Daman is divided by the Daman Ganga River into two parts, namely Nandi-daman (Nani meaning "small") and Moti-daman (Moti meaning "big"). Nandi-daman is the larger of the two towns. It is the downtown area that holds most of the important entities like the major hospitals, supermarkets and major residential areas. While Moti-daman is mainly the old city inhabited mostly by the fishing communities and government officers (most of the public offices are located there).

The Portuguese Diogo de Melo arrived at the spot by chance in 1523, when heading towards Ormuz but caught in a violent storm and having his boat blown towards the coast of Daman. Soon after it was settled as a Portuguese colony and remained so for over 400 years. A larger fort was built in Moti-daman in the 16th century to guard against the Mughals who ruled the area until the Portuguese arrived. It still stands today, most of it preserved in its original form. Today the majority of the municipal government offices are situated inside this fort.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village Directory and PCA data were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and ‘most important commodity’ manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of ‘notified slums’.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly
added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Manish Bharadwaj, IAS, Directorate of Census Operations, Daman & Diu. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)
Registrar General &
Census Commissioner, India

New Delhi.
Dated:- 16-06-2014
Preface

I am deeply indebted to all the officers of Government of Union Territories for their unstained support and cooperation at all stages of Census 2011. I am grateful to Shri Satya Gopal, Administrator of both the UTs, Shri U.R .Vyas, Assistant Director of planning & statistics, Administration of the UTs for personal attention paid in conducting Census 2011 within the quickest possible time and for the valuable help and Co-operation in fulfilling the requirements to bring out this publication.

They infused a sense of urgency and seriousness in the minds of officers of the District Administration, which geared up the entire administrative machinery.

District Census Handbook of Gujarat is a joint exercise of the Government of UTs and the Census organization of the Government of India. In the preparation of the DCHB, the role played by the census organisation is that of census data collection, scanning of collected information, validation, compilation and analysis of data. DCHB Most of the data supplied by the various departments were cross-checked and an attempt was made to reconcile the discrepancies as well in order to get the final figures.

The District Collector, the District Development Officer, District Statistical Officer, District Information Officer and their staff members extended their warm and whole hearted co-operation for carrying out field work of the census and collection of non-census data for this District Census Handbook.
I am deeply grateful to Dr. C. Chandramauli, I.A.S., the Registrar General and Census Commissioner, India for the benefit I have derived by the way of guidance and advice. I also express my thanks to Shri Deepak Rastogi present Addl.RG, Shri P.K.Banerjee. Deputy Registrar General (C&T), Shri A.P. Singh, Deputy Registrar General, (Map), Dr. Pratibha Kumari, Assistant Registrar General (SS), Shri M.S.Thapa, Addl. Director (EDP), Shri A. K. Arora, Joint Director (EDP) and Shri Mahipal Singh, Assistant Director (SS) for providing technical guidance in finalizing this publication.

Shri Manish Bhardwaj, I.A.S. who held the office of Director of Census Operations, Gujarat had guided the operations of the 2011 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Manish Bhardwaj. However, he was repatriated to the State Government before this volume could be made available for the press.

Of this Directorate I would like to extend my sincere thanks to Shri R. S. Meena, DRG (C&T), who had played major role in Census 2011 of Gujarat. Dr. Bhavesh Meheta, JD (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedules through Intelligent Character Recognition technology. Smt V.A.Warade, Deputy Director, Shri Ramsingh Meena, Deputy Director and Shri S Lingasamy, Deputy Director who were assisted by Smt. Sanchita Sarkar, Assistant Director and her team of dedicated workers deserve all praise for their perseverance and dedication in preparing the publication. The maps provided in the D.C.H.B. are prepared by the Map Section of the Census Directorate under the supervision of Dr. R. K. Sharma, R.O (Map). I am thankful to all of them.
I am also thankful to all the census staff who provided assistance directly or indirectly in finalizing data at every stage and for final scrutiny of this publication.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity'
manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of ‘notified slums’.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.
**Brief History of the Union Territory and its Districts:**

After Liberation on 19th December, 1961 from Portuguese Rule of more than four centuries, Daman and Diu became a part of the U.T. of Goa, Daman and Diu under Government of India. After delinking of Goa, which attained statehood, U.T. of Daman and Diu came into existence on 30th May, 1987.

**Daman District:**

The District of Daman is known to have formed part of the country known as Lata which was one the seven divisions of the Aparant or KonkanVishaya, between 2nd Century B.C. to 13th Century A.D. The Daman District is included in the intervening region and therefore must have formed part of the Mauryan empire at least at the time of Ashoka. After the Mauryan power was weakened, the district was under the rule of Satkarni I, the Satavahana ruler in the end of 2nd Century B.C. After that during the 1st Century A.D. the District of Daman seemed to have been ruled by Kshaharatas who were the provincial governors i.e. Kshatrapas under the Kushana emperors. During A.D. 125, Satkarni drove away the Kshatrapas of Ujjain re-conquered the district by about A.D 150 from the Satavahana ruler Satakarni and Daman District again passed under the rule of Kshaharatas of Ujjain till A.D. 249. After the Kshatrapas, the district was ruled by the Abhir Kings till A.D. 416.

After the rule of Abhir kings, the district was under the rule of Traikutakas during the 5th Century A.D. who were the feudatories of the Abhiras. By A.D. 500, the Traikutaka power seems to have been destroyed by the Vakataka king Harishena. The District then was under the power of the Kalachuris of Mahishmati King Krishnaraja and his successors till A.D. 609. King Mangales of Chalukyas of Badami routed out the last king Budharaja of Kalachuris by about A.D. 609. The Chalukyas of Badami ruled the district till A.D. 671 and their descendants known as Lata or NavasariChalukyas ruled from Navasarika, modern Navasari, on the bank of the river Purna to the north of Daman. They ruled independently as feudatories of the BadamiChalukyas of the Deccan. In the next eight centuries, Daman came under the control of a large number of Hindu kings and chieftains.

Madmud Shah Begada, Sultan of Gujarat, seems to have conquered fort Parnera on the river Par and port of Daman and levied tribute from Jagatshah in 1465. Naranshah who succeeded Jagatshah ruled from A.D. 1470 to 1500 and Dharmshah II from 1500 to 1531.

Daman was acquired by the Portuguese from the Shah of Gujarat. They noticed the port of Daman for the first time in 1523. They attacked it several times and finally obtained it in 1559 by means of a treaty with the Shah. Thereafter, it was under the rule of Portuguese till its liberation in 1961.

*District panchayat is common in Diu and Daman district of the UT.

With a view to run smooth administration of the Union Territory it has been divided into two districts and each district has one taluka and one municipal councils. The last and the smallest unit under taluka is a village or a town. At district level, District Collector looks after the works of administration, revenue collection and law and order situation with the help of officials of other departments. At taluka level, Mamalatdar helps the District Collector. So far as developmental works are concerned, District Chief Executive Officer and Block Development Officer take care at district and taluka respectively.

**Jurisdictional Changes:**
During the decade of 2001-2011, no change had occurred in the jurisdiction of the districts and talukas of the Union Territory. The Union Territory consists of two districts, namely Daman and Diu. Daman is situated on the West Coast near the Valsad district of Gujarat, whereas Diu is on Saurashtra Coast near Una taluka of Junagadh district of Gujarat. Both districts are uni taluka district. The boundaries of the districts and talukas of Daman and Diu remain unchanged during 2001-2011. The Capital of the Union Territory of Daman & Diu is Daman. In 2011 Census there are 15 villages, one statutory town and 6 census towns in Daman district whereas Diu has 4 villages and one statutory town.

For the implementation of development activities all the above jurisdictions i.e. village, taluka, district and town have their own relevance and importance. The district census hand book contains the data of village, town, taluka level and in within town at ward level.

The above table shows that the 6 villages which were rural area in preceding Census 2001 had been classified as Census towns for the purpose of enumeration of 2011 Census.

**Development of Administrative Infrastructure Set up:**

The Secretariat with posts of very senior level officers like Chief Secretary-cum-IGP, Finance Secretary, AIGP with supporting staff such as Assistant Secretaries etc. was set up immediately after delinking from Goa. Till 1987, there was only one Collector at Daman while in Diu, there was a post of civil administrator, a Junior Level Civil Services Officer of Goa Service Cadre, Collector of Daman was of an I.A.S. Cadre post. As a consequence of forming a separate Union Territory, the Civil Administrator post of Diu was also upgraded to District Collector, of an I.A.S. Cadre. The Administrative head of UT. of Daman & Diu is Administrator.

District Highlights – 2011 Census

Daman district has 1 sub-district and contains 15 inhabited villages.

Area & Density :

1. Daman district covers 64.86% of total area of the UT Daman & Daman.
2. Density (Population per sq. km) of Daman district is 2655.

• Population :

1. Daman has highest population (191173) in the UT Daman & Diu.
2. Among villages of the district, Magrawada village is the most populated villages with population 6735 and Deva Pardi village has the lowest population of 255.

• Sex – ratio :

Daman district has the sex ratio of 534, which is lowest in the UT of Daman & Diu.

• Child sex – ratio :

Daman district has the child sex ratio of 897, which is lowest in the UT of Daman & Diu.

• Literacy :

Daman district has literacy rate of 88.07% and female literacy rate is 80.98%.

• Economic Activity :

1. The economy of the district is mainly dependent on other workers. Out of 100 workers in the District 97 are engaged in this category.
2. The economy of Daman and Diu depends largely on mineral viz. salts and industries viz. fishing, tourism, distillery. The major agricultural products are paddy, Ragi, groundnut, pulses and beans, wheat, banana, sapota and mango.
3. There are some more than 600 small scale industries present in Daman and Diu. The main industries are located at Dabhel, Bhimpore and Kadiya. The Union Territory of Daman and Diu has an industrial development corporation known as Omnibus Industrial Development Corporation (OIDC).

Section - I
Primary Census Abstract (PCA)
Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but interconnected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.
The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 along with a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing& Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as ‘Special Charges’ such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing& Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their States/UTs. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in
place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is an important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract - District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes - District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes - District/C.D. Block/Town.
5. Urban Primary Census Abstract - Town/Ward level.
The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term ‘Total Population’ includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.

### Notes

- **Marginal workers** include household industry workers and other workers.
- **Total** figures are calculated as the sum of males and females for each category.
- **District/ CD Block/ Town** indicates the geographical location where the data is collected.
- **Rural** and **Urban** categories are differentiated by location type.

1. Data Source: - Census of India, 2011, HH series Tables on Houses, Household amenities and assets.

**Note:**
- **Permanent:** Permanent houses refer to those houses whose walls & roofs are made of pucca materials, i.e., where burnt bricks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

- **Semi Permanent:** Semi permanent houses refer to those houses made of other types of materials.

- **Temporary:** Temporary houses refer to those houses having wall and roofs made of Kutch materials, i.e., where, grass, leaves, reeds, bamboo, mud and unburnt bricks are used for the construction of walls and grass, leaves, reeds, bamboo thatch, mud, unburnt bricks and wood etc. are used for roofs.
