## MOTIF

**Wular Lake-** the largest fresh water lake of the state of Jammu and Kashmir is situated at a distance of 50 km from heart of Srinagar and is a popular picnic spot among locals and tourists from all across the world. Sprawling over an area of 200 sq. km, the surface of Wular Lake is subjected to various changes—all across the year. Wular Lake is mostly calm in its appearance and attracts with its serene and lush environs. However, on certain occasions, it becomes the nurturing grounds for heavy currents generated by fierce winds that blow its way. The 'Gulf of corpses' or Mota Khon is the deepest area of the lake and is supposed to be the resting place of the bodies of people drowned in the lake. Plenty of legends and folklores abound in the region and speak volumes of the popularity of Lake Wular. Though swimming is not a favorite activity for tourists in this attractive tourist spot, they are seen indulging in a lot of merrymaking, boating, fishing and photography be there

## FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1<sup>st</sup> phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15<sup>th</sup> July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.: (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of C.S. Sapru, Joint Director of Census Operation, Jammu and Kashmir. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)  
Registrar General &  
Census Commissioner, India

New Delhi.

Dated:- 16-06-2014

## Preface

The compilation and Publication of District Handbooks has been a traditional feature of the Indian Census since 1951. However in Jammu and Kashmir State, no census was conducted in 1951 and 1991 due to the unavoidable conditions prevailing then. The 2011 series of District census handbook contain two parts each. Part-A deals with Town and Village directory and Part B consists of Town and Village-wise Primary Census Abstract etc. The village also follows the same pattern as in 2001. It is hoped that with its present content the Handbook would, more than ever, serve as a useful reference publication, particularly for administrators and data users as have to deal with planning, implementation and evaluation of development programmes including the Minimum Needs Programme at the Grass Root level. The compilation of the Handbook would not have been possible but for the cooperation extended by the Revenue, Education, Medical, Public Health and other local authorities of the District in making data available for which I owe them my grateful thanks.

The Census -2011 was successfully conducted in the State under the able stewardship of Sh. Farooq Ahmed Factoo, IAS, Director Census Operations, J&K, who had to work very hard to see the operations of Census through in the State under the disturbed conditions prevailing in the State. The data presented in this volume has been collected and Tabulated under his supervision and control.

I am highly grateful to C. Chandermoulli, IAS, Additional Secretary to Government of India under whose stewardship the District Census Handbook has been finalized. I am also thankful A.K.Singh DRG (C&T) and Smt Pratibha Kumari ARG (SS) who extended valuable suggestions from time to time.

(C.S.Sapru)  
Joint Director of Census Operations  
Jammu and Kashmir

## HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses.

In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

-----

## Brief History of The District

Bandipora is newly carved District from erstwhile Baramulla District. The district is surrounded by Himalayan Mountains having Kargil District on north, Kupwara in West, Baramulla in south and Ganderbal in east. The district is a hilly & backward district with moderate climate. District Headquarters Bandipora is well connected by road. Bandipora is about 47 KM by road to Srinagar, (Capital of Jammu & Kashmir). Bandipora all along used to be a well-known town which almost served as a port in old times. It used to be one of the important places of the old kingdom known as Khuaihom. During Mughal period, there were two main ports which were the source of communication between Srinagar and the Central Asian States for commercial purposes. These ports were namely, Aloosa (Ghat) and Nasoo (Bandipora). For about a century, Aloosa remained headquarter for Pargana Khuaihom. The route to Central Asia traversed through Aloosa and once Mughal emperors conferred the area of Khuaihom as „Jagir“ to the family of Bandey“s in Srinagar, since then the area has come to be known as „Bandipora“. Bandipora in ancient and medieval times as Khuaihom had three routes which used to connect Kashmir with China, Mongolia, Kazakhstan, Kirgistan, Turkamania, Afghanistan and Iran. Bandipora is known as “Gateway of Gilgit” and Astore. Commerce was transacted with Central Asia and Ladakh region via Bandipora. Bandipora situated around the north shore of the Wular Lake, in front of the mountains, is an edging of sloping ground covered with villages. The famous Lolab valley in Kupwara district is adjacent to the Bandipora. It is just 30 km from Bandipora via Aaloosa village. Once this road is upgraded it will become a lifeline of the Lolab valley and it will provide an additional route to the Kupwara district.

Bandipora was the connecting link between North India and Central Asia via the Silk Road. At Pazalpora village there was a custom and immigration department which is presently there as a forest check post. There are strong links between skardu gurez and Bandipora.

Bandipora plays host to one of the famous Forest Training and Research Institute in Jammu and Kashmir. Apart from being beautiful, the Darul-Uloom-Rehamia [School for Philosophers] is the largest religious Institution in Jammu and Kashmir. It is the largest Islamic institution of Valley and Second largest in India. Bandipora is known for tracking, mountaineering and fishing. The famous Arin Nallah is home to one the most exotic Trout ,Rainbow Trout, Silver Trout and Gray Trout. The place is surrounded by areas of scenic beauty and ranges such as Sarendar, Kudara, Vewan, Mowa and Tresangam, all of which are inhabited by the Gujjars (“Bakarwals”). Although being a scenic place where peace and tranquility is in the environment

Farming in Bandipora is the main occupation, as more than 80% of the working population is engaged with it, thus has made the district as one of the important districts of Jammu and Kashmir. Main income of the district comes from agriculture. This district consist of hill Stations and Tourist destination. Industrial Sector has been declared as main vehicle for accelerating economic activity besides providing employment to the unemployed youth. The topography of the new District represents a mix of beautiful mountains and streams offering tremendous potential for developing scenic and adventure tourism.

## Administrative Set up

Bandipora district is one of the 22 districts of Jammu and Kashmir state in northern India. Bandipora town is the administrative headquarters of the district and is well connected by road. This district was carved out from the erstwhile Baramulla district in 2007 and it is bounded by Kupwara district in the west, Baramulla district in the south and Kargil, Srinagar and Ganderbal districts in the east. It is Located at a Latitude-34.4, Longitude-74.6. It's elevation range is 1581 meters to 1578. Bandipora is 47 kms by road to Srinagar (capital of Jammu and Kashmir). It all along used to be a well-known town which almost served as a port in old times. It used to be one of the important place of old kingdom known as Khuaihom. The district is hilly and backward with moderate climate.

There are 4 CD blocks in the district and their names are as following:-

S.No	Name of CD Block
1	Gurez
2	Bandipora
3	Hajan
4	Sumbul

## District Highlights 2011 Census

In Kashmiri there is a famous phrase about Bandipora or in other words Bandipora is famous for three A's - A'lim (knowledge), Adab (good habits or literature) and Aab (water). As can be known from the folklore, the name of Bandipora( pronounced as Band e pur) has originated either from Band of Wullar Lake, due to the Bands of place or due to the Closed (Band in Kashmiri) geographical location( i.e. Bandipora is bound by Mountains on three sides and by Wullar Lake in the fourth).This district serves as a link connecting Central Asia through the silk route. Bandipora has a terrace garden similar to the Nishat Bagh in Srinagar.

There are 3 tehsils in the district namely Gurez, Bandipora and Sonawari. The number of inhabited as well as uninhabited villages in each tehsil is given below:-

Tehsil	No of Villages 122		
	Inhabited	Uninhabited	Total
Gurez	28	0	28
Bandipora	41	1	42
Sonawari	50	2	52

### POPULATION OF THE DISTRICT

Population	Total	Persons	392232
		Males	207680
		Females	184552
	Urban	Persons	65361
		Males	35417
		Females	29944
	Rural	Persons	326871
		Males	172263
		Females	154608

The total population of the district as per census 2011 is 392232 persons. It consists of 207680 males and 184552 females. The rural sector of the district is inhabited by 326871 persons which consist of 172263 males and 154608 females .The urban sector consists of 65361 persons among which 35417 are males and 29944 females.

Notes:-\*

- a) The area includes 78,114 sq. Kms. under illegal occupation of Pakistan and 5,180 sq. Kms. illegally handed over by Pakistan to China and 37,555 sq. Kms. under illegal occupation of China in Leh (Ladakh)district.
- b) The population figures exclude population of areas under unlawful occupation of Pakistan and China where census could not be taken.
- c) Population density of State is calculated on the net area 101,387 sq. km excluding the area under illegal occupation by Pakistan and China.
- d) The density of the district is calculated on the revenue area.

## **Section - I**

# **Primary Census Abstract (PCA)**

## Brief Note on Primary Census Abstract

### Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite of several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

### 2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28<sup>th</sup> February, 2011 along with a revisional round from 1<sup>st</sup> March, 2011 to 5<sup>th</sup> March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11<sup>th</sup> September, 2010 to 30<sup>th</sup> September, 2010 along with a

revisional round from 1<sup>st</sup> October, 2010 to 5<sup>th</sup> October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28<sup>th</sup> February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

### **3. Quality Assurance:**

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their states/Uts. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

### **4. Primary Census Abstract:**

The Primary Census Abstract which is important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age

group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

#### **5. Level of Presentation of PCA data in District Census Handbooks:**

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

-4-

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

#### **6. Area Figures:**

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
