PREFACE

Districtwise village statistics have been published at most of the Censuses. A list showing the population of villages in each district was published after the 1891 Census. No such list was brought out in 1901. In 1911 Village Directories were prepared for all districts, but could be published only for thirteen on account of the outbreak of the First World War. At the 1921 Census they were published for all districts in the form of District Census Statistics. In 1931 they were compiled for all districts, but were not published owing to financial stringency, leading to loss of valuable data. At the 1941 Census even though restricted tabulation was undertaken on account of the Second World War, yet the utility of District Census Statistics was recognized and they were published. At the Census of 1951 two volumes were brought out for each district—the District Census Handbook and the District Population Statistics. Government have decided to continue the publication of District Census Handbooks. The 1961 District Census Handbooks contain more data than ever published before. Village Directories, besides giving the population of villages by industrial categories, also contain useful information about schools, hospitals, post offices, etc.

As revised District Gazetteers are going to be published, introductory matter in the District Census Handbooks has been given in brief to avoid duplication.

Information for the District Census Handbooks was collected mainly from three sources *viz.*, State Tabulation Office, District Officers, Heads of Departments and their district level officers. In all cases confirmation has been obtained from Heads of Departments concerned. I am extremely grateful to District Officers and the various Heads of Departments for their wholehearted co-operation in furnishing the desired information.

It is hoped that the District Census Handbooks will prove useful to the various Government departments and scholars.

The printing of the Handbooks commenced from August, 1963.

INTRODUCTION

1. The District

1. The newly formed district of Uttar Kashi has been constituted from the old Rawain tahsil of district Tehri Garhwal. The district is perched at the extreme northern edge of the State and on the western corner of the newly formed Uttarakhand division. On the north it touches Himachal Pradesh for most of the distance and Tibet in the rest. To the west it is bounded by district Dehra Dun, in the south by district Tehri Garhwal and in the east by district Chamoli. The area according to the Surveyor General, India is 7,816 Sq. Km. (3,018 Sq. miles).

2. The district comprises 4 tahsils Pura-ula, Rajgarhi, Dunda and Bhatwari. The tahsil-wise areas are not available. But from the map it can be said that Bhatwari is the largest tahsil and Dunda the smallest. The district has only one town Uttar Kashi N.A. which was accorded the urban status in the 1951 Census.

3. Roads provide the main communication system for this hilly border district. It lies about 94 miles from the rail head at Rishikesh. The motor road from Tehri to Uttar Kashi, though quite smooth, can sustain single way traffic. Bhalldiana, 13 miles from Tehri is an important junction providing link to Lamgaon through Bhalldiana-Lamgaon

Road. Dharasu, at a distance of 27 miles from Tehri is the other important station providing way to Barkot and Yamnotri through Dharasu-Barkot motor road. It is about 10 hours journey by bus from Rishikesh to Uttar Kashi. The 18 miles long motor road from Uttar Kashi to Bhatwari has been constructed recently.

4. The district lies in the upper spurs of the Himalayan Range, comprising seemingly endless series of ridges and valleys. Each ridge or spur leads up to another in a tortuous chain and each valley is a stream bed. The heights of the mountain peaks near the Indo-Tibetan border range from 20,000 to 23,000 feet above the sea level. Generally the upper parts of the ridges that bound the valley are forest clad and on the sloping hill sides lie a chain of sparsely populated villages with cultivation interspersed with patches of bush or inferior forest. The general direction of the main ridges is from north-east to south-west radiating from the lofty peaks. Both the two most important rivers of the State originate in this district. The Ganga, initially called Bhagirathi rises in a glacier called Gaumukh at a height of 13,570 feet. The Yamuna rises from west of the Bandarpunch peak. Yamunotri and Gangotri near the sources of the two rivers, are important places of pilgrimage.

IV

5. The important rivers of the district are the Bhagirathi (Ganga), and the Yamuna. The other rivers are the tributaries Jahnvi of Bhagirathi (Ganga) and Kamal, Rupin, Supin (Tons), Hanuman Ganga, and Kedar Ganga.

6. Three distinct groups of rocks occur in this district, pertaining to the three principal mountainous zones. They are (i) the sedimentary rocks in the lesser Himalayas, (ii) metamorphics in the axis of the great Himalayan ranges and for some distance on its sides, and (iii) Tibetan groups in the troughs immediately behind the axis of the great Himalayan range. Soap stone is reported in good quantity near the village Bangaon in Reserve Forest area in Dharasu Range. No other minerals have come to notice so far.

7. The climate varies according to heights. It is quite diversified ranging from tropical to severe cold. Valley areas are quite hot during summer while places at high altitudes record a temperature below freezing point during winters. Snow falls as low as at 4,000 feet in the winter. The river valleys experience intense damp cold and mist, succeeded by considerable heat as the day advances. The resultant conditions are favourable to fever. The temperature and rainfall data are not available. The rains, however, break earlier than in the plains and are heavier at the foot of the hills and the foot of the snows.

8. Forests abound in this hill district and are controlled by the Forest Division, Uttar

Kashi. The forest produce varies according to the altitudes from 4,000 to 9,000 feet Chir and Deodar and from 10,000 to 15,000 feet *Gulmashi*, *Darmol*, *Kora*, *Bagra*, *Khurcha*, and *Paran*. The *bogiyals*, *Kedarkanta*, daisy, butter cups, Michael Nals, trefoil, anemona etc. are the varieties of flora which make this area a florists paradise. Tahsil Puraula has the famous valley of flowers known as '*Hari ki Dun*'.

9. The important wild animals found in the forests are Tiger, black bear, deer, monk deer, *Thar*, black monkey and porcupine. There are also beautiful birds with beautiful and soft feathers which fetch good price. They are peasants, green pigeon, black partridges, *Chakor*, *Mural* and *Koklan*.

10. In the greater part of the district there are two harvests *rabi* and *kharif*. The chief crops of the *rabi* are wheat and barley and that of *kharif* rice, *jhangora* and *mandua*. Potatoes are also largely grown.

2. Statistics

A—General Population

1. The district occupies the 6th position in area and last position in population in the whole State. The table giving variation in population since 1901 shows that there has been an increase in population since 1931, the percentage increase being the highest during

the decade (1951-1961). The population rose by 122,836 during this period giving a percentage increase of 15·8 which is lower than the State average of 16·7. The order of tahsils by population is Dunda, Bhatwari, Puraula and Rajgarhī.

2. The area of this district according to the Surveyor General of India is 7,816 Sq. Km. (3,018 Sq. miles). Accordingly the density of population is 15 per Sq. Km. (41 per Sq. mile).

3. The district has 671 villages of which 662 are inhabited and 9 un-inhabited. The average population per inhabited village is 182. Most of the villages are small sized i.e. with population less than 500. The number of such villages is 638 (96·4 per cent). The percentage of medium sized villages with a population between 500-1,999 is 3·6. There are no large sized villages with a population of 2,000 and over. More than four-fifths of the rural population (87·4 per cent) lives in small sized villages with a population of less than 500. The remaining 12·6 per cent of population resides in slightly bigger villages having population between 500-1,999.

4. There is only one town of class VI having population of less than 5,000 in the district. The percentage of urban population in the district is only 2·2.

5. The sex ratio i.e. number of females per 1,000 males in 1961 is 964 in the district,

distinctively higher than the State average of 909. The sex ratio in its rural areas is 977 and in its urban areas 517. The disparity between the two is noteworthy.

6. General Population Tables A-I to A-IV and their appendices have been reproduced in the volume.

B-Economic

1. **Workers**—The population of the district is distributed between workers and non-workers in the ratio of 69·0 : 31·0. It is nearly in reverse order to the corresponding ratio of workers and non-workers in the State as a whole (39·1 : 60·9). Among workers 87·5 per cent work as Cultivators and Agricultural Labourers. Next come Household Industry and Manufacturing claiming 3·4 and 0·2 respectively. In other categories the number of workers is very small. Female participation is highly significant in the district. Female workers comprise 48·5 per cent of the total workers. Female participation in agricultural and non-agricultural activities is 97·2 per cent and 2·8 per cent respectively.

2. Of the rural population, 69·4 per cent are workers and 30·6 per cent non-workers. The corresponding figures for the urban are 52·2 and 47·8 respectively. Thus, the proportion of workers is smaller in towns than in villages. Among rural workers 88·5 per cent are Cultivators and Agricultural Labourers, and workers engaged in non-agricul-

VI

tural activities account for 11·5. There is a preponderance of non-agricultural workers in the urban, their percentage being 69·9 as against a percentage of 30·1 in agricultural sector. The important non-agricultural categories of workers in the urban area are Other Services, Household Industry and other Manufactures and Construction. The percentage of workers in Other Services is 38·4, in Household Industry and other Manufactures 11·5, and in Construction 10·0.

3. The largest number of workers is in the age-group 15-34 accounting for 48·4 per cent followed by the next age-group 35-59 which accounts for 37·1 per cent. The percentage of workers below the age of 15 is 8·4 and that in the age 60 and over is 6·1. The population of workers in lower and higher age-groups is quite small.

4. The largest number of persons in Industries other than Cultivation is in construction and maintenance of roads, Railways, bridges and tunnel (2,115), followed by Production and Rearing of Livestock mainly for milk and animal power such as cow, buffalo, goat etc. (1,235) and felling and cutting of trees and transportation of logs (999). Occupationally the bulk of the workers comprises General Labourers (2,060), Farmers and Farm-managers, animals, birds, and insects rearing (1,070) and Tailors, Dressmakers and Garmentmakers (574).

5. **Non-workers**—These constitute 31·0 per cent of the total population. The per-

centages of non-workers among the males and females are approximately equal, at 49·8 and 50·2 respectively. Mostly the non-workers (83·7 per cent) are in the age-group 0-14, being mostly infants and dependents. In all other age-groups females are predominantly engaged in household duties. The distribution pattern of non-workers among males and females is very dissimilar. Among male non-workers 30·3 per cent are full-time students and 68·5 per cent dependents who jointly account for 98·8 per cent, as against the corresponding figures among female non-workers are 2·6, 88·2 and 90·8 respectively. Higher percentage of dependents among males is explained by their absence from household duties who claim a negligible percentage as against 8·9 per cent among females.

6. The more important General Economic Tables of the B-Series have been reproduced.

C—Social and Cultural

1. **Literacy**—The percentage literacy in the total population is 15·6 as against the State average of 17·7. The district ranks 37th in literacy in the whole State. The population of the district is progressive as the percentage of persons in young and very young age-groups is 31.8 as against a small percentage of 10.4 of elderly persons (55 years and above).

4. The percentages of never married, married and widowed or divorced persons are 38.4, 54.0, and 7.6 respectively. Among males and females aged 35 and over, 3.6 per cent of the males and only 0.3 per cent of the females are never married. In the rural and urban areas separately, the

respective percentages are males 3.2 and females 0.2 in the former and males 16.8 and females 0.4 in urban. The percentage of males and females of ages 0-14 returned as married is 0.8 and 2.7 respectively. This shows early marriage is still prevalent.

VILLAGE DIRECTORY

DEFINITIONS OF COLUMN HEADINGS OF THE VILLAGE DIRECTORY

Village ordinarily means a revenue *mauza*, whether inhabited or uninhabited. If some structures and population come into existence at a place which lies within the boundaries of two or more revenue *mauzas*, the locality has been treated as a separate Census Village and the portions covered in it are excluded from the revenue *mauzas* concerned.
