HOUSEHOLD ECONOMIC TABLES INTRODUCTORY NOTE

Household Economic Tables are an innovation of the 1961 Census. It is for the first time in Census history that detailed information has been collected on the functioning of household as an economic entity. The enquiry mainly related to collection of data about household cultivation and household industry. The data throw light on two very important segments of household economic activity in our country.

2. A special feature of these Tables is their mechanical tabulation. This was done in the Mechanical Tabulation Unit of the Registrar General's office, New Delhi.

3. At the 1951 Census, the data relating to economic characteristics of the population were presented on the basis of information collected in the enumeration slip filled in separately for each individual. Thus the only information available for households was their total number and size, and the entire information on economic activity was based on the individual's (and not the household's) participation in different sectors. In a predominantly agricultural country like India where most of the population lives in villages and most of the goods produced do not enter the money market, and where unpaid family labour plays a significant role in the economic activities, collection of data purely on the basis of individuals tended to be slightly misleading, unless supplemented by information relating to economic activities of the household itself.

4. At this Census, the Household Schedule was used to collect such information at the time of actual enumeration in February-March, 1961. In this Schedule information on the extent of land cultivated by the household either owned or held from Government or held from private persons or institutions for payment in money, kind or shares; land given to private persons for cultivation for payment in money, kind or share ; nature of household industry conducted by the household and the duration of the industry in a year along with number of family workers and hired workers engaged in cultivation or household industry or in both was collected. At the back of the Household Schedule was the Census Population Record the main purpose of which was to replace and bring up to date the National Register of Citizens compiled at the 1951 Census. In the Census Population Record information for each individual enumerated in the household like name, sex, relationship to head of household, age, marital status and description of work, if working, was recorded. The form of the Household Schedule used and the instructions issued to the enumerators for filling it at the time of Census are reproduced in Appendix I to this Note.

Household

A household is a group of persons living in the same house and eating from the same kitchen unless the exigencies of work prevent any of them from doing so. The Census household is thus slightly different from the family, *e.g.*, a domestic servant residing and eating at the employer's house is treated to be a member of the household Hotels, hostels, prisons, hospitals, etc., have been treated as *institutional households.*

Household Schedules have been filled in for institutional households also; but they have been excluded at the time of drawing the sample. The material presented in the Tables relates only to the family-type households.

Household Cultivation

Cultivated land includes all land normally used for cultivation including temporary fallows. Household cultivation includes only those plots of land which are cultivated by the household itself. Land leased out to others is not included.

Cultivation includes ploughing, sowing and harvesting of land, but does not include the operations of keeping orchards, groves and plantations like coffee, tea, rubber, cinchona and other medicinal herbs.

A household having land under cultivation is called a cultivating household. When a head of the household himself and or any household member is engaged (even as a secondary work) in cultivation of land which is either owned or held from Government or taken on lease from private persons the household is said to be engaged in household cultivation. It will be seen that owner-cultivators and tenant-cultivators are both included in this category. Agricultural labourers working on land which is neither their own nor taken from others on lease are not treated as cultivators. Households engaged in cultivation do not, therefore, include households whose members work only as agricultural labourers.

Classification of households engaged in cultivation by interest in land is into the following three types :—

(*a*) Those engaged in cultivation of land entirely owned or held from Government;

(*b*) Those engaged in cultivation of land entirely held from private persons or institutions for payment in money, kind or share; and

(*c*) Those engaged in cultivation of land partly owned or held from Government and partly from private persons or institutions for payment in money, kind or share.

Household Industry

Industry means production, fabrication, processing, repairs or servicing (of machines). Household industry is one which is not on the scale of a registered factory and is conducted by one or more members of the household with or without hired labour. In rural areas it can be located any where in the village in which the household lives, but in urban areas it *must be located at home.*

Principal Household Industry

The form of the Household Schedule had a provision for recording more than one household industry conducted by the household. In such cases, the household industry conducted by the household for a longer period in the year has been treated as its principal household industry. Where there were two or more Household Industries conducted by the household for the same period, the 1st industry recorded on the schedule was taken as the principal Household Industry.

Family Workers and Hired Workers

A 'family worker' is a member of the household who works without receiving wages in cash or kind in cultivation or household industry conducted mainly by members of the household and ordinarily does at least one hour of work every day during the working season. Members of the household who help solely in domestic duties have not been treated as family workers.

A 'hired worker, is an outsider who has been in wholetime employment of the household during the last working season or is in wholetime employment during the current working season. This category does not include agricultural labourers who are casually employed for very short periods for harvesting of crops or other operations.

Industrial Classification

The classification of-Household Industries presented in Tables B-XIV—Part—A and B-XVI is into Industrial Divisions and Major Groups according to the List of Common Household Industries with their *Industrial Code Number* which is reproduced as Appendix II to this Note

The range of economic activity relating to Household Industry is limited to Divisions 0, 1, 2 and 3, Appendix II shows only these industrial Divisions and the Major Groups and Minor Groups under them. Though the classification presented in Tables B-XIV—Part A and B-XVI is only up to Major Groups, the Minor Groups included under them show the extent of their coverage.

The classification of household industries in Table B-XIV—Part B is much more elaborate and presents their distribution by four digit code numbers. The four digit classification has been done by Registrar General's office on the basis of the list of Household Industries obtained from the Superintendent of Census Operations.

6. The following Household Economic Tables have been prepared on the basis of the data collected on the Household Schedule :

Table B-X	Sample Households (i) Engaged neither in Cultivation nor Household Industry (ii) Engaged either in Cultivation or Household Industry but not in both and (iii) Engaged both in Cultivation and Household Industry for all areas
Table B-XI	Sample Households engaged in Cultivation classified by interest in land and siae of land cultivated in Rural and Urban areas separately
Table B-XII	Sample Households engaged in Cultivation only classified by size of land cultivated and number of family workers and hired workers in Rural and Urban areas separately
Table B-XIII	Sample Households engaged both in Cultivation and Household Industry showing size of land cultivated classified by Principal Household Industry in Rural and Urban areas separately
Table B-XIV	Sample Households engaged only in Household Industry classified by Principal Household Industry in all areas
Part A	Households classified by Major Groups of Principal Households Industry and number of persons engaged
Part B	Households classified by Minor Groups of Principal Household Industry
Table B-XV	Sample Households engaged both in cultivation and Household Industry classified by size of land in Rural and Urban areas separately
Table B-XVI	Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry in all areas
Table B-XVII	Sample Households classified by (i) number of male and female members by size of Households and (ii) engagement (*a*) neither in Cultivation nor in Industry (*b*) in Household Industry only and (*c*) in Cultivation sub-classified by size of land cultivated

Since these Tables run into a very large number of pages, they are being published in two books. Book I contains Tables B-X to B-XIV Part B and B-XVII, and Book II Tables B-XV and B-XVI.

7. In addition to these eight Tables, two more Tables have been prepared from sample Household Schedules, but have not been included in this Part. These are :—

C-I	Composition of Sample Households by relationship to head of family classified by size of land cultivated
SCT V—Part A	Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in *rural areas only* for households of members of Scheduled Castes in a 20 % sample of all households

Table C-I is included in Part II-C (i) and Table SCT-V in Part V-A (ii) relating to this State.

Table SCT-V corresponds to Table B-XI but gives distribution of households of members of Scheduled Castes in a 20 % sample engaged in cultivation classified by interest in land and size of land in *rural areas only*.

8. As Tables B-X, B-XI, B-XII and B-XV deal with households engaged in cultivation, it was planned to present rural data at tahsil level and urban data at district level because urban population is hardly engaged in cultivation.

Method of Preparation of Tables

9. The Household Economic Tables have been prepared on the basis of 20 per cent sample of family households. The following instructions were issued regarding the selection of sample Households :

"For purposes of tabulation every fifth schedule from the starting random household will be selected to make a 20 % sample. The sample household will be marked continuously for rural areas of a tahsil and for urban areas of a district, *i.e.*, the households left over in a household schedule pad should be carried over to the next household schedule pad for the selection of sample household.

Before marking the sample households the household schedule pads should be arranged in the order of location code number of villages in a tahsil in the case of rural areas and in the order of location code number of towns in a district for urban areas. The first sample schedule should be chosen at random among the first five households in the first household schedule pad and a stamp of S put on it. This random number (random start) should be chosen separately for rural areas of each tahsil and for urban areas of the district. From the first random household every fifth household should be continuously stamped. The samples should be continuously marked for all pads of villages in tahsil or urban area in a district. If in a particular household schedule pad at the end, some households (they will be four or less) are left over, they should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household.

In short the following points should be strictly followed while selecting the sample households :

(i)(*a*) All pads of household schedules of rural areas of one tahsil should be arranged in order of ascending number of location codes of villages. If in a village more than one pad is used, these pads should also be arranged according to the serial number given to the pads for that village.

(*b*) Similarly all pads of urban areas in a district should be arranged in ascending order of location code numbers. Within an urban area these pads will be arranged in the order of block numbers.

(ii) After selection of the first sample schedule the sample will be continuously stamped without break until the last pad of the tahsil is exhausted in the rural areas and the district in urban areas.

(iii) The sample households will be indicated by stamping the selected schedule in the right hand top corner with a rubber stamp marked S.

(iv) The sample schedules (*i.e.*, those having rubber stamp mark) will be carefully removed from the pad and tied together for a tahsil in the sequence of villages within the tahsils and in the sequence of towns in the case of urban areas the slips being arranged in the same order as when the samples were removed.

(v) These bundles should be despatched to the office of the Registrar General.

(vi) In case two or more household schedules are utilised for a household on account of large size of the household, all such schedules utilised for one household should be considered as one schedule for the purpose of counting every fifth schedule in the pad for sample selection.

(vii) The programme of selection of sample household schedules should be arranged in such a way that selected household schedules for one district are sent to the office of Registrar General every month by each Tabulation Office.

(viii) As we are not concerned with institutions therefore, in taking out sample institutional households should be discarded and samples should be confined to family household."

APPENDIX I

Instructions for filling up the Household Schedules

At the top of the Schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the Code numbers representing your district, tahsil/town, village/ward block. You should take care to write these three numbers connected together by oblique strokes in between on every household schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purpose of the Census a Census house has been defined as a structure or a part of structure, a dwelling, a shop, workshop, factory or place of business, or shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A *household* means the entire group of persons who commonly live together in the same census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some census house there may be more than one group of persons, each group should be regarded as a separate household for purposes of the Census and a separate household schedule should be prepared. You should write the household number from the extracts of the Houselist given to you by your supervisor. If, in any case, you find a Census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for Census purposes is a person on whom fall the chief responsibility for the maintenance of the household. Thus the head of the household need not necessarily be the eldest male member. You need not, however, make any elaborate enquiry about this and should record as head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as Census households but of 'un-related persons living together.' In such a household the manager or superintendent or the person who had administrative responsibilities or who by common consent is regarded as the head, should be recorded as head of the household. If in an institution separate families are also living, each such family should be treated as a Census household and a separate household schedule should be filled. In such cases the full name of the recognised head of the household should be written.

If the head of the household is a person who spends the week days in town and spends the week-ends at home, he should be recorded as head of household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is in charge in his absence should be recorded as the head of the household.

If the head of the household is a member of a Scheduled Caste obtaining in your State or in your district you should write the name of the particular Scheduled Caste to which the head of the household belongs within the parallelogram.

You should then fill up the part of the household schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land—(Land includes all land normally used for cultivation purposes including temporary fallows). Three categories of land are given in items 1(i), 1(ii) and 2. Items 1(i) and 1(ii) relate to land actually cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines have been provided for this purpose in 1(i) and 1(ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (*a*) cultivates land owned or held from Government or taken from private persons or institutions or (*b*) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land.'

Category 1(i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, *e.g.*, land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1(ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession but without right of transfer, (iii) held in a variety of tenancies or tenures which may be broadly classified as follows :

(*a*) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);

(*b*) tenants who have been given permanent rights subject to the right or resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area In other cases he does not possess the right);

(*c*) tenants holding land in areas where interim measures have been enacted for stay of ejectment for continuing the leases for a specified period;

(*d*) tenants holding land on temporary leases who are liable to ejectment; and

(*e*) areas held on condition of rendering service either to a village community or to Government. (This, also includes cases where labourers on plantations are given some land for cultivation with permanent right),

and (iv) the following :

(*a*) land taken for a fixed amount of money,

(*b*) land taken for a fixed amount of produce,

(*c*) land taken for a share of the produce,

(*d*) land for which money is paid partly in one and partly in any other form mentioned above, and

(*e*) land held free of consideration.

Category 2—Land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1(ii) .

Categories 1(i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right in acres and record in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right, if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. The area figures should be recorded in acres up to the first place of decimal, and not rounded up to the nearest acre. For example, if a household has 3½ standard bighas of land, it will be entered as 2·2 acres. The local bigha may, however, vary from place to place. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agriculture labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumberance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm.' Labour hired by such a co-operaitve farm should not be entered for this household.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a household industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the head of the household and or members of the household is an essential features of the household industry. In a rural area the household industry can be located either at home or within the village. But in an urban area the household industry or at least the major part of its work must be located only at home. A household industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods .

(*a*) Household Indusrty should embrace manufacture processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(*b*) Household Industry should be on the household scale where the workers mainly will be the head of the household himself and members of the household the role of hired workers from outside being of secondary importance. Thus, in any household industry members of the household should be in a position to lend a hand in the indusrty whenever they find the time in the course of their daily chores. Household industry cannot, therefore, be on the scale of a registered factory, but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery .

(*c*) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the household industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for household industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, *e.g.*, preparing and dyeing the yarn for weaving or winding into warp and wool or cleaning metal surfaces before electroplating in baths, it should still be considered a household industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of household industry. *Biri-makers* who either alone or with help of members of the family roll *biris* at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members

of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the head of the household whether there are any household industries and write the nature of the industry(ies) in the column provided if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no household industry of any sort put an 'X' in each of the places in the right hand corner where the answer will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry. In the case of household which are engaged only in cultivation, if the head of the household is working write 1 under the column 'Head', and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in wholetime employment during last working season or should be in wohletime employment during the current working season.

Similarly in the case of households engaged in household industry only, if the head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the head, if he is working, in the column relating to 'Total', and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in cultivation and household industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at cultivation and household industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to 'Total'. Ascertain the number of hired workers engaged by the family both for cultivation and household industry and write the number in the appropriate column. In a household engaged both in household cultivation and household industry, you need not ascertain how many are engaged in household cultivation and household industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the Census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in 'Cultivation only', put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly in the case of Households engaged in Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either 'Household Cultivation' or 'Household Industry' or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in cultivation or household industry or is supervising or directing work therein.

APPENDIX II

LIST OF COMMON HOUSEHOLD INDUSTRIES WITH THEIR INDUSTRIAL CODE NUMBER

Industrial Code Number	Household Industry
Division 0—*Agriculture, Livestock, Forestry, Fishing and Hunting*	
Major Group 00	**Field Produce and Plantation Crops**
005·1	Production of vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation, vines and orchards
006·2	Production of *copra* (from coconuts)
007·1	Production of thatching grass
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees
008·2	Production of juice by tapping other palms like date, palmyra n. e. c.
009	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01	**Plantation Crops**
013	Production of tobacco in plantation
015·1	*Pan* cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, *ganja*, cinchona, opium and *pan*
Major Group 02	**Forestry and Logging**
023·1	Production of charcoal
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of *Kathha*
025·2	Production of lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above
Major Group 03	**Fishing**
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries
032	Production of pearls, conch, shells, sponges sea herbs, corals, etc., by gathering or lifting from sea, river, pond
Major Group 04	**Livestock and Hunting**
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domesti animals
040·5	Production and rearing of livestock mainly fc milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goat *(mainly for slaughter)*
042·2	Rearing and production of other animal (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc and other small birds *e.g.*, pigeons, parrots peacock, *maina*, etc.
044·1	Bee keeping for production of honey and wa:
044·2	Collection of wax and honey
045	Rearing of *tassar/eri*/mulberry and other sill worms and production of cocoons and rav silk
046·1	Dog breeding, rearing of rabbits and guinea-pi
046·2	Rearing of other small animals and insects n.e.c

Fly-Leaf

This is a basic Table on the economic activity of a household. The Table has been prepared on the basis of 20 per cent sample household schedules. It gives data for total, rural and urban areas separately. The figures in the Table have been given for the State, Divisions and Districts with tahsilwise breakdown for rural areas only. It gives an account of participation of sample households under the following four heads :

(i) engaged neither in cultivation nor household industry,

(ii) engaged in cultivation only,

(iii) engaged in household industry only, and

(iv) engaged both in cultivation and household industry.

In the 1961 Census, Household Cultivation and Household Industry have been defined as follows:

Household Cultivation

Cultivated land includes all land normally used for cultivation including temporary fallows. Household cultivation includes only those plots of land which are cultivated by the household itself. Land leased out to others is not included.

Cultivation includes ploughing, sowing and harvesting of land, but does not include the operations of keeping orchards, groves and plantations like coffee, tea, rubber, cinchona and other medicinal herbs.

A honsehold having land under cultivation is called a cultivating household. When a head of the household himself and/or any household member is engaged (even as a secondary work) in cultivation of land which is either owned or held from Government or taken on lease from private persons the household is said to be engaged in household cultivation. It will be seen that owner cultivators and tenant-cultivators are both included in this category. Agricultural labourers working on land which is neither their own nor taken from others on lease are not treated as cultivators. Household engaged in cultivation do not, therefore, include households whose members work only as agricultural labourers.

Classification of households engaged in cultivation by interest in land is into the following three types :—

(a) Those engaged in cultivation of land entirely owned or held from Government ;

(b) Those engaged in cultivation of land entirely held from private persons or institutions for payment in money, kind or share; and

(c) Those engaged in cultivatlon of land partly owned or held from Government and partly from private persons or institutions for payment in money, kind or share.

Household Industry

"Industry means production, fabrication, processing, repairs or servicing (of machines). Household Industry is one which is not on the scale of a registered factory and is conducted by one or more members of the household with or without hired labour. In rural areas it can be located anywhere in the village in which the household lives, but in urban areas it *must be located at home.*"

B-XI—SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN RURAL AND URBAN AREAS SEPARATELY

Fly-Leaf

This Table presents the distribution of sample households engaged in cultivation classified by their interest in land and size of land cultivated, and has been prepared separately for rural and urban areas of the State, Divisions and Districts. Tahsilwise data relating to rural areas alone are given under each district. It is based on a 20 per cent sample of households drawn for rural and urban areas separately.

2. The Table has been prepared for (i) households engaged in cultivation only, and (ii) those engaged both in cultivation and household industry. Their figures represent the sum of the figures of households shown in columns 5 and 7 of Table B-X.

3. The classification of cultivated land by size is like this: less than 1 acre, 1·0—2·4 acres, 2·5 to 4·9 acres, 5·0—7·4 acres, 7·5—9·9 acres, 10·0—12·4 acres, 12·5—14·9 acres, 15·0—29·9 acres, 30·0—49·9 acres and 50 acres and above. The last group of "unspecified" shown in col. 13 indicates sample households for which the area of land cultivated was not recorded at the time of enumeration.

4. The interests in land are classified into the following three types and indicated by abbreviations '(*a*)', '(*b*)', and '(*c*)':

(*a*) Owned or held from Government;

(*b*) Held from private persons or institutions for payment in money, kind or share; and

(*c*) Partly held from Government and partly from private persons for payment in money, kind or share.

TABLE B-XII—SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION ONLY, CLASSIFIED BY SIZE OF LAND CULTIVATED AND NUMBER OF FAMILY WORKERS AND HIRED WORKERS IN RURAL AND URBAN AREAS SEPARATELY

Fly-Leaf

This Table has been prepared on a 20 per cent sample of households drawn for rural and urban areas separately, and presents the distribution of sample households engaged in cultivation only classified by size of land cultivated and the number of family workers and hired workers engaged in cultivation.

2. The data have been presented separately for rural and urban areas of the State, Divisions and Districts. Tahsil figures have been given for rural areas only.

3. Households having a particular size of holding have been cross-tabulated with reference to the number of persons working in cultivation only. The distribution of households by the number of persons (both family and hired workers) engaged in cultivation is as follows :—

(*i*) households of one person only,
(*ii*) households of two persons,
(*iii*) households of 3 to 5 persons,
(*iv*) households of 6 to 10 persons, and
(*v*) households of more than 10 persons.

For households in which more than one person work figures for family workers and hired workers have been given separately.

4. The classification by size of cultivated land is like this : less than 1 acre, 1·0—2·4 acres, 2·5—4·9 acres, 5·0—7·4 acres, 7·5—9·9 acres, 10·0—12·4 acres, 12·5—14·9 acres, 15·0—29·9 acres, 30·0—49·9 acres, 50 acres and above. The last group of 'unspecified' represents households for which cultivated area was not recorded at the time of enumeration.

B-XIII—SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN RURAL AND URBAN AREAS SEPARATELY

Fly-Leaf

This Table, based on a 20 per cent sample of households drawn for rural and urban areas separately, gives the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by Divisions and Major Groups of the household industry.

2. The data have been presented separately for rural and urban areas of the State, Divisions and Districts.

3. The classification by size of cultivated land is like this : less than 1 acre, 1·0—2·4 acres, 2·5—4·9 acres, 5·0—7·4 acres, 7·5—9·9 acres, 10·0—12·4 acres, 12·5—14·9 acres, 15·0—29·9 acres, 30·0—49·9 acres, 50 acres and above. The last group of 'unspecified' represents households for which the area of land cultivated was not recorded at the time of enumeration.

4. Lines which would have contained 'nil' entries have been omitted from this Table. At the same time industrial Major Groups of household industry having less than 10 per cent of the households in the industrial Division concerned have not been shown in this Table, but are given in the Appendix. The Appendix gives the Major Group of household industry, the size group of land (by abbreviations) and the number of households (in brackets). Industrial Divisions for which one or more major groups have been included in the Appendix have been marked with an asterisk (*) in the Table.

5. This Table throws light on household industries which are carried on as ancillary to cultivation in different parts of the State.

APPENDIX TO TABLE B-XIII

Major groups of Household Industry which are less than 10 per cent of the respective division have not been shown in the main table where in such divisions are marked by an asterisk. Major groups thus dropped from the main table are given run on lines in this Appendix. The figures preceding the bracket represents the code number of the major group dropped from the table. Alphabets given in brackets are abbreviations meant for different ranges of holdings in acres as explained below. The numerical figure given after the alphabet denotes the number of households in that particular range indicated by that alphabet.

Abbreviation	Class ranges of land	Abbreviation	Class ranges of land
A	means Less than 1 acre		
B	„ 1.0—2.4 acres	G	Means 12.5—14.9 acres
C	„ 2.5—4.9 „	H	„ 15.0—29.9 „
D	„ 5.0—7.4 „	I	„ 30.0—49.9 „
E	„ 7.5—9.9 „	J	„ 50 + „
F	„ 10.0—12.4 „	K	„ Unspecified

For example :—State Uttar Pradesh—Rural—20(A-5, C-2, H-1)

Figure 20 stands for Major Group 20 relating to 'foodstuffs', A-5 means that there are five Households having less than one acre of land engaged in 'foodstuffs', industry in the rural areas of Uttar Pradesh State. C-2 likewise means two such households in the land holding range 2.5 to 4.9 acres and H-1 denotes one such household in the land holding range 15.0—29.9 acres and so on.

The list of major groups thus dropped from the main table is given below :—

TABLE B-XIV—SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN *ALL AREAS*

Fly-leaf

This Table, based on a 20 per cent sample of households drawn for rural and urban areas separately, gives the distribution of sample households engaged in household industry only. The data have been presented separately for rural and urban areas of the State, Divisions and Districts.

2. There are two parts to this Table. In Part A, the households have been classified by nature of household industry according to industrial Divisions and Major Groups of the *Indian Standard Industrial Classification*, and the number of persons engaged in each grouped, under 1, 2, 3-5, 6-10 and more than 10 persons.

3. Each Division and Major Group of household industry is described in column 2 of Part A. Households engaged in more than one household industry are classified on the basis of their principal household industry. Lines which would have contained ' nil ' entries have been omitted from this Table. At the same time, Major Groups of household industries having less than 10 per cent of the households in the industrial Division concerned have not been shown in this Table, but are given in the Appendix. The Appendix gives the Major Group, the number of persons engaged (by abbreviations) and the number of households (in brackets). Industrial Divisions from which one or more Major Groups are included in the Appendix have been marked with an asterisk in the Table.

4. Part B gives the number of households engaged in household industry under each Minor Group. The classification of household industries into Minor Groups also is according to 4-digit code numbers. A list of *Common Household Industries* with such 4-digit classification has been worked out in Registrar General's office and is given in Appendix II to the Introductory Note.

APPENDIX TO TABLE B—XIV PART A

Major Groups of Household Industry which are less than 10 per cent of the respective Division have not been shown in the main table. Such Divisions in the main table have been marked by an asterisk. Major Groups thus dropped from the main table are given in this Appendix. The figure preceding the bracket represents code number of the Major Group dropped from the table. Alphabets given in brackets are abbreviations meant for class ranges of persons engaged in the Household Industry as explained below. The numerical figure given after alphabet denotes the number of households in that particular range indicated by that alphabet.

Abbreviation	Class Range	Abbreviation	Class Range
A means	1 Person	D means	6—10 Persons
B ,,	2 Persons	E ,,	More than 10 Persons
C ,,	3—5 Persons	F ,,	Unspecified

For example :—Uttar Pradesh State-Rural-20(A-44,B-33) Figure 20 stands for Major Group 20 relating to 'foodstuffs', A-44 means that there are 44 households having 'one' person working in 'foodstuffs' industry, and B-33 means 33 households having 'two' persons each working in 'foodstuffs' industry in the rural areas of Uttar Pradesh State.

The list of Major Groups thus dropped from the main table is given below.

SAMPLE HOUSEHOLDS CLASSIFIED BY (i) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND (ii) ENGAGEMENT (a) NEITHERE IN CULTIVATION NOR IN INDUSTRY (b) IN HOUSEHOLD INDUSTRY ONLY AND (c) IN CULTIVATION SUB-CLASSIFIED BY SIZE OF LAND CULTIVATED

TABLE B-XVII—SAMPLE HOUSEHOLDS CLASSIFIED BY (*i*) NUMBER OF MALE AND FEMALE MEMBERS BY SIZE OF HOUSEHOLDS AND (*ii*) ENGAGEMENT (*a*) NEITHER IN CULTIVATION NOR IN INDUSTRY (*b*) IN HOUSEHOLD INDUSTRY ONLY AND (*c*) IN CULTIVATION SUB-CLASSIFIED BY SIZE OF LAND CULTIVATED

Fly-Leaf

This Table gives the distribution of sample households classified by their size and household economic activities. *viz.*, household cultivation or household industry.

2. The data have been presented separately for the State, Divisions and Districts with total, rural and urban breakdown. Th s Table is based on a 20 per cent sample of households drawn separately for rural and urban areas.

3. The households have been classified in five groups, according to the size of households, namely, single member, 2-3 members, 4-6 members, 7-9 members and 10 members and over.

4. The classification of households by economic activities is limited to rural areas and is of three types, namely, (*i*) households engaged neither in cultivation nor in household industry, (*ii*) households engaged in household industry only and (*iii*) households engaged in cultivation. The last have been further sub-classified by size of holdings into ten groups, *i.e.*, less than 1 acre, 1·0—2·4 acres, 2·5—4·9 acres, 5·0—7·4 acres, 7·5—9·9 acres, 10·0—12·4 acres, 12·5—14·9 acres, 15·0—29·9 acres, 30·0—49·9 acres, 50 and over acres. The last group of 'unspecified' represents households for which the area of cultivated land was not recorded at the time of enumeration.

5. The Table also gives for total, rural and urban areas of each unit the total number of households, household population by sex as well as the total number of sample households and sample household population by sex. For each size-group the number of sample households and their populaiton by sex have been given.
