MOTIF

PALA WETLAND

Palak lake is the largest lake in Mizoram and the most famous landmark of the Mara Autonomous District Council. The local people call it Pala Tipu. Surrounded by lush green forests and mountains, it is home to a range of animals, birds, amphibians and reptiles. Pala Wetland is located at about 360 km. from Aizawl, the capital city of Mizoram and about 97 km. from Saiha. Pala Wetland falls under the Phura Forests Range, Environment & Forest Department, Mara Autonomous District Council. It is situated 6 km. from the nearest village i.e., Phura. The nearest metal road Kaochao village is 52 km. from Phura. The area lies within the jurisdiction of Tipa Rural Development Block. The area is surrounded by thick forest comprising numerous species of floral and faunal values. The Pala Wetland comprises an area of 18.5 Sq km. and the Pala Lake area (Water area) is 1.5 Sq km. it has two Lake namely Tipu Pino and Tipu Taw, the water level of these two lakes are drastically decreased in the summer. They are about 5 km. along the patrolling path towards the east of the Pala Lake. The altitudes range from 274m (above mean sea level) on the surface of the Pala Lake and 500-589m (above mean sea level) at the Liapahlo hill ranges. The many low-lying marshy areas within the wetland area provide excellent habitat for many herbivores such as the Sambar deer (*Cervus unicolor*), wild pig (*Sus scrofa*), barking deer (*Muntiacus muntjac*) and the elephant (*Elephas maximus*). In addition to these, there are various species of primates such as the highly endangered Hoolock gibbon (*Bunopithecus hoolock*).

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Lalhmingthanga, Deputy Director, Directorate of Census Operations, Mizoram. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)
Registrar General &
Census Commissioner, India

New Delhi.

Dated:- 16-06-2014

Preface

In the forward to this publication a summary of the background, coverage and content to the District Census Handbook have been provided. This volume contains the salient features and information on census and non-census data collected respectively during Census of India 2011 and from various states and Central Government Organizations so as to enable the data users to make full of fruitful utilisation of the data and various information presented herein. It is hoped that the micro level information incorporated in this publication will quench the thirst of planners and other users including research scholars for such details.

The publication of the District Census Handbooks for all eight districts of Mizoram is a joint ventures of the State Government of Mizoram and the Census Organization of Government of India. The design layout and various formats presented in the District Census Handbook have been provided by the Census Commissioner India. The compilation of various data, preparation of the analytical notes and gathering of all relevant information for incorporation in the DCHB have been attempted by this Directorate and the cost of publication is borne by the State Government. It may be mentioned here that the process of compilation of various data initially collected mainly from the Block Development Officer and respective Deputy Commissioners was finalized after cross checking with data obtained from concerned State and Central Government agencies so that as far as practicable, the discrepancies could be reconciled, we are grateful to all Block Development Officers, Deputy Commissioners, various Heads of Departments of the State and Central Government for their whole-hearted help and co-operation. I am grateful to the Secretary to the Government of Mizoram, General Administration Department (GAD), Additional Secretary, GAD, Under Secretary, GAD and all their helpers for sparing their valuable time during the preparation and publication of the District Census Handbook.

I convey my deep sense of gratitude to Shri C.Chandramouli, Registrar General and Census Commissioner, India for his valuable guidance and advice received from him right from the beginning. I am thankful to Miss Pratibha Kumari, Assistant Registrar General, Social Studies Division and Shri A.K. Arora, Joint Director, EDP Division of the Office of the Registrar General and Census Commissioner, India, who have been a source of constant help and guidance to us on all technical matters including planning and designing the formats. Because of their continuous help to us this volume could be produced in all India pattern. My thanks are also due to Shri A.P. Singh, Deputy Registrar General, (Map) for providing technical guidance in the preparation of maps as well as for printing of a large number of maps under his direct supervision and active guidance at the Headquarters office.

At the Directorate level, the preparation of this volume has been a product of a joint effort and team work of all my colleagues led by Shri D.R. Banerjee, Dy. Director and Mrs. R. Lalnghakhleli, Dy. Director. Because of their hard work and dedication of duties this volume could be published in time. I also convey my deep feeling of appreciation to all the officials of this Directorate who have put their efforts in the publication of the District Census Handbook.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and

cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses.

In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief History of the District

As in the case of all other districts of Mizoram, there is no recorded history of the people and the place of habitation for this district also right from the beginning and till the arrival of British rulers in this area. Thus the ancient unrecorded history of this particular area and its people is virtually based on the legends traditions, customs and beliefs. Innumerable folk songs tales and tables also provide some sort of clues for ascertaining their migration and early settlements in this region but the origin cannot be traced very far. However, it is general agreed that all the Mizoram tribes including the Lakher (Mara) lived in what is now Chin Hills of Myanmar prior to their arrival. Even at present the Lakher are more closely related to the Chins and Zos of Chin Hills of Myanmar than most of the other tribes and sub-tribes of Lushais in Mizoram. The most common clans of the Lakher includes Bohia, Chhachhai, Chozah, Hlychho, Mathipi, Azyu, Vytuchho, Lava, Nohro, Syuhlo, Syhly, Notlia, Khithie, Khaimeichho etc. the Lakher call themselves Mara which is a tribe commonly known as Chins in the Chin Hills of Burma (Mizoram District Gazetteers – 1989 –p 80). They speak Mara language.

The present Saiha District has been carved out of the then Chhimtuipui District vide Government of Mizoram Notification conveyed under Memo No. A.60011/21/95-GAD date 29.07.1998 with its Head Quarters at Saiha. It consists of two RD Blocks with headquarters at Saiha and Tuipang.

In respect of grass root level and localized administration it may be added here that this district along with the neighbouring Lawngtlai District together has a unique feature of its own which can be briefly stated below:-

In the early 1950s when Chieftainship was abolished and Mizo District Council covering the then Aizawl district and Lunglei District areas were constituted, a separate Regional Council called Pawi/ Lakher Regional Council was also created for present day Lawngtlai and Saiha District areas. When Mizo District became the Union Territory of Mizoram, three separate District Councils called Pawi District Council, Lakher District Council and Chakma

dominated areas of the region. These District Councils have continued to function within their respective original jurisdictions even after Mizoram became a full fledged state in the year 1987. These District Councils names have since been changed to Lal Autonomous District Council for Pawi District Council, Mara Autonomous District Council for Lakher District Council and Chakma Autonomous District Council for Chakma District Councils. Each of these District Councils have a specified number of Members of District Council (MDC) to be elected and nominated and Executive committees are formed from these MDCs headed by a Chief Executive Member for each District Council.

There is no change of jurisdiction of both the Rural Development, Sub-Division of Tuipang and Sadar Sub-Division of Saiha as well as that of the District Councils of Mara during the last decade (1991-2001).

- **Brief description of place of religious, historical or archaeological importance in villages and place of tourist interest of the district**

1) Saikao: Saikao is the village where the Missionaries of the Lakher Pioneer Mission had stationed to preach the Gospel (words of God) amongst the Maras in 1907. It is situated near and above the river "Beino" (Kolodyne). It has been visited by many tourists to meet the only living Missionary Pihno Violet Louisa Anne and to re-discover the exiting religious and historical developments of the Lakher Pioneer Mission. Today, the generous people constructed grave yard and laid Tombstones for the former and early Missionaries who expired sometime back in the said Saikao Village and this grave yard is quite worthy of visiting for tourists. In 1914, the Missionaries constructed a Bungalow which is still existed in its original structure. There are numerous important documents available in the Bungalow.

2) Pala Tipo (Pala Lake): Pala Tipo is the biggest natural lake in Mizoram. It is circular in shape and is roughly a little more than one square

kilometer. The lake is surrounded by a very thick forest and various kinds of wild animals and birds make their dwellings in and around the lake. The surroundings of the lake are also very rich in fauna and flora. It is extremely magnificent to see this beautiful lake.

3) Mawma Tlah: The Mawma Tlah or Mawma Mountain is the highest Mountain in Saiha District with more than 6672 feet located in the South East part of Saiha District. This mountain has manifold historical background among the Mara people and highly valued by the resident people and is one of the most exciting places for the tourist to be visited especially during Winter Season.

4) Keicho Tlah: This Mountain is located near Lana village and it also has many legendary history behind it and this mountain is surrounded by various natural wonders such as Lo Baiba, Lo Hawka, Alo Laitla, Chyva papahlie, A vahiahmao, etc. In addition to the above mentioned mountains in serial no. 3 and 4, certain mountains like Tliatlu, Kahri, Phusa Tlah and Mawhro Tlah are also very popular and enticing mountains in Saiha District.

5) Kaopi: This legendary waterfall commonly known as Kaopi is located at Tisi river situated near Tisi village. This Kaopi waterfall is made up of stony cliff and has many historical backgrounds and this popular waterfall remains one of the most adventurous places to be visited by the resident people as well as people from outside the district.

Besides, there are many places such as legendary humorist **Chadua's** hunted wild animal skulls like structure at river Beino (Kolodyne) near Kaochao village, Azino Dyuchhai or a majestic stone

chair of fairy Queen at river Beino near Lopu village, Laki Lokhaoh located at Hloma village in East Maraland etc.

- **Major characteristics of the district, contribution of the district in the form of historical figure associated with the district**

As already mentioned earlier, Saiha district is located in the southern most part of Mizoram which was created along with four other new districts in the northern area in the year 1998. It may be mentioned here that even after the creation of Union

Territory in 1972 and elevation to the status of a state in 1987, there was no change in the pattern of coverage of the whole Saiha district by Autonomous District Councils constituted under the 6th Schedule of the constitution of India. Prior to its creation as a district, the districts area was covered by independent sub-division called Saiha Sadar under Chhimtuipui District known as Chhimtuipui district. In 1998 Chhimtuipui district was bifurcated into two districts namely Saiha and Lawngtlai and the present district is having only two RS Blocks namely Saiha and Tuipang. This district is predominantly occupied by Mara population and the Mara Autonomous District Headquarters is also located at Saiha.

However, in terms of literacy, Saiha district with a male literacy of 86.1% and female literacy of 78.1% is the 6th position among all eight districts in the State while the average literacy of Mizoram is 88.8%. In terms of density of population, sex ratio and work participation, the district occupies the rank of 3rd, 2nd and 8th position respectively.

Since the district is inhabited mostly by the members of Mara community, Mara dialects are used by these people while speaking among themselves, whereas Mara language or English is commonly used while speaking to others. As in case of other inhabitants of other districts of Mizoram, rice, maize supported by generous quantity of meat are the most wanted staple food of the people. Fish and various types of locally grown vegetables are also popular among the local inhabitants.

Administrative Set-up

Located at the remotest south western corner of the State of Mizoram, Saiha District is one of the 5 newly created Districts of Mizoram. It was carved out of the then Chhimtuipui District in the year 1998 vide Government of Mizoram Notification issued vide No. A.60011/21/95-GAD dated 11.03.1998. The administrative headquarters of the district is located at Saiha the then district headquarters of Chhimtuipui District. The Deputy Commissioner is generally responsible for looking after day to day affairs of the administration as well as for maintenance of law and order in the District. He is assisted by various categories of senior and middle ranking officers like the Superintendent of Police, Additional Deputy Commissioner, Sub Divisional Officers and other as well as by the Project Director DRDA, Block Development Officers and various other District level and subordinate officers.

Prior to its creation as a district, the area under the jurisdiction of this district was covered by independent sub divisions called Saiha Sadar sub divisions under undivided Chhimtuipui District. At present Saiha Sadar sub division and Tuipang sub division with headquarters at Saiha and Tuipang respectively have been functioning. In addition to the above there are two rural Development Blocks called Tuipang and Saiha RD Blocks in the district. These two RD Blocks were functioning with similar jurisdiction even prior to the creation of the district. Apart from the grass root level elected bodies called Village Councils, one unique feature of the district is existing District Councils viz. Mara (Lakher) Autonomous District Council (HQ – Saiha) functioning since 1972. This District Council have been constituted under the provisions of the Sixth Schedule of the Constitution of India. Prior to 1972 this area was covered by similarly constituted Pawi, Lakher Regional Council established in early 1950s.

There are two Notified Towns in the district i.e. Saiha which is also known as District Capital and Tuipang.

District Highlights 2011 Census

- With 44.38 %, Saiha District ranks 4th Urbanised populated in the whole Eight District of the State.
- Out of 126 uninhabited Villages there are 9 uninhabited villages in the District.
- Out of 23 notified Towns there are only One (1) notified Town in the District.
- In terms of Literacy, Saiha District with a literacy rate is 90.0 % against the State average of Literacy rate of 91.3 %.
- The district with 44.38% ranks 4th position with Urbanised Population in all Eight District of the State 52.11 %.
- The Density of population of Saiha district is 40 per Sq.Km against the average density of 52 per Sq.Km of the whole State .
- Tuipang 'V' is the most populated Village in the District while Lope (Zyhne) and Supha comprises of 58 persons each is the least populated Villages in the District.

Section - I

Primary Census Abstract (PCA)

Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was

enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 alongwith a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their States/UTs. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also

through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is an important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.

Data Source:-Census of India, 2011, HH- series Tables on Houses, Household amenities and assets.

Table - 2 : Percentage distribution of Households living in Permanent,

Sl. No.	Name of Sub - District	Total			Permanent
		Permanent	Semi permanent	Temporary	
1	2	3	4	5	6
1	Sub-District - Tuipang (1528801920)	829 (20.09%)	1,899 (46.03%)	1,331 (32.26%)	829 (20.09%)
2	Sub-District - Saiha (1528801921)	3,537 (52.11%)	2,224 (32.76%)	794 (11.7%)	288 (13.22%)
District - Saiha (15288)		4,366 (40%)	4,123 (37.78%)	2,125 (19.47%)	1,117 (17.72%)

1.Data Source:-Census of India, 2011, HH- series Tables on Houses, Household amenities and assets.

Note :

Permanent : Permanent houses refer to those houses whose walls & roofs are made of pucca materials, i.e., where burnt bricks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi Permanent : Semi permanent houses refer to those houses made of other types of materials.

Temporary : Temporary houses refer to those houses having wall and roofs made of Kutch materials, i.e., where, grass, leaves, reeds, bamboo, mud and unburnt bricks are used for the construction of walls and grass, leaves, reeds, bamboo thatch, mud, unburnt bricks and wood etc. are used for roofs.

Semi permanent and Temporary Houses , 2011

Rural		Urban			Name of Sub-District
Semi permanent	Temporary	Permanent	Semi permanent	Temporary	
7	8	9	10	11	2
1,899 (46.03%)	1,331 (32.26%)	0 (0%)	0 (0%)	0 (0%)	Sub-District - Tuipang (1528801920)
1,132 (51.95%)	702 (32.22%)	3,249 (70.49%)	1,092 (23.69%)	92 (2%)	Sub-District - Saiha (1528801921)
3,031 (48.07%)	2,033 (32.24%)	3,249 (70.49%)	1,092 (23.69%)	92 (2%)	District - Saiha (15288)

Table -3 : Number and Percentage of Households

Sl. No.	Name of Sub-District	Total/ Rural/ Urban	Total Number of households	Number and percentage of Household			
				Tap water from treated source	Tap water from untreated source	Covered well	Un-covered well
1	2	3	4	5	6	7	8
