according to main activity classified by sex and age-groups
Table B-II	Workers and Non-workers in urban arees according to main activity classified by sex and age-groups.
Table B-III Part A	Classification of Workers and Non-workers according to main activity by educational levels in urban areas
Table B-IV Part A	Industrial classification of persons at work other than at cultivation as main activity by sex and division, major groups and minor groups

Appendix to Table B-IV Part A	Distribution of workers in manufacturing, processingn servicing nd repairs by household industry and on-household industry
Table B-IV Part D	Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service as main activity
Table B-VI Part A (I)	Occupational classification of persons at work according to main activity other than cultivation classified by sex and age-groups in urban areas.
Table B-VI Part A (II)	Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in urban areas
Table B-VI Part B (I)	Occupational classification of persons at work according to main activity other than cultivation by sex and age-groups in rural areas
Table B-VI Part B (II)	Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in rural areas
Table B-VII	Secondary work i.e. persons having main activity (i) Cultivators (ii) Agricultural Labourers (iii) Household Industry (iv) Non-Household Industry Trade, Business or Service (v) Non-workers classified by sex and by secondary work (i) Cultivator (ii) Agricultural Labourer (iii) Household Industry, (iv) Non-Household Industry, Trade, Business or Service
Table B-VIII	Persons classified as Non-workers according to main activity cross classified by sex, age-groups and type of activity
(C—Social and Cultural Tables)	
Table C-I Part A	Members of households by relationship to head of household classified by age-groups
Table C-III Part A	Age, sex and education in all areas
Table C-III Part B	Age, sex and education in urban areas only
Table C-V Part A (I)	Distribution of languages (inclusive of mother-tongues grouped under each) specified in Schedule VIII to the Constitution of India
Table C-V Part A (II)	Distribution of languages (inclusive of mother-tongues grouped under each) specified in Schedule VIII to the Constitution of India for districts, tahsils, sub-tahsil and towns
Table C-V Part B (I)	Speakers of languages/mother tongues (inclusive of mother tongues where grouped) other than those specified in Schedule VIII to the Constitution of India for Chamba district

Table C-V Part B (II)	Speakers of languages/mother tongues (inclusive of mother tongues where grouped) other th n those specified in Schedule VIII to the Constitution of India for district/tahsils/sub-tahsil and towns.
Table C-VI	Religion.
Table C-VIII Part A	Classifiication by literacy and industrial category of Workers and Non-workers according to main activity among Scheduled Castes
Table C-VIII Part B	Classification by literacy and industrial category of Workers and Non-workers according to main activity among Scheduled Tribes.

D-Migration Table

Table D-I	Population classified by place of brith.
Appendix Table D-I	Persons born in other districts of the State and enumerated in Chamba district
Appendix II to Table D-I	Persons born in this district but enumerated in other districts of the State.
Table D-V	Migrant Workers and Non-workers according to main activities classified by place of last residence (Total).
	Migrant Workers and Non-workers according to main activities classified by place of last residence (Urban).
Table D-VI	Migrants classified by place of last residence, age-group, duration of residence and marital status.

E-Establishment Tables

Table E-I	Distribution of establishments by broad types
Table E-II Part A	Distribution of manufacturing, processing or servicing establishments other than household industries classified by registered factories, un-registered workshops and size of employment.
Table E-II Part B	Distribution of manufacturing, processing or service ing establishments other than household industries classified by industry, fuel/power or manual used and size of employment.
Table E-II Part C	Distribution of household industry establishments classified by industry, fuel/power used and size of employment.
Table E-III	Distribution of trade/commerce establishments classified by the type of business or trade and size of employment.

Table E-IV	Distribution of establishments (other than manufacturing, processing or servicing or busines and trade establishments) by size of emyloyment

H-Housing Tables

Table H-I	Census houses and the uses to which they are put
Table H-II	Distribution of Census Houses by predominant material of wall and predominant material of roof
Table H-III	Households classified by number of members and by number of rooms occupied

Special Tables on Scheduled Castes and Scheduled Tribes

Table SC-I Part A	Industrial classification of persons at work and non-workers by sex for Scheduled Castes (Rural)
Table SC-I Part B	Industrial classification of persons at work and non-workers by sex for Scheduled Castes (Urban)
Tables SC-II	Age and Marital Status for Scheduled Castes
Table SC-III Part A	Education in urban areas only for Scheduled Castes
Table SC-III Part B	Education in Rural areas only for Scheduled Castes
Table SC-IV	Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes
Table ST-I Part A	Industrial classification of persons at work and non-workers by sex for Scheduled Tribes
Table ST-I Part B	Industrial classification of persons at work and non-workers by sex for Scheduled Tribes
Table ST-II	Age and Marital Status for Scheduled Tribes
Table ST-III Part A	Education in urban areas only for Scheduled Tribes
Table ST-III Part	Education in rural areas only for Scheduled Tribes
Table ST-IV	Persons not at work classified by sex, type of activity and educational levels for Scheduled Tribes
Table ST-V	Religion for Scheduled Tribes

	U	...	...	...	...	...	...	...	...	...	...

Note :—(i) The density figures per Km. (2) shown under Col. 4 for 'Urban' areas of district/tahsil/Sub-tahsil are worked out using the area figures corrected upto two places of decimals obtained by adding the area of individual towns in the respective units and not using the area figures given in the table. For 'Total' and 'Rural' the density is worked out on area figures corrected upto one place of decimal.

(ii) Area figures shown under Col. 3 against 'Total' of district represent provisional 'Geographical Area' supplied by the Surveyor General. Figures for urban areas are those supplied by the Local Bodies. Area figures for rural areas are derived by subtracting the urban area from the total area of the district. The total of the area figures of the tehsil/sub-tahsil will not tally with the district figures because the former represents 'Land Use Area' and are derived from the figures supplied by the Director of Land Records.

(iii) The following abbreviations have been used in this table to describe the civic status of the towns:

MC—Municipal Committee.

CB—Cantonment Board

A-1 AREA, HOUSES AND POPULATION

APPENDIX I

(Statement Showing 1961 Territorial Units consulting the present set up of Chamba District)

District/Tahsil/ Sub-Tahsil	1961 Territorial Unit	Area added		Name of State/ District/Tahsil/ Sub-Tahsil from which area is subtracted	Area which has been subtracted		Name of State/District/Tahsil/Sub-Tahsil/ to which area is added	Net Gain / Loss =(gain) +(loss) Km. 2
		Name	Area in Km.2		Name	Area in Km.2		
1	2	3	4	5	6	7	8	9
CHAMBA DISTRICT	Chamba District	Three towns viz. Dalhousie M.C., Dalhousie C.B., and Bakloh C.B.	14.3*	Gurdaspur District of Punjab State	...	...	...	...
Bhattiyat Tahsil	Bhattiyat Tahsil	Three towns viz. Dalhousie M.C., Dalhousie C.B, and Bakloh C.B.	14.3*	Pathankot Tahsil of Gurdaspur District	...	...	...	...

Note:

1. Territorial Unit-wise totals of area figures have not been given due to the reason that the figures have been collected from various sources.
2. *Area figures according to Local Bodies.
3. Only those units which have undergone jurisdictional charge during 1961-71 have been shown in this Appendix.

SECTION III
DEPARTMENTAL STATISTICS

FLY LEAF DEPARTMENTIAL STATISTICS

Since 1951 Census, it has been our endeavour to include departmental statistics in one form or the other pertaining to the each district in the respective District Census Handbook. No doubt, considerable efforts were made to procure the data for this purpose from various district offices/agencies. The departmental statistics included in the present series of Handbooks are more or less devised on the pattern of the District Census Handbooks of 1951 and 1961 Cesnuses so as to make data comparable. A few new tables, were added in each census and those of less utility were left off. In the present publication almost all the tables introduced in 1961 Census and, in addition, some useful data on land revenue/rent demand and collections; electricity and water supply; particulars of libraries and reading rooms; medical and paramedical staff; public health activities; family planning centres: horticulture; local bodies and organs of democratic decentralisation and their composition etc. have been included.

This part of the publication is a modest endeavour in the direction of presenting a bird's eye view of the socio-economic position obtaining in the district during the last decade (1961-70). As far as possible efforts have been made to incorporate the data down to the tahsil/sub-tahsil level to facilitate inter-regional comparisons within the district For this purpose we heavily leaned on old records. have files, notes and reference books and had also undertaken extensive touring in the district. The broad approach in the compilation of administrative statistics had remained the same as suggested by the office of the Registrar General, India. In few cases, the data had been collected with sligeht variation due to the peculiar conditions obtaining in the district.

Departmental statistics high-lighting all important physical, economic, civic and developmental aspects have been presented in 36 tables in respect of Chamba district. A broad outline of the contents of each table are given as under:

Table No. 2 : Incorporates monthwise average rainfall and rainy days recorded at the district, tahsil, sub-tahsil headquarters and other stations for the years 1961–70.

Table No. 9 : gives the bus routes and related statistics.

Table No. 10 : gives the directory of Circuit Houses-Inspection Bungalow/Travellers Bungalow/Tourist Home/Youth Hostel maintained by P.W.D., Ministry of Tourism and Civil Aviation, Local Bodies etc. The details of maintaining/reserving authority and distance from the nearest bus stop have also been shown in this table.

Table No. 12 : shows the net area irrigated by various sources of irrigation for the years 1961-70.

Table No. 14 : gives the cropwise breakup of irrigated area from 1961-70.

Table No. 16 : gives particulars of all banks and their branches located in Chamba district in the year 1970.

Table No. 21 : gives tahsil and sub-tahsilwise number of towns and villages having potable sources of water as in 1969-70.

Table No. 22 : shows tahsil and sub-tahsilwise number of towns/villages by sources of drinking water as in 1969-70.

Table No. 28 : gives particulars of Library and Reading Room facilities available in the district.

Table No. 31 : shows tahsil/sub-tahsil wise land utilisation statistics pertaining to the year 1969. This represent total geographical area, area covered by forests, cultivable land, culturable waste and the area not available for cultivation.

Table No. 32 : gives tahsil/sub-tahsil wise total area under cultivation classified into single and double cropped area for the years 1961-70.

Table No. 33 : gives tahsil/sub-tahsil wise area and out-turn of all major food and non-food crops for the years 1961, 1966 and 1970.

Table No. 34 : represents tahsil/sub-tahsilwise total area and irrigated area under all major food and non-food crops for 1961, 1966 and 1970.

Table No. 35 : depicts the density of total, rural and urban population per 100 hectares of area under food-grains, area under crops other than food-grains, net area sown and area sown more than once.

Table No. 36 . shows the crude density and density of cultivators and agricultural labourers per 100 hectares of net area shown in 1951, 1961 and 1971.

Table No. 37 : represents rainfall, densiy, area sown and irrigated under major Kharif and Rabi crops.

Table No. 38 : shows tahsil/sub tahsilwise-number of agricultural tools and implements by its rural and urban break-up.

Table No 39 : gloves the results of livestock censuses conducted in the district in the year 1956, 1961 and 1972.

Table No 41 : shows the location of various types of veterinary institutions i.e, hospitals and dispensaries located in the district.

Annexure Table No 41 : gives the locati- and date of establishment of artificial insemination ce res in the district.

Table No. 44 : shows total area under forests classified into reserve forests, protected forests unclassed or undemarcated forests and forests not under the control of Forest Department of the year 1961-1970.

Table No. 59 : highlights the distribusion of holdings by size-group as on 1970-71 (Agricultural years).

Table No. 63 : relates to civil justice.

Table No 64 : shows the location of Police Stations police posts, check posts and traffic check posts in the district.

Table No. 65 : shows the strength of police force in the districts for the years 1961 to 1970 by various catgories of personnel.

Table No. 69 ; gives the number of local bodies and organs of democratic decentralisation in the district for the years 1961 to 1970.

Table No. 73 : gives the receipt and expenditure of Gram-Panchayats in the district for the years 1961-62 to 1970 71.

Out of 74 Tables, 26 have been compiled.
