**PART II
IMPERIAL AND STATE TABLES**

IMPERIAL TABLE I

Area, Houses and Population.

This Table shows the area of the State in square miles, also the number of towns and inhabited villages and the total urban and rural population by sex.

The area shown in this Table is 3791.3sq. miles, i.e. the same as shown in the last Census.

There has been an increase of two towns viz. Bhanvad and Jam Jodhpur which were upto now classified as villages. Both are important towns possessing Municipalities and are the Head Quarters of the Talukas of the same name.

The following table summarises the variation of towns and villages as compared with the Census of 1921:--

Towns and villages	1921 Census	1931 Census	Reasons for variation
Number of towns	3	5	The increase is due to Bhanvad and Jam Jodhpur having been added as towns.
Number of villages	683	685	There has been a total increase of 4 villages, as 19 new villages have been included this time, against 15 villages shown in the last Census but having now become uninhabited as particularised in the attached Statement. Two villages of the old stock having been classified as towns there has been a total increase of two villages.

Statement showing the number of villages become uninhabited since 1921 and additional villages included in the present Census.

IMPERIAL TABLE II

Variation in Population during last 50 years.

This Table shows the population of the State as recorded in each Census from 1881 to 1931.

With the exception of 1921 Census, there has been an increase in population throughout. The decrease in 1921 is due to the exceptionally heavy toll of human lives exacted by Influenza and Plague epidemics during the years 1917 and 1918 throughout India.

The net increase since 1881 to 1931 is 93, 045 souls, i. e. 29.3 percent.

IMPERIAL TABLE IV

Cities and Towns classified by Population with variation for fifty years.

This Table shows the urban population as now ascertained with that of the five previous censuses.

It will be noticed that while the urban population of other towns shows an increase, that of Jodiya shows decrease in the net variation since 1881. Probably the cause may be that Jodiya recognised at one time flourishing Bandar doing brisk business not only with other Indian Ports but with foreign countries like Africa etc., has not been able to hold its own on account of subsequent and rapid development of British Ports. It is also not connected by Railway and as such bereft of modern Transport facilities its trade cannot prosper as it otherwise would.

Bhanvad and Jam Jodhpur both show an increase and as such they have been classified as towns.

IMPERIAL TABLE VII

Age, sex and civil condition.

This Table gives information about the population of the State arranged according to age groups.

A glance at figures for the age group 0 to 5 will show that the number of females exceeds that of the males, but after that the number begins to fall off thus showing greater mortality amongst female children between the ages of 6 to 20. This may be due to the child marriage system which, however, is getting less popular, day by day and there is every reason to believe that a marked change for the better will be noticed when the information regarding this matter will be collected during the next census.

It will also be noticed that at present even upto the tender age of 10, so many as 8, 559 persons [3441 boys and 5118 girls] are married, i. e. 11.6 and 18.2 percent respectively of their total population. Of course in old times this percentage was still higher. The following table shows the civil condition of the males and females upto the age of 10 years by different religions.

IMPERIAL TABLE XI

Occupation by Caste, Tribe or Race.

Part A. Part A of this Table gives information about the various occupations in which certain occupational castes are engaged. The castes selected for the purposes of this table are confined to certain occupational castes only in order to show the extent to which their traditional occupations are retained by them as their principal or subsidiary means of livelihood, as also to show the extent to which they forsake them in favour of others.

Part B. Part B shows the distribution of workers and working dependents in certain important groups of occupations by principal caste, tribe or race.

IMPERIAL TABLE XII**Educated Unemployment.**

The information recorded in this Table is doubtful. Possibly the people considered it a humiliation to openly admit their inability to secure an employment inspite of their education and as such no correct information was supplied.

EDUCATED UNEMPLOYMENT
PART B—BY DEGREE

IMPERIAL TABLE XIII.

Education by Religion and Age.

This table shows the information about education by religion and age.

The following table compares the number of literate and illiterate persons as recorded in the past and present Censuses:—

Year	Population		Literate		Illiterate		Literate in English	
	Males	Females	Males	Females	Males	Females	Males	Females
1931	2,05,767	2,03,425	39,853	7,942	1,65,914	1,95,483	3,850	120
1921	1,74,275	1,71,078	26,651	4,555	1,47,624	1,66,523	2,055	81

It will be noticed that against the total increase in population of 18% during the last decade, the corresponding percentage of increase in literacy both in vernacular and English is more than 50%. Besides the growth of education is not confined to males only because there has been a similar marked increase in the number of educated females also.

IMPERIAL TABLE XIX.

Europeans and allied races and Anglo—Indians by Race and age.

This Table shows the number of European and Anglo-Indians etc. as enumerated at the present census. They are chiefly confined to the City of Jamnagar and the excess population as shown under Nawanagar State is due to inmates of a Continental Steamer [touching at Bedi Bandar] which were enumerated on the day of the final census.
