## **NOTE**

The census enumeration was carried out in full according to plan but the Government of India decided to restrict the tabulation for British India. Consequently the tables in this volume cover less than half the contemplated range and offer in effect only the distribution of the population by community and by province or State, district, tehsil and town. In many areas however village tables will also be produced by provincial governments.

Opportunity has been taken however to sort wherever possible the 1/50 random sample taken in every area.

2. The slips in which the remaining unsorted information is to be found are stored in each province against a possible reopening of tabulation in happier circumstances.

## I—AREA, HOUSES AND POPULATION

1. The all-India Census questionnaire of 1941 was applied to the whole of Baluchistan, thus recording for the first time in history the age and civil condition of each and every indigenous inhabitant. For political and sentimental reasons these two items were never asked in previous censuses. The only tracts which could not be enumerated on account of administrative and political difficulties, and of which the estimated population was taken into account, were the following border areas:—

| District     | Tehsil        | Name of tract   | Houses     | Estimated population |              |            | Remarks  |
|--------------|---------------|-----------------|------------|----------------------|--------------|------------|--|
|              |               |                 |            | P                    | M            | F          |  |
| Zhab         | Fort Sandeman | Gastoi          | 150        | 747                  | 430          | 317        | Based on the actuals of 1921                   |
|              |               | Kamar-din Karez | 254        | 1,376                | 747          | 629        | Based on the house-list estimates made in 1940 |
| <b>Total</b> |               |                 | <b>404</b> | <b>2,123</b>         | <b>1,177</b> | <b>946</b> |  |

2. The area of the province has undergone the following changes owing to either the revision of survey figures, or the formation of a new tehsil of Usta in the Sibi District, or the inclusion of certain disputed areas and in one or two cases owing to new surveys:—

| District or State  | Area in sq miles |                |
|--------------------|------------------|----------------|
|                    | 1931             | 1941           |
| <b>BALUCHISTAN</b> | <b>134,638</b>   | <b>134,002</b> |
| Quetta-Pishin      | 5,220            | 5,310          |
| Loralai            | 7,525            | 7,375          |
| Zhab               | 10,315           | 10,478         |
| Bolan              | 359              | 407            |
| Chagai             | 19,622           | 19,429         |
| Sibi               | 11,187           | 11,457         |
| Kalat State        | 54,713           | 53,995         |
| Kharan State       | 18,565           | 18,508         |
| Las Bela State     | 7,132            | 7,043          |

3. The only changes which took place in the areas of districts and States on account of territorial transfers were: (1) the transfer of the Shorarud sub-tehsil with an area of 414 sq miles from the Chagai district to the Quetta-Pishin district, and (2) the formation of the Kharan division of the Kalat State into a separate State.

4. The urban : rural ratio calculated on the population living in towns of 5,000 and over is 102 : 1,000 ; that is, for every thousand of rural population there are 102 persons living in towns.

5. " House " covers only occupied houses and includes not only permanent houses but also blanket-tents and other removable or temporary dwellings. The figures for 1941 are exclusive of houses in the strictly military areas of the various cantonments and also those in military stations temporarily established on account of the Anglo-German War.

6. Statistics of area and population by tehsils will be found in Provincial Table I.

7. The definition of " village " is given on the fly-leaf of Table III.

The first census of 1891 was too rough and fragmentary to lend itself for comparison in this table. Similarly comparison with the figures for 1901 is misleading because Western Sinjrani in Chagai as well as Makran and Kharan were excluded from the census and the figures for the Jhalawan division of the Kalat State which were based on estimates were found to be very considerably exaggerated.

The figures of population for previous censuses differ in the case of Quetta-Pishin and Chagai districts from those given in this table in previous reports owing to subsequent inter-district territorial transfers specified on the fly-leaf of Imperial Table I. The adjustments thus made are shown below :—

| Name of unit or area | District, etc from<br>which transferred | District, etc to which<br>transferred | Persons |        |        |       |

### III—TOWNS AND VILLAGES CLASSIFIED BY POPULATION

1. The term "village" is the revenue village including attached hamlets. In States' areas it includes not only revenue *mauzas* with attached hamlets, but also residential villages with outlying hamlets as well as localities which though often containing practically no dwellings are regularly occupied at certain seasons of the year by the semi-nomadic population.

"Town" means any continuous collection of houses possessing definite urban characteristics and usually not below 5,000 in population although, in one or two cases for particular reasons this population limit is not applied.

2. The following unclassed population is included in the figures given in column 18 of the table owing to there being no village within reasonable distance in which the figures could be included :—

### SAMPLE TABLE VII

This census has seen the beginning of random sampling. Every 50th slip in rural areas of Baluchistan was taken out during the main sorting. Only Imperial Tables I to V, XIII and XIV had been sanctioned on this occasion but opportunity has been taken to sort the sample slips for the important table VII.

1/50th of Baluchistan rural population is 14,875 ; the number of slips in the sample batch is 14,609. There has been no attempt to give figures in the sample sort for VII for the insignificant minor communities ; in their case the tiny figures would have had little meaning.

2. The community tables (XIII and V) show Muslims as 975 in 1,000 of the rural population in Baluchistan and Hindus as 24 in 1,000. The sample shows Muslims as 984 in 1,000 and Hindus 16 in 1,000, an agreement within 1% for the main component.

According to the sample 6,187 out of 14,609 are between 0—15 and 6,686 between 15—45, *i.e.*, ratios per 1,000 of total rural population are 424 and 458.
