1. Foreword xi-xii
2. Preface xiii-xiv
3. Acknowledgement xv
4. History and Scope of the District Census Handbook xvii
5. Brief History of the District xix
6. Analytical Note 1-59
   (i) Physical features 3-9
   (ii) Census concepts 9-13
   (iii) Non Census concepts 13-21
   (iv) 2011 Census findings 22-25
   (v) Brief analysis of PCA data 25-44
   (vi) Brief analysis of Village Directory and Town Directory data 45-51
   (vii) Major social and cultural events, natural and administrative developments and significant activities during the decade. 51-52
   (viii) Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest in the towns of the district. 52-53
   (ix) Scope of Village and Town Directory 53-59
7. **Section I- Village Directory** 61-239
   (a) Brief Note on Village and Town Directory 63
   (b) C. D. Block wise presentation of Village Directory data 65-217
      (i) Map of Pangin C.D. Block (Circle wise) 67-81
      (ii) Alphabetical list of villages with code 2001-2011of Pangin C.D. Block 82-83
      (iii) Village Directory of Pangin C.D. Block 84-99
         (i) Map of Riga C.D. Block (Circle wise) 101-104
         (ii) Alphabetical list of villages with code 2001-2011of Riga C.D. Block 105
         (iii) Village Directory of Riga C.D. Block 106-113
            (i) Map of Ramle-Bango C.D. Block (Circle wise) 115-129
            (ii) Alphabetical list of villages with code 2001-2011of Ramle-Bango C.D. Block 130-131
            (iii) Village Directory of Ramle-Bango C.D. Block 132-147
               (i) Map of Ruksin C.D. Block (Circle wise) 149-159
               (ii) Alphabetical list of villages with code 2001-2011of Ruksin C.D. Block 160-161
               (ii) Village Directory of Ruksin C.D. Block 162-177
   (ix)
(c) Appendices to Village Directory

Appendix – I: Summary showing total number of villages having Educational, Medical and other amenities in villages – C.D. Block level.

Appendix – IA: Villages by number of Primary Schools.

Appendix – IB: Villages by Primary, Middle and Secondary Schools.

Appendix – IC: Villages with different sources of drinking water facilities available.

Appendix – II: Villages with 5,000 and above population which do not have one or more amenities available.

Appendix – III: Land utilization data in respect of Census towns.

Appendix – IV: C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix – V: Summary showing number of Villages not having Scheduled Caste population.

Appendix – VI: Summary showing number of Villages not having Scheduled Tribe population.

Appendix – VI A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix – VI B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix – VIII: Number of villages under each Gram Panchayat (C.D. block wise).

8. Section II - Town Directory

(a) Town Directory Statement I – Status and Growth History

(b) Town Directory Statement II – Physical aspects and location of towns, 2009

(c) Town Directory Statement III – Civic and other amenities, 2009

(d) Town Directory Statement IV – Medical Facilities, 2009

(e) Town Directory Statement V – Educational, Recreational and cultural facilities, 2009

(f) Town Directory Statement VI – Industry and banking, 2009

(g) Town Directory Statement VII – Civic and other amenities in slums, 2009

(h) Appendix to Town Directory – Towns showing their outgrowth with population
The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and Non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The Non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and ‘most important commodity’ manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of ‘notified slums’.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code,
Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)- Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Censuses.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Smt. Bharati Chanda, Joint Director of Census Operations, Arunachal Pradesh. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R. C. Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M. S. Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

Dated: 16-06-2014
PREFACE

The District Census Handbook’s were first introduced in 1951 census. They contain important census and non-census statistics pertaining to a particular District. This series constitute an important set of census publications brought out by the Census Organisation on behalf of the State government. The Census Directorate prepares the manuscripts of the District Census Handbooks out of the data collected from the field during Census Operations and also incorporates in it various other data originating from different Government Departments. The District Census Handbooks are widely made use of by the State Government and its district level and other lower level officials for proper planning, development and administrative purposes as well as by a large cross-section of data users like academicians, scholars, researchers and many other Non-Governmental Agencies.

In DCHBs of earlier censuses only Primary Census Abstract data was presented along with the Village Directory/Town Directory Data. However, in 2011 census, the publications of DCHB as part A and B for each district is brought out. The Village and Town Directories are included in Part-A, whereas Part-B contains the Primary Census Abstract. The Village Directory gives for each Village, the area, population, educational, medical, civic and other amenities as also its land use pattern. Similarly in the town directory, information on various civic amenities, the area figures, population characteristics, physical aspects, communications, municipal finance, trade and commerce, industry and banking facilities etc. pertaining to a town are incorporated. Primary Census Abstract presents certain other basic data like number of residential houses and households, sex-wise break-up of the total population, literates, main workers by categories, marginal workers and non-workers, sex-wise break up of Scheduled Castes and Scheduled Tribes population etc. Besides, some brief notes on the administrative development, economic resources and social aspects of the District are also incorporated in this volume. Also it contains brief analytical notes on the village and town directories and are supported by a few inset tables based on the Primary Census Abstract as well as the village and town directories. Above all an overall attempt has been made here to present the basic statistical data on villages and towns which it is expected would come handy and useful to all concerned.

The data presented under Village and Town Directories were furnished from the field, village and town-wise by the district administration mainly through the Circle Officers in respect of the villages and by the Deputy Commissioner through the District Statistical Officer in respect of urban areas respectively. The data presented under Primary Census Abstract were collected during the Census Operations by the field functionaries of the Circle Officers and the Deputy Commissioner. My thanks are due to all these dedicated band of field officials who have provided the basic data required for compilation of this volume. The notes on different State and Central Govt. Departments are furnished by the respective departments. I am grateful to all these departments for their sincere co-operation.

The collection, compilation and tabulation of data including designing and production of the District Census Handbook Volumes were undertaken by the Census Department at its own expenses keeping in mind with the past practice adopted in earlier Censuses. It is my sincere hope that all the data users will find the contents of the 2011 DCHB series convenient and useful.

(xiii)
Last but not the least, I cannot but express my gratefulness to Dr. C. Chandramauli, IAS, Registrar General and Census Commissioner of India for his valuable instructions and guidance in bringing out the District Census Handbooks. I would like to render special thanks to Shri A. K. Arora, Joint Director, DPD, ORGI and his team of officers for their constant technical guidance and co-operation. I am indebted to the Map Division of ORGI and more especially to Dr. A. P. Singh DRG (Map) for bringing out all the maps used in these publications.

Lastly, I must express my appreciation to the Officers and Officials of the Directorate of Census Operations, Arunachal Pradesh for their active involvement and co-operation in bringing this publications.

Bharati Chanda
Joint Director of Census Operations,
Arunachal Pradesh, Shillong

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 Census DCHB provided a descriptive account of the district, administrative statistics, census tables and Village and Town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained Village and Town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and most important commodity’ manufactured in a village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of ‘Notified Slums’.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz; (i)-Status and Growth History of towns,(ii)-Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.
BRIEF HISTORY OF THE DISTRICT

The name of the district ‘East Siang’ is derived from the river Siang, which flows to the river Brahmaputra in Assam. Pasighat is the district headquarters, which is the first administrative centre in Arunachal Pradesh opened in the year 1911.

Beginning of administrative development of the area can be traced back to the Govt. of India’s Notification of 1914 wherein the area became a Part of the central section of the North East Frontier Tract under the administrative control of political officer. In the year 1919 central section along with Eastern Section of the same tract was renamed as Sadiya Frontier tract with its Headquarters at Sadiya. In the year 1948 Sadiya Frontier Tract was bi-furcated into two separate administrative charges namely Abor hills district and Mishimi hills district. Under the regulation of 1954, Abor hills district was renamed as Siang Frontier Division. In 1965 Siang Frontier Division was again renamed as Siang district and political officer was redesignated as Deputy Commissioner.

Further, through Arunachal Pradesh (Re-organization of district) bill, 1980 under schedule 111, Siang district was bi-furcated into East Siang and West Siang district, with its headquarters at Pasighat and Along respectively.

Again under notification No Land/log – 18/1994 dated 23rd November East Siang district was bi-furcated into two districts Viz. East Siang and Upper Siang, with its headquarters at Pasighat and Yingkiong respectively.
ANALYTICAL NOTE
i) Physical features

Location and size

East Siang district is located in the central part of Arunachal Pradesh and lies approximately between 27º 43' to 29º 20' North Latitudes and 94º 42' to 95º 35' East Longitudes. The district is bounded by Upper Siang district in the north, Lower Dibang Valley district in the east, Dhemaji district of Assam in the south and West Siang district in the west. The district has an area of 3603 sq. Km and ranked 12th in terms of area among the sixteen districts of the state. The area of the district accounts for 4.3 percent of the total area of the state.

Physiography

The East Siang district is a wild, mountainous region and presents a remarkable topographic variety. The district is hilly in the north and gradually descending southwards. The district is a part of the Middle Himalayas and the Siwalik ranges but the Siwalik ranges in the southern portion of the district has turned into a plain due to erosion caused by the Siang river. The district has the following regions.

Lower catchment of Siang river: The region is a part of the Middle Himalayas and spreads over Boleng and Pangin Circle. The geology of the region is of Ziro, Daporijo and Bomdila Gneiss, Miri formation, Disang/Rengging, Younger Adi (Abor) volcanics. The soils of the region are high base status soils of humid region, shallow black, brown and alluvial soils of northern regions and recently formed hydromorphic alluvial soils. The area is covered by dense East Himalayan subtropical wet hill forests.

Foot-hills of East Siang district: It is a part of the Siwalik ranges. It is situated in the southern portion of the district. The area is dissected by several small rivers and gullies. The region spreads over Nari Circle and parts of Mebo and Pasighat Circles. The geology of the region is of three types, i.e. the Upper Siwaliks, the middle Siwaliks(Tipams) and Lower Siwaliks (Surmas). The soils of the area are high base status soils of humid region, shallow black, brown and alluvial soils of northern region and recently formed soils. The region is covered by dense tropical semi-evergreen forests. The area receives heavy orographic rainfall during rainy season.

Siang river plain: The region is an extension of the Brahmaputra plain drained by the Siang river and its tributaries and lies in the southernmost portion of the district. The region spread over the parts of the Pasighat and Mebo Circles. It also occupies small portion of Nari Circle. The soils of the area are alluvium and recently formed soils. The forests of the area are tropical wet evergreen forests. Shrubs are also found in the area in patches scattered everywhere. The area as a whole is plain having fertile soils suitable for cultivation.

Drainage

The mighty Siang river which is known as Tsangpo in Tibet is the principal river in the district. The Siang river enters the district at the western corner near Janbo of Upper Siang district and flows from north-western to south-eastern direction and merged with the Brahmaputra in the plains of Assam. The main tributaries which fed the Siang river are Yamne, Siyom, Simang and Yembung. The entire river system in the district is a part of Brahmaputra basin and the Siang river is an important tributary of the Brahmaputra.

Climate

The varied topography of the district has a profound influence on the climatic conditions of the district. The climate varies from place to place depending on the elevation and its location. The altitude of the district ranges from 130 metre to 752 metre above the sea level. Pasighat, the district headquarters is situated at 155 metre above the sea level. The mountainous part in the north have
mountain type climate and the plains and valleys in the lower portion experience tropical climate. Heavy rainfall is received during June to September. June, July and August are the hottest months and December and January are the coldest months. The district received wind during winter. The average annual rainfall varies from 150mm to 336mm and most of the rainfalls occur during April to September. The maximum temperature is around 37.4° C and minimum is 9.0° C.

**Forestry**

In Arunachal Pradesh, the life of the local people is closely linked to the forest. The people enjoy customary right over the forest to collect minor forest products for their bonafide domestic requirements. They also enjoy the privileges of fishing and small hunting.

The district is covered by northern tropical semi-evergreen forest and northern India tropical moist type of forest. The district has one central forest division and one wild life sanctuary division with headquarters at Pasighat. There are 4 Ranges and 15 Beat under the two division. The total reserve forest area in the district is 46785 hectares and 278 hectares of plantation is done under ANR artificial under social forestry in the district.

The Forest department, Pasighat, is looking after the protection of forest besides creation and maintenance of various plantations. To protect and preserve the wild life, the provision of wild life protection Act. 1972 were enforced throughout the divisions. Regular publicity and awareness campaign were made to educate the local people about the need to protect and preserve the forest and its wild life particularly the endangered species. Some of the forest produce includes fuel wood, thatch, cane, bamboo, broomsticks and toko leaves. As on 2008-2009, the forest department has incurred expenditure of Rs. 1,19,88,542/- and an amount of Rs.1,66,46,299/- has been collected as revenue from forest products.

**Minerals and mining**

The presence of limestone deposits in the district has been reported by the department of geology and Mining, Govt. of Arunachal Pradesh. The limestone reserve at Pangin is estimated to be 225 million tonnes.

**Land and land use pattern and tenancy**

As per the present system of the land use in this district the land within the township areas are allotted on lease to the interested Arunachalee individuals on payment of land premium and lease rent as per Govt. fixed rates after obtaining Govt. approval. The other land in village areas are under the traditional ownership of the villagers for which there is no records as cadastral survey has not been carried out. Further, the lands within the township areas are also being allotted to Govt. Deptt. on receipt of requisition from them for construction of Govt. buildings etc. for which land value as per Govt. fixed rate is realized/paid by the concerned Departments.

The land leased enterprises support a large segment of population in the district. The land leased enterprises particularly the cultivation of field crops as well as horticulture crops are considered a critical determinant of overall economic development. The efficient use of land resource, therefore, assumes singular significant with respect to planning of economic activities.

The district is sparsely populated. Plenty of land is available to the tribesman natural gift although there is no land record. Though plenty of land is available in the district but there is no tenancy system in the district as well as in the State. The land ownership can be classified under three broad heads:

1. Community Ownership.
2. Clan / Individual Ownership.
The people are by and large asking for land possession certificates against village land under their occupation with a view to get financial assistance from various financial Institutions/Banks etc. for starting re-plantation etc. The Govt. of Arunachal Pradesh has issued directive to issue land possession certificate which is very much time consuming and as a result there is inordinate delay in obtaining Govt. approval. It is difficult to establish the ownership of individual’s land until and unless complete survey of village land is carried out and brought on records.

Agriculture

Agriculture is the main occupation of the people of the district. More than 60 percent of the total geographical areas of the district are under cultivable land. During the last decade, a rapid change has taken place regarding pattern of cultivation. In many areas of the district, the practice of shifting cultivation has been replaced by settled cultivation.

There are three types of cultivation being practiced in the district viz., Wet rice cultivation, Terrace rice cultivation and Jhum cultivation. The agricultural crops such as paddy, maize, millet, wheat, pulses, potato, ginger, turmeric, oilseeds, chilly, sugarcane and various vegetables are cultivated in the district. However, the main crops are paddy, maize, millet, potato and oilseeds. The following table shows the area and production under each crop during 2008-09 and 2009-10.

5
The total production of horticulture crop is 26374.559 MT. In view of the infrastructural constraints like lack of transport and storage facilities, the surplus product are yet to be fully explored for optimum benefits of the new venture. The district authorities have explored the possibilities to generate other horticulture product like citronella, tea and Mushroom etc. to sustain economic development of the district.

**Animal Husbandry and Veterinary**

Livestock plays an important role especially in socio-economic development of the people of the district. It is important to note that rural economy of the district is measured with the number of living animal like, Mithun, Pigs etc. Even status of family is assessed with the number of animal especially Mithun. The Department of Animal Husbandry and Veterinary has been rendering veterinary services to the live stock of the district for uplifting the economic conditions of the people since its inception. The department has taken up effective measures to protect and safeguard the animal and poultry birds from any kind of disease.

There are 8(eight) veterinary Dispensaries and 8(eight) Veterinary aid Centre, 30 key village sub-centre, 1 District Diagnostic Laboratory centre and 1 Mobile Veterinary Dispensary are functioning in the district. Moreover the district is having 1(one) livestock farm, 2(two) livestock demonstration centre, 1(One) Cattle upgrading centre. In addition to the above, one school of Vety. Science has been established during the year 1981. In-service training course is imparted by the institution.

According to 2012 livestock census, there are total livestock of 2,81,635of which 59548 are cattle, 9776 are mithun, 35266 are pig, 19 elephant, 16557 are goat, 679 are buffaloes, 153491 are poultry and 6299 are others. The developmental activities taken up by the department can be listed as under.

- **Cattle Insurance Scheme:** The cattle insurance scheme has been taken by the department in 2009 and some cattle has already been insured.
- **Milk Chilling Plant:** The milk chilling plant having capacity to handle 200 ltrs of milk has been taken up by the department and likely to commissioned very soon.
- **Community Cattle Shed:** To provide security of the livestock, community cattle shed has been constructed at Ledum village under the centrally sponsored scheme- National Programme on Cattle and Buffalo breeding (NPCB).
- **A.I Centre:** The department of Animal Husbandry and Veterinary is undertaking A.I programme to improve the locally available cattle with preserved semen collected from highly developed breeds of cattle. Under this programme, a number of high yielding offspring has been produce in the district.
- **Liquid Nitrogen Plan:** Liquid nitrogen plan has been installed in the district in 2005 for starting of frozen germplasm for crossed breeding programme under artificial insemination.

Besides the above, the department has adopted three villages viz. Berung, Sika-Tode and Sika-Bamin for cent percent health coverage of live stock for the year 2012-2013 as a pilot project.

**Industry**

East Siang is industrially undeveloped district in the state. In fact, there is not a single large scale industrial unit in the district except few cottage or small sale industrial units. As a result, the population of the district mainly depends on agriculture. The industries department has been bifurcated into two departments viz., department of Industries and department of Textile & Handicrafts since the year 2000.
The district is having 4 Craft Centres one each at Pasighat, Mebo, Boleng and Nari and three Sericulture farms one each at Pasighat, Sille and Borguli. The average intake of trainees in the four crafts centre each year is between 15 to 20 trainees. For the 2012-2013, the total value of outturn is Rs.16,900/- and sale proceeds worth Rs. 88,359/-.

During the last decade, 17 (Seventeen) Small Scale Industry Units have been registered in the district. Besides, the following developments have taken place in industries in the district:-

a) A new project known as Industries Growth Centre has been established at Niglok-Ngorlung at Ruksin Sub-Division for promoting industries in the district.

b) A private Industrial Training Centre/ ITI has been set up at Rottung under Pangin Circle by J.P Groups for imparting various job oriented technical trainings to the local youth.

c) Employment Generation Programmes and Central sponsored Scheme such as PMRY, PMEGP, etc are implemented fort the last one decade and a huge number of unemployed youth have been engaged in gainful employment.

In addition to that, government has taken up many schemes for development of small scale industries in the district during the last decade. Agro-based small scale industries like fruit processing, manufacturing of hand tools, agricultural implements, milling of food grains, oil seed etc have been encouraged through various government schemes.

Co-operative

The department of Co-operation was established in 1954 in Arunachal Pradesh and the first Co-operative society was formed at Pasighat as Pasighat Co-operative General Store Ltd. on 2nd September, 1957 and later on converted to Pasighat Lamps Ltd. The Co-operative movement plays an important role to promote Socio-economic balance of the district. Co-operative movement has got momentum due to insufficient supply of consumer goods in the district.

There are 52 Co-operative Societies registered in the district till date. Govt. Consumers Co-operative Society Ltd., Koyu, is under the process of liquidation. The numbers and particulars of the Co-operative Societies in the district is given below.

Along with the consumer activities, Co-operative Societies started other economic activities by organizing industrial Co-operative, Fishery, and Multi-purpose Societies with the sole object of providing better service to the people and to uplift their economic condition. Other dimension of the Co-operative movement is the functioning of Apex Bank which is functioning in the district to intensify Agriculture, Industrial and IRDP credit operation and Socio-economic development.
Electricity and Power

East Siang district has vast potential for development of Hydro-electric Power. If properly harnessed, it can help to support development not only in the district but also for other districts of the State.

The proportion of electrified villages in the district is impressive. About 95 percent of the total villages and two towns have been electrified in the district. The total electricity generated in the district during 2012-2013 is 2704788 KWH and out of which 127298 KWH are from D.G set and 202755 KWH are from Hydel power. Energy received from PGCIL is 2569433 KWH and from ASEB is 442411 KWH during 2012-13. The energy consumption for domestic and commercial purpose is 867621 KW and 865532 respectively.

In fact there is no Thermal Power Project in the district. Only Hydel Power House through Micro-Hydel and D.G. set generate and supply power to the consumers for multipurpose uses.

Source: The Assistant Engineer (E), Pasighat electrical Sub-Division, Pasighat.

Fishery

The efforts have been made by the government to develop fisheries in East Siang district. There are two government Fish Seed Farms at Pasighat and fish seeds are supplied to the fish farmers of the district.

As on 31st March’ 2012-2013 there are 2 government fish farms, 13 people fish farm and 1241 village fish pond constructed in different village in the district. The Fishery Department has implemented various schemes on subsidy basis. About 57 hectares of area are brought under fish culture and 2 hectares of water area developed for fishery. During 2012-13, one lakh fingerlings were distributed to the fish farmers.

Transport and Communication

Transport and Communication system are not quite satisfactory and Government’s efforts are going on towards its development. Transport and communication system of the district is not very good developed as compare to national context, but it is good enough in Arunachal Pradesh circumstances. During the last decade a number of new roads have come up in between the villages and in between villages and Pasighat town.

In the district there are some developed road communication facilities to which daily bus services ply from Pasighat to different places like Yingkong, Boleng, Pangin, Along, Likabali and Itanagar etc. As on 31st March, 2013, the total length of roads were 1042.678 km of which 960.678 km were constructed and maintained by the P.W.D and 82 km by G.R.E.F.

In addition to State transport services, there are some private services also, which are plying in the town as well as in various villages in the district. All kinds of goods are generally carried by road transport where the road facility is available and commodities to interior villages are carried by the porters.

Panchayati Raj

The Panchayati Raj was introduced in the district with the promulgation of the North East Frontier Agency Panchayat Raj Regulation in 1967 by the President of India. Since then election to the Panchayat Bodies has been held regularly viz., 1969, 1973, 1976, 1980, 1983, 1987, 1992, 1997, 2003, 2008 and 2013. The last election was held under the provisions of the Arunachal Pradesh Panchayati Raj Act, 1997 which was based on 73rd Amendment Act of the Constitution, 1992.

The present structure of Panchayati Raj in Arunachal Pradesh consists of three tier namely i) Gram Panchayat- at the Village level ii) Anchal Samiti – at the Circle level and iii) Zilla Parishad – at
the District level. The district has one Zilla Parishad with 13 members, 13 Anchal Samiti with 156 members and 156 Gram Panchayat with 578 members. The Anchal Samities and Zilla Parishad are functioning as advisory bodies only.

The main functions of the Gram Panchayats are general function like preparation of annual budget, plan and programme for the development of the village, maintenance of essential statistics of the village, Agriculture including Agricultural extension, Animal Husbandry, development of fisheries in the villages, social and farm forestry, Khadi and Cottage industries, Housing, Drinking water, village roads, Rural electrification, Education including Adult and non formal, cultural activities, Rural sanitations, Public health, Women and Child development, Public Distribution System etc. Apart from that all issues/activities relating to the development of the village are handling by the Gram Panchyat. However, the Panchayat bodies in the state have been raising their voices against the State govt. for not giving their due powers and authority as provided in 73rd Amendment Act, 1992.

(ii) Census Concepts

Building: A ‘Building’ is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca Houses: Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/ Abestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutcha Houses: Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

Dwelling Room: A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant’s room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant’s household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not
been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

**Census House:** A ‘Census House’ is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

**Village:** The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban Area:** The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is ‘town’ for urban areas and ‘village’ for rural areas. The urban area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns: All places with a municipality, corporation, cantonment board or notified town area committee, etc. are known as statutory towns.

(b) Census Towns: All other places satisfying the following three criteria simultaneously are treated as Census Towns.

i) A minimum population of 5,000;

ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as ‘urban’ all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitute of OGs which are the parts of UAs.

**City:** Towns with population of 100,000 and above are called cities.

**Urban Agglomeration:** An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the exiting town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an ‘urban agglomeration’. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of an Urban Agglomeration (i.e., all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there
were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

**Out Growth (OG):** The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc and **physically contiguous with the core town of the UA.**

**Household:** A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

**Institutional Household:** A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars homes, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless Household:** Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**Scheduled Caste and Scheduled Tribes:**

The list of SCs and STs applicable in the State is given hereunder:

1. Abor
2. Aka
3. Apatani
4. Nyishi
5. Galong
6. Khampti
7. Khowa
8. Mishmi, Idu, Taroan
9. Momba
10. Any naga tribes
11. Sherdugpen
12. Singpho
13. Hrusso
14. Tagin
15. Khamba
16. Adi
Language and Mother Tongue: As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person’s mother to the person. If the mother died in infancy, the language mainly spoken in the person’s home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate: A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate: Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level: The highest level of education a person has completed.

Work: Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in ‘work’ as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker: A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as ‘Main worker’.

Marginal worker: A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as ‘Marginal worker’.

Non-worker: A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as ‘Non worker’.

Cultivator: For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like— tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under “other workers”.

Agricultural Labourer: A person who works on another person’s land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely
works on another person’s land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

**Household Industry Worker:** Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

**Other Worker:** A person, who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are ‘Other Workers’.

**Work Participation Rate:** Percentage of Workers (Main + Marginal) to total population.

**Population Density:** Population density is the number of persons inhabited per square kilometer of the area.

**Age:** Age is measured in terms of the completed number of years.

**Sex Ratio:** Number of females per 1,000 males in a population.

**(iii) Non-Census Concepts**

**Civic Status of Urban Units:** Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee / Municipal council, Municipality etc.

**Size Class of U.A./Town:** Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population are classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

**Slum Area:** The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega City:** The concept of ‘Mega City’ is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut-off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure
Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, Cities with 10 million and above population have been treated as Mega Cities and the same criteria of population has been adopted in 2011 Census.

**Concepts used in VD and TD of DCHB:**

1. **Educational Amenities:** The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this purpose. If there are composite schools like Middle Schools with Primary classes, or Secondary Schools with middle classes, these are included in the number of Primary and Middle Schools respectively. For example, if in a village there are two Primary Schools and one Middle School with primary classes, the number of Primary Schools in the village are given as three and that of Middle School as one even though there may be only three educational institutions. So also in case of Secondary schools. For better understanding, the distinctiveness of different types of Schools is depicted hereunder:

1.1 **Pre-primary (PP):** Now-a-days, the children are sent to Schools at a very early stage. Lot of Pre-Primary Schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary Schools have classes starting from pre-primary level. Pre-Primary classes include Nursery, K.G., Pre-basic, Play School, etc.

1.2 **Primary School (P):** Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 **Middle School (M):** Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

1.4 **Secondary School (S):** Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 **Senior Secondary School (SS):** Schools and Colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. **Degree College:** (i) **Arts/Science/Commerce:** These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

   (ii) **Engineering College (E):** It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

   (iii) **Medical Colleges:** These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. **Management College/ Institute (MI):** It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.
1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled: There are Government and Government recognized institutions/organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities: 2.1 Hospital-Allopathic and Hospital-Alternative medicine: A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there is hospitals providing facilities under different systems of medicines such as, Allopathy, Ayurveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b) Ayurveda: Ayurveda means ‘Science of life’. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements are represented in the form of Tridosha: Vata, Pitta and Kapha. These three ‘doshas’ are physiological entities of living beings. Ayurveda developed into eight distinct specialities, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c) Unani: Treatment of Unani consists of three components, namely, preventive, promotive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Arthritis, Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homoeopathy: Treatment in Homoeopathy, which is holistic in nature, focuses on an individual’s response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30- bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.
2.3 Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer. A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4 Primary Health Sub-Centre (PHS): A Primary Health Sub-centre is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/tribal/desert areas. Each PHS has a sanctioned strength of one male and one female health worker.

2.5 Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counselling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7 Health Centre: Clinic where medicine and medical supplies are dispensed. It has no inpatient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8 Dispensary: Place where patients are treated and medicines provided but with no inpatient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9 Veterinary Hospital: Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc in rural areas.

2.10 Mobile Health Clinic: These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counselling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12 Nursing Home: A nursing home is a long-term care facility licensed by the state that offers 24-hours room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies., treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13 Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Bumol etc. These shops are not taken as medicine shops.
3. **Drinking water:** The following are the main source of drinking water facility (ies) available in the village.

3.1 **Tap Water-treated:** This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as ‘Tap water from treated source’.

3.2 **Tap Water-un-treated:** If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as ‘Tap water from un-treated source’.

3.3 **Covered Well (CW):** A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 **Un-covered Well (UW):** A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

3.5 **Hand Pump (HP):** Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 **Tube Well / Borehole (TW):** Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self explanatory.

4. **Community Toilet Complex:** Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. **Rural Sanitary Mart or Sanitary Hardware Outlet(RSM):** It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. **Community bio-gas or recycle of waste for productive use:** Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid waste is subjected to decomposition, bio-gas could be produced under favourable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. **Communication and transport Facilities:**

   7.1 **Post Office (PO):** Self-explanatory.

   7.2 **Sub-Post Office (SPO):** Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

   7.3 **Post & Telegraph Office (PTO):** Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.
7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self explanatory. 7.6 Mobile Phone Coverage: Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC): If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighbouring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

7.11 Other District Roads (ODR): These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development head quarters or other main roads.

7.12 Village Road: The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR): A road provided with a bituminous surfacing.

7.14 Gravel (Kuchha) Road (GR): A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM): This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP): A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: Banking facility means a place where a person can operate a bank account.

8.1 Commercial Bank (CB): These may be banks wholly owned by the Government of India or by Indian or Foreign Companies.

8.2 Cooperative Banks (Coop. B): A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Co-operative Banks are often created by persons belonging to the same local or professional community or sharing
a common interest. These banks are registered under the Cooperative Societies Act. The Cooperative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949.

8.3 **Agricultural Credit Society (ACS):** Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery.

8.4 **Non-Agricultural Credit Society (NCS):** These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9.**Miscellaneous Facilities:** 9.1 **Self-help Group (SHG):** Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarn Jayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9.2. **Public Distribution System (PDS) shop:** The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3. **Mandis/Regular Market:** These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4. **Weekly Haat:** These are those clusters of shops with or without fixed premises which are open once a week.

9.5. **Agricultural Marketing Society:** It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.

9.6. **Nutrition Centre: Integrated Child Development Services (ICDS):** The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7. **Anganwadi Centre:** Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8. **Accredited Social Health Activist (ASHA):** ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9. **Sports Club/Recreation Centre:** Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10. **Cinema/Video Hall (CV):** If regular cinema houses licensed by Government is available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.
9.11. **Public Library:** Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12. **Public Reading Room:** Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13. **Newspaper Supply:** The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.

10. **Availability of Electricity/Power.** If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 **Power Supply for domestic use:** This category includes electricity used only for domestic consumption.

10.2 **Power supply for agricultural use:** This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 **Power supply for commercial use:** This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 **Power supply for all uses:** This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. **Land Use Pattern:** The land use area of the villages is given in hectares. The land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. **System of drainage:** Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. **Type of latrines:** The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.

   (i) **Pit System:** The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

   (ii) **Flush/pour flush:** A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the
passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used).

(iii) **Service**: Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under “Others” category.

14. **Protected Water Supply- Source and capacity of Storage system**: There are various sources of water supply and its storage system in the town.

14.1 **Service Reservoir**: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 **River Infiltration Gallery**: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for intake screens. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 **Bore Well Pumping System**: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 **Pressure Tank**: Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. **Road lighting (Points)**: Road lighting means the number of street lights that are maintained in the town.

16. **Home Orphanage**: Orphanage is the name to describe a residential institution devoted to the care of orphans—children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a ward of the state, and orphanages are a way of providing for their care and housing.

17. **Working women's hostel**: These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. **Old Age Home**: There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. **Stadium**: A stadium is a place, or venue, for (mostly) outdoor sports, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. **Auditorium/Community Hall**: These are the places where meetings, social functions etc. are organised.
iv) 2011 Census findings

(a) Distribution of Population in rural-urban areas.

As per the findings of 2011 Census, the total population of the district is 99,214 (50,116 males and 49,098 females) and constituting 7.2 percent of the State Population spread over 3,603 Sq.Km. area of the district. Among the fifteen Circles of the district, Pasighat (36,354) is the most populated circle and Kora (884) is the least populated circle. Other Circles in order of their population size are Sille-Oyan, Namsing, Mebo, Boleng, Ruksin, Nari, Bilat, Riga, Pangin, New Seren, Rebo-Perging, Koyu and Kebang circles. Out of the total population of 99,214 of the district, 77.8 percent resides in the rural areas and 22.2 percent in the urban areas. The decadal growth rate of the district is 13.5 percent. The district has a density of 28 persons per sq.km and sex ratio of 980. The literacy rate of the district is 72.5 percent and work participation rate is 40.5 percent.

(b) Size class and Status of Towns, Population, Growth, Density and Sex Ratio, Work participation rate, Literacy, Religion, Availability of University education in the District

There are two towns in the district i.e. Boleng (NT) and Pasighat(NT). Boleng is a new town added in 2011 Census. The population of the two towns is 27,635 persons as per 2011 Census and falls under Class III and VI Towns respectively as classified by population size. The urban growth rate is 25.8 percent while the sex ratio of the town is 978. The urban literacy rate accounts for 80.1 percent of which 85.6 percent are males and 74.4 percent are females. The urban Work Participation Rate accounts for 31.9 percent of which 45.9 percent are males and 17.5 percent are females.

(c) Mother Tongue, Scheduled Castes and Scheduled Tribes of earlier Censuses

DISTRIBUTION OF DIFFERENT MOTHER TONGUES OF ARUNACHAL PRADESH COMPARED WITH EAST SIANG DISTRICT RETURNS, 2001

It has been seen from the Annexure VIII that East Siang district has returned Adi (39,067) as the major language speakers followed by Nepali (8,537), Adi Miniyong (8,374), Adi Gallong (4,914), Bengali (4,736), Hindi (4,627) and Assamese (3,334) as compared to Nissi (117,124) the highest followed by Nepali (94,895), Adi (93,517), Adi Gallong (61,674), Bengali (54,521), Hindi (53,663)
and Assamese (51,422) at State level. This proves that every district has language of its own. Unlike other States, there is no predominant language in Arunachal Pradesh.

</table>

In this table, number and percentage of Scheduled Castes and Scheduled Tribes have been depicted for Circles. Pasighat Circle shows the lowest percent of ST population with rural urban break up 81.5% and 34.7% respectively. The highest percentage of ST population with 99.7% recorded against Rebo-Perging Circle.

The percentage of SC population is very insignificant in all the Circles of the district.

District Total: 87397 65432 21965 99214 71579 27635 13.5 9.4 25.8 25.8 27.9

Table-1 relates to the decadal change in population of Tahsils/Sub-district by residence, 2001-2011. As can be seen from the table, Pasighat is the most populated circle and Kora is the least populated circle in the district. The decadal growth rate of the district works out to 13.5 percent against 26.0 percent of the State. The rural and urban decadal growth rate of the district is 9.4 and 25.8 percent respectively. Among the 15 Circles of the district, Koyu Circle has the highest growth rate followed by Nari, Kora, New Seren, Boleng, Ruksin, Pasighat and Namsing which have higher growth rate than the district level. The remaining Circles have growth rate below the district level and even in the decreasing trend. It can also be seen that the urban decadal growth rate has increased from 25.8 to 27.9 percent.

Total 0 0 0 (0 %) 0 0 0 (0 %) 0 0 0 (0 %)

The table shows the CD Block wise number and percentage of inhabited villages in specified population size ranges of less than 200, 200–499, 500–999, 1000–1999, 2000–4999, 5000–9999 and above 10000 population. As can be seen from the table, 32 percent i.e. 48 of 150, of the total number of inhabited village has population less than 200. The district has 17 villages which have population above 1000. It is observed that the number and percentage of inhabited villages decreases with the higher population ranges.
Table 3: New towns, de-notified, declassified and merged town in 2011 census

(a) New
(i) Statutory town 2
(ii) Census town Nil

(b) Denotified
(i) Statutory towns of 2001 census denotified and also did not satisfy the criteria to be treated as census towns. Nil
(ii) Statutory towns of 2001 census denotified but identified as census towns based on demographic and economic criteria. Nil
(iii) Census towns of 2001 census are notified as statutory town in 2011 census. 1

(c) Declassified Nil

(d) Wholly merged with other town(s). Nil

*Declassified means the Census towns of 2001 Census which failed to satisfy the demographic and economic criteria.

As can be seen from the table, there are two statutory towns in the district during 2011 Census.

</table>

Note: Sex ratio has been defined here as the number of females per 1000 males

The table shows the sex ratio of the state and district from 1901 to 2011. However, data prior to 1961 are not available as Census Operations started in the state only in 1961. The district has higher sex ratio than the state level in all the Censuses except in 1981 it was lower than the State.

District: East Siang (251)  
| Persons | 99214 | 40222 | 20185 | 3565 | 8.66 | 493 | 1.23 | 15979 | 39.73 |
| Males | 50116 | 23591 | 10381 | 4400 | 8.29 | 300 | 1.27 | 10954 | 46.43 |
| Females | 49098 | 16631 | 9804 | 5895 | 6.67 | 193 | 1.16 | 5025 | 30.21 |

As can be seen from the table, out of the total workers of 40222 persons in the district, 50.2 percent are Cultivators, 8.9 percent are Agricultural labourers, 1.2 percent are Household industry workers and 39.7 percent are Other workers. The majority of the workers in the district are Cultivators and Other workers whereas the Agricultural labourers and Household industry workers are negligible. The proportion of different category of workers varies from circle to circle. Riga has the highest proportion of Cultivators (91 percent), and Pasighat has the highest proportion of other workers (74.3 percent). The Agricultural labourers are negligible in all the circles except Nari, Sille-Oyan and Pasighat circles where it is recorded as 21.6, 18.4 and 10.6 respectively. The least number of workers recorded in all the circles is the Household industry workers.

</table>

| Total   | Persons 71579    | 31417                   | 19712            | 62.74  | 3151 10.03 | 371 1.18 | 8183 26.05 |
|         | Males 36147      | 17174                   | 10116            | 58.90  | 1719 10.01 | 218 1.27 | 5121 29.82 |
|         | Females 35432    | 14243                   | 9596             | 67.37  | 1432 10.05 | 153 1.07 | 3062 21.50 |

In rural areas, among the 31417 total workers, 62.7 percent are Cultivators, 10 percent are Agricultural labourers, 1.2 percent are Household industry workers and 26 percent are Other workers. It can be seen that in the category of Cultivators and Agricultural labourers, female workers are more than the male workers in most of the C.D blocks. However, in Other workers, the male workers are slightly higher than the number of female workers in all the C.D blocks.

Note:-
* Education includes all education facilities.
^ Medical includes all medical facilities.
# Post office includes post office, telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.
@ Bank includes Commercial Bank and Cooperative Bank.
** Telephone includes Telephone, PCO and Mobile.

The table shows C.D Block-wise availability of various amenities in the district. It is seen that out of 150 inhabited villages in the district, drinking water is available in 98.7 percent of the village, education in 89.3 percent, power supply in 72.7 percent, medical in 36 percent, telephone in 65.3 percent, transport and communication in 34 percent and approach by pucca road in 31.3 percent of the villages. The amenities such as post office, banks and agricultural credit societies are available in very few numbers of villages. The same is also seen in C. D Block-wise analysis.

Among the C.D blocks, Riga C.D. Block has the highest percentage of village with education and medical facilities, in drinking water all the C.D. Blocks have attained above 90 percent coverage, Pasighat in telephone and power supply and Mebo in approach by pucca road. The availability of amenities such as post office, transport communications, banks and agricultural credit societies is very negligible.

Note:-
* Education includes all education facilities.
^ Medical includes all medical facilities.
# Post office includes post office, telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.
@ Bank includes Commercial Bank and Cooperative Bank.
** Telephone includes Telephone, PCO and Mobile.

The table provides the number and percentage of rural population served by different amenities presented in C.D Block-wise. The table shows educational facilities available in the district caters to 94.5 percent of the rural population, medical to 45.6 percent, drinking water to 99.9 percent, post office to 29 percent, telephone to 76 percent, transport communication to 43.5 percent, banks to 14 percent, approach by pucca road to 36.9 percent and power supply to 74 percent of the rural population in the district. Agricultural credit societies caters to only 2.9 percent of the rural population in the district.

</table>

The table shows the distribution of villages according to population range and amenities available. It can be easily seen that maximum number of villages falls under 1-499 population range. It can also be seen that in bigger villages of above 500 population, the availability of different amenities is much better than that of village with lesser population.

VII. Major Social and Cultural Events, natural and Administrative development and significant activities during the decade

The local Scheduled Tribes dominates the population structure of the district. The negligible percentage of outsiders who are temporarily staying there for their livelihood are not directly involved with any major social and cultural events of the district. The major tribes that inhabit the East Siang District are ‘The Adis’. They are divided into many sub-tribes like Pasi, Padam, Minyong, Galong, Simong, Millang, Komkar, Pailibo, Boribakar, Membra, Mishmi, etc. The people celebrated their respective annual festivals and ceremonies with due pomp and gaiety held on different occasion throughout the year. During the religious festivals ceremonies are performed with sacrifice of domestic and semi domestic animals and local rice beer. Rites are performed with offering of prayers to the respective deities of the festivals and by erecting altars of other suitable arrangement. It is the practice of different tribes to appease the deities in various ways. Such practices of worship in festivals are laid as customs and traditions of respective societies, which identify their ways of social life.

The “Solung” is the main festival of the “Adis”. The Solung festival is a manifestation of the ‘Adis’ fertility cult. There are different versions of its origin, but the most commonly accepted one is that the Adis were asked by Kine-nane, the goddess of wealth and prosperity, to perform the Solung puja. The story goes that long ago, one Doying-Bote (God in Heaven) came in contact with Kine-nane and became sexually excited. When he was about to copulate with her to monsters. Total Mone and Dudeng-Mone, intervened and snatched off his testicles to destroy it and in the process scattered the divine sperms over different places from some of which sprouted paddy plants. This was found by Kine-nane. Finding human beings starving for want of food she sent the paddy seeds through a dog. Since then men have been producing paddy in plenty to meet their requirement of food. Kine-nane ask the men so helped by her to offer her puja in the name of “Solung” which they were only too willing to do. Kine-nane also helped them to acquire mithuns (semi domesticated animal resembling buffalo which are reared by the people of Arunachal Pradesh mainly for meat) and pigs, the two animals which are sacrificed at the time of Solung.

In Solung they try to propitiate both Doying Bote and Kine-nane and if they are pleased and satisfied, the former will appear in the form of clouds and rains and later in the form of greater fertility of soil. They land together on the surface of the earth where ultimately their union takes place. It is believed that their successful union will lead to high yields of crops, more animals like mithuns, pigs etc., and ultimately wealth and prosperity for men. Solung celebration continues for five days. First day is called “Solung-Gidi Dogin”, or the day of preparation, second and the main day of celebration is called doreph-long (the day of animal sacrifice). Third day is known as Binngy at Binam, or worshipping the goddess of plenty and prosperity. Fourth day is yaktor or Ekoph when the villagers remain busy preparing bows and arrows and other weapons of war. On the fifth day the Miri religious leader or priest is given a ceremonial sent off when the girls sing and dance.
Solung is celebrated in the month of August or September but there is no fixed month or date for it. Now-a-days the festival is celebrated with a three day programme only in some places, after sowing of seeds and transplantation of paddy plants, when the villagers get same respite from their farming activities, they celebrate solung festival so they would reap a rich harvest and raised more mithuns and pigs etc. They also hope to be free from natural calamities, fire accidents, disease etc.

Mopin is another popular festival of the Adis, mainly of the Galong communities of Arunachal Pradesh. This festival is normally celebrated in order to get rid of natural calamities, disease, affects of evil spirits and for good harvest, health and wealth and prosperity. In this festival,

Mopin the goddess of welfare, peace, wealth, prosperity and wisdom is propitiated in a grand celebration. The festival lasts for five days from the fourth to the eight of April before sowing of paddy.

Besides the above, other festivals such as Etor, Aran, Unying, Ali Aye Ligang, Pime and Reh are also celebrated in the district.

Dances are an integral part of the festivals of the district. Some of the popular dances are; Ponung dance which is performed especially on the occasion of Solung festival, Popir dance is performed on the occasion of Mopin festival, Dishang dance is performed by men folk and Tapu is a war dance performed with long traditional swords, vigorous cries and rapid movement of men folks.

The essence of the festivals is fast changing and the festivals have been undergoing some changes in their form, style, rituals, mode of performance etc. particularly in the urban centers. The festivals of Arunachal Pradesh embody the social and cultural essence of the indigenous tribes. The Govt. of Arunachal Pradesh therefore, takes keen interest to giving incentives to preserve its rich cultural heritage. But practically it has been noticed that the local traditional dance and other folk songs are gradually neglected by the present generation and gradually its place has been seen to be taken by dances and songs. However, efforts are on to stop this cultural degeneration. In the process Adi cultural and Literacy society have come up with unique idea of introducing enactment of mythological dramas during celebrations of different religious cum social festivals.

After all there are feelers in their society too that the modesty and gravity of their traditional songs and dances be preserved at all costs for which there can be no substitutes.

viii) Brief description on religious, historical, Archaeological and places of tourist interest

**Pasighat:** Pasighat, the district headquarters is the oldest town in Arunachal Pradesh. It was established by the British in 1911. It is located on the banks of the Siang river. It offers tourism activities such as bird watching, grass land safari, water sport and trekking. The district also has the oldest school in the State which came to be known as Independence Golden Jubilee Govt. Higher Secondary School(IGJGHS) established in 1918 by the British administration.

**Siang River Bridge:** Siang River Bridge is located over river Siang at Ranaghat, Pasighat, Arunachal Pradesh. The foundation stone of the bridge was laid by former Prime Minister Rajiv Gandhi during 1988. It is one of the most beautiful recreational spot.

**Dr. Daying Ering Wild Life Sanctuary:** It is a green habitat located around 13 km away from Pasighat. The sanctuary is home to various unique species of plants, birds and animals such as hog, deer, hispid, hare, floricans, reptiles and migratory birds.

**Kekar Monying (Black Rock):** A mountain cliff near Rottung is an important historical place because it was here that the Adi tribes put up a strong resistance against the british rule in 1911.
The war was a part of a punitive expedition undertaken by the British for murder of Noel Williamson, a Political Officer by Matmur Jamoh, a native of Yangrung village.

**Sirki Water Falls:** It is situated 5 km away from Pasighat and is an ideal place for trekking, fishing and outings.

**Komsing:** A memorial stone of Sir Noel Williamson, a Political Officer, who was killed by Narmi Jamoh and others during the british colonial rule.

### (ix) Scope of Village and Town Directory

#### Village Directory 2011 Census

The Village Directory is being compiled for both inhabited and un-inhabited villages. In the village directory both private and government facilities/institutions have been given. In case of un-inhabited /depopulated villages, the location code number, name and area of the village is being given universally in Village Directory and Village PCA. The columns relating to the amenities and land use pattern, etc. being left blank and it will be noted against the name of the village that it is un-inhabited/depopulated. The Appendices to Village Directory and Inset Tables based on village Directory data are also prepared for inhabited villages.

In the Village Directory format for 2011 Census there are 121 columns and the details thereon are as follows:

- **Columns 1 : Serial Number:** Self explanatory. All the villages within the CD block are presented serially in the ascending order of their location code number.

- **Columns 2: Name of village:** Self explanatory. The names of the villages are shown against this column. This also includes the forest and uninhabited villages.

- **Columns 3: Location Code Number of village:** The location code numbers of the villages are shown against this column.

- **Columns 4: Area of the Village:** The area of the villages has been given in hectares.

- **Column 5: Total Population:** The total population of the village as per 2011 Census has been given against this column.

- **Column 6: Number of Households:** The numbers of households as per 2011 Census have been given in this column.

- **Amenities:** The availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the Village Directory. Wherever the amenities are not available in the village, the distance range code viz; ‘a’ for <5 Kms, ‘b’ for 5-10 Kms and ‘c’ for 10+ Kms of the nearest where facility is available is given. Column wise details are given below:

- **Columns No. 7 : 20 Educational Facilities:** All the different educational facilities available in the village have been given under these columns. Nursery/LKG/UKG classes are included in Pre-Primary Schools, Classes up to class V included in Primary School; Classes from VI to VIII are included in the Middle school. Classes from IX and X included in Secondary School. Classes from XI and XII are included in Senior Secondary School. In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of
primary and middle schools, respectively. The information on the entire educational institutes is given under these columns.

**Columns No. 21 to 38 Medical Facilities**: All the different medical facilities available in the village have been given under these columns.

**Columns No. 39 to 46 Drinking Water**: The information on availability of various types of the drinking water facility within the village has been given under these columns.

**Columns No. 47 to 50 Availability of Toilet and others**: The information on availability of toilet and Bio-Gas etc. available in the village has been given under these columns.

**Columns No. 51 to 67 Communication (Post & Telegraph and Transport)**: The information on communication and Post Office, Sub-Post Office, & Telegraph Office, Village PIN Code number, Phone-Landlines, Mobile Phone, Private Courier Facility, Internet Café, etc; available in the village has been given under these columns. The information on all various transport facilities whether public/private transport like Bus, Railway Station, or Navigable waterways, Taxi, Van, Tractors etc. available in the village has also been given under these columns.

**Columns No.68 to 79 Village connected to High Ways, Village Roads, Banks and Credit Societies**: The information on all roads connected to village has been given under these columns. These include National Highway, State Highway, District Roads and other district roads connected to the village, Pucca roads, Kutchcha Roads, Water Bounded Macadam Roads, Navigable Water Ways and Foot Paths has been given under these columns. Further, the information on availability of banks, ATM and Agricultural Credit societies in the village has been given under these columns.

**Column No. 80 to 96 Miscellaneous Facilities**: The information on various miscellaneous facilities available in the village has been given under these columns. These includes Self -Help Group, Public Distribution Shop (PDS), Mandi /Regular Market, Weekly Haat, Agricultural Marketing Society, Nutrition Centre(ICDS),Anganwadi Centre, ASHA, Community Centre, Sports Fields, Sports Club/Recreation Centre, Cinema/Video Halls, Public Library, Public Reading Room, News Paper Supply, Assembly Polling Station, Birth and Death Registration Office.

**Columns No. 97 to 100 Electricity**: Availability of Power Supply in the village, whatever may be the form of its use has been given in these columns. These include Electricity for Domestic Use, Electricity for Agriculture Use Electricity for Commercial Use, and Electricity for all purpose Domestic Uses.

**Column No. 101 and 102 Nearest Town**: The name of the nearest town along with the distance range code has been in these columns.

**Land use and Irrigation**: The land use pattern in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the following 9 categories.

(i) **Column No. 103 Forests**: This includes all lands classed as forest under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests remain included under the forest area.

(ii) **Column No. 104 Area under Non-Agricultural use**: This includes all lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agriculture.
(iii) **Columns No. 105 Barren and Un-Cultivable land**: This includes all barren and uncultivable land like mountains, deserts, etc. land which cannot be brought under cultivation except at an exorbitant cost should be classed as uncultivable whether such land is in isolated blocks or within cultivated holdings.

(iv) **Column No. 106 Permanent Pastures and other Grazing Lands**: This includes all grazing lands whether they are permanent pastures and meadows or not. Village common grazing land is included under this head.

(v) **Column No. 107 Land under Miscellaneous Tree Crops, etc.**: This includes all cultivable land which is not included in ‘Net area sown’ but is put to some agricultural uses. Lands under Causing trees, thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under ‘Orchards’ are classed under this category.

(vi) **Column No. 108 Culturable Waste Land**: This includes lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category at the end of the five years.

(vii) **Column No. 109 Fallow Lands other than Current Fallows**: This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

(viii) **Column No. 110 Current Fallows**: This represents cropped area, which is kept fallow during the current year. For example, if any seeding area is not cropped against the same year it may be treated as current fallow.

(ix) **Column No. 111 Net Area Sown**: This represents the total area sown with crops and orchards. Area sown more than once; in the same year is counted only once.

**Column No. 112 Total Irrigated Land Area**: It includes all land which is cultivable and irrigated by any source of irrigation. The total irrigated area of the village has been given under this column.

**Column No. 113 Total Un-Irrigated Land Area**: Un-Irrigated area includes all land which is cultivable but not irrigated by any source of irrigation. The total un-irrigated land area of the village has been given under this column.

**Column No. 114 to 118 Area Irrigated by Source**: The area irrigated by various source of irrigation in the village have been given under these columns. The different source of irrigation facilities available in the village are as follows:

(i) Canals (C) - Govt. or Pvt.,
(ii) Wells/Tube-wells (W/TW),
(iii) Tanks/Lake (T/L),
(iv) Waterfall (WF) and
(v) Others (O)

**Columns No.119 to 121 Three Most Important Commodities Manufactured**: The names of three most important commodities manufactured in the village are indicated in this column.

**C.D. Block level Totals of the Village Directory**: 

55
At the end of entries for the Village Directory of each C.D. Block, the totals of different columns are being given wherever possible. However, in case of some of the columns, it may not be possible to work out the C. D. Block level totals, in such cases the particular of relevant columns are being left blank against C. D. Block level.

**Appendices to Village Directory**: The Village Directory also includes the following appendices:

- **Appendix I**: Summary showing total number of villages having Educational, Medical and other amenities in villages – C.D. Block level.
- **Appendix I A**: Villages by number of Primary Schools.
- **Appendix I B**: Villages by Primary, Middle and Secondary Schools.
- **Appendix I C**: Villages with different sources of drinking water facilities available.
- **Appendix II**: Villages with 5,000 and above population which do not have one or more amenities available.
- **Appendix III**: Land utilization data in respect of Census towns.
- **Appendix IV**: C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.
- **Appendix V**: Summary showing number of Villages not having Scheduled Caste population.
- **Appendix VI**: Summary showing number of Villages not having Scheduled Tribe population.
- **Appendix VII A**: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.
- **Appendix VII B**: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.
- **Appendix VIII**: Number of villages under each Gram Panchayat (C.D. block wise).

**Note explaining the abbreviations used in Town Directory 2011 Census**:

**Statement I**: Status and Growth History

- **Column 1**: Serial Number: Self explanatory

- **Column 2**: Class, Name and Civic Status of Town: The Class is presented according to population of the towns in 2011 Census as follows:

<table>
<thead>
<tr>
<th>Population</th>
<th>Class</th>
<th>Population</th>
<th>Class</th>
</tr>
</thead>
<tbody>
<tr>
<td>100,000 and above</td>
<td>I</td>
<td>10,000 – 19,999</td>
<td>IV</td>
</tr>
<tr>
<td>50,000 – 99,999</td>
<td>II</td>
<td>5,000 – 9,999</td>
<td>V</td>
</tr>
<tr>
<td>20,000 – 49,999</td>
<td>III</td>
<td>Below - 5,000</td>
<td>VI</td>
</tr>
</tbody>
</table>

The following abbreviations are used to denote the Civic Status of the town.

<table>
<thead>
<tr>
<th>Civic Status</th>
<th>Codes</th>
<th>Civic Status</th>
<th>Codes</th>

</tr>
</tbody>
</table>
Column 13 (System of Water Storage):

(i) Over Head Tank OHT
(ii) Service Reservoir SR
(iii) River Infiltration Gallery RIG
(iv) Bore Well Pumping System BWP
(v) Pressure Tank PT

The information on 2 major source of water supply is given in column 12 and the system of water storage with capacity against each in kilo-litres (in bracket) is presented in column 13.

Columns 14 Fire Fighting Service: In case the fire fighting service is available in the referent town, ‘yes’ is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Columns 15 to 19 Electrification (Number of connections): Different types of electric connections have been shown in these columns, i.e., Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement IV: Medical Facilities, 2009:

Columns 1 - 2 Serial number and Name of Town: Self explanatory

Columns 3 to 13: The number of various medical institutions such as Hospitals, Dispensaries, Health Center, Family Welfare Center, Maternity and Child Welfare Center, Maternity Homes, T.B. Hospital/clinic, Nursing Homes, Charitable Hospital/Nursing Home, Mobile Health Clinic and Others as available in the town, are indicated in these columns (along with number of beds in brackets). If a medical facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Column 14 Veterinary Hospital: The Number of Veterinary Hospitals available in the town is given in this column.

Column 15 Medicine Shop: The number of Medicine shops available in the town is given in this column.

Statement V: Educational, Recreational and Cultural Facilities, 2009:

Columns 1 – 2 Serial number and Name of town: Self explanatory

Columns 3 to 15 Educational Facilities: The information on number of Primary school, Middle school, Secondary school, Senior Secondary school, Arts/Science/Commerce colleges (of degree level and above), Medical colleges, Engineering colleges, Management Institute/Colleges, Polytechnics, Recognized Shorthand, Typewriting and vocational training Institutions, Non-formal Education Center (Sarva Shiksha Abhiyan Center), Special School for disabled and Others available in the town, are indicated in these columns. If an educational facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Columns 16 to 23 Number of Social, Recreational and Culture Facilities: The information on No. of Home Orphanage, Working women’s hostels (with No. of seats in bracket), No. of Old Age Home, Stadium, Cinema Theatre, Auditorium/Community halls, Public libraries and Reading rooms available in the town are given under these column.
Statement VI: Industry and Banking 2009:

**Columns 1 – 2 Serial number and Name of town**: Self explanatory

**Columns 3 to 5 Names of three most Important Commodities Manufactured**: The names of three most important commodities manufactured in the town are given under these columns.

**Columns 6 to 8 Number of banks**: The number of banks available in the referent town both Commercial and Co-operative banks are recorded against these columns.

**Columns 9 & 10 Number of Agricultural and Non Agricultural Credit Societies**: The number of Agricultural and Non Agricultural Credit Societies available in the referent town are given in these columns.

Statement VII: Civic and other Amenities in Slums, 2009:

This statement VII provides information on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.
VILLAGE AND TOWN DIRECTORY
**Brief note on Village and Town Directory**

The Village and Town Directory present data on amenities available to the people in each village and town. It is the most credible source of information. It is the only source of primary data in the village, town and ward level. The village directory also indicates the land use statistics in respect of each village. The data included in the village and town directory are one of the most important compilation of Census, as the data presented are considered useful by scholars, planners, business people, industrialists. It provides valuable information for planning and formulation policies for Central and State Government.

The scope and coverage of Village Directory of 2011 DCHB, has been widened by including a number of amenities in addition to those of 2001. The format of village directory is basically on the pattern canvassed in 2001 Census. The Village Directory is being compiled for both inhabited and uninhabited villages. In the Village Directory both government and private facilities and institutions have been given. The 2011 village directory consists of 121 columns. The village directory gives for each village particulars about the availability of different amenities such as education, medical, drinking water, post, telegraph, bus service, credit societies, mobile coverage, transportation, power, availability of toilets, etc. Column No 80-96 gives information on various miscellaneous facilities available in the village such as self help groups, public distribution system, mandis, regular markets, weekly hat, ASHA, community centre and so on. In addition to the121 columns, the village directory also includes Appendix No 1 to Appendix No VIII.

**Town Directory Statement**

The Town directory consists of seven statements. All these statements are almost similar to those adopted in 2001 census.

**Section I – Village Directory**

(a) List of Villages merged in towns and outgrowths at 2011 Census
   Not a single village has been merged in towns and outgrowths at 2011 Census
(b) C.D. Block Maps (Showing) Tehsil boundary
(c) Alphabetical list of villages along with location code 2001 and 2011
(d) C.D. Block wise Village Directory in prescribed format.
(e) Appendices to Village Directory.

**Section II- Town Directory Statements.**
