## PREFACE

The Registrar-General, India, Ministry of Home Affairs, Government of India, New Delhi, through his office letter No. 51/2/51-RG., dated the 16th March, 1951, recommended to all the State Governments the publication of District Census Handbooks. The Government of Hyderabad accepted the recommendations for the preparation of the Handbooks through G.O. No. 13, dated 21-4-1952 issued by the Revenue Department. The Handbook for each district is divided into two parts. Part I deals with available factual material relating to the resources of the district, the extent of utilisation of these resources and with Socio-Economic data of general interest. Part II comprises the more important of the 1951 Census tables along with statistics for each primary census unit, that is to say, either a village or a town or a city. It also gives the list of villages and towns and cities having Post offices, Police stations, Rest houses, Dak bungalows, Railway stations, Bus halts etc. The present series pertain to Part II of the District Census Handbooks. The series comprising Part I of the District Census Handbooks is now being prepared and will be issued as soon as all the requisite material is collected.

2. A three-man Committee consisting of Shri Mohd. Abdulla, I.A.S., Revenue Secretary, Shri M. V. Divatia, Director, Bureau of Economics and Statistics and Shri C. K. Murthy, I.A.S., Superintendent of Census Operations was appointed to examine the drafts of Part II of the Handbooks for pruning the tables in order to reduce the cost of publication. Out of the 21 Census Tables published on the All-India plan in Part II-A and Part II-B of "Census of India, 1951, Volume IX, Hyderabad State," the Committee recommended the inclusion of 13 tables as detailed in the contents in addition to the Primary Census Abstracts which give the basic data for each primary census unit. Of these tables, A-series comprises General Population Tables and gives the relevant data either for the whole district or classified according to tahsils or towns of the district. Table E gives Summary Figures by Tahsils. The remaining tables coming under B. and D. series, present statistics relating to Means of Livelihood, Economic Status, Languages, Religion, Scheduled Castes and Scheduled Tribes, and Literacy classified according to certain tracts with a view to giving the rural and urban break-up for the district under each of the above heads.

3. Prior to 1951, primary census unit statistics in Hyderabad State, as elsewhere, used to be presented in districtwise publications called the "Village List" giving sex-wise break-up of the population of each village, town or city, as the case may be, on the basis of religion and communities. Instead, in the present publication these statistics are presented in the tahsilwise Rural and Urban Primary Census Abstracts according to the classification of the population into eight livelihood classes. It has not been possible to give the sexwise break-up of these statistics except in the case of the total population of each primary census unit; as under the Census, the data for individual villages, towns and cities were not tabulated according to sex for the eight principal means of livelihood. In addition to this, the Primary Census Abstracts also contain the area, the number of houses and households and the number of literate males and females in respect of each primary census unit.

An explanatory note on the tables regarding the contents as well as certain terms occurring in each of them is given separately.

4. Each District Handbook contains a map of the district and each of its tahsils. The district map gives the district and tahsil boundaries, rivers, roads etc. The tahsil maps show similar details for each tahsil and in addition give the location of each village, town or city in the respective tahsils. These maps were prepared by the Settlement and Land Records Department, Hyderabad. The code number of each of the villages, included in the Primary Census Abstract of a tahsil, whose location could not be determined on the maps, has been given at the foot of the relevant tahsil map.

5. For the completion of this work the co-operation and assistance of the different departments has been very helpful. Acknowledgements are in particular due to the Commissioner, Settlement and Land Records, Hyderabad, the Director, Government Printing, Hyderabad, the Secretary, Local Government Department, Hyderabad, the Superintendent, Road Transport Department, Hyderabad, the Chief Engineer, Irrigation Branch, the Chief Engineer, Roads and Buildings and the Chief Engineer, Irrigation Projects, Public Works Department, Hyderabad, the Inspector-General of Police, Hyderabad, the Director, Postal Services, Hyderabad Circle and the Divisional Commercial Superintendent, Central Railways, Secunderabad. Special acknowledgement is due to Shri C. K. Murthy, I.A.S., Superintendent of Census Operations for Hyderabad for having completed the statistical material for the present publication during the tenure of his office.

Hyderabad-Dn.,  
25th November, 1954.

M. V. DIVATIA,  
*Director, Bureau of Economics &  
Statistics and Ex-officio Superinten-  
dent of Census Operations, Hyderabad.*

## EXPLANATORY NOTE ON TABLES

TABLE A-I—*Area, Houses and Population*

This table gives for each tahsil of the district the area, the number of villages and towns (including cities, if any), occupied houses and the total population.

The term "Village" means a revenue village or a "Mauza" which includes the scattered hamlets known as "Mazras" situated within its limits. The term in this table (as well as in Table A-III) excludes (1) all revenue villages absorbed in a town and (2) all deserted villages. Consequently, the figures under Col. (4) of the table do not represent the total number of revenue villages in the district.

The term "Town" includes all places falling under the jurisdiction of Town Committees or declared as Municipalities in addition to certain other places with distinct urban characteristics such as the availability of civic amenities, contiguity of habitation and the composition and size of population.

The term "House" broadly means "every dwelling place with a separate main entrance".

TABLE A-II—*Variation in Population during Fifty Years*

This table gives the variation in population of the district during the last fifty years. The figures for the previous five Censuses, as given in this table, differ from those given in the reports pertaining to the concerned Censuses on account of necessary adjustments made in view of the territorial changes in the district.

TABLE A-III—*Towns and Villages Classified by Population*

In this table towns (including cities, if any), and villages are classified under the following three main population groups further sub-divided into nine sub-groups :—

1. Towns & Villages with less than 2,000 population.
2. Towns & Villages with population of 2,000-10,000.
3. Towns & Villages with population of 10,000 and above.

As in the case of Table A-I, figures under Col. (2) of this table also do not represent the total number of revenue villages in the district.

TABLE A-IV—*Towns Classified by Population with Variations since 1901*

In this table the towns are divided into six classes according to the size of population ranging from those with a population of 100,000 and above to those with less than 5,000 inhabitants, giving the population of each town during the last fifty years.

TABLE A-V—*Towns arranged Territorially with Population by Livelihood Classes*

In this table the towns are arranged according to the size of population. The table gives the population of each town classified according to eight livelihood classes and sex. The eight livelihood classes are as follows :—

*Agricultural Classes*

- I. Cultivators of land, wholly or mainly owned, and their dependants.
- II. Cultivators of land, wholly or mainly unowned, and their dependants.
- III. Cultivating labourers and their dependants.
- IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

*Non-agricultural Classes*

Persons (including dependants) who derive their principal means of livelihood from :—

- V. Production (other than cultivation).
- VI. Commerce.
- VII. Transport.
- VIII. Other services and miscellaneous sources.

As the owner cultivators, tenant cultivators and agricultural labourers, *i.e.*, Livelihood classes I, II and III are numerically insignificant in urban areas, they are clubbed together in this table.

TABLE B-I—*Livelihood Classes and Sub-classes*

This table gives tractwise (rural and urban) figures separately for males and females pertaining to Self-supporting persons, Earning dependants and Non-earning dependants under each of the classes of principal means of livelihood. The terms "Self-supporting", "Earning dependant" and "Non-earning dependant" are explained in para 5 of the Indian Census Economic Classification Scheme given in Part II-B Tables, Census of India, 1951, Vol. IX, Hyderabad, at page 99 and Appendix I referred to therein.

TABLE B-II—*Secondary Means of Livelihood*

This table gives figures separately for Self-supporting persons and Earning dependants in each of the eight principal means of livelihood classified according to the eight secondary means of livelihood.

TABLE D-I (i) *Languages—Mother-Tongue*

This table gives the tractwise (rural and urban) distribution of population separately for males and females according to Mother-tongues. The "Mother-tongue" of a person was defined as the language spoken by him from the cradle. It was, however, added that the mother-tongue of infants and deaf-mutes should be presumed to be the same as that of the mother.

TABLE D-I (ii) *Languages—Bilingualism*

This table gives tractwise (rural and urban) figures pertaining to bilingual returns for the district. For determining bilingual status of a person, in the instructions issued to enumerators in this regard, they were asked to ascertain with reference to each person enumerated by them as to whether in addition to his mother-tongue the person spoke any Indian language usually in his daily and domestic life and if so to record the name of the language which he spoke most frequently.

TABLE D-II—*Religion*

This table gives tractwise (rural and urban) distribution of population by religion. The table gives figures for Hindus, Sikhs, Jains, Buddhists, Zoroastrians, Muslims, Christians, Jews and "Other Religions". The last category is further sub-divided into Tribal and Non-tribal.

TABLE D-III—*Scheduled Castes and Scheduled Tribes*

This table gives tractwise (rural and urban) figures separately for Scheduled Castes and Scheduled Tribes in accordance with the classifications given in the Constitution (Scheduled Castes) Order, 1950 and the Constitution (Scheduled Tribes) Order, 1950 respectively. The list of Scheduled Castes and Scheduled Tribes as given in the above two Orders are given in flyleaf to table D-III at page 157 of Part II-A—Tables, Census of India, 1951, Vol. IX, Hyderabad.

TABLE D-VII—*Literacy by Educational Standards*

This table gives tractwise (rural and urban) figures separately for males and females pertaining to literacy and education according to different educational standards. The term "literate" used in columns (5) and (6) of the table includes all persons who are able both to read and write but have not passed any examination at all or have read up to third form or seventh class *i.e.*, those who have not passed the middle standard. The others are classed according to the thirteen Educational Standards given in the headings of Columns (7) to (32) of the table.

**TABLE E Summary Figures by Tahsils**

This table gives tahsilwise (1) area, (2) population for the 1951 and 1941 Censuses respectively, (3) percentage variation in population during the decade 1941-51 and 1931-41, (4) density of population as ascertained at the 1951 & 1941 Censuses and lastly (5) the number of males and females in each of the eight livelihood classes. This table also gives the rural and urban break-up for all the figures.

The 1941 population of the district given in column (6) is as adjusted to conform to the districts as constituted in April, 1950. Corresponding figures for the 1941 population of the existing tahsils have not been given in the table. It has not been possible to work out the 1941 tahsil figures on account of vast changes in the boundaries of many tahsils, the creation of many new tahsils, the abolition of many old tahsils and the non-availability of the requisite records.

*Note* :—Further details in respect of each of the above tables are available in the flyleaves to the respective tables in the “Census of India, 1951, volume IX, Hyderabad” as follows :—

**LIST OF CENSUS \*TRACTS—OSMANABAD DISTRICT**

Tract No.	Name of tract
6.1	Osmanabad and Parendra Tahsils Rural
6.2	Tuljapur Tahsil Rural
6.3	Omerga Tahsil Rural
6.4	Latur and Owsa Tahsils Rural
6.5	Bhoom and Kalam Tahsils Rural
6.6	Osmanabad District : Non-City Urban (all Urban areas)

\* *Note.*—The district was divided into tracts which were of two categories namely, (1) Rural tract and (2) Urban tract. All the villages in a tahsil or sometimes in more than one contiguous tahsils within the same district constituted a Rural tract. As far as possible the whole of the rural area (comprising all villages) in a tahsil was constituted into a single rural tract. In a few cases, however, where the size of the population of the rural area of a tahsil was small, the rural areas of one or more than one adjoining tahsils formed a single rural tract. The remaining areas in a district, not covered by the Rural tracts, were constituted into an Urban tract. The urban tract in the district was further sub-divided into two categories namely, (1) City urban and (2) Non-City urban tracts. The city urban tract contained the population of the city in the district. [It may be noted that there were only two city urban tracts in the state for the purposes of 1951 sorting operations namely, (1) Hyderabad City and (2) Warangal City]. The Non-City urban tract included the population of urban areas (*i.e.*, towns) excluding the areas declared as cities within the district.
