MOTIF

LUNGRANG BAK PUK

LungrangBakpuk (Lungrang Cave) is situated at the western side of Lunglei District at about 2 kms. fromLungrang center. There are two large caves in the place, which are 200 metres apart. The bigger one is called "**Bakpuk**" and its depth is 250 metres, width 16 metres having a height of 20 metres. The cave is surrounded by thick forest, and there is lake at the end of the cave. The lake is 8 metres long and 4 metres wide cave can be entered from the western side.

The second cave is situated at the west of the main cave and is called "**SakuhPuk**" and is 28 metres deep and 10 metres wide and 14 metres high. There is water at the end of the cave also.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Lalhmingthanga, Deputy Director, Directorate of Census Operations, Mizoram. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)
Registrar General &
Census Commissioner, India

New Delhi.

Dated:- 16-06-2014

Preface

In the forward to this publication a summary of the background, coverage and content to the District Census Handbook have been provided. This volume contains the salient features and information on census and non-census data collected respectively during Census of India 2011 and from various states and Central Government Organizations so as to enable the data users to make full of fruitful utilisation of the data and various information presented herein. It is hoped that the micro level information incorporated in this publication will quench the thirst of planners and other users including research scholars for such details.

The publication of the District Census Handbooks for all eight districts of Mizoram is a joint ventures of the State Government of Mizoram and the Census Organization of Government of India. The design layout and various formats presented in the District Census Handbook have been provided by the Census Commissioner India. The compilation of various data, preparation of the analytical notes and gathering of all relevant information for incorporation in the DCHB have been attempted by this Directorate and the cost of publication is borne by the State Government. It may be mentioned here that the process of compilation of various data initially collected mainly from the Block Development Officer and respective Deputy Commissioners was finalized after cross checking with data obtained from concerned State and Central Government agencies so that as far as practicable, the discrepancies could be reconciled, we are grateful to all Block Development Officers, Deputy Commissioners, various Heads of Departments of the State and Central Government for their whole-hearted help and co-operation. I am grateful to the Secretary to the Government of Mizoram, General Administration Department (GAD), Additional Secretary, GAD, Under Secretary, GAD and all their helpers for sparing their valuable time during the preparation and publication of the District Census Handbook.

I convey my deep sense of gratitude to Shri C.Chandramouli, Registrar General and Census Commissioner, India for his valuable guidance and advice received from him right from the beginning. I am thankful to Miss Pratibha Kumari, Assistant Registrar General, Social Studies Division and Shri A.K. Arora, Joint Director, EDP Division of the Office of the Registrar General and Census Commissioner, India, who have been a source of constant help and guidance to us on all technical matters including planning and designing the formats. Because of their continuous help to us this volume could be produced in all India pattern. My thanks are also due to Shri A.P. Singh, Deputy Registrar General, (Map) for providing technical guidance in the preparation of maps as well as for printing of a large number of maps under his direct supervision and active guidance at the Headquarters office.

At the Directorate level, the preparation of this volume has been a product of a joint effort and team work of all my colleagues led by Shri D.R. Banerjee, Dy. Director and Mrs. R. Lalnghakhleli, Dy. Director. Because of their hard work and dedication of duties this volume could be published in time. I also convey my deep feeling of appreciation to all the officials of this Directorate who have put their efforts in the publication of the District Census Handbook.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and

cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses.

In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief history of the district

Before the annexation of the whole area constituting the present day of Mizoram during 1889-90 after the successful LUSHAI EXPEDITION OF 1889-90, no recorded history of the area including the present Lunglei District area is available. Hence for all practical purpose the history of Lunglei District began from that period only although long before than the area was populated by various clans and subclans of Lushai Tribes and various areas were controlled by Chiefs of each such clan/subclan, mainly belonging to the Lushai Tribes.

Based on the recorded versions of the happenings of those days the cause and effects of the aforementioned expedition can be summerised as below :

Prior to the expedition of 1889-90, another expedition was conducted by the British during 1871-72 (The Lushai Expedition of 1871-72) which constituted of two columns, one originating from Cachar in the North and the other from Chittagong in the South West of the then Lushai controlled areas. The first column proceeded upto Champhai in the eastern border adjacent to the Burma and the other reached Lunglei and then proceeded northward vanquishing all the offending Chiefs enroute. The objectives of this expedition was also to force the Lushais Chiefs to surrender and recognise the superiority of the British power and once these were achieved the forces returned back to their respective places of origin. The situation however, didnot remain quiet for long. In 1885 Lushais killed one British Officer and two British soldiers at a place near Rangamati of Chittagong division without any provocation and while they were busy in survey works. This incident was followed by a series of devastating raids during which many innocent people including one powerful local ruler of neighbouring Chittagong area were killed by the raiders. These incidents enraged the British and compelled them to take punitive action against offenders. The Lushai Expedition of 1889-90 was, therefore, conducted by the British rulers of neighbouring areas. This expedition was arranged at a much bigger scale and consisted of columns from Cachar (North), Burma (East) and Chittagong (West). While Cacahr column reached on the 4th February 1890

and established a permanent garrison at Aizawl and an outpost at Chengsil, Chittagong column entered the area via Demagiri and reached Lunglei. A permanent post was established at Lunglei and another at Darzo east Lunglei. Although as in other expeditions main objectives of the expedition were more or less similar to earlier punitive expeditions conducted by the British viz., to punish the tribe which committed depredation in the British Territory, to subjugate them and make them loyal and to explore and open out hither to only vaguely known country lying between Chittagong Division and Burma. This expedition, in fact became the landmark and a turning point in the history of the Lushai Hills in general and the Lunglei District of today in particular since immediately after the expedition the whole area was brought under the British rule administration - a unit of administration was established under Assam province comprising of the northern half of the area and named North Lushai Hills with headquarters at Aizawl and South Lushai Hills for southern area with headquarters at Lunglei but was placed under Chittagong Division of Bengal. Political Officers were posted for these two newly created district administrations - in 1890 for North Lushai Hills and in 1891 for South Lushai Hills.

In the year 1898 North and South Lushai Hills were merged into one district and was placed under the administrative control of Assam. Thus although Lushai area was created as a separate district as back as 1890, it was demoted to the status of Sub- Division (Sub-district) in the year 1898 and it continued to remain as such upto 1972, when the then Mizo District was elevated to the status of Union Territory of Mizoram comprising of Aizawl, Lunglei and Chhimtuipui districts - the later two having been newly created as districts. It may be mentioned here that during the last decade (1991-2001), due to creation/reorganisation of the districts in Mizoram both Aizawl and Chhimtuipui districts were divided into 5 (five) and 2 (two) districts respectively but Lunglei District remained the same as no new district was created in that area. Apart from the Sadar Sub-Division with headquarters at Lunglei. two

more Sub-Divisions with headquarters at Tlabung and Hnahthial have been functioning at present. In addition to that there are 4 Rural Development Blocks in the district namely, W. Bunghmun, (headquarters at Bunghmun), Lungsen (headquarters at Lungsen), Lunglei (headquarters at Lunglei) and Hnahthial (headquarters at Hnahthial). The jurisdiction of these RD Blocks remained unchanged during last decade.

As mentioned earlier, the southern part of Mizoram was earlier under the jurisdiction of Lunglei District for a very short time (7 years) after which it became a subdistrict, then elevated to a district (1972 onwards). Thus the present boundary of Lunglei District can be briefly described as below :

It is flanked by Myanmar in the east, by Bangladesh in the west. In the north it has Mamit and Serchhip Districts and a very small length of Aizawl District. The southern part of the boundary is shared by Lawngtlai and Saiha Districts.

(a) Major social and cultural events :

Apart from celebration of Christmas and New Year, following traditional festivals (KUT) are also widely enjoyed by the people of the district :

a) MIMKUT :Minkut is celebrated in the month of July/August after harvesting the Maize crop. It is celebrated with a spirit of thanks giving and singing and dancing.

(b) CHAPCHARKUT :It is celebrated after the completion of the Jhum cutting and before the Jhums are burnt. It is celebrated with much fanfare during March which is also the time for the advent of the spring season.

(c) PAWLKUT : This rice/paddy harvest festival is celebrated during the month of December and January even every year. Community gathering, feasting, singing and dancing are main attractions of the festival.

(b) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district

Although tourists from other countries and various other parts of India do not travel to this district regularly, Serkawr the original place of missionary activities and Sethlun where earliest Church was built in the district are worth mentioning as places of religious as well as tourist attraction. The district Park, Lal In and Khawiva Mini Hydel Project are also regularly visited by visitors and tourists.

(a) Chawngvungi :Mizo folk-lore is incomplete without the story of Chawngvungi. She was born in the village of Pangzawl (now under Hnahthial RD Block). Chawngvungi was an extraordinarily beautiful woman. She was courted by many, but all her suitors were discouraged by the high bridal price demanded by her mother.

Sawngkhara, the ugly son of a chief finally won her by using a magical love potion. Chawngvungi became his wife, but she died soon after. The remainder of Sawngkhara's life was devoted to grieving and mourning for her.

Today, locations associated with this tragic tale can be visited in Pangzawl village.

(b) KhawnglungRun : During the years of 1856 and 1859 A.D. there was a great conflict between the North and the South of Mizoram. That conflict was one of the greatest events in the history of Mizo. At that time, the Northern part of Mizoram was under the two famous chieftains namely, Vuta and Vanhnuailiana whereas the Southern part of Mizoram was dominated by the descendant of Rolura.

At that time, there was a very famous armed raid taking place in the village of Khawnglung. Khawnglung village was situated about 145 kms. from Aizawl in the Northern part of Lunglei District. Historically, it was remembered as "Khawnglung Run". 'Khawnglung', means 'the name of village' and 'Run' means 'raid'. So, Khawnglung run means "Khawnglung raid". The village of Khawnglung was situated on top of the hill with only one entrance on the side of the hill. It was under the chieftainship of Lalpuithanga, son of Thuama. The Khawnglung village had a good fence as it was located on the hill top. It was very difficult for the enemies to attack them easily, and the villagers considered themselves to be most secure and thus lived happily.

The Khawnglung village raid was one of the most famous and the greatest massacre in Mizo history. It was said that the Khawnglung expedition resulted in the cessation of the enmity between the North and the South of Mizoram.

It was said that the Northern chieftains of Mizoram surprise attacked the Khawnglung village at the dead of night when the villagers were fast asleep. The raiders could enter the village because the guards at the entry were sleeping soundly due to the great feast they had earlier enjoyed in the village.

The attackers first went to the Zawlbuk (Zawlbuk means the Bachelors' Dormitories). At the time, it was custom for every village to have a Zawlbuk, a big hall where the bachelors of the village would sleep at night. When the raiders entered the Zawlbuk, they proudly announced that the Khawnglung people did not know the time to awake up and simultaneously threw on them bundles of twigs. Those who wake up first were shot down and all the Bachelors were thus eliminated. The invaders also went from house to house killing the inmates and also burnt down their houses. Blood flowed literally along the street. Practically almost all the inhabitants of the village were killed. The invaders then returned to their villages carrying with them immense body.

Even this day the village is still known as Khawnglung.

(c) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

As already mentioned earlier, Lunglei is one of the two oldest places (the other being Aizawl) in Mizoram where British rulers established their first garrison administrative units. While all other districts (except Aizawl) have been elevated from RD Block or Sub-Divisional levels to the status of a district, Lunglei has the distinction of being the oldest district for a short period (7 years) then demoted to the Sub-District level from 1898 to 1971 and then again retrieve its lost glory of being a full-fledged district in 1972. Although it remained as a part of the then Lushai Hills District (1898 to 1971), for all practical purposes the district was far closer to the neighbouring Chittagong Division during British Raj. After partition of India, this closeness has suddenly vanished although people living in the bordering areas have been continuing petty commercial transaction. As mentioned earlier, the district is second in terms of population and size, 5th in literacy, 5th in sex ratio, 6th in density in the State.

Although inhabited by a large section of Chakma and other communities mostly in the western belt of the district, Mizo is the principal language and it is the mother tongue of the vast majority of the inhabitants. Christianity and Buddhism are the two most important religions of the people of the district. The staple food of the inhabitants, irrespective of tribe or clan continues to be rice, supplemented by maize, sweet potato and various types of vegetables, Meat however is the most popular among all food products. Fish is also eaten in moderately large quantity. Christmas and New Year festivals are the most popular and important functions of the Christian community whereas Buddha Purnima is also observed by Chakma population of the district.

Administrative Set-up

The district is located in the southern part of Mizoram. Lunglei is one of the two oldest administrative units of Mizoram - the other being old Aizawl District. When the British rule was extended to this area in the year 1889-90 Lunglei was one of the two independent administrative units under a political officer based at Lunglei (1890-97). However in 1898 it was merged with Aizawl Northern Lushai Hills and was placed under the Political Officer of Aizawl. The newly created district was named the Lushai Hills District and it continued to be a Sub-Division/Sub-District upto 1972 when it was again elevated to a full fledged district and it has continued to enjoy this status upto the Census of 2001.

The Deputy Commissioner heads the team of district level officers within his jurisdiction. The Deputy Commissioner is assisted by other officers like the Superintendent of Police and various other departmental officers. Apart from this there are three Sub-Divisions headed by Sub-Divisional Officers directly controlled by the Deputy Commissioner. There are 4 RD Blocks headed by the Block Development officers who assist the Deputy Commissioner and his colleagues in the all out development of rural areas of the district. Although there are 4 Notified Towns including the district headquarters at Lunglei, Municipalities or Town Committees are yet to be constituted in those places and locally elected body called Village Councils are still exercising their authorities as per provisions of the relevant provisions of Acts and Rules.

District Highlights 2011 Census

- Lunglei District is having the 2nd largest number of population among all the Eight Districts of Mizoram.
- Lunglei District is the 5th Urbanised Population with 42.59 % from the total average of 52.11 % of the State..
- In terms of Sex Ratio, The district is having figure of 947 from the total Average of 976 of the State.
- In literacy the District ranks 5th with 88.9 % literacy against the State average of 91.3 %.
- Out of 23 notified Towns there are only 3 notified Towns in the District.
- The density population is 36 persons Sq.km against the total average of 52 persons Sq. Km.
- The most populated Village is Hnahthial with total persons of 1,8,926 while Kutkawk with 20 persons is the least Populated village in the district.

Important Statistics

		State		District		
Number of Villages	Total		830		195

Section - I

Primary Census Abstract (PCA)

Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was

enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 alongwith a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their States/UTs. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also

through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is an important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
