STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking features. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

A—General Population Tables:

There are four main tables and three appendices in this series.

Table A-1.—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

Occupied Residential House.—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

Town Group.—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

Houseless & Institutional Population:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

Class of Towns.—Towns are classified into six classes as below according to their population sizes:—

Class	*Population range*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Below 5,000

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

The Working Categories:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

	CENSUS WORKING CATEGORY	CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC
I	Workers in cultivation	Minor Groups 000, 001, 002, 003, 004,
II	Agricultural Labourers ...	The same as in I above
III	Workers in mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities	Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry)
IV	Workers in household industry ...	Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale
V	Workers in manufacturing other than household industry ...	Divisions 2 & 3
VI	Workers in construction ...	Division 4
VII	Workers in Trade and Commerce ...	Division 6
VIII	Workers in Transport Storage and Communications ...	Division 7
IX	Workers in other services ..	Divisions 5, 8 & 9

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

Class of Worker:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

Non-workers:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

Education Levels:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.*, the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.*, fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience".

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

B—(ii) Household Economic Tables:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction:—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas:—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services:—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade:—	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	**999**

APPENDIX—II

NATIONAL CLASSIFICATION OF OCCUPATIONS

(Code Structure)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)

75 Occupational Groups (two-digit code numbers)

11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—

- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—

- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—

- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists

- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—

- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—

- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—

- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.
- 0X4 Geographers
- 0X3 Librarians, Archivists and Related Workers:

1 *Administrative, Executive and Managerial Workers*:

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers:*

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations*:

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified*:

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

- 793 Cement Finishers and Terrazzo and Mosaic Workers
- 794 Hut Builders and Thatchers
- 795 Well Diggers
- 799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
- 800 Type-setting Machine Operators
- 801 Compositors
- 802 Proof-Readers and Copy Holders
- 803 Printers (Paper)
- 804 Printers (Textile)
- 805 Photo-Litho Operators, Photo-lithographers
- 806 Engravers, Etchers & Block Makers (Printing)
- 807 Stereotypers
- 808 Book Binders
- 809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
- 810 Furnacemen, Kilnmen and Ovenmen
- 811 Potters, and Related Clay Formers
- 812 Blowers and Benders, Glass
- 813 Moulders and Pressers, Glass
- 814 Grinders, Cutters, Decorators and Finishers
- 815 Pulverisors and Mixers, Cement, Clay and other Ceramics
- 819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
- 820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
- 821 Crushers and Pressers, Oil Seeds
- 822 Dairy Workers (Non-Farm)
- 823 Khandsari, Sugar and Gur Makers
- 824 Bakers, Confectioners, Candy and Sweetmeat Makers
- 825 Makers of Aerated Water and Brewers
- 826 Food Canners, Preservers and Related Workers
- 827 Butchers
- 828 Coffee and Tea Blenders and Related Workers
- 829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
- 830 Batch and Continuous Still Operators
- 831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
- 832 Crushers, Millers and Calenderers Chemical and Related Processes
- 833 Paper Pulp Preparers
- 834 Paper Makers
- 839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
- 840 Curers, Graders and Blenders, Tobacco
- 841 Cigarette Machine Operators
- 842 Cheroot, Cigar and Bidi Makers
- 843 Snuff and Zarda Makers
- 849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
- 850 Basketry Weavers and Related Workers
- 851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
- 852 Plastics Products Makers
- 853 Tanners, Fellmongers, Pelt Dressers and Related Workers
- 854 Photographic Dark Room Workers
- 855 Makers of Musical Instruments and Related Workers
- 856 Paper Products Makers
- 859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
- 860 Checkers, Testers, Sorters, Weighers and Counters
- 861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
- 870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

9 *Service, Sports and Recreation Workers.*

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

INTRODUCING THE DISTRICT

by

G. N. Tiwari

Deputy Superintendent of Census Operations,
Madhya Pradesh

Situated on the Satpura plateau between 21° 28' and 22° 49' north and 78° 10' and 79° 24' east in the southwest corner of Jabalpur division, Chhindwara district extends from the Nagpur plain in Maharashtra in the south to the Narbada valley in the north. The present territorial constitution of the district dates back to 1st November 1956 when the states were reorganised. In shape, the district roughly corresponds to a quadrilateral; in fact the quadrilateral formed by joining the north-eastern, north-western (this almost corresponds to the place where the boundary of the district meets those of the Betul and Hoshangabad districts) south-western (the point where the boundary of the district meets the boundaries of Nagpur and Amrawati districts) south-eastern (the point at which river Pench leaves the district and enters Nagpur), extremities of the district exclude a very small portion of the district. The district is flanked by the Satpura plateau districts o Betul and Seoni on the west and east respectively; the Narbada valley districts of Hoshangabad and Narsimhapur make its boundary on the north, the former to the north-west and the latter to the north-east; while the district of Nagpur in Maharashtra makes up the bulk of Chhindwara's boudary in the south. A small part of the south-western boundary of the district abuts on Amraoti district of Maharashtra. With an area of 4,565 square miles, it ranks tenth in the State, containing 2.67% of its area. Its area is equal to two-third of the area of Wales in United Kingdom. As regards population however, its rank in the State ascends by two places, and by one place as regards its 1951 rank. Its 1961 population of 785,535 persons is 2·43 percent of the State population, and is higher than the average population of a district in the State (752,847) by 4·3%. Its population ranges between ± 10% of the populations of Morena, Rewa, Sagar, Balaghat, Shahdol, Indore and Mandsaur districts, but in respect of area the comparability applies to Morena only. To give two other useful comparisions, the biggest district in the State (Bastar) is roughly 3½ times as big as Chhindwara, while the most populous Bilaspur has roughly 2½ times as many inhabitants as the district. In its turn, Chhindwara is about 6 times as large in area, and 4 times in population, as Datia, which is the smallest district in the State in respect both of area and population. The district takes its name from the headquarters town, which in its turn is believed to be derived from *Chhind* or date-palm tree.

The district today has the same territorial constitution as it had before the year 1931. It consists of three tahsils Chhindwara and Amarwara in the north and west, and north and east respectively, and Sausar in the south. Each tahsil is also a sub-division for revenue and general administration purposes. The administrative pattern of the district is similar to that obtaining in other parts of the State and hardly merits separate discussion. For judicial administration the district comes in the jurisdiction of a District and Sessions Judge with headquarters at Chhindwara. Judiciary has completely been separated from the executive in the district so that the exercise of judicial functions is now solely in the hands of judicial officers and not in the hands of revenue officers The district has an extensive forest area, and is divided into three forest divisions, each in charge of a Divisional Forest Officer.

Physical Aspects *

The district is more or less divided in to

* Extracted from Settlement Reports and District Gazetteer.

three natural regions, corresponding to three steps ascending from south to north. The lowest step has about the same elevation as the Nagpur plain and forms the bulk of Sausar tahsil. The second step consists of the central portion of the district comprising the southern portions of Chhindwara and Amarwara (corresponding roughly to the ex-khalsa area) and the northern part of Sausar; this may be called the Satpura plateau proper, and is similar to the other plateau districts Betul and Seoni. The third step forms the northern part of the district and consists of a confusion of plateaus and valleys, which are at the highest level of the Satpuras.

Hill Features *:

The principal hills of the district include (i) the ranges forming the southern edge of the Satpura plateau rising steeply from the level of the Nagpur plain in the Sausar tahsil; (ii) the hills rising from the central plateau to the high elevation of the ex-jagir areas of the district, and (iii) the hills by which the higher plateau of the Satpura comes down to the level of the Narbada valley. Besides these main ranges, small hills are scattered about in all parts of the level lands. Thus, an irregular mass of somewhat lower hills lies along the border of the district with Nagpur. A branch of this range goes towards the north-east, and on the north of river Jam it broadens out into an extensive mass of hills which rise to the level of the Satpura plateau. This mass of hills is flanked on the west by the Nagpur-Itarsi road and on the east by the Nagpur-Chhindwara road. Towards the east, beyond the Nagpur Chhindwara road, the line of hills turns southwards towards the Khamarpani plateau which is thrown south-wards from the main bulk of the plateau.

The lower Satpura plateau which consists of the southern halves of Amarwara and Chhindwara tahsils (ex-Khalsa area) and northern parts of Sausar, consists of low hills scattered over nearly the whole of it. These are occasionally single flat-topped blunt-ended trap hills, but more often little irregular groups. However there are four level stretches of plain, not much cut up by the hills. These are (i) the plains around Chaurai, mostly to the north of the Chhindwara-Seoni road (infact this is a continuation of the *haveli* tract of Seoni district); (ii) the Chand valley (iii) the Saoli Mokher plain and (iv) to some extent the plain round Bhatoria.

To the north of the lower Satpura plateau forming the boundary between the former Khalsa and jagir areas of the district, is a more or less clearly defined line of ghats, running almost in a line with a slight trend to the south. The area north of the ghats is about 75 miles long (east-west) and 30 miles broad (north-south). The most prominent feature of this area is its southern base, a solid range of hills about eight miles broad, and more than 3,000 feet high, running along its entire length. The central and northern parts of this area are less uniform. Towards the east, the southern ranges extend northwards, by a broken mass of hills, which go on increasing in height as one goes northwards till one reaches the northern ridges, which form the boundary between the Satpura plateau and the Narbada valley. These ridges in the east are separated from the Pachmarhi plateau of Hoshangabad district, which has the same elevation, by the deep Denwa valley. The ex-jagir area, forming the highest step of the terrain in the district, thus consists of an oblong block of hills, cut through on the north-west by a valley of the horse shoe shape.

Rivers :

The highest ridge of the Satpuras which lies from east to west in the north of the district forms the watershed between the Narbada valley and portions south of it. The general slope of the district is southwards. Only Shakkar, Sitarewa, Dudhi, Denwa and Tawa flow northwards, the first three in Narsimhapur district and the last two into Hoshangabad district. All these rivers rise in the former *Jagirs* in the north of the District. The Chief rivers of the District are the KANHAN, the PENCH, and their tributaries, the JAM and the KULBEHRA. The Kanhan rises in the north-west in the former Bhardagarh *jagir* and runs southwards through the western part of Chhindwara tahsil. Before finding its way to the Sausar plains, it turns east and runs in that direction for sometime

* Extracted from Settlement Reports and District Gazetteer.

emerging into the plains at the point where the Nagpur–Chhindwara road begins to climb the ghats. After crossing the Nagpur Chhindwara road it flows through the Sausar plain in a south-easterly direction, and after running along the boundary of Sausar tahsil for some miles, leaves the district at its south-eastern corner. The Kanhan eventually joins the Wainganga river. The Jam which flows mostly through Sausar tahsil is a tributary of the Kanhan. The second most important river Pench, takes its rise from the former Matur jagir and enters the erstwhile *Khalsa* portion of Chhindwara tahsil from north-west. It thus flows to the east and turns sharply to the south (with a slight inclination towards west) at the point where it meets the Seoni border. Thereafter, it runs along the boundary of Chhindwara first with Seoni and then Nagpur district. It leaves the district at the south-east corner of the Khamarpani tract and joins the Kanhan in Nagpur district. High grade coal occurs in the bed of this river. Kulbehra is a tributary of Pench; it rises near Umreth in Chhindwara tahsil, flows towards Chhindwara town whence turning southwards and flowing through the Mokher tract along top of the ghats it meets the Pench.

Flora and Fauna :

Flora :

Forests: On account of its extensive forest area, the district is divided into three forest divisions – the East Chhindwara Division consisting roughly of the eastern halves of Chhindwara and Amarwara tahsils, the West Chhindwara Division consisting of the western halves of these two tahsils, and the South Chhindwara Division in Sausar tahsil. Some important facts relating to these are given below:

	Name of Division	Number of ranges	Area in sq. miles		Remarks
			R. F.	P. F.	
	1	2	3	4	5
1	East Chhindwara Division	5	152.84	499.16	Dry deciduous type of pure teak and mixed forests.
2	West Chhindwara Division	5	162.85	568.82	Transition zone of teak and *sal* : Teak forest : 163.95 sq. miles, *sal* : 39.97 sq. miles – remaining is mixed forest.
3	South Chhindwara Division	5	346.60	148.89	Pure teak and *khair* forests occur, along with mixed forests.
		15	662.29	1,216.87	1,879.16 sq. miles.

The forests in all the divisions are of the tropical dry deciduous type; and teak is the most important specie found in all the divisions. The best quality teak however occurs in the South Forest Division, more particularly in parts of the Silwani and Sank and Kanhan ranges where teak forests of II-quality are also found. The common qualities of teak forests are IV-b to III. Mixed teak and bamboo forests also occur in Silwani, Kanhan and to a small extent in Borpani ranges. In the ranges of the other divisions, the teak forests contain principally teak trees with smaller proportions of other species. Pure crops of teak also occur rarely in these divisions. *Khair* occurs abundantly in the south Chhindwara division but only sparsely in the two northern divisions. *Sal* (*Shorea robusta*) is found extensively in the Tamia and Damua ranges (Denwa valley) of west Chhindwara division. An interesting feature in the West Division is occurence of transition zone of teak and *sal* where the two species are found growing together. The ex-jagir forests in the Amarwara and the Umreth ranges

* Compiled from notes furnished by Divisional Forest Officers.

contain also considerable number of *harra* trees. Besides these important species, the mixed forests in every part of the district contain–*sagon* (*Tectona grandis*), *bija* (*Pterocarpus marsupium*), *dhawra* (*Anogeissus latifolia*); *lendia* (*Largerstroemia parviflora*); *salai* (*Boswella serrata*), *tendu* (*Dispyosros Melanoxylon*); *tinsa* (*Ougenia dalbergioides*); *karil* (*Petalidium barlerioides*, occurs abundantly on hill slopes in Ankera and Sillewani ranges); *bhirra* (*Chloroxylon swietenia*); *bhosia* (*Bauhinia racemosa*); *jamun* (*Eugenia jambo-lana*), *pakar* (*Ficus infectoria*), *palas* (*Butea frondosa* – on heavy soil and frosty areas); *babul* (*Acacia arabica* – on heavy soil and frosty areas); *rohan* (*Soymida febrifuge*); *saj* (*Terminalia tomentosa*); *thuar* (*Euphorbia tirucalli*); *siris* (*Albizzia proca & lebbek*); *bhilma* (*Semecarpus anacardiun*); *bel* (*Aegle marmelos*); *ber* (*Zizyphus jujuba*); *dhawra* (*Grevia tillaefolia*); *ghont* (*Zizyphus xylopyra*); *gular* (*Ficus glomarat*). Found occasionally are *haldu* (*Adinis cordifolia*), *imli* (*Tamarindus indica*), *jamrasi* (*Elaeodendron glaucuin*); *kakai* (*Flacourtia ramontchil*), *mahua* (*Madhuca latifolia*); *pipal* (*Ficus religiosa*); *semal* (*Bombama labaricum*); etc. Particularly in the northern division are found in fair proportions *shisam* (*Dalbergia latifoila*); *kusum* (*Schleichera obesa*); *baheda* (*Terminalia belerica*); *achar* (*Buchanania lanzar*); *amaltas* (*Cassia fistula*); etc. *Koha or arjun* (*Terminalia arjuna*) occurs on the banks of streams and rivers in all parts of the district.

Fauna:

The district contains various wild species like tiger (*Panthera tigris*), leopard or panther (*Panthera pardus*), and jungle cat of the cat family; wolf (*Canis lupus*), jackal (*Canis aureus*), *lomri* (*Valpes bengalensis*), and *sonkutta* (*Cyon alpinus*) of the dog family; hyaena or *lakarbagha* (hyaena); sloth bear or *bhalu* (*Melursus ursinus*); wild boar or *suar* (*Sus cristatus*); black buck (*Antelope cervicapra*), fourhorned antelope (*Tetraceros quadricornis*); *chinkara* (*Gazzella bannetti*) of the antelope family; *sambhar* (*Rusa unicolor nigra*); spotted deer; wild buffalo (*Babulus buballis*); the Indian porcupine (*Hystrise lencura*); the common hare (*Lepus ruficandatus*) of the rodents; *nilgai*. The number of carnivora species is reported to be increasing in the west Chhindwara division where the herbivora ones are decreasing.

History:

The early history of the district is veiled in obscurity, and at best only conjectures can be formed on the basis of two inscriptions, one found at Dudia, 30 miles to the south-west of Chhindwara and the other at Nilkanthi, 14 miles south of Chhindwara; and similar inscriptions found in the Multai tahsil of Betul district and in Seoni district. Though the villages mentioned in the inscriptions belonging to the time of Maharaja Pravarsena II of Vakataka dynasty are not identifiable in the districts in which they were found, still it is not unlikely that the reign of the Vakataka kings[1] had extended to the Satpura plateau. This dynasty was ruling a territory which included the Satpura[2] plateau from about the third century A. D.

The second inscription discovered at village Nilkanthi was found on a pillar which appears to have formerly belonged to a temple, and though the inscription was much defaced, the name of king Krishna III of the Rashtrakuta[3] time could still be made out. This king belonged to the 7th Century A. D.. Inscriptions on plates[4] found at villages Tiwarkhed and Multai which refer to the reign of the Rashtrakuta dynasty, and the fact that the villages Tiwarkhed mentioned in the Tiwarkhed inscription is identifiable with Tiwarkhed itself shows almost conclusively that the Rashtrakutas dominated the Multai plateau and since the kingdom of this dynasty was at Malkhed in the former Nizam territory, naturally the intervening district of Chhindwara[5] must have belonged to them. The supremacy of the Rashtra-Kuta kings began, according to the District Gazetteer[6], about

1. Chhindwara Gazetteer, page 23.

4. Ibid. page 70 & 77.
5. Ibid page 82.
6. Ibid. page 25.

750 A. D. and lasted for two centuries and a quarter,' and it was during their predominance that 'the Kailasa temple at Ellora was built'. The Rashtrakutas were overthrown about 973 A. D., but the Nagpur country, and therefore also the territory now included in Chhindwara was apparently held by a prince of the line in subordination to the Chalukya Rajput dynasty until the end of the 11th century.

According to the District Gazetteer, the history of Chhindwara after the fall of the Rashtrakutas is again obscure, but the available evidence points to its being included in the domain of the kings of Kherla in Betul. The Gazetteer quotes the Persian Historian (1398) Farista to the effect 'that Narsingh Rai, Raja of Kherla, had great wealth and power, being possessed of all the hills of Gondwana and other countries[1] The Kherla kings were subjugated by the Bahmani kings of Gulbarga and Sholapur and were finally annexed to Malwa kings in 1433. It is however doubtful whether the Malwa kingdom extended to the Chhindwara district.

Gond Kings :

Local tradition points to a Gowli dynasty having been seated at Deogarh prior to the advent of the Gond dynasty there. According to the Settlement Report of the district (1867), the then jagirdars of Harrai and Sonpur and others ascribed the original grant of their lands to the Gowli kings, but nothing exists more than tradition. The semi-mythical Gond hero Jatba who founded the Gond dynasty of Deogarh is said to have taken service under the twin Gowli kings Ransur and Ghansur. For a full account of the tradition the Gazetteer may be seen. Jatba overthrew his Gowali masters and established himself on the Deogarh throne. The Ain-i-Akbari refers to Chatwa (Jatwa) while describing the Kherla Sarkar and this would show that Jatba was ruling about 1590 A. D. Jatba is said to have built the Deogarh fort and also those of Patan Saongi and Nagardhan. The most important of the Gond kings of Deogarh was however Bakhta Buland who was a contemporary of Aurangzeb, and under whose behest he adopted the Muhammadan faith under the name of Bakht Buland – 'of high Fortune.' Bakht Buland undertook the development of his territory and in his time the tract received a great infusion of Hindu cultivators and artisans. He also extended his dominions by acquiring from the Gond rulers of Mandla the territories of Seoni, Katangi, Chhapara and Dongartal; and Partabgarh and Saugarhi in Bhandara district were conquered for him by a Pathan adventurer Raj Khan. Bakhta Buland is also credited with the founding of the modern city of Nagpur on the site of some hamlets then known as Rajapur Barsa.

Bakht Buland resided at Deogarh above the ghats – which was the capital; but his son and successor Chand Sultan fixed his capital at Nagpur. The Kingdom prospered under the rule of Chand Sultan, but on his death in 1739, Wali Shah, said to have been an illigitimate son of Bakht Buland usurped the throne, and this set the train of dissensions which eventually led to the annexation of the kingdom by the Bhonslas. With the help of the latter the widow of Chand Sultan succeeded in restoring the kingdom to her sons Burhan Shah and Akbar Shah. Dissension however started between the two brothers, so that in 1743 Raghoji Bhonsla again intervened at the request of Burhan Shah and drove out Akbar Shah. All real power however now passed into the hands of the Bhonsla chief, and he retained Burhan Shah as a nominal king for reasons of policy.

Maratha Rule :

Till 1803, the Maratha administration of the territory was reported to be good and the country prospered. But in 1803 Raghuji II, who united with Scindhia against the East India Company, was defeated and by the treaty of Deogaon had to cede the provinces of Cuttack and Southern Berar to the British. It is from then on that the administration of the Marathas deteriorated. Heavy taxes were imposed and to make matters worse, the raids of Pindaris began at about the same time. In 1818, after the battle of Sitabaldi, Appa Sahib was deposed

1. Gazetteer page 26.
2. Ibid. page 27.

and forwarded to Allahabad in custody. On the way however he escaped to Mahadeo hills, where he was joined by the Pindari leader Chitu. With the help of the Gond chiefs, Appa Sahib made an attempt to recapture Deogarh but it was foiled. Similarly the attempts of Jagirdar Chain Shah of Sonpur to capture the fort of Chauragarh for his master failed; troops under Major O' Brien defeated and captured him and Appa Sahib escaped to the Panjab. At this time Raja Raghuji III was a minor and the Nagpur territories were administered from 1818 to 1830 by Sir Richard Jenkines. In 1830 Raghuji III was allowed to assume the reins of actual government himself. He died in 1853 without leaving heirs, and his territories were declared to have lapsed to the East India Company. Chhindwara district thus became a British territory in 1853.

Rainfall and Climate :

Rainfall is registered at the tahsil headquarters of Chhindwara, Sausar and Amarwara and at Tamia in Chhindwara tahsil, and Harrai and Chourai in Amarwara tahsils. Table 1.1 in part II of the Handbook gives rainfall in millimetres at each of these six stations from the year 1952 to 1960. The average rainfall at the six recording stations for the seven years 1952 to 1955 and 1957 to 1959 (the years 1956 and 1960 were excluded in calculating the average because in 1956 figures for the month of June are reported to be not available, while in 1960, the figures for October are reported to be not available for all the stations) is : Chhindwara 1113 mm. (44"); Sausar 1023 mm. (40"); Harrai 1222 mm. (48") and Tamia 1689 mm. (67"); Amarwara 1,067 mm. (42") and Chourai 1,195 mm. (47"). The average of these six stations, which may be called the district average is 48". (The average is apparently pulled up by the high rainfall in the north-west region of the District). The average rainfall is least in the plains of Sausar, but goes on increasing with the rising elevation as one goes north. Tamia which is at a high altitude receives the highest rainfall of 67". The low rainfall at Amarwara, which is considerably in the north of Chhindwara and Chourai is not amenable to an easy explanation.

Rains start in the district, as in other parts of the State, some time in the third week of June, from the Arabian sea monsoon. The months of July and August are the months of the heaviest downpour. Thereafter, the amount of rainfall goes on decreasing till rains stop in the month of October.

During the nine year period, 1952–1960, rains have been fairly regular except in 1952 when the rainfall was very much below the average (the average rainfall for that year was 706 mm. or 28"). The maximum rainfall of 2359 mm. (92") was recorded in 1955 at the Tamia recording station, while the lowest 549 mm. or (22") was recorded at Chhindwara station in 1952.

Climate :

Chhindwara district exhibits considerable variation in its climate, corresponding to its physiographical divisions. The plains of Sausar have a hot climate like the plain of Nagpur. The northern portions of the district are on a higher elevation, particularly the north-west portion is in the same elevation as Pachmarhi and enjoys a similarly cool climate. The temperature in the central portion of the district is moderate.

Table 1.2 in part II of the Handbook gives the temperatures recorded at Chhindwara observatory for each month of the year, from 1951 to 1960. The following table gives the average mean maximum, average maximum, average mean minimum and average minimum temperatures for each month in the year for the ten years from 1951 to 1960.

Average mean maximum (A), Average maximum (B), Average mean minimum (C), and average minimum (D) temperatures at Chindwara observatory, 1951-60

Month	Average Temperature (in centigrade)			
	A	B	C	D
January	25.6	28.4	10.6	4.8
February	29.0	32.8	12.8	7.1
March	32.9	37.1	17.0	12.4
April	36.4	39.9	21.9	17.0
May	39.2	42.1	26.1	21.5
June	35.2	40.3	24.9	21.3
July	28.4	32.7	22 4	20.6
August	28.0	31.0	22 0	20.0
September	29.0	32.2	21.3	18.8
October	29.3	31.8	17.7	12.2
November	27.7	29.7	11.9	8.1
December	26.3	28.7	10.0	5.9

January is the coldest month in the year, when on an average, the mean maximum, maximum, mean minimum and minimum temperatures have their lowest values – i. e: 25·5°C. (77.9°F.), 28·4°C. (83·1°F.), 10·6°C. (51·1° F.) and 4·8° C. (40·6° F.) respectively. Thereafter, as may be seen from the above table, the mean maximum, maximum, mean minimum and minimum temperatures go on rising steadily till they attain their peak values in the month of May, which is the hottest month in the year. On an average for the ten years from 1951 to 1960, the mean maximum, maximum, mean minimum and minimum temperatures for the month of May are 39.2°C. (102·6° F.), 42·1° C. (107 8° F.), 26·1° C. (79·0° F.), and 21·5° C. (70·7°F.) respectively.

After May, the mean maximum, maximum, mean minimum and minimum temperatures again start decreasing in value from month to month till August, the decrease being rather steep in case of the mean maximum and maximum temperatures from May to June and June to July. The minimum temperatures do not drop so fast during this period. It may also be observed that the August temperatures are only slightly lower than the corresponding July temperatures. On an average, for the last ten years the maximum temperature in August was 31°C (68°F). Thereafter, the curious phenomenon of warmer days, but cooler nights starts, and continues till October. In both September and October the day temperatures are greater than the day temperatures in July and August, but the nights are cooler. The minimum (i.e. night) temperature in October is however about 8° less than the minimum temperature in July or August. The day temperature in July and August is probably pulled down on account of rains. After October, the temperatures again start falling steadily till they reach their lowest values in January.

December and January seem to be the coldest months in the year, while April, May and June are the warmest. During the ten years referred to above, the mercury touched its lowest level of 3·2°C (37·8°F) in January 1960, and the highest mark of 43·8°C (110·8°F) in May 1958.

Distribution of Area and Population :

Chhindwara district has a population of 786 thousand persons on a land area of 4,576 square miles or 3,929 thousand acres. This gives us roughly 5.0 acres of land area *per capita*; comparing with 3.3 acres for the State as a whole Distribution of area and population of the district among tahsils is given in the table below :

Percentage distribution of area and population

District/Tahsil	*Area	Rank	Population	Rank
Chhindwara District	100.0	....	100.0	....
Chhindwara Tahsil	43.9	1	51.8	1
Amarwara Tahsil	32.3	2	21.9	3
Sausar Tahsil	23.8	3	26.2	2

Chhindwara tahsil is the biggest, and the most populous tahsil in the district. It contains 44% or more than two-fifths of the district's area, and more than half (52%) of its population. Amarwara tahsil contains a little less than one-third of the district's area and is second in area ranking. In population-ranking, Amarwara tahsil, which contains a little more than a fifth but less than one-fourth (22%) of the District's population, yields the second place to the smallest Sausar tahsil. This last-mentioned tahsil includes a little less than one-fourth of the district's area, but a little more than that proportion of its area. It deserves to be noticed that both Chhindwara and Sausar tahsils contain greater proportions of the district's population than of its area, while the reverse is the case with Amarwara tahsil i.e. in it population is less than proportionate to area. Distribution of both area and population among tahsils thus seems to be

* Area figures furnished by the Director of Land Records (corrected upto 1962-63) have been used for this table. The area figures given in Table A-I of the Handbook are not used because the tahsil areas in that table exclude forest areas and therefore do not add up to the District area.

considerably uneven. This is probably administratively inconvenient. Figures in the table above give only a broad indication of the relative populousness of each tahsil. For a clearer picture, we must consider the population density index i. e. number of persons per square mile. This is done in the table below, which also gives population density for 1951 to highlight changes that have taken place during the decade. The density both for 1961 and 1951 has been calculated on the basis of the latest area figures furnished by the Director of Land Records, which have the merit of *inter se* consistency.

Density of population, 1961 and 1951

District/ Tahsil	Population per square mile				
	1961	Rank	1951	Rank	% increase
Chhindwara District	172	....	141	....	22.0
Chhindwara Tahsil	203	1	165	1	23.0
Amarwara Tahsil	117	3	95	3	23.2
Sausar Tahsil	189	2	160	2	18.1

Chhindwara district has a lower population density than that of the State as a whole; its density of 172 persons to a square mile in 1961 is 9.5% lower than the State average of 192 persons per square mile. In 1961 also the tahsils have maintained their relative density-rankings of 1951. On an average, there are 31 more persons living on a square mile in the district in 1961 than were living on it in 1951. In the most densely populated Chhindwara tahsil, the number of persons per square mile has increased by 38; in Sausar it has increased by 29 and Amarwara by 22.

In the State context, Chhindwara ranks 29th in respect of population density. Districts having comparable population densities with Chhindwara are: Morena (174) Chhatarpur, (176); Dewas (167), East Nimar (166) and Vidisha (174).

Discrepancy in Area-figures :

Area figures for the district given by the Surveyor General, India and the State Directorate of Land Records do not agree. This disagreement is to be attributed to the difference in methods followed by these two agencies in surveying and computing the areas. The discrepancies sometimes, though not in case of Chhindwara district, have sizeable dimensions. In the case of Chhindwara, the discrepancy is of the order of 0.2% of the Surveyor General's area figures, the latter being smaller.

Another discrepancy to which attention needs to be drawn is regarding the inconsistancy between the tahsil and district areas reported in table A-I in the Handbook. The Director of Land Records area of the district, both 'total' and 'rural' includes a forest area of 662.3 square miles (1,715.4 Sq. km.) but as tahsilwise break-up of this area was not available, it was not included in the tahsil areas given in the table. The result is that the tahsil areas, both 'total' and 'rural' do not add up to the district area; 'total' or 'rural'. The density figures given in column 4 of table A-I are also similarly discrepant, because they are calculated on the Director of Land Record's area figures of the district and each tahsil. The result is that the tahsil and district population densities are not comparable.

Population variation during 1891-1961 :

The last census (1961) was the tenth Census of the district in the series of decennial censuses, and the eleventh, if we include an earlier count made in 1866 prior to the settlement operations. In this section, however, we will consider the population variation only for the last seventy years, starting from the Census of 1891 The table inset below gives the decennial percentages of variations experienced by the population of the district from 1891. The corresponding variations in the population of the State as a whole, and of neighbouring Jabalpur district are also being given for purposes of comparative study.

Percentage variation in Population, 1891–1961:

Year	Percentage decade variation in population		
	Chhindwara District	Madhya Pradesh	Jabalpur District
1	2	3	4
1891			
1901	+ 0.1	N.A.	N.A.
1911	+26.7	+15.3	+ 9.6
1921	– 4.9	– 1.4	– 0.3
1931	+16.6	+11.4	+ 3.7
1941	+ 6.5	+12.3	+17.7
1951	+ 5.9	+ 8.7	+15.0
1961	+21.5	+24.2	+21.8
1901–31	+40.5	+26.7	+13.6
1931–61	+37.0	+51.6	+64.9
1901–61	+92.5	+92.0	+87.4

The salient features of population variation in the district are :

(i) The very low increase in population during the decade 1891–01

(ii) The high growth rates during 1901–11, 1921–31, and 1951–61

(iii) Reversal of growth in 1911–21

(iv) The low rates of increase, as compared to the State, during 1931–41 and 1941–51 decades.

1891–1901

The very low growth of population in the decade 1891–01 was a phenomenon common to most other districts of the State. In fact the population of many districts in the State had decreased during the decade, which is wellknown for its years of continued calamity. Within the district, rate of growth differed from one part to another. The *khalsa* area of Chhindwara and Amarwara tahsils showed an increase of 3.6 per cent during the decade, the Sausar tahsil of 0.6%, while the *jagirs* inhabited mainly by tribals showed a decline of 11.8%.* The decline in the *jagirs* was due to failure of the small millets there in 1897; while in 1900 the entire district was mauled by famine.

1901–11

During this opening decade of the twentieth century the population of the district registered an unusually high rate of increase, which has not so for been surpassed. The corresponding increases in the State and Jabalpur district were 15.3 and 9.6 per cent respectively. The years 1903, 1906, 1907 and 1910 were reportedly unhealthy years but they had apparently little effect on the population of the district. Amongst causes leading to the high rate of population increase were (i) great progress made in the development of the district by the construction of railway lines connecting Chhindwara with Seoni, and with Amla in Betul district (ii) construction of Nagpur branch of Satpura railway was still going on, and that had caused an influx of labourers from neighbouring districts and (iii) exploitation of coal mines.

1911–21

The decade 1911–21 had a very complex agricultural and economic history considerably affecting population growth. There were reportedly poor harvests in the years 1913–14 and 1917–18. The most important cause of mortality, however, was the appearence in September 1918 of the fatal influenza epidemic which continued** well into 1919. To quote the official Famine Report, this epidemic 'struck the Provinces with lightning suddenness and violence. spreading rapidly and leaving behind it a meloncholy wake of decimated villages and destitute orphans.' The distress of the influenza scourge on the predominantly tribal population inhabiting northern parts of the district was particularly greater. Further most of the immigrant labour that had come to the district from neighbouring districts for construction of the Chhindwara-Nagpur section of the Satpura railway during 1901–11 must have returned home during the decade. All these account for the somewhat higher proportionate decline in the population of the district during the decade.

* District Gazetteer, page 39.

** District Gazetteer, page 39.

1921–31

In Census literature, the Census of 1921 is referred to as the 'great divide.' Prior to 1921, population variations from decade to decade fluctuated and did not show any unidirectional trend, whereas, in the subsequent decades, population has been steadily increasing. The decade is reported to have opened badly owing to failure of monsoon in the year 1920–21. According to the 1931 census report of the erstwhile C. P. and Berar, the subsequent years of the decade were generally good for the district; the percentage of outturn of crops to the normal was less than 18% only in the year 1925 of the decade. In all other years it was more than 80%. In fact in the years 1923 and 1928 the out turn was as high as 120% and 101% respectively of the normal. Also, during this decade the area under crops increased by 18.7% of its 1920–21 value, which was more than proportionate to the population increase of 16% registered by the district in the decade.* The population increase by tahsils durineg the decade was; Chhindwara 18.6%, Sausar 15.6% and Amarwara 13.8%. Births had exceeded deaths in the district by a big margin in all the years of the decade except in the year 1921 when the effects of the influenza epidemic were still felt. The influence on the population of a few out breaks of plague during the decade was negligible.

1931 41 and 1941-51

During these two decades, population increase in the district was slower than in the State as a whole. Unfortunately, owing to war economies, tabulation programme of 1941 census was very much cut down, so that it is difficult to assign reasons for low population growth in the district. Possibly migration to neighbouring Jabalpur district which witnessed an impressive increase of 15% during this decade may be one reason for the low growth of Chhindwara district. For 1941–51, analysing the rate of increase into its tahsil components, we find the maximum increase (10.6%) to have occurred in Chhindwara tahsil. This is more or less comparable with the State increase. The low rate of increase for the district is however to be traced to the low rates of Amarwara (5.7), and particularly Sausar (0.92). The very probable reasons as far as Amarwara and Chhindwara tahsils are concerned is migration to the neighbouring Jabalpur district particularly the cities of Jabalpur and Murwara where ordnance factories had sprung up during the war and which are known to have drawn labour from the adjoining districts. The very low growth of Sausar tahsil which can easily be characterised as the richest tahsil of the district is rather surprising. The explanation apparently is migration to the neighbouring Nagpur district particularly Nagpur city.

Last decade

The last decade again saw a spectacular rise in population of the district and if we exclude the phenomenal rise of the 1901–1911 decade, this was the highest rise so far recorded. High rise in population however is a feature common to the whole State, and the rise in Chhindwara is smaller than that in the State as a whole. Analysed into its tahsil components, the population rise is as follows:

Increase during the last decade

Name of Tahsil	Absolute			As % of 1951 population		
	T	R	U	T	R	U
1. Chhindwara	75,449	37,052	38,397	22.8	12.2	138.8
2. Amarwara	31,817	31,817	.	22.6	22.6	..
3. Sausar	31,839	20,302	11,537	18.2	13.2	55.5

* Census of India (C. P. & Berar) 1931 page 22.

We thus find Chhindwara and the entirely rural Amarwara to have grown at the same rate, though the agriculturally richer tahsil Sausar registered a somewhat lower percentage increase. Since high population increase was a phenomenon common to the State as a whole the increase cannot be explained on the basis of a favourable balance of migration alone. The reason for the high increase is perhaps to be traced to the increase in survival rate, as a result of control of mortality due to malaria and other diseases, and a general improvement in publice health.

Rural/Urban growth during *1951-61.*

The rural population of the district has grown by 14.9% which analyses into tahsil components 12.2%, 22.6% and 13.2% for Chhindwara, Amarwara and Sausar tahsils respectively. The urban population has increased by 103.05% which breaks up according to tahsils into 138.8%, and 55 5% respectively for Chhindwara and Sausar tahsils. The figures indicate a very high-even phenomenal growth of urban population but this is more apparent than real because it is owing to the declaration of certain areas as towns in the 1961 Census, which were treated as rural in 1951. Thus, Chhindwara tahsil which had only one town in 1951, namely Chhindwara town has now four more added. These are, with their 1961 and 1951 populations shown below.

Name of Town	Population 1961	1951
1. Jamai	9,543	7,914
2. Datla-Bandhi	3,860	5,287
3. Badkuhi	7,005	5,993
4. Chikhli kalan	8,397	5,892

All these are mining towns. In order to arrive at a better judgment of rural and urban growths in the district, we must deduct the 1951 population of these towns, from the 1951 rural population and add it to 1951 urban population. This gives us the following results.

Chhindwara tahsil

Year	Rural	Urban
1961	340,754	66,049
1951	278,676	52,678
Increase	62,078	13,371

The percentage increases of Chhindwara tahsil for rural and urban areas now come to 22.3 and 25.4 respectively, which shows that the true increase in urban population during the decade has been only slightly in excess of the rural growth, and our former result of a spectacular rise in urban population of the tahsil is proved faulty. On working out similarly for Sausar tahsil which has one new town Lodhikheda added to it, we get the true rural and urban percentages as 17.0 and 24.9 respectively, thus reducing the apparent gap between rates of urban and rural growths.

Rural-Urban break up of population

The table below gives rural-urban distribution of the population of the district and of each tahsil in 1961.

Percentage Distribution by T/R/U

District/Tahsil	Total	Rural	Urban
Chhindwara District	100	87.5	12.5
Chhindwara Tahsil	100	83.8	16.2
AmarwaraTahsil	100	100	..
Sausar Tahsil	100	84.4	15.6

Chhindwara district has an overwhelmingly rural population. It is infact slightly more rural than the State as a whole, where the proportion of rural population is 85·7% as compared to 87.5% for Chhindwara district. The district's urban proportion is pulled down by the entirely rural Amarwara tahsil. Both Chhindwara and Sausar tahsils have proportionately more urban population than the State as a whole.

Towns:

In 1961, Chhindwara had eight towns, three in Sausar tahsil and five in Chhindwara tahsil. With the exception of Chhindwara town, which is residental town, all other towns in Chindwara are colliery towns. In Sausar tahsil, the tahsil headquarters town is a residential town, Lodhikhera is a crafts (handicrafts)town while Pandhurna is primarily an agricultural town. Four towns in Chindwara tahsil and one in Sausar tahsil have been added in 1951-61 decade.

Villages:

Chhindwara district contains 2.7% of the State' s inhabited villages, but only 2.5% of its rural population. On an average, a district should contain 2. 3%, of the *State's*, villages, and the same proportion of State's population. Chhindwara district is thus on the higher side of the average in both these respects. 5.3% of the district's total of villages are uninhabited, which is much less than the State proportion of 9.1%. Tahsilwise the inhabited villages are distributed as follows :

Chhindwara 48.0%, Amarwara 29.4%, and Sausar 22.6%. With one of the three tahsils containing roughly half of all the inhabited villages in the district, the distribution *prima-facie* appears to be lop-sided; and is not likely to be very convenient from the view point of distribution of land records and revenue work load. This lopsidedness is characteristic of the district's distribution of rural population also, with Chhindwara tahsil (rural) alone containing half (49.6%),and the other two containing one-fourth each (actual proportions are Amarwara 25.1% and Sausar 25.3%). Thus judging simply from the standpoint of inhabited villages and rural population Chhindwara tahsil is the equivalent of the other two.

Change in number of inhabited villages since 1951 :

In the district as a whole the number of inhabited villages has moved up by 12 since 1951, which analysed into its tahsil components is: Chhindwara tahsil one less and Sausar tahsil thirteen more. The number remains unchanged in Amarwara tahsil. The loss of one in Chhindwara tahsil becomes a gain of three if notice is taken of the four newly added towns of 1961 which were all villages in 1951, and which consequently are a loss to the 1961 village list of the tahsil. It thus appears that three uninhabited villages of 1961 (which did not enter in the Primary Census Abstract of 1951 Handbook) have now become inhabited. The increase of thirteen villages in Sausar tahsil is likewise converted into one of fourteen if we allow for the upgrading of Lodhikhera a village of 1951-to the status of a town in 1951. Infact, the excess in Sausar tahsil is caused because nineteen depopulated villages of 1951 had inhabitants in 1961, while only five populated villages of 1951 became depopulated in 1961. The names and location code numbers of these two categories of villages of Sausar tahsil are as follows.

I Depopulated villages of 1951 which have become populated in 1961 :

Kanbasagar (17); Morghat F. V. (20); Ghoghri (205); Chikni (262); Bhudkum (277); Godri Khapa (288);Dohoda (305); Warjali(315); Khedi Dhiyajuwan (339); Kanhargaon (346); Gadkhapa (377); Biroli (382); Chichghat (384); Jatalpur (396); Chichghat (408); Bagholi (443); Khapa Karimnagar (447); Koda Dongari B. S. No. 2 (450); Nandapur (342);

II Villages populated in 1951 but deserted in 1961 :

Markawada (43); Ghadela B. S. (149); Khursapar F. V. (210); Panchal Khapa (266).

Size of Villages :

The table below gives 1000 villages in the district and in each tahsil distributed according to their sizes, for the 1951 and 1961 censuses :

Size Class	No. of Villages in District		Chhindwara Tahsil		Amarwara Tahsil		Sausar Tahsil	
	1951	1961	1951	1961	1951	1961	1951	1961
1	2	3	4	5	6	7	8	9
Below 500	866	825	866	818	906	867	810	786
500–999	95	129	94	134	79	110	120	142
1,000–1,999	23	31	24	32	13	16	36	49
2,000–4,999	13	14	11	15	2	7	31	21
5,000 +	3	1	5	1	....	....	3	2
Total	1,000	1,000	1,000	1,000	1,000	1,000	1,000	1,000

For the district as a whole the number of small villages, though still large (88%), has gone down by about 4 in 100. Almost all of these have moved up into the next higher class (500–999), the movement being most conspicuous in case of Chhindwara tahsil. There has similarly been increases in the number of villages in the next higher class (1,000–1,999). In respect of big villages (2,000–4,999), Chhindwara and Amarwara have gained but Sausar has lost. The number of very big villages has gone down from 3 in 1,000 in 1951 to 1 in1961. Amarwara has the maximum number of small villages (87% in 1961) a feature to be attributed to its indu-trial backwardness and also to its tribal population with a known bias for small habitations. Sausar, the richest tahsil agriculturally, has the least number of small villages (79% in 1961).

The district has a high proportion of very small villages (below 200 in population). Surprisingly enough Sausar tahsil has the biggest proportion (41.7%) of these villages in 1961, with Amarwara (40.1) and Chhindwara (37.3) following closely behind.

Distribution of population by size of villages :

The following table shows the proportion of population living in villages of specified population sizes viz. very small (below 200); small (200-500), medium-sized (500-999), big (1,000–2,000), and very big (2,000 and over).

District/Tahsil	Total population	Number of persons residing in villages with Population					
		Less than 200	200–499	500–999	1,000-1,999	2,000 4,999	5,000+
1	2	3	4	5	6	7	8
Chhindwara Tahsil	1,000	115	379	238	117	136	15
Amarwara Tahsil	1,000	153	486	232	63	66	.
Sausar Tahsil	1.000	106	293	240	168	163	30
Chhindwara District	1,000	122	384	237	117	125	15

The table indicates that very small villages accounting for nearly two-fifth of the total villages accomodate a little less than one-eighth of the rural population of the district. In Sausar this proportion is still lower – i. e. less than one-ninth, and is maximum i. e. more than one-seventh in Amarwara. This shows that many of the villages in this class are much smaller than the upper limit (200) of the class.

'Small' villages in the population range (200-499) emerge as the most populous group in the district and in each tahsil. For the district, the frequency of these villages is very nearly the same as the frequency of the very small villages (below 200) but they contain more than three times the inhabitants. The proportion of population residing in the 'small' villages is highest, roughly half, in Amarwara

tahsil, while it is much lower- less than one third in Sausar tahsil. Taking the two classes together, we are led to yet another significant observation that a little more than half of the population of the district (in Amarwara tahsil the proportion is nearly two-third, while in Sausar it is two-fifth) lives in small villages below 500 in population.

Medium-sized villages (500-999) which number roughly one-eighth of the total number of villages account for a little less than one-fourth of the rural population of the district. There is hardly any deviation from this proportion in the case of individual tahsils. In the next upper size-class, (i. e. 1,000-1,999) or big villages, the proportion of population is roughly half of the proportion living in the medium-sized villages (500-999). The proportion is maximum in case of Sausar tahsil i. e. about one-sixth, while it is least-roughly one-sixteenth-in case of the entirely rural Amarwara tahsil. Very big villages i. e. more than 2,000 in population, which form less than 2% of all the inhabited villages in the district have as high as one-seventh (14%) of the district's rural population. The big and very big villages together contain about one-fourth (actually a little more) of the rural population of the district. An approximate picture of the rural population is thus : out of every four persons living in villages two live in small villages below 500 in population; one in medium-sized villages with population between 500 and 999 and one in big villages having more than a thousand inhabitants each.

Sex Ratio:

In the district as a whole, there are 15 women less per 1,000 males than there were in 1951. This decline in the proportion of females relative to males is shared by each tahsil, though the drop is most conspicuous (20) in case of Chhindwara tahsil, and is least (4) in case of Amarwara. The relatively bigger drop in the sex-ratio of Chhindwara tahsil is perhaps significant of industrialisation and immigration; while in case of the entirely rural tahsil Amarwara the small drop appears to be the result of yet unknown factors common to the district as a whole. Another significant observation about sex-ratio in Amarwara's population is that the general decline in the ratio notwithstanding, the latter continues to be in excess of the males in the tahsil. In Sausar tahsil, the excess of females of 1951 has now been converted into a small deficit.

Sex-Ratio since 1901 :

Variations in sex-ratio in the district and in each tahsil are presented in the table inset below :

Year	District	Amarwara Tahsil	Chhindwara Tahsil	Sausar Tahsil
1901	1,046	N.A.	N.A.	N.A.
1911	1,020	1,025		1,010
1921	1,026	1,066	1,008	1,023
1931	1,015	1,045	1,003	1,010
1941	997	1,029	975	1,010
1951	995	1,019	978	1,010
1961	980	1,015	958	996

The table brings out that :

(i) For the district as a whole, the sex-ratio has steadily been dropping since 1901 except in 1921 when it registered a slight increase over the value of the preceding census. We have however no evidence to connect this increase in 1921 with the oft-mooted suggestion that in

unhealthy years (as the closing years of 1911–21 decade certainly were) persons belonging to the stronger sex suffer greater mortality.

(ii) Upto 1931, the proportion of females per 1,000 males was greater than 1,000 in the district as a whole and in each tahsil.

(iii) Since 1921, the ratio has been steadily dropping in Chhindwara and Amarwara tahsils, whereas in Sausar, it stayed constant for three successive censuses.

(iv) The sex-ratio imbalance is most pronounced in Chhindwara tahsil, while it is almost at parity in the thickly populated Sausar tahsil.

Sex-ratio in rural and urban areas :

The table inset below gives the sex-ratio separately for the rural and urban areas of the district and each tahsil.

District/Tahsil	Total	Rural	Urban
1. Chhindwara District	980	993	894
2. Chhindwara Tahsil	958	974	880
3. Sausar Tahsil	996	1,011	923
4. Amarwara Tahsil	1,015	1,015	..

The total excess of males over females in the district is 7,809, of which 5,501 or about 70% is due to male excess in urban areas; while for the rural areas the male excess is only 30% of the district total. It is to be noted that for the rural areas of the district as a whole the number of males and females is sensibly near parity. In fact, in two of the tahsils, there is an excess of females in the rural areas, and the district ratio is dragged down by the Chhindwara tahsil where even in rural areas it is as low as 974. *Prima facie* this is due to greater urbanisation and industrialisation of Chhindwara tahsil owing to the coal mining industry. In order to verify such a correlation, the P. C. A. of Chhindwara tahsil was scrutinised to sort out villages having 20% or more male workers in category III (which were presumably villages near about coal mines) and their sex-ratios were worked out. In absolute terms, these villages (31 in number, as per list-Appendix-A) showed an excess of 7,908 males over females; which is greater than the male excess for the tahsil rural area as a whole by 3,382. This means that if we exclude the 31 villages referred to above, even in Chhindwara tahsil rural, there is a feminine preponderance of 3,382 – which is a characteristic belonging to rural areas of the other tahsils also. We have thus evidence to connect the imbalance in the sex-ratio in the rural areas of Chhindwara tahsil with the coal mining industry in that tahsil. This also would explain the very low sex-ratio in the urban areas of Chhindwara tahsil because except Chhindwara town, all towns in the tahsil are coal mining towns.

Sex-ratio by size of villages :

It is worthwhile to study whether sex ratio by size of villages has any observable pattern. The table below therefore gives sex-ratio by size of villages :

District/Tahsil	Sex-ratio in villages having population					
	Below 200	200-499	500-999	1,000-1,999	2000-4,999	5,000 +
1	2	3	4	5	6	7
Chhindwara District	993	1,019	1,017	974	896	988
Chhindwara Tahsil	987	1,019	1,014	936	819	935
Amarwara Tahsil	1,008	1,022	1,028	1,043	928	....
Sausar Tahsil	990	1,012	1,014	1,001	1,020	1,042

It is noticed that sex-ratio is generally adverse to the fairer sex both in very small and very large villages, while it is favourable to them in the small and medium-sized villages (200-999). The relative paucity of females in the very small villages is an interesting characteristic and may be possibly due to the relatively unstable conditions in very small villages. The smaller number of females for the district as a whole in case of bigger villages is due to the pull of Chhindwara tahsil and is probably related to the mining industry.

Age and Sex :

The age and sex structure of the population is presented in the table below by quinquennial age-groups (upto 70 years of age, but beyond that all ages have been clubbed together). Corresponding figures for the State are also given for comparison :

Distribution of 100 *Persons by Age-Group and Sex*

Age-Group	Chhindwara District			Madhya Pradesh		
	Persons	Males	Famales	Persons	Males	Females
1	2	3	4	5	6	7
0–4	17.3	8.7	8.6	16.4	8.2	8.2
5–9	13.7	6.8	6.9	14.3	7.3	7.0
10–14	9.8	5.2	4.6	10.1	5.5	4.6
0–14	*40.8*	*20.7*	*20.1*	*40.8*	*21.0*	*19.8*
15–19	7.1	3.7	3.4	7.9	4.1	3.8
20–24	8.2	3.9	4.3	8.6	4.2	4.4
25–29	8.8	4.4	4.4	8.8	4.5	4.3
30–34	7.6	4.0	3.6	7.3	3.9	3.4
15–34	*31.7*	*16.0*	*15.7*	*32.6*	*16.7*	*15.9*
35–39	5.8	3.2	2.6	5.8	3.1	2.7
40–44	5.1	2.6	2.5	5.3	2.7	2.6
45–49	4.3	2.2	2.1	4.2	2.2	2.0
50–54	4.1	2.1	2.0	4.0	2.1	1.9
55–59	2.4	1.2	1.2	2.1	1.1	1.0
35–59	*21.7*	*11.3*	*10.4*	*21.4*	*11.2*	*10.2*
60–64	2.5	1.2	1.3	2.4	1.2	1.2
65–69	1.1	0.5	0.6	0.9	0.4	0.5
70+	2.1	0.9	1.2	1.8	0.8	1.0
60+	*5.7*	*2.6*	*3.1*	*5.1*	*2.4*	*2.7*
A. N. S.	N	....		0.1	N	N

For a correct appreciation of this table it is necessary to remember that it is based on ages actually returned at enumeration. The quality of age returns in the Indian censuses has been the subject of much adverse comment by demographers as being subject to gross inaccuracies, arising from the universal ignorance about one's age. This ignorance is more particularly found in the rural areas. The tendency therefore naturally is to return the age in round figures, generally in digits ending in 0 and 5, or in even rather than odd digits. The age-data therefore suffers from a digit bias, which will be apparent on drawing a graph of single year age returns, which will show peaks at 0, 5, 10, 8, 12, 15, 20, 25, 30, ...etc. In order to minimise the distorting effects of age-misreporting, quinquennial groups have been adopted

in the table above,the stratagem being to include one preferred age in each group. This grouping does suppress to some extent the effect of age-heaping, but it does not need an expert eye to be able to say that they are not entirely absent. Thus if ages were all correctly reported, frequency will go on decreasing in successive age-groups (of equal width of course). A look at the above table, however, shows that there are more persons in the age-group 20–24 than in 15–19, and in 25–29 than in 20–24; evidently due to disproportionately large numbers returned at 20 and 25, as compared to 15 and 20 respectively. Hence, in considering the above age-data, we will be treading on firmer ground if we confine our scrutiny to the broad age-groups 0–14, 15-34, 35–59 and 60+, which can conveniently be taken to correspond to the infants and children, young persons, middle aged persons and old persons.

As in the case of the State, in the district too, the proportion of children under 15 years is the maximum. In concrete terms roughly 2 out of every 5 persons in the district are infants or children below 15 years of age. The age group 15–34 i.e. young persons accounts for a little less than one-third of the population of the district, and is, narrower than the corresponding State segment by about 1%. Middle aged persons i.e. between 35 and 60 years of age, form a little more than one-fifth of the population, the proportion being greater than the corresponding State proportion by a very small extent. Persons in the older segment i.e. 60 years and more are somewhat more numerous than in the State as a whole, but in absolute terms they do not even come to about 1 in 17 in the district.

The youthful character of the population is clear. Persons below 35 years contribute more than 72% to the population while more than four-fifths are below 45 years of age.

Changes in age-composition since 1951 :

The following table gives the distribution of 100 persons of the district's population by broad age-groups in 1951 and 1961. The proportion for 1951 are based on a 10% sample while those for 1961 are based on the total count :

Age-group	1951	1961
1	2	3
All ages	100	100
0–14	38.8	40.8
15–34	32.3	31.7
35–59	23.6	21.7
60+	5.2	5.7
A.N.S.	0.1	0.1

Neglecting the effects of age-misreporting which are small in the broad age segments considered above, the figures bring out that the proportion of young children below 15 years and of old persons above 60 years has increased in the district since 1951. This shows that chances of survival in children and old persons alike have improved during the decade. The two middle segments show decline, but it does not mean that mortality in these segment has increased. The proportion probably has been brought down because of the high value in the age group 0-14 most of whom have been added during the inter-censal decade to the survivors of age-cohort 0–4 of 1951 Census.

Marital status by age-groups :

In the table inset below is presented a break up of the population of each sex by age-groups and by marital status.

TABLE

Distribution of 1,000 persons of each sex in each age-group by marital status

Age group	Total		Never Married		Married		Widowed		Divorced/ separated	
	M	F	M	F	M	F	M	F	M	F

Age not stated	„	„	414	629	552	371	34	....	...	...

Never married persons : Early marriages :

As is to be expected, the number of never married persons has a peak value at the lowest age-group (in fact no person is shown to be married below 10 years of age. This however does not disprove the prevalence of child-marriages because of the enumeration instruction to record all persons below ten years of age as never married, which goes on decreasing sharply as higher age-groups are reached *till* it attains a very small value. Only one out of every 100 males in the age-group 10–14 is married ; showing that in case of boys very early marriages are negligible. In case of females in the same age group the married proportion is as high as 10%, showing that in case of that sex marriages do start taking place between 10 and 14 years. Before reaching 19 years of age, as many as 3/4 ths of the girls enter matrimony, but in case of boys the proportion is still only one in five. About 2/3rd of the boys in the age-group 20–24 are married ; as regards girls of that age-group, only one in 50 in that age-group remains unmarried. Beyond 25 years of age, very few boys and girls remain unmarried. To sum up, the evidence before us shows that infant marriages are not in vogue in the district ; that most of the boys get married between 20 and 30 years of age while most of the girls are married between 15 and 20 years of age.

Widowed persons :

The number of widowers and widows is insignificantly small till 24 years of age. In age-group 25–29, the proportion of both widows and widowers is roughly 1 in 50. In the higher ages, widows outnumber the widowers. Thus in the age-group 35–39, widows are as numerous as 11 in 100, while widowers' proportion is only 4 in 100. In the next higher age-group, one in every five females is a widow but in case of males, only one in sixteen has lost his spouse. The number of widows goes on increasing sharply, so that about half of the females in the age-group 50–54 have lost their partners. More than three-fourths of the women who survive to ages beyond sixty

years are widows. In case of males, however, even beyond 70 years of age, about two-thirds of the males have their spouses living. Incidentally, this confirms that women have greater longevity than males in the older age-groups.

Education and Literacy :

The district witnessed a spectacular improvement in the field of education in the post independence period, particularly during the decade 1951-60. The number of primary schools in Chhindwara and Seoni districts in 1951 was 359, which is almost equal to the number (352) of primary schools in Chhindwara district alone in 1957. Even after 1957, the district maintained a steady progress and the number of schools rose to 572 in 1960 i.e. by about 68% of the 1957 number. During the same period, the number of pupils has more than doubled. It stood at 44,429 in 1960. The proportion of the number of pupils attending primary schools to the number of persons in the age-group 6-10 (the primary school going age-group) is 43% while separately for boys and girls, the proportion is 67% and 19% respectively. Taking these proportions as indices of attendance in primary schools, we observe that the position is far from satisfactory in the case of girls because more than four-fifths of the girls who should have attended school did not do so. The position is much better in case of boys, but still needs improvement if universal education is to be a reality. In 1960 there were three schools for every 10 villages in the district. The distribution of the schools according to tahsils is not available.

The table inset below shows the percentage of literates to total population for the district and each tahsil with a sexwise, and rural/urban break up.

District/Tahsil		1961			1951		
		P	M	F	P	M	F
Chhindwara District	T	16	26	6	10	17	4
	R	13	22	4	9	14	3
	U	39	52	24	34	48	19
Chhindwara Tahsil	T	17	27	7			
	R	13	22	4	7	12	2
	U	41	53	27			
Sausar Tahsil	T	18	28	7			
	R	14	24	5	10	18	2
	U	34	50	18			
Amarwara Tahsil	R	12	20	4	7	12	2

In 1961, the percentage of literacy in the district for the population as a whole is 16, while separately for males and females it is 26 and 6. These are somewhat lower than the State figures for 1961-viz. 17, 27 and 7 each to each. The corresponding figures for Jabalpur division are 21, 32 and 9. The district is thus not very advanced in education as compared to other districts of the division. The position has improved considerably for the district as a whole, since 1951, there being a 60% increase during the decade. The table also shows that the progress has been more in the rural than in urban areas obviously because the latter were already much ahead in 1951. In rural areas, the performance of Chhindwara and Amarwara tahsil has been more impressive than that of Sausar tahsil; but Amarwara still remains the most backward tahsil in the district educationally. In respect of rural literacy the proportion in Chhindwara is 13% as against 20% of Indore which leads the State in this characteristic. Balaghat, with 19% is still much ahead of Chhindwara in rural literacy and so is Narsimhapur (18%). The literacy percentage in females is (6), as against a male literacy of 26% while in rural areas the figures for females and males are 4% and 22% respectively.

Higher education :

In 1960, the district had 37 middle schools including senior basic schools and 14 higher secondary schools. An arts and commerce college has also been functioning at the district headquarters since 1959. The district has also a mining polytechnic since 1959. A training college for teachers started in 1960, and a normal school for teachers are other educational institutions of the district. 36% of the literate and educated persons in the district possess educational qualifications equivalent to or higher than the primary school level ; while 5% have passed matriculation or higher examinations. The proportion of graduates and persons with higher educational qualifications is roughly 1 in every 200 literate and educated

Community development programme :

On 1st March 1961, the reference date for the Census, the district had eight community development blocks, four in Chhindwara tahsil, two in Amarwara tahsil and two in Sausar tahsil. With the addition of the Bichhua block in Sausar tahsil on 1-4-1962 the district is now completely covered by the Community Development Programme. The first block to come was Pandhurna in Sausar tahsil inaugurated on the Gandhi Jayanti day in 1953. The next two years did not see the addition of any more blocks, but in the year 1956, three blocks were created; Chhindwara block, Chaurai block in Amarwara tahsil and Tamia block in Chhindwara tahsil. The last mentioned was converted into a special multi-purpose tribal block later on. Parasia block in Chhindwara tahsil came in 1957, while the Sausar block was the solitary addition in 1958. The year 1959 did not witness the addition of any new blocks, but two blocks, Mohakheda in Chhindwara tahsil and Amarwara in Amarwara tahsil, came in 1960.

Medical and Public Health :

The district has five hospitals (including one T. B. hospital) all located at Chhindwara. There are primary health centres at Sausar, Amarwara, Chaurai, Tamia and Pandhurna whereas the number of development blocks is 8. Besides the district has allopathic dispensaries at Jamai, Lodhikhera, Harrai, Batka Khapa, which are run by the Janapada Sabhas; a dispensary at Amla run by the Forest Department and an Ayurvedic Dispensary at Sarla Khapa. There is a Government Homeopathic Sanatorium at Nawegaon. Not much information was available regarding private hospitals, and ayurvedic dispensaries run by the local bodies. We can however form a fairly good idea of the state of public health services in the district from the data contained in table B-V of the Handbook which contains returns relating to physicians, surgeons and other persons concerned with public health. From this table, it appears that 258 persons have been returned from the district in the occupational group '03' i.e. "Physicians, surgeons and dentists". These include physicians in allopathy, ayurved, homeopathy and of certain other unspecified categories. As a total public health picture, therefore, in the district we have one physician, or surgeon for 3,045 persons—one for 4,573 persons in rural areas and one for 928 persons in urban areas. The urban areas, therefore, seem to be better served by medical services.

Considering physicians and surgeons in allopathy alone, who are generally technically qualified (whereas in case of ayurvedic and homeopathic systems of treatment, self-taught persons who do not hold certificates from recognised institutions also practise) and who seem to matter most in the public mind, table B-V tells us that the District has only 76 allopathic physicians and surgeons, 7 in the mining industry, and 69 in other services. There is, thus, one physician in allopathy for 10,336 population. The uneven, or even lopsided distribution of allopathic medical help over rural and urban areas of the district seems to follow from the fact that roughly three-fourths of the allopathic doctors are concentrated in urban areas which contain only 12.5% of the district's population. In other words, while there is one allopathic doctor for 1,756 of urban population, there is only one such doctor for 34,357 persons in the rural areas. In other words, a population which has in rural areas only one doctor, has twenty such doctors in the urban areas. Chhindwara district's rural population, however seems to be better served by allopathic medical help than

the rural population of the State as a whole, because in case of the latter there is one allopathic physician for 41,580 persons in the rural population. In case of urban areas also, Chhindwara district is somewhat better than the State in this respect, which has one physician for every 1,822 persons in urban areas (Chhindwara's urban areas have one for 1,756 persons).

Ayurvedic physicians, however, show a concentration in the rural areas. Out of 99 persons returned as ayurved physicians in the district as many as 75 are from rural areas giving us one ayurved physician for every 9,162 persons of the rural population. In case of ayurvedic medical help also the rural population of the district seems on an average, to be in a better position than the rural population of the State as a whole, where there is one physician in ayurved for every 11,473 persons. Besides the district has 36 homeopathic physicians (31 of these are in rural areas), and 45 physicians of unspecified types (of these also 26 were in the rural areas).

Regarding medical services other than those rendered by physician or surgeons, table B–V shows that the district had 683 persons in group '04' i.e. nurses, pharmacists etc. Of these 255 were in the urban areas and the rest in rural areas. Out of the 80 nurses (family 040) returned from the district, 60 are in the urban areas, and only 20 in the rural areas. Midwives and health visitors (family 041) who numbered 317 in the whole district, are concentrated in the rural areas to the extent of 297. (These include perhaps returns of primitive midwifery also .

Epidemics :

Table 6–B.2 based on information furnished by the Civil Surgeon of the district shows that cholera had taken a somewhat heavier toll of life in the years 1953 and 1954. Small pox also took large number of lives in 1951, 1956 and 1959. There is no data to indicate the areas of high incidence of these diseases in these years. Plague appears to have been eliminated as an epidemic, no deaths from it having been recorded except in the year 1951. The greatest number of deaths, however, occur from 'fevers' every year.

Vital Statistics :

The figures of vital statistics of the district as per its 1961 constitution are not available prior to 1957; for the period 1951 to 1956, the figures relate to old Chhindwara district which included the present Chhindwara and Seoni districts. Tahsilwise figures for any of the years of the decade 1951–61 are not available so that it is not possible to assign the births and deaths to the new districts of Chhindwara and Seoni. For this study, the following approximations are made : the births and deaths for the years 1951–56 (for 1951 only three-fourths of the births and deaths were taken into account) were totalled and then assigned to the two districts in the proportion of their mean populations (i.e. the arithmatic mean of the population for 1951 and 1961 Censuses). The assignment of births and deaths to the two districts for the period 1951–56 is as follows :

	Total Births	Assigned to Chhindwara	Assigned to Seoni	Total Deaths	Assiigned to Chhindwara	Assigned to Seoni
1951–56	229,892	137,753	92,139	150,229	90,018	60,211
1957–61		110,134			59,303	,,
Total		247,887			149,321	,,
	Balance of births of over deaths :				98,566	
	Total increase in population :				139,105	
	Population not explained by natural increase :				40,539	

As high population increases have been a normal feature of most of the districts in the State, the huge unexplained population increase of 40,539 cannot all be explained by balance of migration and this leads us to conclude that the vital statistics returns are incomplete ; and that the extent of such incompleteness appears to be considerable.

Religion :

The table inset below gives the distribution of Chhindwara's population by religion for 1961 and 1951 :

Distribution of 100 persons by religion in total rural and urban areas, 1961 and 1951 :

Year	T/R/U	Hindu	Sikh	Jain	Muslim	Christian	Budhist	Others
1	2	3	4	5	6	7	8	9
1961	T	93.1	0.1	0.4	4.0	0.3	2.1	N
	R	94.5	N	0.3	3.0	0.1	2.1	N
	U	83.8	0.5	1.8	11.2	1.2	1.5	..
1951	T	95.1	0.1	0.4	4.1	0.3	N	N
	R	96.3	N	0.3	3.2	0.2	N	N
	U	80.6	0.7	2.5	14.8	1.4	N	N

93% of the district's population belongs to Hindu religion. In rural areas this proportion is greater (95%), but comes down to 84% in the urban areas. Muslims numbering 4% of the total population are the second largest religious group in the district. Their proportion is smaller (3%) in the rural areas, but increases to 11% in the urban areas. Neo-Budhists rank third in respect of numerical strength, amounting to 2% of the total and rural populations. Their proportion is less (1.5%) in the urban areas. Other religious groups which, though not very numerous, are still found in numerically significant strength are in the order of their numerousness Jains, Christians and Sikhs. The Jains add up to 0.4% of the total population, and are concentrated in urban areas, where they form 1.8% of the population. Similar concentration in urban areas is also shown by the Christians and the Sikhs.

As regards changes since 1951, the most important is the decrease in the proportion of Hindus by 2%. The gainers have been the Neo-Budhists, who were negligible in number (only one Budhist was returned in 1951) in 1951, but who now form 2% of the total population. These are mostly concentrated in the rural areas of Sausar tahsil adjoining Maharashtra State, the converts coming almost entirely from the Marathi speaking followers of Late Dr. Ambedkar.

Scheduled Castes and Scheduled Tribes :

Disregarding synonyms by which the same caste is called, twelve Scheduled Castes were enumerated in the district, which together constituted 9.1 percent of the district's population. In the rural areas, they constituted the same percentage of the rural population of the district ; while in urban areas the proportion was slightly greater i.e. 9.5% of the urban population. Of the total Scheduled Caste population, about 87% live in rural areas. Four castes namely Bahna or Bahana, Balahi or Balai, Dom or Dumar and Ganda or Gandi have less than 80 persons each; so that the really numerous castes number only eight:—viz Basor and synonymous castes; Chamar and synonymous castes; Katia or

Patharia; Khatik, Chikwa or Chikwi; Kori, Mahar or Mehra, Mang and synonymous castes and Mehtar or Bhangi. Of these the most numerous are the Mahar or Mehra, who account for a little more than 45% of the total Scheduled Caste population of the district. Katia or Patharia, and Chamar with synonymous castes, constitute 23% and 22% of the Scheduled Castes population. The other 10% is represented by Mang (including synonyms), Mehtar, Basor (including synonyms), Kori, Khatik, Bahna, Dom and Balahi in the order of their numerousness.

The castewise breakup of Scheduled Caste population of the district by tahsils is available only for rural areas. Of the district's total rural Scheduled Castes population, a little more than three-fifths (61.5%) resides in Chhindwara tahsil, about one-fourth (26%) in Amarwara, and only one-eighth (12.5%) in the southern Sausar tahsil which adjoins the Maharashtra State. The Scheduled Castes are thus concentrated in the rural areas of Chhindwara and Amarwara tahsils. The low proportion of Scheduled Castes in rural Sausar (which had 32.6% of the Scheduled Castes population of the district in 1951) tahsil is traceable to the very high proportion (90% of the district's rural Budhist population) of Budhists in its rural areas. The revolutionary neo-Budhist movement of the decade 1951–61, which resulted in the Marathi speaking Scheduled Castes, mostly belonging to Mahar Caste, followers of Dr. Ambedkar embracing Budhism *enmasse* almost overnight, is too recent to be forgotten. That all these neo-Budhists are recent converts would be clear from the fact that in 1951 the number of Budhists in the district was negligible whereas, now it has assumed sizeable dimensions.

Of the important scheduled castes the most numerous are Mahar or Mehra. Of the rural population of this caste 62% live in Chhindwara tahsil, 26% in Amarwara tahsil and only 12 percent in the Sausar tahsil. Katia or Patharia, the next numerous scheduled caste in rural areas of the district, is concentrated in Chhindwara tahsil to the extent of 67%; Amarwara tahsil contains 28% of the rural Katia or Patharia population; while Sausar contains 5%. Chamar is the third most numerous caste in the district. Rural Chhindwara tahsil contains only 56% of the Chamar population (rural) of the district, Amarwara contains 29% and Sausar contains only 15%. Of the less numerous castes, the Mang and synonymous castes are mostly concentrated in rural Sausar tahsil while the Kori caste is similarly concentrated in rural Chhindwara tahsil.

Distribution According To Working Categories

The table below gives a distribution of 1,000 persons among scheduled castes in the district according to the census working categories:

1,000 persons among scheduled castes distributed by nine categories of workers and non-workers.

Scheduled Caste	Total	Persons in Category									
		I	II	III	IV	V	VI	VII	VIII	IX	X
1	2	3	4	5	6	7	8	9	10	11	12
1 All Scheduled Castes	1,000	226	99	72	49	4	3	6	6	48	487
2 Mahar	1,000	238	111	74	10	3	5	7	8	39	505
3 Chamar	1,000	135	127	91	138	10	1	4	2	29	463
4 Katia	1,000	388	78	41	5	1	3	4	3	26	451

Obviously, the scheduled castes are principally engaged in agriculture, having about 63% of their total workers in that sector. The dependence on agriculture seems to be greater in case of the Katia or Patharia, who have 85% of their working force in agriculture. The Chamar caste, with only 49% of its workers in agriculture, leans more on household industry—which in their case is making and repairing of shoes and other simple leather products—other Scheduled Castes do not engage in household industries to that extent as their principal work. Almost all the major Scheduled Castes have sizeable participation in category III—which mostly includes work in the coal mines. The Chamar again have maximum proportion of workers in the mines, with Mahars closely following. The latter may be migrant labourr from the Sausar tahsil. Another significant observation regarding Chamars is the proportionately larger number of landless workers in agriculture, because as against 135 cultivators on owned or leased lands, there are 127 agricultural labourers. The Katia appear to be somewhat better in agriculture because in their case the numher of owner or tenant cultivators is about 5 times the number of landless agricultural labourers. The Chamars thus seem to be economically very backward.

Progress of literacy and education in the Scheduled Castes of the district is quite impressive compared with that in other districts. Percentage of literacy in Scheduled Castes in the district is 12.1 (20.8% for males and 3.1% for females), which compares with the percentage 16.3 (26% for males and 6% for females) in the general population of the district. Scheduled Castes are thus not very much behind the general population in respect of literacy and education. 36% of the literate and educated among the Scheduled Castes possess educational qualifications equivalent to and higher than the primary school level, while 2% have passed matriculation or higher examinations. In the general population, the proportion of those who have passed primary school level is 35.9% (the same as in scheduled castes) and of those who have passed matriculation and higher examinations is 5%.

Scheduled Tribes :

33 percent of the population of the district consists of persons belonging to scheduled tribes. They are concentrated mostly in rural areas (about 98% of the total scheduled tribe population), Gonds are the most numerous of scheduled tribes in the district, forming 87% of the total scheduled tribes population. Korku, Bharia and Pardhan forming respectively 5%, 4%, 3% of the scheduled tribes population of the district are other important tribes. Other less numerous tribes enumerated in the district are Kol, Halba or Halbi, Kharia, Pardhi, Baiga, Bhunjia, Oraon, Munda, Nihal Bhil, Birhul or Birhor, Dhanwar, Bhunjia, Kawar or Kanwar and Parja. Of these except Kol, and Halba or Halbi. the rest are numerically insignificant and may be migrants in connection with the mining labour.

Tahsilwise Distribution of Scheduled Tribes :

Breakup of each scheduled tribe by tahsils is available separately only for rural areas of the district. The scheduled tribes do not show concentration in any particular tahsil and the distribution is more or less in proportion to the general population of the tahsils. Chhindwara tahsil contains half (50.2%) of the rural population of scheduled tribes. Amarwara (26.4%) and Sausar (23.4%). Of the more numerous tribes, the Bharias (and synonymous groups) are entirely concentrated in the northern tahsils Chhindwara and Amarwara; while Korku (and synonymous tribes) are concentrated in Chhindwara and Sausar tahsils. Other tribes which are numerically strong in the district do not exhibit any tahsilwise concentration.

The table inset below shows a distribution of some of the important tribes according to the working categories of the Census and non-workers :

TABLE

Name of Tribe	Total	I	II	III	IV	V	VI	VII	VIII	IX	X
1	2	3	4	5	6	7	8	9	10	11	12
All Tribes	1,000	458	118	32	3	1	2	1	2	11	372
Gond	1,000	462	122	31	2	1	1	1	2	10	368
Korku	1,000	499	58	38	6	N	2	N	1	9	387
Bharia Bhumia etc.	1,000	493	98	31	4	1	1	1	1	15	355
Pardhan, Pathari or Saroti	1,000	332	133	50	5	2	6	3	3	37	429

The table shows that the participation rate in agriculture is very high in case of the tribes i. e. 92% for all the tribes together and is 92%, 90%, 92% and 81% respectively for the Gond, Korku, Bharia and Pardhan. The distribution follows more or less the same pattern in case of Gond, Korku and Bharia, but is different for the Pardhans. The first difference is the higher proportion of non-workers in the Pardhans. Secondly, the Pardhans have proportionately less number of persons participating in category I (i. e in cultivation) and more persons in other services'. They also have the maximum proportion of persons in the mining industry. Mining of course, comes next only to agriculture as regards participation in case of all the tribes generally.

The sex-ratio of all scheduled tribes in the district is 1 042; while that of the most numerous Gonds is 1,051. Pardhans also have a slight excess of females over males but all other tribes have excess of males over females.

Educationally the scheduled tribes in the district are still very backward in comparison to the district's general population and the scheduled castes,though they are better off than scheduled tribes in the State as a whole and in many another district. Proportion of literate and educated in the scheduled tribes in the district is 5% (9% for males and 0.9% for females), comparing with 16% (26% for males and 6% for females) in the general population and 12.1%. (20.8% for males and 3.1% for females) in the scheduled castes. 28% of the literates and educated persons in the scheduled tribes possess educational qualifications equivalent to, or higher than the primary school level and 0.8% have passed matriculation or higher examinations.

Mother Tongues :

As many as sixty one speeches have been returned as mother tongues from the district. This, however, does not mean that the district is a veritable ' babel of tongues'. Far from it, a cursory glance at table C-V indicates that 98% of the population speak only seven languages, namely, Hindi, Marathi, Gondi, Urdu, Parvari, Korku and Muasi. Even of these seven, the first three alone claim as much as 93%of the population as speakers. It follows, therefore, that fifty-four languages are spoken as mother tongues by only 2% of the population. Thirty-one out of these fifty-four speeches do not claim more than fifty speakers each.

Hindi, returned as mother tongue of 65% of the population, is the most widely spoken speech in the district as a whole; and also in the northern tahsils Chhindwara and Amarwara. In the rural areas of the latter tahsil 98% of the population have returned Hindi as mother tongue while Chhindwara tahsil rural has 77% of its population speaking Hindi as mother-tongue. The proportion of persons speaking Hindi is as low as 14% in the Sausar tahsil which is on the border of the Marathi speaking Nagpur district of Maharashtra. The Hindi claimed by the vast majority of the population in the district as mother-tongue is

in fact a form of Hindi akin to its Bundeli dialect.

Marathi which, as already observed, is the dominating language in Maharashtra areas adjoining Sausar tahsil, is the most widely spoken mother tongue in that tahsil. Being the mother tongue of 17% of the population, it is after Hindi the second most commonly spoken mother tongue in the district. In Sausar tahsil speakers of Marathi as mother tongue number 47% of the population in rural areas of the tahsil. In Chhindwara tahsil rural, 5.4% of the population speak Marathi as mother tongue, and it is the third most common speech in that tahsil. In Amarwara tahsil (rural) Marathi is the mother tongue of only 0.5% of the population; but even then it is the third most common speech in the tahsil.

Gondi, a tribal dialect named after the Gond tribe, is the mother tongue of 11% of the population in the district, and is the third most important speech. It is the second most commonly spoken mother tongue in rural areas of all the tahsils. The largest proportion (27%) of speakers of Gondi is in Sausar tahsil; while Amarwara rural has only 0.5% of its population claiming Gondi as their mother tongue. In rural areas of Chhindwara tahsil, 27% of the population have returned Gondi as mother tongue. Gondi is thus seen to be more widely spoken in the southern and western parts of the district and it sinks into a numerically unimportant minority language in the north-eastern Amarwara tahsil.

Speakers of Urdu number 1.5% of the population. Almost half of them are returned from the urban areas. Speakers of Parvari are almost as numerous as Urdu speakers, but they are concentrated almost entirely in rural areas of Sausar tahsil.

Korku and Muwasi speeches, taking the names of the tribes and community by which they are spoken, claim respectively 1.3 and 1.2 percent of the population as speakers. Muwasi is almost exclusively returned from rural areas of Chhindwara tahsil; whereas speakers of Korku are concentrated in rural areas of both Sausar and Chhindwara tahsils.

Other numerically significant speeches i. e. claiming more than 500 speakers each are, with number of their speakers : Katia (2,287); Punjabi (2,185); Koshti / Marathi (1,574); Sindhi (1,174), Gujarati (1,307); Bengali (1,041); Banjari (983); Telugu (798); and Marwari (521). The remaining 45 languages have thus less than 500 speakers each. Speakers of Punjabi, Koshti/Marathi, Bengali, Telugu and Marwari are concentratedi mostly in urban areas; while Katia and Banjar are returned almost entirely from rural areas.

It is instructive to see how the relative proportions of some of the important speeches have changed during the past fifty to sixty years. From the Gazetteer of Chhindwara* District, which was compiled in the first decade of this century, it would be seen that Hindi Gondi, and Marathi languages were then spoken by 53, 25 and 19 per cent of the population Korku was spoken by 2% of the population Thus, during the sixty years or so that have elapsed Hindi speakers have improved their proportion by 12% mostly at the cost of Gondi speakers whose proportion has fallen by 13%. The proportions of Marathi and Korku speakers have decreased but slightly. Another important change that may be observed is that Marathi which was the third most widely spoken language sixty years back has now climbed to the second position, while Gondi has come from ths second to third position. Speakers of Korku have also declined in proportion. The Bhoyari dialect which had in 1901 about 17000 speakers has now almost disappeared from the scene, the number of speakers claiming it as mother tongue being only 431. Katia speakers have also been reduced in numbers, but they are yet not numerically insignificant.

Gondi speakers form only 38% of the Gond population of the district suggesting that majority of the Gonds have adopted other speeches as their mother tongues. In case of Korku language, we find that speakers of Korku as mother tongue form 77% of the Korku population of the district. Similarly the speakers of Urdu as mother tongue are 73% of the Mohammadan population of the district.

* Central Provinces District Gazetteers, Chhindwara District; Vol. A, Descriptive 1907 page 12.

Land Utilisation in the District :

Table 2A.1 on page 337 of the Handbook gives the figures of land utilisation in the district from year 1950–51 to 1960–61. Under the classification prevalent till 1952–53, data for land–use was published under four categories forests, areas not available for cultivation, areas cultivable and areas cultivated. The last mentioned cetegory included net area sown and current fallows From the year 1953-54, the second and third categories were further classified. The areas not available for cultivation were now further divided into (i) land put to non–agricultural uses and (ii) barren and unculturable land. The cultivable areas were similarly divided into (i) culturable waste (ii) fallow land other than current fallows (iii) permanent pastures and other grazing lands and (iv) land under miscellaneous tree crops and groves not included in the net area sown.

Forests :

In 1960–61 forests covered 1023.7 thousand acres of land in the district, making 35.8% of the total reporting area. The forest area is proportionately greater in Chhindwara district than in the State. It is distributed more or less evenly in the district. Tahsilwise figures for forest area are not available. A note on the *flora* and *fauna* represented in the forests of the district has been given earlier.

Areas not available or cultivation :

This category includes 5.7% of the total reported area in 1960 61. Of this 4.4 percent represents areas put to non–agricultural uses namely occupied by buildings, roads and railways, canals, etc. The remaining 1.3% is covered by barren and unculturable lands like mountains and rocks. The percentage of land put to non–agricultural uses in the district is low as compared to the percentage for the State as a whole (4.3%).

Cultivable Areas :

This category of land accounts for 17% of the total reporting area. Of this roughly one third consists of culturable waste; a little more than one–fifth, of fallow lands other than current fallows; a little more than two–fifths, of permanent pasture lands; and an insignificant proportion of miscellaneous tree crops and groves. Apparently the district contains considerable areas other than old fallows which could be reclaimed, preferably by the efforts of individual farmers to whom it may be allotted.

About 4% of the total reporting area is reported as old fallow lands, while about 2.2% is current fallow land; so that 6.6% of the land remains uncultivated though it is cultivable.

Cultivated Areas :

Under this head are shown separately the net area sown and the area recorded as current fallows. For the year 1960–61, the net area sown in the district was about two-fifths of its total area, which is comparable with the corresponding percentage (36.1%) for the State as a whole. For the two other Satpura districts, namely Betul and Seoni, the percentages are 36.9 and 37.3 respectively. The net area sown has increased by 8.1% in the period 1951–61, while the population has grown thrice as fast during the same period. This means, even if there has been some degree of improvement in the technique of cultivation, agriculturally the district remains almost where it was in 1951–52. Again the percentage of cultivated to cultivable areas in the district is 71.3, which is high in comparison to the value for the State i. e. 65.3% in 1959–60.

Cropping Pattern :

On account of the wide range of climatic and physical conditions, different types of agricultural practices are prevalent in different parts of the district. Rabi is the representative crop pattern of the central plateau consisting principally of the southern portions of Chhindwara and Amarwara tahsils; moist black soil of the plateau being preeminently suited for wheat and gram, the two principal rabi crops. The best wheat tract of the plateau is its south-eastern portion consisting of the plains north of Chourai, an extension of the Seoni *haveli*. The north-eastern part of the plateau is also a black soil tract but is cut up frequently by hills, which are suitable for the growth of millets only. The south and western portion of Chhindwara tahsil has yellow soil. Wheat cultivation however extends as far west as Umreth a village to the

southwest of Chhindwara town. The wheat growing belt in the west of the central plateau follows roughly the Pench river towards its source. The rest of the western portion of the central plateau is suited for *kharif* crops, mostly the millets. Rice is also sparsely cultivated. The higher plateaus in the north also grow *kharif* crops chiefly the inferior millets.

In Sausar tahsil, the cultivation is of the type described 'complex kharif' by Mr. Montgomrie, Settlament officer. The nature of crops however does not change abruptly but there is a gradual transition. The highlying tract around Khamarpani adjoins the wheat growing parts of Amarwara tahsil and has broadly similar soil and elevation. The chief crop grown there is wheat but *juar*, the staple crop of Sausar tahsil also is grown. Cotton however is not grown in the tract. Another transition tract is in the north-east, around village Ambara. It is on a lower elevation than Khamarpani and consequently grows less wheat than *juar*. In the rest of Sausar tahsil, with the exception of Pandhurna valley about Pandurna and Chicholi which have wheat cultivation on relatively larger areas, *kharif* cultivation reaches its maximum. The principal crops of this tract are *juar* and cotton.

Table on page 338 of the Handbook gives the acreage under important crops in the district during the decade 1951-60 The maximum acreage is under *juar* crop, fluctuating between 310 thousand acres in 1956-57 and 361 thousand acres in 1953-54. It accounted roughly for 43% of the total area under cereal crops in 1960-61, and about one third of the area under food grains in that year. Next widely sown crops are the millets-*kodo*, *kutki* and maize-which are the staples of the tribals inhabiting the hilly regions, especially in the north of the district. *Kodon* is sown earlier and is know as *Bhadeli* while *kutki* a later variety is reaped later in *Katik* and is known as *Katkai*. The crop next in importance is however wheat, area under which fluctuated from 124 thousand acres in 1950-51 to 175 thousand a cres in 1956-57 and 171 thousand acres in 1960-61. Save one or two years the area under this crop is steadily growing. Pulses-gram, *tuar* or *rahar*, *mung*, *tioda* and others occupy greater area than wheat and it is distributed all over the district. The acreages under rice, cotton and ground nut though sizeable and mutually comparable are still not very impressive in comparison to *juar*, wheat, millets and pulses.

Tahsilwise Cropping-pattern :

The table inset below gives percentage of area under some important crops to the net area sown separately for the district and each tahsil for the year 1960-61.

Percentage of area under certain crops to net area sown, 1960-61.

District/Tahsil	Rice	Wheat	Jowar	Total cereals & millets	Gram	Tur	Total pulses
1	2	3	4	5	6	7	8
Chhindwara District	2.9	15.2	29.1	66.6	10.3	4.2	19.0
Chhindwara Tahsil	2.8	17.1	22.8	70.9	13.7	3.2	20.8
Amarwara Tahsil	3.5	20.4	16.0	63.3	11.4	1.9	20.9
Sausar Tahsil	2.5	6.3	50.8	63.7	3.6	8.9	.139

District/Tahsil	Total food grains	Total food crops	Groundnut	Total oil seeds	Cotton	Total non-food crops	Double cropped area
1	9	10	11	12	13	14	15
Chhindwara District	85.7	87.5	4.1	16.0	2.5	18.9	6.4
Chhindwara Tahsil	91.8	94.0	2.2	14.1	N	14.4	8.4
Amarwara Tahsil	84.3	85.2	0.9	20.3	N	20.8	6.0
Sausar Tahsil	77.7	79.9	10.6	13.8	9.3	23.6	3.5

87.5% of the district's net sown area is under food-crops. Area under food-crops is highest (94%) in Chhindwara tahsil, while it is lowest 80% in Sausar tahsil. Amarwara tahsil has 85% of its area under food-crops. Both Sausar and Amarwara devote comparatively greater proportion of area to non-food crops, the former to cotton and the latter to oilseeds.

Most of the area under food-crops is under food grains. The difference between the area under food-crops and food-grains gives the area devoted to the cultivation of sugarcane, fruits, and vegetables and condiments. In the district as a whole, 1.8% of the net sown area is under the non-grain food-crops. Proportion of such area is least (0.9%) in Amarwara tahsil; while it is 2.2% in both Chhindwara and Sausar tahsils. Chhindwara tahsil grows the bulk of sugar-cane, potatoes and other vegetables of the district, and a good proportion of condiments especially chilli. Sausar tahsil on the other hand grows almost all the citrus fruits-oranges particularly, and more than half of chillis in the district. Amarwara has some acreage devoted to the production of vegetables and sugarcane.

Of the food-grains, cereals and millets occupy 66.6% of the district's net sown area. Highest (71%) area under cereals and millets is in Chhindwara tahsil. Sausar and Amarwara have nearly equal proportion of area under cereals and millets.

Cereal *juar* has the maximum acreage—29% of net area sown in the district. The area under *juar* is more than half (51%) of the net area sown in the southern Sausar tahsil : but is as small as 16% in Amarwara tahsil. It is the most widely grown cereal in Sausar and Chhindwara Tahsils.

Wheat occupies 15% of the district's net sown area, and is second most widely grown cereal in the district and in Chhindwara tahsil. In the eastern Amarwara tahsil, however, it is the most widely cultivated cereal. It has relatively smaller area in the mainly *kharif* tahsil Sausar

The cereal rice, which is an important crop in the eastern districts of the State is only a minor crop in Chhindwara district, having less than 3% of the district's net sown area under it in 1960-61.

Data regarding area under the minor millets *kodon* and *kutki* is not directly available; but some idea of the magnitude of such areas can be formed by subtracting the areas under the cereals wheat, rice and *juar* from the area under all cereals and millets. There is no doubt that bulk of the area so obtained is under millets. In the district as a whole the small millets occupy about 19% of the net area sown; they have somewhat higher areas under them in Chhindwara and Amarwara tahsils. Sausar tahsil has only 4% of its net sown area under the millets and cereals other than *jowar*, rice and wheat.

A little less than one-fifth of the district's net sown area is under pulses. In Chhindwara and Amarwara tahsils, the area is a little greater than one-fifth of the net area sown, but in Sausar it is much smaller - i.e. 14% of the net sown area. The most important pulse grown in the district is gram which occupies more than half of the area under pulses in the district and in Chhindwara and Amarwara tahsils. Gram however has smaller area under it than *tur* in Sausar tahsil.

Oilseeds and cotton are chief non-food crops of the district. The latter is almost exclusively grown in Sausar tahsil which had

9% of its net sown area under it. Oilseeds occupied 16% of the district's sown area. The acreage under oil-seeds was proportionately greater (20%) in Amarwara tahsil. In Chhindwara and Sausar tahsils, oilseeds occuped 14% of the net areas sown. Groundnut is the most important oilseed in Sausar tahsil, covering 11% of the net area sown. In Chhindwara and Amarwara tahsil *ramtila* and *jagni* are the most widely grown oilseeds. *Jagni* (*Guizotia oleifera*) or niger is a companion crop to *kodon-kutki*.

Double cropped area :

Area sown more than once has also been growing more or less steadily since 1950–51. In 1960-61, it had more than 1½ times the value of 1950–51. In 1960–61, double cropped area amounted to 6.4% of the district's net area sown. The proportion of double cropped area is highest (8.4%) in Chhindwara tahsil. In Amarwara tahsil, 6% of the net area sown in 1960-61 yielded more than one crop. Sausar tahsil has the smallest proportion 3.5% of double-cropped area.

Sowing of crop mixtures is also practised. Popular crop mixtures in Amarwara tahsil—as reported by the District Agricultural Officer—are : (i) *juar* and *mung* in equal proportion (ii) wheat and gram with three parts wheat and one part gram (iii) *juar* and *tur* with three parts of *juar* and one part of *tur*. In Sausar tahsil, wheat-gram (3 : 1), *juar*-groundnut (1 : 3) and *juar-mung* (1 : 1) are the common crop mixtures. The crop mixtures of Chhindwara tahsil are the same as those of Amarwara tahsil. Rotation of crops is also resorted to. According to information given by District Agriculture Officer, in Amarwara tahsil wheat is rotated with gram or niger (*Jagni*), and the millets *Kodo-kutki* by *Jaqni*. Crop rotations practised in Sausar tahsil are groundnut after cotton, and *juar* after cotton.

Irrigation :

Tables 2A.3 and 2A.4 in part II of the Handbook give the area irrigated under major crops by source of irrigation. In Chhindwara district, irrigation is mainly from wells, which irrigated more than 95% (37,000 acres) of the total irrigated area in 1960-61. The percentage was even greater than that in some of the earlier years of the decade. The district does not have any canals, nor is it likely to have any in the third plan period. A little less than half of the irrigated area is under wheat ; the remaining being under pulses and sugarcane.

Economy :

The table inset below gives a breakup of 1000 males for total, rural and urban areas in case of the district, and for rural areas only in case of tahsils by the nine categories of workers and non-workers.

Working Category	Chhindwara District		Chhindwara tahsil		Amarwara tahsil	Sausar tahsil
	T	R	U	R	R	R
Total	1,000	1,000	1,000	1,000	1,000	1,000
Total workers	608	621	524	617	625	624
I	336	377	64	360	428	363
II	84	92	26	64	93	147
III	82	78	113	119	28	44
IV	28	25	48	23	26	29
V	7	3	35	4	N	1
VI	5	3	14	3	4	2
VII	19	11	73	10	14	10
VIII	9	4	45	5	2	5
IX	38	28	106	29	30	23
Non-workers X	392	379	476	383	375	376

With 69% of its male workers working principally in the agricultural sector, the agrarian base of the district's economy is apparent. The proportion of male participation in the agriculture sector is however less than that for the State as a whole viz. 73%. The district is thus somewhat less dependent on agriculture than the State and the reason is to be found in the proportionately higher number of males working in category III—which in the district, is mostly coal mining : the proportion of males in category III to total male workers in the district is 13.5% as against 3.8% for the State. The proportion of male workers in agriculture to total male workers is 83% and 76% respectively in Seoni and Betul, the two Satpura neighbours of Chhindwara. The district's industrial backwardness is clear ; only 0.7% of the male population is working in category V as against 1.8% in the State as a whole. Among individual tahsils, the rural areas of the mining tahsil Chhindwara have 69% of male workers in agriculture ; which is equal to the percentage for the district as a whole and is less than the corresponding percentage of all the rural areas of the district. This is due to the concentration of all the mines in the rural Chhindwara tahsil. The entirely rural Amarwara has 80% of all its workers in agriculture, while rural Sausar has a still large proportion 82%. Some idea of the pressure on land can be had from the land-man ratio (area of land per person) which is 4.4 acres for the district. If we confine ourselves to only those lands which are culturable, including those under cultivation, the ratio comes to 2.6 acres per person.

Household Economy :

Table B X to XVI in the body of the Handbook present economic data relating to the district treating the household as a unit, and not the individual. A brief analysis of the data presented in some of these tables is quite useful. It may be mentioned that these household economic tables are prepared from a 20% sample of the household schedules; since this sample is big enough, the inferences derived from it can, without sensible error, be extended to the whole universe of households. Table B–X shows that 54.2% of all households in the district were engaged in cultivation only. 4.8% were engaged in household industry only while 6.6% were engaged both in household cultivation and industry. Thus 60.8% of the households were engaged in cultivation, and 11.4% in household industry. 34.3%, or roughly one-third of the households in the district were engaged neither in cultivation nor in household industry.

Table B–XI in the Handbook gives the breakup of cultivating households by size of land cultivated on the one hand, and by interest in land cultivated on the other. The data is presented separately for rural and urban areas of the district, and for rural areas of each tahsil. In rural areas of the district, 67% of the households are engaged in household cultivation. It appears that only 76% of the cultivating households own their entire holdings ; while 5%, or one in twenty of the households cultivate lands not belonging to them but taken on lease from others. This proportion may therefore be taken to represent the extent of absentee land-lordism still current in the rural areas of the district. Again, 19% or roughly one-fifth of all the rural households cultivate on lands partly owned by them and partly taken from others on lease.

As regards size of holdings, the table shows that 4% of the households cultivate on holdings of less than one acre in size. 6% of the households cultivate on holdings between 1 to 2.4 acres in size, while 14% do so on holdings of 2.4 to 5 acres in size. Thus 24% or roughly one-fourth of the households cultivate on holdings of less than 5 acres, which are clearly uneconomic holdings. 31% of the households cultivate holdings of 5 to 10 acres in size, which may or may not be economic holdings depending on the size of the cultivating household and the quality of soil. Holdings of 10 to 15 acres are cultivated by 21% or roughly one-fifth of the households. 23% of the households cultivate holdings between 15 to 50 acres of land, while 1.4% have holdings of more than 50 acres of land.

Agriculture :

With 78.5% of the working force in it, agriculture is the mainstay of the district's economy. The proportion is smaller—70% in

the mining tahsil Chhindwara, and is highest 88% in the entirely rural tahsil Amarwara. Sausar tahsil has 84% of its working force in agriculture. 61% of the workers in the district are returned as cultivators. In Amarwara tahsil, the proportion of cultivators is as high as 71%. In Sausar the proportion of cultivators is lowest i.e. 57%; while in Chhindwara tahsil, cultivators are 58% of the working force. Proportion of agricultural labourers in the district as a whole is 18% of the working force; it is 13.7% in Chhindwara tahsil, 17% in Amarwara tahsil and as high as 27% in Sausar tahsil. The high proportion of agricultural labourers in Sausar tahsil is probably on account of cotton cultivation. in that tahsil which is labour-intensive.

Category III—Mining and quarrying etc. :

Category III comes next to agriculture in importance in the economy of the district. It gives principal employment to 8.5% of all workers in the district. The proportion of workers in this category is the highest in the mining tahsil Chhindwara—being 13.8% of the tahsil's working force. It is smaller, respectively 4.1% and 2.7% in the Sausar and Amarwara tahsils.

Coal Mining :

56% of the workers in Category III are engaged in coal mining (minor group 100). Chhindwara is the biggest producer of coal in the State, accounting for 43% of the State's output of coal in 1959. Most of the collieries, 19 out of 27*, are situated in the Pench valley and the remaining eight are situated in Kanhan valley. Except for a few quarries, others produce II to III grade coal.

Manganese Mining :

3.8% of the workers in category III in the district are in minor group '103', that in, mining of manganese. Chhindwara is rich in manganese ores, its reserves having been estimated at 15 million tons out of a State reserves estimate of 55 million tons, by the team of the National Council of Applied Economic Research. In manganese production, the district is next only to Balaghat in the State. The table below gives figures for the production of coal and manganese in the district for some years of the decade.

Year	Output** in tons	
	Coal	Manganese
1951	1,658,363	19,833
1953	1,921,914	45,405
1956	2,110,739	27,393
1957	2,249,540	22,495
1958	2,349,521	20,970
1959	2,246,663	18,806

The progressive short-fall in the output of manganese from 1953 is due to the slump in that industry from that year.

Besides mining, which as seen above absorbs 60% of the workers in category III other economic activities of this category are (a) forestry and logging, employing 3.4% of the workers; (b) fishing-minor group '031'-employing 3.8% of the workers; (c) cattle-breeding for milk and animal power, and rearing of sheep for production of wool employing 23.5% of the workers.

Category IV— Household Industry :

Participation in this category is to the extent of 4.0% of the district's working force. It ranks fifth in respect of size of participation in the district. One-fourth of the workers in household industry are in urban areas. Tahsil-wise the proportions of workers in household industry to total workers in each tahsil are; Chhindwara 3.5%, Amarwara 3.1% and Sausar tahsil 5.3%. The last mentioned tahsil thus has a somewhat greater participation in household industry, owing to a large number of

* Annual Report of the Department of Geology and Mining for 1959.

** Figures for 1956 to 1959 are taken from reports of the Department of Geology and Mining, M. P.; for the years, 1951 and 1953 the figures are taken from the report on Techno-Economic Survey of Madhya Pradesh.

workers in the towns of Lodhikhera and Sausar being engaged in cloth weaving on handlooms. That is why 42.9% of the workers in Sausar tahsil in household industry are in urban areas, mostly in the towns of Lodhikhera and Sausar.

Only a small fraction 0.4% of the workers in category IV are engaged in such activities as production of plantation crops, fishing or livestock production. 99.6% of the household industry workers are employed in the making of goods.

The most important household industry, which is concentrated to the extent of 73% in the urban areas, mostly the towns of Lodhikhera, Sausar and Pandhurna in Sausar tahsil, is cotton-weaving in handlooms. This household industry absorbs 16% of the workers in Category IV, Major group 23 'Textile Cotton' accounts for 18.2% of all workers in category IV. Sex wise participation in the industry is more or less equal.

Next important in size of participation is major group '28' ("manufacture of wood and wooden products") which accounts for 17.3% of all workers in category IV. Industries included in this are carried on predominantly by males. 9.8% of the workers in this group are engaged in the making of articles from bamboo and cane, a traditional industry associated with Basor and Mang castes which is dispersed over rural and urban areas more or less evenly and has greater participation of females than males. Carpentry, including manufacture of structural wooden goods accounts for 7.6% of the workers; it is concentrated mostly in rural areas and is carried on almost exclusively by males.

14.8% of the workers in household industry are employed in major group '20' i.e. making of food-stuffs. These are mostly in rural areas, and are characterised by greater female than male participation. Important household industries in this group are: production of edible oils (minor group 207) employing 6.3% of workers in category IV; production of butter, *ghee* and other dairy products (minor group 206) employing 3.4% workers; and production of rice, atta, flour etc. by milling, dehusking and processing of crops and food grains (minor group 200), employing 2.3% of workers in household industry.

Making of leather and leather products, traditional industry of the Chamar group of Scheduled Castes, (major group 31) employs 12.2% of the workers in category IV. In this household industry, males are about four times as numerous as females. Other important household industries are tailoring (minor group 273) employing 10.0% of predominatly male workerss rural blacksmithy (minor group 369) employing 9.4% of predominatly male workers of category 'IV; making of structurel clay products like bricks, tiles etc. (minor group 340) employing 5.4% of workers in category IV; silver and goldsmithy (minor group 393) employing 5.3% of workers in category IV; making of earthen pots (minor group 350) employing 2.1% of the workers; and making of *biri* (minor group 220) employing 1.6% of the workers in category IV.

The household industries described above include 96.3% of the workers in category IV.

Category V-Manufacturing:

Chhindwara district is very poor in large scale manufacturing industries. Employment in category V in the district is less than 1% of all workers in the district. Most of the workers in category V are in Chhindwara tahsil, that too in the urban areas. The entirely rural Amarwara tahsil has negligible participation in category V.

In 1961, there were only 19 registered factories in the district, including the transport workshop owned by the Government and a printing press at Chhindwara. Twelve of these factories were located in Chhindwara town, while Pandhurna and Parasia towns had respectively 5 and 2. According to figures furnished by the Chief Inspector of Factories, the number of persons employed in all these factories was 673, which is only about one-third of all workers in category V in urban areas. This indicates the possibility of small number of establishments to have escaped registration;

but by and large it means that most of the workers returned in category V actually are engaged in small scale industries which do not technically satisfy the definition of household industry. Of the nineteen registered factories, three (all located in the town of Pandhurna in Sausar tahsil which produces cotton) were cotton ginning and pressing factories; three cold storages, five dal and oil mills; five saw mills and one general and job engineering. It thus appears that most of the factories in the district are concerned with the processing of agricultural and forest produce.

Category VI– Construction :

This sector of economy employs only 0.5% (i. e. 1 in 200) of the working force. Half of the workers in this category are employed in construction and maintenance of buildings (minor group 401);45% in the construction and maintenance of roads, railways etc. and 5% in the construction and maintenance of telegraph lines.

Category VII– Trade and Commerce :

Employment in trade and commerce is to the extent of 2.1% of the district's working force. In the rural areas, participation in trade and commerce is roughly 1% (actually it is slightly smaller) which indicates the lower consumption level of the rural population. Roughly 7% of the workers in trade and commerce are engaged in whole-sale trade. They are almost all in the urban areas. More than half of these are engaged in whole-sale trading in cereals and pulses (minor group 600); about one-fifth in the wholesale trading in sugar, oils, vegetables, and other food stuffs (minor group 601). Trading in all kinds of fabrics and textiles products, and in tobacco products are also significant in the wholesale trade.

Retail trading engages nine-tenths of the working force in category VII. About half of the retail traders are in urban areas. More than half (53.7%) of these retail treaders are concerned in trading in cereals, pulses, vegetable, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry, etc. i.e. edible things. Next in importance is retail trading in fibres, yarns, *dhotis*, *saries* etc. employing 11.8% of the working force in retail trade. Retail trading in tobacco and its products like *biris* and cigarettes employs 9.1% of the retail trade workers. Other important branches of retail trade in the order of their size are : retail trading in food-stuffs like sweetmeats, condiments, biscuits, cakes etc. (minor group 646); retail trading in fuel such as coke, coal, firewood, kerosene oil etc. (minor group 645); retail trading in animals (minor group 647); retail trading in metal, porcelain and glass utensils (minor group 662).

The exports of the district centre round its main products : coal, food grains cotton, oilseeds, timber, manganese, *harra* and other forest produce etc. Things made by local artisans in the villages have local markets. Chourai village is a centre for wheat trade, while Pandhurna town in Sausar tahsil is important for cotton trade. *harra* or myrabolam which has value in the foreign markets is an important item of export to the Narsimhapur town from the former *Jagirs* in the north of the district.

Category VIII--Transport, Storage and Communications :

From the point of view of size of participation, this category is not very important in the district's economy, employing less than 1% of its workers. Of these more than nine-tenths (91%) are in transport. railway transport alone accounts for 56.4% of the workers in category VIII. The development of railways in the district began in the opening decade of this century. Seoni--Chhindwara branch was opened for traffic in 1904. Today the district headquarters is also connected by rail with Nagpur (by a narrow guage line); with Amla in Betul District by a broad-guage line running between Amla and Parasia Besides, the Delhi Madras railway line via Itarsi passes through the south--western corner of the district and Pandhurna town is a station on it.

Transport by buses and by motor vehicles other than buses (minor groups 701 and 702) account for one-fifth of the workers in category VIII. The district has a net-work of roads, mostly emanating from the head-

quarters town Chhindwara. The latter is now connected with all-weather first class roads with Multai in Betul district via Junnardeo, Piparia in Hoshangabad district via Parasia and Tamia, Narsimhapur via Amarwara, Seoni via Chaurai and Nagpur via Sausar. Total length of roads in the district is reported to be 1,077 miles. This includes 188 miles of State high ways, 125 miles of major district roads, 17 miles of other district roads, 555 miles of forest roads and 192 miles of village roads. The district has 73 miles of all-weather Government roads per 1,000 square miles of area, which compares with a State average of 129 miles, and 247 miles for Jabalpur district. Inclusion of forest and village roads most of which are only fair- weather roads increases the figure to 235 miles in case of the district, 184 miles in case of the State and 352 miles in case of Jabalpur district. Chhindwara thus seems to be poorer as compared to the State as a whole as regards all weather Government roads. Employment in storage and warehousing (major group 72) is numerically insignificant. Communication however has sizeable participation of 8% of the working force in category VIII. Workers in communication are all engaged in post and telegraph services.

Category IX--Other Services

From the size of participation, this category ranks third in the district's economy. It has 4.9% of the district's working force in it. Roughly three-tenths 29%) of the workers in this category did not furnish sufficient information to enable their industrial affiliation in any of the known activities included in the category.

'Personal service' (major group 88) employs the highest proportion (21.6%) of the workers in category IX. These are mostly barbars and hair-dressers (5.6%); washermen (5 1%), domestic servants such as cook etc. (3.7%); and persons serving in services in hotels etc. (2.1%)

'Public Services' (Major group 80) is next from the point of view of size, employing 20.1% of the workers in 'other services'. These mostly come from public service in administrative departments and offices of the State Government (12.9%); public service in police 3.5%) and public service in administrative departments of quasi-Government and local bodies (3 5%). Educational services (minor group 811) mostly teachers in the primary, middle and higher secondary schools and in colleges contribute 11% of the workers in category IX. Another important service is 'public service in health and medical services rendered by organisations and individuals" (minor group 890), which contributes 5.2% of the working force in category IX. Sanitary services (major group 51) employ 3 5% of the workers in the category.

Non–workers : Unemployment :

Table B–IX in the body of the Handbook gives details of all non-workers by sex and age-group. All of these persons cannot be regarded as swelling the rank of unemployed in the district, or of potential job seekers. Columns 18 to 21 of the table are of considerable interest as they disclose the number of persons who are seeking employment. Such persons are only 0.3% of all non-workers, and this small proportion would tend to paint a rosy picture of the state of employment in the district. Nothing could, however, be farther from the truth than such a picture. The figures in columns 18 to 21 do not probably represent the true state of affairs for a variety of reasons. One of these is that the questions regarding the State of unemployment in the enumeration schedule did not evoke helpful answers from the respondants, partly on account of the uninformed manner of putting the question to them, but also partly because of the reluctance of the respondents to disclose their state of unemployment. Then most of the students in ages beyond 15 are potential entrants to the labour market, and should be taken note of as unemployed. In fact, all persons in the ages 15–59 except men and women engaged in household duties and inmates of penal and mental institutions should be treated as unemployed, for whom jobs have to be found. This leaves 18,700 persons roughly, most of whom on the census day were fit enough to work

(no full time student has been returned in the age-group 15–34 in the district, which seems to be an error either at the operational stage on the part of the enumerator, or at the tabulation stage, because it is inconceivable that with so many high schools, and couple of colleges there would not be whole time students above 15 in the district) and for whom jobs had to be found. This makes about 29% of all non-workers in the working age-group (15–59) and may be taken as a rough index of unemployment in the district. In the above line of reasoning, no notice has been taken of the vast army of unemployed persons who have been returned as workers on account of the somewhat liberal definition of 'work' in 1961 Census.

Electricity:

Data made available by Electricity Board shows that till 1960-61, seven out of eight towns in the district were electrified. Forty-four villages out of the 1,896 inhabited villages of the district had also been electrified by 1960-61. With a rate of 2.3 eletcrified villages out of every 100 inhabited villages, Chhindwara district was ahead of the State in rural electrification; which had only 0.5 electrified villages per 100 villages. Jabalpur district which led in respect of rural electrification had 2.8 electrified villages per 100 inhabited villages, and thus Chhindwara district is not very much behind Jabalpur district as regards rural electrification.

Summing up

Present Chhindwara district came into existence on 1-11-1956 with Chhindwara, Amarwara and Sausar tahsils of the old Chhindwara district. This was also the territorial constitution of the district prior to 1931. The major portion of the district is situated on the Satpura plateau. The district derives it importance from its rich resources in minerals, forests and agriculture. It is the biggest producer of coal in the State; accounting for more than 40% of the State's output. It is also rich in manganese ores, its deposits having been estimated at 15 million tons. 36% (about 41% according to forest authorities of the district) of the district's area is covered by forests. Except the Sausar plain which has a hot climate, the rest of the district enjoys a cool climate. Rainfall varies from 40" in Sausar plain to about 66" in the highest elevations in the north–west of the district.

During the last sixty years, the district has seen major vicissitude only once viz. during the decade 1911–21, when what with crop-failures and a devastating epidemic of influenza, the district lost 5% of its population at the 1921 count. It, however, recovered remarkably well and its population at the 1931 count registered a 17% increase over the 1921 population. The following twenty years was a period of slow population growth for the district The last decade witnessed an impressive increase of 21.5% in the district's population; but even then it has not multiplied as fast as that of the State as a whole. The increase of 27% recorded by the district during 1901–11 decade, however, remains unsurpassed to date.

In size, Chhindwara ranks 10th in the State and contains 2.7% of its area. Its rank according to population is however 8th and it contains 2.4% of the State's population. The district is sparsely populated. Its population density of 172 persons to a square mile is lower than the State average of 190. It has a lorge population - approximately one-third–of Scheduled Tribes, mostly Gonds, but a sizeable proportion of Korkus also, who are economically and educationally backward. Their development requires greater efforts.

Of the district's population in 1961, 88% lived in rural areas. This proportion is slightly higher than the State proportion of 86%. The average population per inhabited village in the district is 414, comparing with 394 per inhabited village in the State as a whole. Further 49%, or roughly half of the population of the district live in small villages with less than 500 people. The corresponding State proportion is 42%.

The urban component of the district's population is 12% comparing with a State proportion of 14%, showing that the level of

urbanisation in the district is slightly lower than in the State as a whole. The district had, in 1961, eight towns ; against only three in 1951. Four of the towns, all in Chhindwara tahsil, are colliery towns, three are administrative centres and commercial towns; while one is a crafts town.

Sex-ratio in the district is 980, against 953 for the State as a whole. It does not show any disproportionately high imbalance in the sexes. In 1951 the sex ratio was higher than the 1961 ratio by 15. The fall in sex-ratio during 1951-61 is a phenomenon common to the whole State and we cannot easily ascribe it to causes like urbanisation or industrialisation as is generally done.

In educational progress, Chhindwara seems to be more or less on par with the State as a whole, having in 1961 a literacy percentage of 16 against 17 for the State as a whole. Viewing the decade in retrospect would however show that the district has made considerable progress in the field of education since 1951, when it had a literacy percentage of 10 only. This remarkable progress has been made possible by a liberal opening of primary schools. Nearly 43% of the children in the primary school going age-group '6-10' attended schools in 1960. The percentage was 67 for boys and 19 for girls. Universal primary education being our public policy, it follows that the district has not yet to rest on its oars in the matter of education, but to keep up progressing with the same tempo. Attendance of girls in primary schools seems to need particular attention. In other spheres of education too, the district has made considerable improvement since 1951.

54% of the district's population is in the working force, the proportion being higher than the State average of 52%. Higher participation rate in the district is mainly to be ascribed to the higher participation (47%) by women in the district than in the State as a whole, which is 44%. 79% of the workers in the district are in agriculture which is also the proportion in agriculture for the State as a whole. Category III, which includes economic activities like mining and quarrying, forestry, fishing, orchards and plantations, livestock and hunting, is next in importance in the district's economy. The bulk of the workers in category III i.e. about 60% are in coal and manganese mining. Other sizeable economic activities, with their participation rate in the working force are : 'other services' 4.9%, household industry 4.0%, and 'trade and commerce' 2.1%. Participation in 'construction', 'manufacturing' other than household industry' and 'transport, storage communications' is less than 1% in each case.

APPENDIX—A

Note:—1 Under Columns 3(a) and 3(b), (a) represents the area figures furnished by the Surveyor General of India, (b) represents the area figures furnished by the State Survey Department. The area figures of tahsils, total and rural are based on the figures of State Survey Department.

2 The Urban areas are collected by the Census Organization.

3 Population per square mile has been calculated on area figures furnished by the State Survey Department.

4 Towns treated as such for the first time in 1961 are printed in italics.

5 (M.) Stands for Municipality, (G. P.) stands for Gram Panchayat.

Appendix	XI—Towns and Villages having co-operative societies together with the description of the society	...	331

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note:—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise, that is, under the name of the district have been arranged the industries in ascending order of minor groups, showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code numbers with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc. as in the case of villages.

The following examples will make the above note clear:

For example, Chhindwara District total 200 (401) signifies that there are 401 establishments in Chhindwara District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling dehusking and processing of crops and foodgrains", Chhindwara Tahsil 202 (4) signifies that there are 4 establishments in Chhindwara Tahsil pertaining to Minor Group 202, which stands for "Production of indigenous sugar gur from sugar cane or palm juice and production of candy" Village 2 Sawarwani 313 (1) signifies that there is one establishment pertaining to Minor Group 313, which stands for " Manufacture of leather products such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles" Jamai Town Ward No. 1 207 (1) signifies that there is one establishment located in ward No. 1 of Jamai Town pertaining to Minor Group 207, which stands for "Production of edible fats and oils, other than hydrogenated oil)."

CHHINDWARA DISTRICT

PART II

OTHER DISTRICT STATISTICS

This part contains some useful official statistics pertaining to the district collected and compiled from various agencies (the agency or Source is indicated below each Table or Statement) and from official publications. These are presented under the following heads:—

1 Rainfall and Temperature

2 Economic Statistics:—
- (a) Agricultural
- (b) Prices and Wages
- (c) Live-stock and Taccavi
- (d) Co-operation, Banking and Insurance
- (e) Consumer's price index for working class

3 Administrative Statistics

4 Progress of Community Development Programme

5 Educational Statistics

6 Health, Medical and Vital Statistics:—
- (a) Health and medical
- (b) Vital Statistics

7 Communications Statistics

8 Miscellaneous

Note :— Figures for the years 1911 to 1951 are the Census years averages arrived at by striking the averages of the census year and two years preceeding and following it. For example the averages for the census year 1911 are the averages of the years 1908-09, 1909-10, 1910-11, 1911-12 and 1912-13.

* Figures of Seoni district are also included.
