PRIMARY CENSUS ABSTRACTS

Explanatory Note

These abstracts show figures of population according to eight livelihood classes for every town and each of its ward and each village. They also show the area of each village or town and for each village or townward the number of occupied houses, house-holds and literates, males and females separately. These abstracts are in essence a village directory with the data exhibited according to livelihood classes instead of communities as in 1941. These abstracts have been prepared in two parts: Part I for towns in which all towns of the district are shown together, arranged alphabetically, the name of tehsil in which the town is situated being given within brackets against the name of the town and Part II for villages, in which the villages have been arranged alphabetically for each tehsil and tehsils are arranged by location code numbers in each district. The information regarding the displaced persons has been given as Head Note on each abstract, for the whole tehsil in the rural and for the whole district in urban abstracts.

In column No. 2 the code number of each village only is given, that of tehsil and district has been given in the Head Note. The area figures given in Col. No. 3 have been obtained from the (Charge Superintendents) Tehsildars, etc.

The figures in Cols. Nos. 6, 7, 27 and 28 have been obtained from the abstracts of the National Registers of Citizens prepared by the enumerators. These registers consist of a transcription of the replies to the more important census questions in respect of every person enumerated. Figures of literates according to the tracts, derived from the census slips shown in Table D. VII, are generally more reliable than the village figures obtained from National Registers of Citizens. The census slip, on which the replies to the census questions were recorded, was the main document, the National Registers of Citizens was merely a copy. Moreover errors seem to have been committed by the enumerators while preparing the abstracts of National Registers of Citizens.

Un-populated villages and hamlets have not been given a place in the abstracts, their lists are given at the end.

Repeated attempts were made to verify the names of villages through the local officers, and corrections suggested have been embodied so far it was practicable. At the time of this verification certain other discrepancies also came to notice, namely (1) confusion in the treatment of hamlets was observed in some cases, (2) certain villages belonging to one tehsil were entered in another one and *vice versa*, (3) the population figures of villages having similar or common names were wrongly entered, (4) in some cases figures of hamlets were found totalled with the village figures twice. This resulted in a slight change in total figures. This explains the difference, if any, between the totals of the Primary Census Abstracts and those of tables prepared from it before such verification.

II—Cultivators of land wholly or mainly unowned and their dependants.

III Cultivating labourers and their dependants.

IV—Non-cultivating owners of land; agricultural rent receivers and their dependants.

Persons including dependants who derive their principal means of livelihood from:—

V—Production other than cultivation.

VI - Commerce.

VII—Transport.

VIII—Other services and miscellaneous sources.

N. B.—In most of the Tables, the m/l class number is only given instead of describing the class.

Code No.—In the enumeration stage a set of location code numbers was prescribed to identify each inhabited spot whereby the districts were numbered serially within the State, tehsils within a district and cities, towns and villages within a tehsil. Similary houses were numbered within a village and households within each house. Hamlets were given sub-numbers under the number of the parent village.

Key to Symbols
