Himachal Pradesh

RENUKA LAKE

MOTIF ON THE COVER

Of all the lakes in Himachal Pradesh, Renuka is the most beautiful. The lake appears to have a feminine like figure profile of the Goddess which is held in great esteem by devout Hindus. It is about 2 kms. from Dadahu, the tahsil headquarters of Renuka tahsil and is surrounded by fascinating forests. It is connected by motorable road from Nahan, the district headquarters of Sirmaur.

2. The lake is associated with Renuka Ji, the mother of Parshu Ram, a well known personality of the epic age. It is said that Jamdagni Rishi father of Parshu Ram lead a saintly life around here. According to legend, Rishi Jamdagni displeased with his wife Renuka and ordered his son Parshu Ram to chop up her head. The son carried out the orders of his father. The Rishi thus pleased, told his son to ask for a boon. Parshu Ram prayed for his mother and brothers life. The Rishi acceded to his wishes and all the dead regained life and this was commemorated by the people. Every year a large fair is held in honour of the Goddess Renuka. The fair is normally celebrated for 3 days i.e. from Dashmi to Dwadshi of brightly fortnight of the Kartika (November month). Thousands of pilgrims including from the neighbouring States participate in the fair and have their sacred dip on Deothni Akadshi in the lake which falls 10 days after the Diwali festival. In addition, it is becoming a fast growing tourist resort.

9. Primray Census Abstract for Scheduled Castes and Scheduled Tribes . . . . . 325—327

(i) Primary Census Abstract for Scheduled Castes . . . . . 329—331

(ii) Primary Census Abstract for Scheduled Tribes . . . . . 333—335

Appendix VII—Blockwise total, scheduled castes and scheduled tribes population 336-337

FOREWORD

The District Census Handbook (DCH), compiled by the Census Organisation on behalf of the state governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The District Census Handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, part-B to village and town PCA and part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features alongwith the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they served. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled castes and scheduled tribes population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the reqiurements of the Minimum Needs Programme by providing information on a few new items. A few statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on scheduled castes and scheduled tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the scheduled castes and scheduled tribes PCA upto tahsil/town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and tahsil/ Police Station/C.D. Block etc., level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organistion. The data have been collcted and compiled in the State under the direction of Shri K.L. Negi, the Director of Census Operations, Himachal Pradesh on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi,
the 26th April, 1982.

P. PADMANABHA,
REGISTRAR GENERAL, INDIA.

PREFACE

The mass of data collected during 1981 Census has to be given timely concrete shape so that the utility of the data does not get minimised for the data users and this Handbook has been an endeavour towards that end.

2. The District Census Handbook contains two parts. Part A deals with the Village and Town Directory and Part B gives broad socio-economic data of the people of the district. The District Census Handbook begins with the analytical note. This note by no means is an authoritative analysis about the district but it touches a broad gamut of historical, physical and socio-economic characters of the district just to acquaint a lay reader about the district. In other words, analytical note basically intends to introduce the readers about district so that it helps in forming a background about the district.

3. The information in Village/Town Directory has been collected through the Revenue Agency/Civic authorities at the grassroot level in the state which was cross-checked from the other concerned implementing agencies. Primary Census Abstract is the compilation of the data collected in the field in 1981 Census. While Part A provides glimpse of previous decade's progress, Part B gives panorama of basic data on the socio-economic conditions of the people in the district.

4. The District Census Handbook is not meant to be taken in for leisure reading. It is rather a Biblical reference book for data users i.e. the administrators, the planners and the scholars for the next decade. This District Census Handbook, while on the one hand, provides a broad glimpses of past decades socio-economic changes, on the other, it serves a sort of benchmark for future action-plan for the Government.

5. My colleagues and I shall feel amply rewarded if this book comes up to the expectation of our readers as single best source of objective information of an enduring value on this district.

6. During the entire period of 1981 Census and subsequent compilation of data for this book, we had the honour of having constantly enlightened guidance and encouragement from Shri P. Padmanabha, the Registrar General and the Census Commissioner, India which has enabled us to bring out this book in time. But for his inspiration and personal interest it would not have been possible to timely complete this massive work.

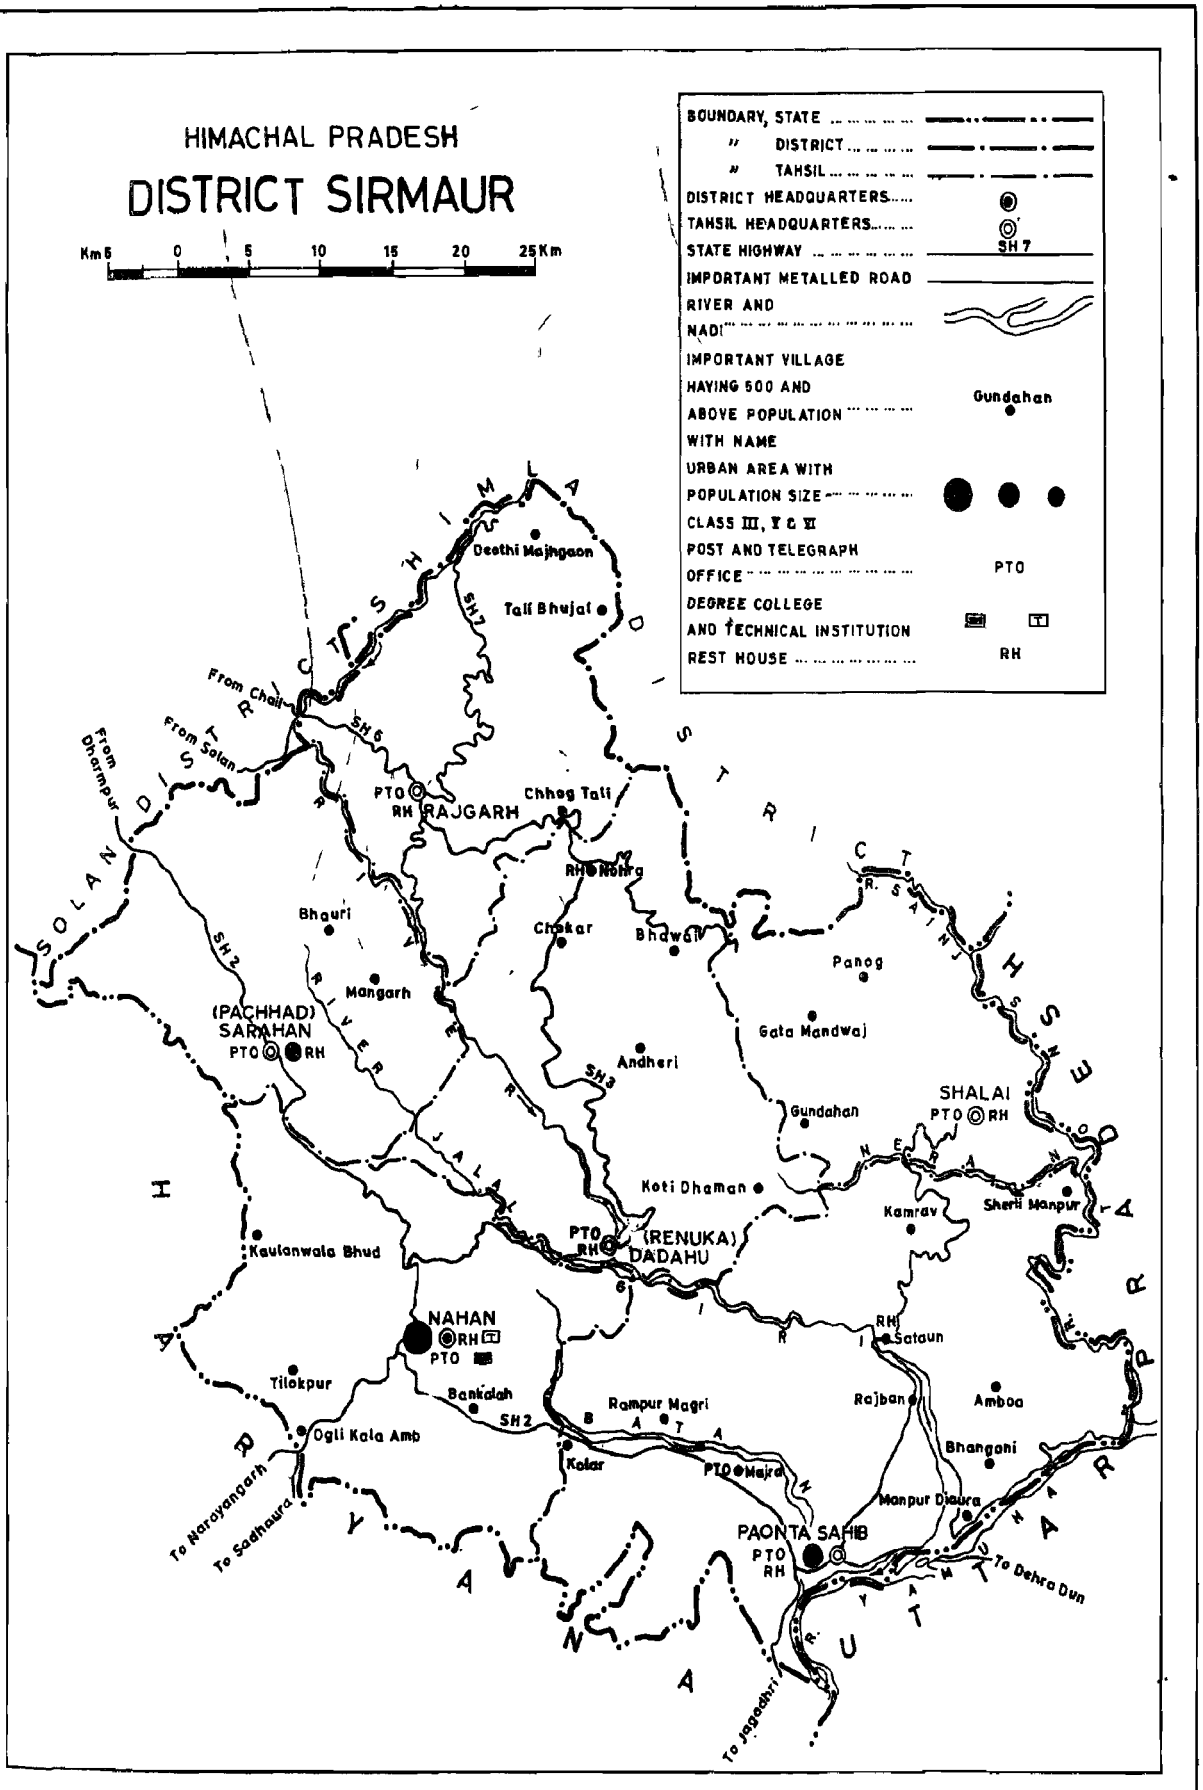

7. In anatomical completion of this book, efforts put up at various levels of the staff of this Directorate, the consolidated staff, vast number of the field enumerators, supervisors and other officials involved in 1981 Census deserve special mention and it is because of their unfailing hard work that we could achieve successful completion of this book. I am undoubtedly grateful to them all.

8. It, indeed, was a rare opportunity for me to be associated as the author of this book. I shall feel my endeavours suitably rewarded if the book proves useful to the readers.

K. L. NEGI,
Director of Census Operations,
Himachal Pradesh.

SHIMLA,
the 17th February, 1982.

ANALYTICAL NOTE

History : After the lapse of paramountcy in 1947 the princely states were given a choice to merge with the Union of India. The erstwhile Surajbansi Rajput princely state of Sirmaur was merged into Himachal Pradesh on the 15th April, 1948 and given the status of district with princely states physical jurisdictions intact.

2. About the origin of the name "Sirmur" there are quite a few surmises. One view being that the state derived its name as Sirmaur because of the senior position it held amongst the princely hill states. Another version is that at the earliest times the capital of the state was at Sirmaur and the state was so called after the name of the capital. But, how the word Sirmaur originated is not known. Third version being that the state was founded by Raja Rasaloo of Jaisalmer whose one of the ancestors name was Sirmur and who belonged to Rasaloo family. Beyond this, nothing definite is traceable.

3. The legend goes that during the earliest history of Sirmaur state when Raja Madan Singh used to rule, a woman knowing necromancy presented before the Raja and talked about her acrobatic skill. Raja being sceptible about it, promised her half of his kingdom if she displayed her skill by crossing over the river Giri by means of acrobatic rope. To his surprise, she succeeded in crossing and when she was returning on the rope one of the courtiers of the Raja feeling apprehensive cut the rope and consequently the woman was drowned in the river. This treachery on the part of Raja resulted in a flood which swept the town and the entire princely family perished leaving the state without a ruler.

4. One version goes that on this, state of affairs, the subjects of the Sirmaur state approached the Raja of Jaisalmer to give one of his sons as the ruler of the state which was conceded and sent one of his sons who was crowned as Raja of Sirmaur. According to another version, in about 1097 AD, Raja of Jaisalmer Ugar Sen who happened to visit Hardwar on pilgrimage and on hearing the throne vacant in the nearby state sent his son Soba Rawal who conquered and established his kingdom with the capital at Rajban taking the title of Subans Parkash. He ruled the state uptil 1099 AD and thus after 4 years of rule he expired. Eversince, the name 'Parkash' in the princely family of Sirmaur continued till today and uptil the date of lapse of paramountcy the same dynasty continued to rule Sirmaur state. Though, it is beyond the scope of this book to make authoritative analysis of the ruling dynasty, however, the broad events during the subsequent rulers have been summed up in this book. Malhi Parkash ruled the state from 1108 AD to 1117 AD. He was a man of deep religious and charitable disposition. He fought battle with the Raja of Srinagar in Garhwal and wrested from him the fort of Malda. His descendant Udit Parkash ruled from 1121 to 1127 AD who changed his capital from Rajban to Kalsi in Dehra Dun otherwise his period was not much eventful. Down the descent in the line, comes the name of Somar Parkash who ruled the state from 1149 to 1158 AD who conquered the fort of Ratesh in Keonthal state and made it his capital. But, Suraj Parkash who ruled from 1158 to 1169 AD returned his capital to Kalsi whereupon his subjects revolted against him and his daughter was killed in the process of defending the fort. Hearing this news, Suraj Parkash returned from Kalsi and subdued the rebels and also overcame the Thakurs of Jubbal, Balsan, Kumharsain, Ghond, Sahri, Theog, Rawain and Kotgarh and forced them to pay tribute. Next century in the history of Sirmaur state perhaps passed on uneventfully. However, the period of Jagat Parkash from 1342 to 1356 was known for its mal-administration with the result the aforesaid Thakurs again revolted against the suzerainty. His son Bir Parkash who took over the reign of state in 1356 AD and ruled till 1366 AD was an energetic ruler and crushed the revolt of the aforesaid Thakurs and constructed a fort at Hatkoti at the junction of Rawain and Jubbal states.

5. During the time of subsequent rulers the capital of the state shuttled between Neri, Kot and Gargah in Ratesh pargana. But, during the time of Budh Parkash it was shifted to Kalsi again. The present capital at Nahan was founded in 1621 AD by Karam Parkash who ruled the state from 1616 to 1630 AD. He became a spirtual disciple of Baba Banwari Dass whose descendant still hold the temple of Jagannath at Nahan. It is believed that Shah Jahan, the Mughal Emperor of India had requested Karam Parkash for 2,000 horses to conquer Srinagar in Garhwal which the Raja provided. But, his Commander Nijabat Khan met a disaster in this adventure, after initial successes in capturing the forts of Shergarh, Kalsi, Bairat etc. whereupon he lost his position and he was replaced by Mizra Khan as Fauzdar who with the help of Raja Subhag Parkash of Sirmaur and other jagirdars of hills conquered Srinagar in Garhwal. Raja Subhag Parkash in recognition of his services received a firman on behalf of the Mughal Emperor and area of Kotaha was annexed to Sirmaur State.

6. Raja Subhag Parkash was a good administrator and took keen interest in the development of the state particularly in the field of agriculture. This led to the confirment of area of Kalakhar (area near Dehra Dun) by the Mughal Prince. Again, during the reign of Budh Parkash during 1664 to 1684 AD, the Mughal Prince passed on the fort of Bairat and Kalsi from Raja of Srinagar who had occupied the fort which originally belonged to Sirmaur state. It is believed that Raja of Sirmaur had close correspondence with the Begum Jahan Ara whom he sent musk, wild pomegranates and wild fowls etc. Budh Parkash's son Jog Raj succeeded his father under the title of Mat Parkash who ruled between 1684 and 1704 AD who was recognized by the Mughal Emperor. One of the interesting features of his reign was the visit of Guru Gobind Singh to Paonta and who resided there for 3 years when he was expelled from Anandpur by the Raja of Bilaspur for failing to conform to his directions. Later the Raja of Bilaspur and Srinagar fought a battle with the Guru at Paonta where the former were killed and the Guru emerged victorious and the present Gurdwara of Paonta Sahib marks the spot where the Guru had won the battle.

7. Mat Parkash died in 1704 AD issueless. Therefore, Hari Parkash ascended the throne in 1704 AD and continued to rule uptil 1712 AD. On his death, his son Bije Parkash ruled the state from 1712 to 1736 AD. Thereupon, his son Partap Parkash was the ruler from

82M/J(N)442DCOHP—2(a)

1736 to 1754 AD. He was a weak ruler and many of his feudatories rebelled against his rule. In 1754 AD his son Kirat Parkash ascended the throne and ruled for 16 years upto 1770 AD. He was an efficient ruler and effected great reforms in his state. He won battles over the Raja of Srinagar of Garhwal and thereafter he annexed Narayangarh, Rampur, Thanadhar, Morni, Pinjore, Ramgarh and Jagatgarh. Having won the aforesaid principalities he consolidated his power over the entire area and entered into alliance with Raja Amar Singh of Patiala and secured from him Saifabad. Further in alliance with Raja of Srinagar of Garhwal he fought battles with Gorkhas and forced a treaty on them. After his death in 1770 AD his son Jagat Parkash ruled the state uptil 1789 AD. This period, of course, was not much of historical happenings and quietly passed on to his son Dharam Parkash who ruled the state from 1789 to 1793 AD. During his time, it is said, that Raja Ram Singh of Nalagarh encroached a portion of his territory which he got recovered and also occupied the fort of Khushalpur near Dehra Dun from Raja of Srinagar of Garhwal. Further, in his time Raja Sansar Chand of Kangra attacked on the Bilaspur state whereupon Bilaspur Raja sought help from Raja of Sirmaur. The help was readily offered and Raja Dharam Parkash himself commanded his forces and after a pitched battle lost his life whereupon his brother Karam Parkash ascended the throne from 1793 to 1815 AD. He was an indolent king, with the result, he lost all the feudatories for ever. In his time the princely house was known for court conspiracies where with the help of some courtiers his brother Rattan Parkash tried to seize the throne of Sirmaur. But, Karam Parkash appealed to Kaji Ranjor Thapa, Commander-in-chief of the Gorkha Army at Dehra Dun for help. Commander Thapa was looking for an opportunity and immediately rendered help and crushed the court conspirators of Rattan Parkash. However, he did not return the principality to Karam Parkash the real ruler of the Sirmaur state and he was left in lurch, with the result, he had to live at Subathu under the Ramgarh state. But, after the death of Kushal Singh, the Raja of Ramgarh and his sons ordered Karam Parkash to leave their state and he accordingly moved to Buria where he spent his time until death in 1826. At this time Rani Goler w/o Karam Parkash appealed to the British Commander at Ludhiana Col. Ochteclony for assistance to recover the state from the illegal occupation of the Gorkhas. This appeal coincided with general declaration of war by British Government against the Gorkhas. The British Commander moved from Ludhiana and on the way drove away the enemy out of Kalingar fort in Dun. Thereafter, the British Army reached at Nahan and attacked the Gorkhas who were hiding inside the Jatak fort 7 kms. from Nahan. But, the British Army had to suffer heavy loss of men and material and the Gorkhas continued to remain entrenched in the fort until they evacuated it in pursuance of the treaty entered into by the Nepal Government with the British India Government in 1815.

8. The British, however, did not reinstate Karam Parkash instead the sanad was granted to his son Fateh Parkash and the Goler Rani was appointed as regent during his minority. Fateh Parkash on attaining majority in 1827 was vested with the full powers of the state. The Jaunsar pargana with the forts of Morni, Jagatgarh, Kiardadun were retained by the British under them. However, in 1833 Kiardadun was restored to Fateh Parkash on the payment of Rs. 50,000.00 to the British. Raja Fateh Parkash had best of the relations with the British during his 35 years of reign from 1815 to 1850 AD. In 1838 during the first Afgan war Fateh Parkash assisted the British with men and material which was acknowledged by the British Government. During the first Sikh war in 1839—46 Raja Sirmaur again sided with the British and sent a contingency to reinforce the British Army at Hari-ki-pattan.

9. On his death his son Raghubir Parkash ruled the state from 1850 to 1856 AD. He was succeeded by Shamsher Parkash who ruled for 42 years from 1856 to 1898. He had married to the daughter of the of Raja Keonthal who was a lady of great beauty and ability and who used to conduct the judicial and administrative business of the state in the absence of the Raja. On her death, he abandoned the palace and made Shamsher Villa his residence which was built by him. In her memory, he laid the garden known as Ranital Bagh at Nahan.

10. He was a very able and far sighted ruler and modernised the administration of the state. He established police, judicial, revenue courts, district board and Public Works Department and Nahan became the first municipality in the principality during his time. Dispensaries, schools and post offices were opened and an attempt was made to develop iron mine at Chheta which proved to be unremunerative. Raja then established Nahan Foundry. His greatest achievement was said to be the colonisation of Kiardadun which was hitherto a wild and dense forest track. The land reforms of the state for the first time was settled and the proprietory rights conferred on the zamindars. Forests were preserved which became a source of revenue to the state.

11. Raja Shamsher Parkash was appointed as a member of the Imperial Legislative Council and also conferred with a title of Khillat in recognition of the services rendered by him during the mutiny in 1857. In 1876 he was conferred with K.C.S.I. and 1886 G.C.S.I. and as personal distinction he was made entitled to 13 guns salute. In 1896 the Sirmaur state was taken out of the political control of the Superintendent of Shimla Hill States and placed under the Commissioner of Delhi.

12. On his death in October, 1898, he was succeeded by Raja Surendra Bikram Parkash who was installed by Sir Machworth Young on October 27 of that year. Raja was carefully educated during his father's time and took keen interest in the development and proper administration of the state. He had marriage alliance with the daughter of Raja of Suket. In 1901 he received K.C.S.I. and in 1902 he was appointed as a member of the Imperial Legislative Council. He supported with men and material the British Army in South-African war. He died at Mussoorie on the 4th July, 1911 after a rule of 12½ years.

13. On his death his son Raja Amar Parkash assumed the throne and was formally installed by Sir Louis Dane, Lt. Governor of Punjab on the 24th

October, 1911. He was properly trained during his father's time and proved a very able administrator. He continued the policies of reforms initiated by his grand-father and maintained the administrative standard at a very high level. He was a man of simple living, punctuality, hardwork and had an immense love for justice and like his predecessor continued to be very loyal to the British India Government. He married in 1910 to the eldest daughter of Maharaja Dev Shamsher Jang Bahadur of Nepal who was highly educated, intelligent, polished in manners and charitable in disposition. During first World War Raja Amar Parkash sent a contingent of state force to Mesopotamia to fight for the British Empire who rendered a good service in the war. In recognition of his services he was given the distinction of K.C.S.I. in 1915 and in 1918 he was made a Lieutenant Colonel and in 1921 he was titled K.C.I.E. and in 1931 his salute was raised from 11 guns to 13 guns as a personal distinction.

14. He effected many reforms of which Surendra Water Works Nahan was completed. He opened free primary schools throughout the state and built hostels for the students and high school buildings. He inaugurated Mahima Library and got the road metalled from Nahan to Kala Amb which was completed in 1927. In the field of revenue administration the important land mark of his time was the revision of settlement in 1931 which made the state revenue records reliable and uptodate. He died in August, 1933 away from his kindgom while on treatment of his Maharani in Europe.

15. His son Maharaja Rajendra Parkash succeeded him in 1933. During his father's time itself, he was trained in the state craft thoroughly and was a keen sportsman also. He had marriage alliance with the Nagod state in Central India on the 15th April, 1936. The most important aspect of his administration was the promulgation of Usirious Loans Act. One of the most interesting activities during the reign of the last ruler was the increased activity of the freedom fighters in the state in which Praja Mandal played the predominant role in mobilising public opinion against the state and the British India Government which ultimately culminated into state's succeession to the Union of India and final merger in Himachal Pradesh.

People : Population of Sirmaur district is predominantly Hindus and next, come Mohammadans and third being the Sikhs. There is a sprinkling of Jains and Christians in the district.

2. The people in the Trans-Giri-region mostly have come from the neighbouring areas of Jubbal and Chaupal. But in the plains of Kiar-da-dun valley, some of them have migrated from plains of Punjab particularly from Ludhiana, Hoshiarpur and Patiala districts. There is considerable population of Hindus and Mohammadan Gujjars in the district. The Mohammadan Gujjars are believed to have come from Jammu in the look out of pastures to tend their cow/buffalow herds. Of the aforesaid population of Hindus, Gaddis, Gorkhas and Gujjars are most mobile because in summer they shift to the higher ranges of Trans-Giri-region and Shimla district and in winter they settle down to Kiar-da-dun valley and around Nahan.

3. Amongst the Hindus the predominant castes are the Brahmins and Kanets. The Brahmins are generally known as Bhatt who are mostly inhabited in Trans-Cis-Giri area. In the Cis-Giri area the Bhatts are of Sarswat and Gaur sects. The Gaur Brahmins claim their descent from Bengal though generally it is believed that they migrated from Ambala district upwards the hills. The Sarswat Brahmins claim their descent from the basins of Ganga and Mythical Saraswati rivers. The Trans-Giri Brahmins are called Pabuck and are mostly vegetarian. The Bhatt Brahmins of Trans-Giri area have mostly lost their original distinctiveness and they do not now hesitate in inter-marriaging with Kanets and are mainly engaged in agriculture though in the past they were mainly engaged in narrating the genealogical tales in the history of the rulers.

4. Amongst the Rajputs the predominant are Panwar, Tunwars, Kashyaps, Chauhans and Pandir etc. They are inhabited in the Cis-Giri area and follow the Rajput customs of the Rajputana though originally there has been thin distinction between the Rajputs and the Kanets now they have become one through common customs, habits and marital relations. Other castes like Kolis, Dumnas, Chanals, Chamars, Lohars, Badis are also inhabited mainly in the Cis and Trans-Giri area In Kiar-da-dun valley Jats, Sainis, Labanas, Banjaras, Gujjars, Telis are inhabited who are also generally the migrants from the plains. Sikh population also is predominantly inhabited in this valley.

Language : Traditionally, in the Trans-Giri area the inhabitants use to speak Giri Pahari and in Cis-Giri area they use to speak Sirmauri or what is popularly called Dharthi. But, with the wide spread linking up of the communications in the entire district and the spread of education amongst the bulk of the masses predominant population of the district now can speak Hindi, Punjabi and Pahari in all over the district. No authoritative research, of course, has been done nevertheless the Linguist Survey Report of India by G.R Grierson in 1917 is a book worth reading.

Houses : As elsewhere, the houses in Sirmaur generally in the lower area of Kiar-da-dun and Cis-Giri area generally of one storey and made of stone and mud. In the Trans-Giri area the houses are invariably of 2/3 storeyed made of stone and wood. In the Cis-Giri area and Dun Valley the animal sheds are generally separate from the residence whereas in the Trans-Giri area the ground storey of the house is often used as cow-shed and stacking of wood. However, with the spread of education and improved socio-economic conditions people are shifting to RCC houses in the Cis and Dun Valley areas and to some extent in the Trans-Giri part of the district too.

Furniture : Traditionally, in Trans-Giri area bed steads are not used. Floor of the house is made of planed wooden planks. However, in Cis-Giri area and Dun Valley bed steads are commonly used. Clothes are generally kept in the wooden chest in the hills and in trunks and boxes in the Cis-Giri and Dun valley areas. But, with the passage of time and the modernisation, the distinction is getting narrower and any well to do house anywhere in the district has modern furniture available in the house.

Food & Dress : Maize and wheat are the staple food of the people. They also take rice occasionally. In hot weather, they use maize satus-maize grains parched before grinding. People take three or four meals a day. The morning meal is called 'Jathalru' the midday one 'checli' and supper 'bailu'. Sattu is eaten twice a day during the hot weather but it is used at all time in the Sain and Dharti ilaquas, where bread made of maize flour is eaten. Butter milk and curds are always used. Meat and fish are also taken. Patande is much liked in the hills. It is practically the same as the mande or pura of the plains, but contains no sugar or salt and is prepared on festive occasions.

2. In Tahsil Nahan and Cis-Giri tract the dress of the people is usually the same as in the plains. In Trans-Giri the traditional dress of a man consists of a white woollen unbuttoned coat called Lohiya, black wollen tight pyjama and a wollen cap but the majority go without pyjama wearing only a small loin cloth. They have now switched over to shirt and pyjama and instead of the woollen cap, gandhi cap is more in use. The women have now taken to Salwar and Kamiz instead of the Lehnga and Kurti which they used in the past. Similarly they are gradually changing over to Dopattas as head gear instead of the triangular piece of coloured cloth called Dhattu. The Dhattu is, however, still largely used and is copected to hold its own against Dopatta because of its economical and colourful value.

Physical Features : The district lies in outer Himalayan ranges, commonly called as Shivaliks between 77°—01′—12″ and 77°—49′—40″ east longitude and 30°—22′—30″ and 31°—01′—20″ north latitude and except of the Dun Valley which is called as Kiar-da-dun the district is predominantly mountainous with deep valleys lying between ranges of varying elevations. Longest length from west to east is 77 Kms. and the maximum width from north to south is 80 Kms.

2. The district is bounded by Shimla district in the north, the rivers Tons and Yamuna in the east, district Ambala of Haryana in the south and west and north-west by Solan district.

3. Geographically, the district can be divided into three parts. The Trans-Giri (Giri par) region, Cis-Giri (Giri War) region and the plains of Kiardadun or Dun Valley.

4. The Trans-Giri region consists of the wild mountains culminating into Chur Peak which is popularly called as Chur-Chandni-Ki-Dhar (the hill of the silver bangle). It has altitude of 11,982 ft. above sea level. From this lofty mountain run two ranges one in north-west direction called the Dhar Taproli-Jadol and the other the Dhar Nohra which runs south-east direction towards Haripur Fort at the altitude of 8,809 ft. above sea level where from it divides into two ranges one of which runs almost east to the valley of Tons. These ranges divide Sirmaur from Jubbal tahsil. Two other ranges run north-west called Dudham Dhar and south-west with many minor spurs from them towards the Giri. The second range first runs south-west under the name Dhar Nigali and then turns to east under the name of Dhar Kamru. The Dhar Shillai runs parallel to this Dhar in northern side and these two form the valley of Naira river which ultimately falls in the Tons river.

5. The Cis-Giri region is intersected by three main ranges which run from north-west to south-east. Of them first is the Sain Dhar which runs parallel, to the Giri River. The second is the Dharthi Dhar or what is called little range. Between these two Dhars flows river Jalal. The third is quite a low range which runs from around Kala Amb to the South of Nahan and forms an open valley with Dharthi Dhar. In the western half of this rage flows the Markanda river. Between eastern extreme of this Dharthi range lies open wide valley known as Kiar-da-dun valley whose easttern border is the Yamuna and the Giri rivers forming a boundry with Uttar Pradesh and the western Nahan tahsil. This flat valley is irrigated by Bata river which flows from east to west originating from Dharthi ranges

6. The river Giri is the biggest river in the district which originates from Kotkhai/Jubbal tahsil of Shimla district and flows down in the south-east direction and divides the Sirmaur district into almost two equal parts which are known as Cis-Giri and the Trans-Giri regions. It ultimately joins the river Yamuna near Paonta Sahib. Lot of tributaries join this river in its long course, most important of them being Jalal river which originates from Dharthi ranges near Pachhad and joins the Giri River at Dadahu from the right side. This is a small stream which is fordable throughout the year except when it is in floods. The river Giri is very useful as the entire transportation of timber in the district is done through the river.

7. Another important river which forms the eastern border of the Sirmaur district is the river Tons. It is also used for floating timber from the territories of Jubbal and Uttar Kashi.

8. The River Markanda rises below the temple of Devi Katasan at Barban and flows west-wards and waters the lands of Sambhuwala and Rukheri after which it enters into Ambala district near Kala Amb. It is very shallow and sluggish stream.

9. Opposite direction flows Bata river which waters flat land of Dun valley before it immortalise itself into the river Yamuna at Bata Mandi.

Geology : Regarding the geology of the district Mr. H. H. Hayden writes as follows :

"The greater part of the Sirmur state lies on rocks of tertiary age, with beds belonging to the carbonaceous system (Krol and Blaini groups) on the norht-east. The lower tertiary rocks are particularly well developed, and the Sirmur series, which includes the Subathu, Dagshai and Kasauli groups, takes its name from the State. The upper tertiary, or Siwalik, series is largely developed in the neighbourhood of Nahan, where the lower beds consist of great mass of sand-stones, the Nahan group; these are overlain by sand-stones and conglomerates (middle and upper Siwalik) containing a rich mammalian fauna of pliocene age".

2. This system is more fully described in the Manual of the Geology of India as follows :

(*a*) In the neighbourhood of Nahan this system was originally divided into two members a lower, to which

the name of the Nahan was applied, and an upper to which the name of Siwalik was restricted. In this area the boundary between the two groups is a great fault, but there must be a real, if local unconformity for the upper Siwalik conglomerates contain numerous pebbles of the Nahan sandstone they are faulted into contact with. The distinction between the Nahan and Siwalik zones appears to be well maintained in a south-easterly direction as far as the borders of Nepal, but to the north-west it disappears, and there appears to have been a continuous series of deposits, ranging from the bottom to the top of the upper tertiary formation. No fossils have yet been found in the typical Nahans, though it would appear that they do occur, but to the north-west representatives of the Siwalik fauna occur low down in the series, in beds, which very possibly represent the Nahan group as originally defined. Under these circumstances it has been found inadvisable to retain the separation between Nahan and Siwalik, and the former are nowc lassed as lower Siwalik, though the term may be retained as a useful local designation for a particular type of formation.

(*b*) The Nahan group is composed of alternating beds of a fine grained, usually grey, firmasandstone, and of clays, usually bright and red in colour, and almost always some shade of red or purple which weather in a nodular manner. The clays usually prevail in the lower part of the group and the sandstones in the upper.

(*c*) The lithology of this group resembles very closely that of the Dagshai group, and one might be tempted to regard them as equivalent to each other. The equivalence cannot be absolutely disproved till the area west of the termination of the typical lower Himalays, in the Kangra valley and the Jammu Hills, has been examined in greater detail than has yet been done, but in the meanwhile there are good reasons for supposing that the lithological similarity between the two groups is due to a smilarity in their condition of deposition, and does not mean contemporanity of origin.

(*d*) In the first place the two groups are found in distinct areas, separated by a marked structural feature exhibiting itself at the present day as a fault of many thousand feet throw. This fault-commonly known as the main boundary—is connected in peculiar manner with the elevation of the Himalayas, and it is highly improbable that the beds exposed south of it are of the same age as those found to the north. Another argument depends on the fact that no exposure of the Subathu group has been found even in the deepest cut sections of the typical Nahan groups, and a third may be derived from the smaller degree of induration, indicating, though not proving, a younger age. In the country north of Nahan town, where the Nahan and Dagshai groups are brought into contact which each other, on opposite sides of the main boundary fault, the sandstones of the former always weather into soft rounded humps, while the Dagshai sandstones weather into angular fragments which have lost the sharpness of their angles, but exhibit a much less degree of weathering than that which the Nahan beds have undergone.

(*e*) Finally, the red clay beds which have already been mentioned as occuring at the top of the Kasauli group, though they differ somewhat from the typical Nahan clays, resemble them sufficiently to point to a return of the conditions of deposition which prevailed in the Dagshai and Nahan periods, and suggest that on an unbroken section the Nahan would be found to overlie the Kasauli group.

(*f*) No fossils have been described from the typical Nahans. It is possible that some of the lowest Siwalik fossils found in the North-West Punjab may have been derived from beds of this same age, but the supposition lacks proof. There seems, however, to be little room for doubt that Sir Proby Cautley did find fossils on the northern side of the hill on which the town of Nahan stands, and consequently in the beds of the Nahan group, but the specimens were lost before they had been examined by a paenatologist.

Forests : The forests range between scrub, sal and bamboo forests of the low hills to the fur, and alpine forests to the higher elevations. Lowest point of the southern boundary of the district is 1,400 ft. above sea level to the 12,000 ft. Churdhar in the north from sea level. The forests grown between these two extremes vary as the elevation itself.

2. The high level forests consist of oaks, fur, spruce, blue pinc. Apart from them, there are Deodar forests in the north of the Giri river mixed with kail & pine etc. These forests are very valuable and the timber extracted from them is sold in the plains for very high price in the form of sleepers. In Dharthi ranges and the Cis-Giri area, cheel, pine forests are of great value for extraction of the resin. Sal forests occur in the Dun Valley and east of Nahan and its timber is of great value. In the lower elevation Bhabbar grass grows which is of great value and so also Bamboo forests though these are not of pure type but mixed with other species.

3. Various species of trees in the district are given below :

I. Northern dry mixed dicidus forests contains the following type of species:

(*a*) *Botanical names of species*

1. Anogeissus Latifolia
2. Flaconritia remontchii
3. Terminalia Chebnla
4. Syzyqium cuminii
5. Mallotus philippinesis
6. Lanea grandis
7. Terminalia tomentosa
8. Accacia catechu
9. Limonia acidissima
10. Dalberqia Sissu
11. Cassia fistula
12. Qugeinia dalsergioides
13. Aegle marmelos
14. Shorea robnsta
15. Dendro calamns Strictus
16. Carissaopacca
17. Wood fordia floribunola

18. Murraya Koenigii
19. Adhatoda Vassica
20. Colebrookia
21. Enphorbia, royleana
22. Bauhminia Vahilli
23. Puerariatubevosa
24. Caesalinia Sepiaria
25. Combretum decandorum

(*b*) *Elevation*: *Upto 1250 metres*

II. Lower or Siwalik chil, pine forests are comprised of following species of trees :

(*a*) *Botanical names*

1. Pinus roxbuighic
2. Mauotus philippnensis
3. Pyrus pashia
4. Emblica officinalis
5. Acacia catechu
6. Terminalia tomentosa
7. Carissa opaca
8. Rubus ellipticus
9. Myrsine africana
10. Colebrookia oppositifolia
11. Murraya Koiniggii
12. Adhatoda Vassica

(*b*) *Elevation : Uplo 100 meters*

III. Upper or himalayan chil pine forests :

(*a*) *Names of species (botanical)*

1. Syzyginm cuminii
2. Lanea grandis
3. Acer oblongum
4. Quercus glauca
5. Qnercus incana
6. Rhododendron arborium
7. Pieris oralifolia
8. Myrica nagi
9. Plectran thus rugosus
10. Meriandra strobilifaria
11. Pyrus pashia
12. Carissa opacca
13. Rubus nivens
14. Rhusperviflora
15. Flemingia Prostrata
16. Lannea grandis
17. Bauhinia variegata
18. Sapinm insigne
19. Euphorbia royleana

(*b*) *Elevation :* 1200 *metres to* 1800 *metres*

IV. Ban Oak forests (Qnercus incana) :

(*a*) *Botanical names*

1. Rhododendron arborinm
2. Pieris ovalifolia
3. Litsea umbrosa
4. Myrica nagi
5. Myrsine a fricana
6. Boenna hansenia albiflora
7. Indigofera geravdiana
8. Rubns nivens
9. Desmodinm tilaefolenm
10. Barbris chitria
11. Prinsepia utilis
12. Hedera helix
13. Similax parvifolia
14. Vitis trifolia

(*b*) *Elevation :* 1800 *meters to* 2300 *metres*

V. Moru oak forests (Qnercus dilatata) :

(*a*) *Botanical name of species*

1. Pinus smithiana
2. Qnercus dilatata
3. Qnercus incana
4. Pinus Wallichiana

(*b*) *Elevation* : 2000 *metres to* 2500 *metres*

VI. Moist deodar forests (Cedrus) :

(*a*) *Botanical name of species*

1. Qnercus incana
2. Rhododendron arborinm
3. Lnnicera anqnstifolia
4. Viburnum colonifolinm
5. Berberis chitria
6. Daphne cannabina
7. Indigofera pnlchalla
8. Rnbns nivens
9. Prinsepia utilis
10. Hedera helix
11. Vitis parvifolia
12. Jasminum Officinale
13. Clematis montana
14. Rosa moschatta

(*b*) *Elevation :* 1800 *metres to* 2800 *metres*

VII. Western mixed conferons forests contain following species :

1. Taxus Baccatta
2. Qnevcus Semicarbifolia
3. Qnevcus incana
4. Qnevcus diatata

5. Viburnum nevvosum
6. Skimmia laureola
7. Deutzia corymbosa
8. Arundinaria falcatta
9. Fragaria vesica
10. Violaserpens
11. Valeriana hardwikii
12. Geranium walli chianum
13. Rubns nivens
14. Ainslia aptera
15. Hadera nepalemsis
16. Vitis species
17. Jasminum officihale

(*b*) *Elevation* : 2400 *metres to* 3000 *metres*

VIII. Moist temperature decidnous forests are :

1. Aesculus indica
2. Acer caesium
3. Acer pictum
4. Betnla alnoides
5. Cornus capitata
6. Juglans regia
7. Qnevcus Semi carpifolia
8. Qnevcus incana
9. Viburnum foetens
10. Rubus nivens
11. Spiraea Sorbifolia

(*b*) *Elevation* : 1800 *metres* to 2780 *metres*

IX. Low level blue pipe forests are :

1. Qnercus incana
2. Qnercus dilatata
3. Rohododendrn arborinm
4. Berbeeis lycinm
5. Rnbns nivens
6. Berberis chitria
7. Desmodinm tiliaefolinm
8. Myrsine africana
9. Prin Sepia htilis

(*b*) *Elevation : Upto* 2400 *metres*

X. Kharsn oak forests (Qnercus Semican pifolia) :

1. Abies Pindrono
2. Picea Smythiana
3. Betula alnoides
4. Taxns laccata
5. Viburnum foetens
6. Coloneastev Lacillaris
7. Sarcococca saligna
8. Salix vaginata
9. Geranium Wallichiana
10. Viola canescens
11. Anemone rivularins
12. Skimmia laureole

(*b*) *Elevation :* 2500 *metres to* 3300 *metres*

XI. West Himalayan upper Oak—fir forests :

1. Abies pindrono
2. Qnercus Semicarpifolia
3. Betula alnoides
4. Rhododendron campanulatum
5. Salix elegans
6. Skimmia lanreola
7. Rumex nepalents
8. Lonicera angnstifolia

(*b*) *Elevation* : 2600 *metres to* 3400 *metres*

XII. Moist alpine scrub

1. Rliododendron anthopogon
2. Salix flabeliaris
3. Rotentilla argyrophylla
4. Rosa Sericea
5. Ranunculus diffusus
6. Anemone abtusiloba

(*b*) *Elevation : Not mentioned*

XIII. Dry deciduons scrub forests :

1. Lanea grandis
2. Acacia catechu
3. Aegle marmelos
4. Carrissaopaca
5. Enphobia royleana
6. Sapinm insigne
7. Wood fordia floribnnda
8. Nyctanthes arbortristis

(*b*) *Elevation :*

XIV. Khair-Sissm forests upto 125 metres :

(*a*) *Name* :

1. Zizyplnis jujuba
2. Mnrraya Koenigii
3. Adhatoda vasica

(*b*) *Elevation* :

XV. Himalayan Sub-tropical scrub forests

(*a*) *Names* :

1. Sapinminsigne
2. Enphorbia royleana

3. Rhns parviflora

4. Carissa opacca

(*b*) *Elevation* :

XVI. Sub-tropical enphorbia scrub forests :

(*a*) *Names* :

1. Enphorbia royleana

(*b*) *Elevation* : *As is of chil forests*

XVII. Oak-scrub forests :

1. Rhododendron arbroium
2. Pieris oralifolia
3. Pyris paslna

(*b*) *Elevation* : *As is of oak forests*

XVIII. Low level blue pin forests :

(*a*) *Names* :

1. Qnevcus incana
2. Rhododendron arborinm
3. Rnbns nivens
4. Berberis lycium
5. Desmodinm tiliaefolinm
6. Prinsepia ntilis
7. Myrsine africana
8. Viola

(*b*) *Elevation* : 1500 *metres to* 2400 *metres*

XIX. Dwarf rhododendron scrub forests :

1. Rhododendron
2. Salix
3. Lonicera

The State Government have adopted three dimentional forest farming. Under the scheme the Forest Department supplies saplings to the people at the rate of 10 paise per sapling. Initially, they were distributed free of cost to the people. The policy of the Government is 60% of the forest land should be covered under the commercial species like cheel, khair, Deodar, Fur, Spruce and remaining 40% of the forest land is to be covered under the species for fodder, fuel wood, poplar and Bamboo. Further, four hectares or more land is given for plantation to the planters. Further, if the people opt for four hectares of land or more for plantation, they are given technical guidance and fencing material free of cost. In order to check and discourage the destruction of forests, exploitation of the forest wealth has been nationalized and it is being done through the Himachal Pradesh Forest Corporation.

Fauna : Due to wide variations in the altitude a large variety of fauna is available in the forests of the district, though, due to increased poaching and indiscriminate deafforestation of the forests has lead to the fast decrease of the fauna in the district and some of the species are almost at the verge of extinction.

2. The musk-deer or Kastura is found in the highest altitude of Chur Peak in Pajoga, Churas and Nohra forests. So, also the black-bear which generally is found in the thick forests of Deodar, Fur and Spruce on the elevation of 3660 mtrs. during summer and generally it comes down to the valleys of the altitude of 1525 mtrs. during winter. It lives on the roots, corns of oaks, grain nuts and the bark of the trees and honey. Most omnipresent animal in the district is procupine which is found almost in the entire district. This animal mostly feeds on the forest nurseries, valnut plant, cheel and Deodar. The Himalayan goat—Ghoral is found from 900 to 2700 mtrs. elevation. It is a stocky goatlike animal which is found in groups of 4 to 6 grazing on the hill side and in the forests. Another interesting animal is barking-deer-Kakar which is found in the cheel and Ban forests of Sarahan, Rajgarh and Haban ranges. In the lower portions of Sarahan, Renuka, Jamta and Rajgarh ranges, pigs are found which generally live on the crop roots, tuber insects and snakes etc. It causes a considerable damage to the crops. The pigs are generally found in the herds of 2 to 15 or even more. Monkeys of Rhesus, Maigna and Langoors are quite common in the entire district.

3. In the Haban, Rajgarh and Sarahan ranges, plenty of beautiful birds like monal are available. The Koklas is found in the Deodar and sometime in the Fur forests and prefers a moist wooded forest with under growth. It is commonly found in the parts of Haban, Rajgarh, Nohra and Sangrah ranges. The black partridge is found upto 1800 mtrs. elevation and frequents in the grassy and scrub peaks. The hill partridge is found beyond Cheel forests mostly in Ban and Oak forests and occasionally in Deodar forests. Chakor is an another specie of the pigeon crop which is found generally between 1500 to 3000 mtrs. elevation in Rajgarh, Sangrah and Shillai ranges. The pigeon crop of pheasants lives gregariously on clis and precipices.

Mines & Minerals : Sirmaur district covering an area of 2,670 sq. kms. in lesser Himalaya and Siwalik ranges is fairly rich in mineral wealth. The important minerals found are limestone, gypsum and barytes. These are being used by local industries as well as by the sugar and paper industries of the adjoining states. Approximately 1,380 hectares of land has been leased out to exploit the mineral resources of the district. Mineral revenue from the district has shown considerable increase as is evident from the figures below :

TABLE 1

1975-76	1,90,000.00	approximately
1976-77	2,11,000.00	,,
1977-78	2,30,000.00	,,
1978-79	2,40,000.00	,,
1979-80	6,30,000.00	,,
1980-81	6,50,000.00	,,
1981-82	11,00,000.00	,,

Apart from giving revenue to the district, mining has provided direct employment to about 250 people.

Limestone : Huge deposits of limestone varying from cement grade to chemical grade occur at Sataun, Manal, Hyona to Kamroo, Tilor Dhar to Lalag, Paonta to Bharli, Barthal, Kanser, Borli, Sangrah, Naura and Bhangri. Total reserves in the district may be of the order of 200 million tonnes. A cement plant with capacity of 600 m.t. per day is already in production at Rajban and then a bright prospectus for atleast 2 to 3 mini cement plants.

2. In the district 19 leases for limestone have been granted to various parties and the annual production from 1975 onwards has been shown in table 2 given below :—

TABLE 2

Mineral production (in metric tonnes)

Year	Limestone	Barytes	Gypsum
1975-76	21,348.646	1,701.050	Nil
1976-77	44,324.245	1,166.000	Nil
1977-78	53,290.000	436.000	Nil
1978-79	64,495.000	639.000	332.380
1979-80	1,77,100.000	847.560	2,824.000

3. The limestone produced is being used in the manufacture of cement, ordinary lime, hydreted lime and in sugar and paper industries.

Barytes : Barytes occurs on beins and in pockets at Kanti Meshwa, Tatyana and Ashnog. Three mines have been sanctioned for its production and it is mostly used in the paint industry. Most of the deposit has been exploited.

Gypsum : Deposits of gypsum occur at Bharli and Korga although at present the Bharli deposit is being exploited. Only one mine has been sanctioned for its production and recently the Korga deposit has also been applied for lease. Total reserves are of the order of 1.5 million tonnes. It is being used by the Cement Factory at Rajban.

2. Apart from these major minerals, minor minerals like sand, stone and bajri are being used in various developmental and construction works. These minerals realised about 2 lakh rupees through public auction. Clay is being used for the manufacture of tiles and bricks by one Government agency and three brick kiln owners.

Electricity & Power : In 1978-79, a Hydro Electric power across Giri River was completed. A barage was constructed across the river Giri and the water was diverted through 7.11 kms. long tunnel with the diametre of 3.65 mtrs. and the power house located at the toe of the hill in Bata river valley. This has the installed capacity of 60 MW electricity generation. During June, 1980 due to flooding in the Power House both the generating units were damaged which resulted in the closure of generation from 24-6-80 to 19-11-80. One unit was recommissioned on 20-11-80 and another in December, 1980. No other Hydro Electric Scheme is in the offing at the moment.

Land, Land use pattern & Tenancy : Since the bulk of the district is spread over the deep valleys and high elevations, the cultivation is possible only in small holdings in the deep valleys or the river basins in most of the parts of the district. Rest of the land is all either under shrub forest or grassy land with alpine trees here and there. It is only in Dun Valley that the land is flat and fertile and cultivation in cereals is extensively done.

2. With the framing of the tenancy laws, the landlordism has almost been abolished and after the introduction of the Himachal Pradesh Tenancy and Land Reforms Act most of the cultivators are also the owners of the land. The local terminology for the tenancy was known as galla-batai where the tenant was required to pay 1/4th of the grain or equivalent rent in cash. Before the introduction of Land Reforms Act, the tenants used to pay different types of rents and also used to render service to the landlord. Now, same tenants of the yester years have become the self cultivators.

Agriculture : The soil in the district varies from light sandy to heavy clay and the nature of the soil in Paonta valley ranges sandy and sandy loam and Pachhad, Renuka and Nahan tahsils medium loam to clay types.

2. From agriculture point of view the district can be taken into three distinct regions. One, the hilly parts of tahsils Pachhad, Rajgarh, Renuka and Paonta. Two, Nahan tahsil which can be divided in Dharthi range and valley of Nahan and Paonta. Third, Kiar-da-Dun. In the high elevation maize is the predominant crop. Apart from this, ginger and turmeric are also grown in summer. Still, in higher elevations potato and wheat are grown. The Kiar-da-Dun valley is known for wheat and quality rice. At one time poppy used to be grown in the district which has been banned by the Government by law.

3. The wheat of Sonalika and Kalyan were introduced in the district in 1968 onwards which are being replaced by K.L. 421. In 1967-68 HIM-23 was introduced as maize variety which now has been replaced by Vijay Composite and V.L. 42. Gram is grown in the valley area of Paonta and lower portions of Nahan and Pachhad. The popular quality of gram seed is C-235. Sugarcane is grown mostly in Paonta valley and lower portion of Nahan tahsil. COJ-64 seed is getting popular lately since it has high sugar content and fast resistance. Earlier the farmers used to sow CO-1148. As regards paddy it is grown all over the district in deep valleys wherever irrigation facilities are available. Most popular varieties are CHINA 988, I.R. 579, NORIN 8, NON-NORIN 18. Of late, HIMDAN is being recommended for higher hills. Cultivation of Soyabean was introduced in the district during 1968-69 with seed PUNJAB 1. Of late, Bragg quality of seed is being preferred due to its high yield. Black Dal (urad) of T-9 is grown in most of the parts of the district due to its high yield. Under the multi cropping pattern, cultivation of Toria is being propagated in a big way and at this moment DKA-1 (Dhaula-Kunwa selection-1) is popular with the people.

4. Amongst the vegetable cultivation, Peas, Tomat and Potato have become very popular in the district. The varieties of Peas being introduced are Kinnauri (Boach Selection) and Boon Villa. Very recently, Arkel and Lincoln variety of peas have been introduced and because of their early maturity and high yield people have preferred this variety. Tomato of Solan Gola variety is grown in the district. Seed potato is being grown in Rajgarh and Pachhad and portion of Renuka tahsil while in Paonta and Nahan tahsils table potato is being grown. The popular variety of seed potatoes are Kufri, Chandermukhi and Jyoti.

5. In order to encourage the cultivation of sugarcane in Paonta Sahib tahsil, the State Government have started a khandsari plant at Paonta so as to provide market for the sugarcane product and also a Regulated Marketing Committee has been established at Paonta in 1973 to ensure fair return to the cultivators.

6. There are five Seed Multiplication Farms at Bhagani and Dhaula Kuwan in Paonta Block, Bagpshog in Pachhad Block, Andheri in Sangrah Block and Hubi in Nahan Block. There are two Potato Development Stations at Khwagadhar and Thiambagh in Pachhad and Renuka Blocks respectively and two Ginger Development Stations at Harlo and Timbi in Sangrah and Sanguri Blocks have been set up with a view to multiply the seeds of high yield varieties so as to meet the requirements of the cultivators in the area and also to enlighten the local farmers with the latest farm technology. The production of ginger during 1981 has been 11,857 metric tonnes compared to 11,223 metric tonnes in 1971 thereby registered an increase of 5.34 percent in production during the decade.

Horticulture : Since late sixties the district has made a considerable stride in the field of horticulture. The apple orchards are located predominantly in Rajgarh tahsil where they grow royal and golden varieties of apples. Plum is being grown in Rajgarh as well as in Pachhad tahsil, popular variety being cantra roza and marri coza. Walnuts are grown all over the district and of late commercial varieties of walnuts have found great favour. Paonta area grows kagzi lemon which has been further propagated in lower areas of Nahan and Pachhad tahsils, particularly Dun valley has taken up the cultivation of Kagzi lemon in a big way. Orange cultivation has also not lagged behind and the popular variety being kuino.

2. In order to provide a market for Horticulture products, the State Government have started a Fruit Processing Unit at Dhaula Kuwan run departmentally. The HPMC is having fruit processing units at Rajgarh and Bagthan. There are three privately run fruit processing units at Rajgarh, Sarahan and Paonta Sahib.

3. The plant protection centres are located at Nahan with a sub-centre at Rajgarh which render technical guidance to the orchardists and supply pesticides etc. through the Agriculture Department. Further, the Horticulture Department is responsible for getting nursery to the orchardists on reasonable rate for which they have kept Government as well as private registered nurseries. Under the component plan loans and subsidies are provided on the supply of plants, fertilizer and pesticides. The subsidies are to the extent of 50 percent in case of scheduled castes and scheduled tribes and backward areas, 33 percent to the marginal farmers and 25 percent to the small farmers.

Irrigation : Paonta valley is the most fertile valley in the State having gross cultivable area of 12,140 hectares (30,000 acres) of land which was hitherto mostly deprived of proper irrigation facilities. In order to harness the tail water of the Giri Hydro Electric System it was proposed to irrigate 5,200 hectares of fertile land on both banks of Bata river. This major irrigation scheme was set up at the cost of Rs. 6.27 crores as approved by the Planning Commission. The most components of the project are diversion weir, right bank canal, left bank canal and their distributorieh The diversion weir impounds water storage of 1,23,000 cubic mtrs. The right bank canal after crossing Bata river carries a maximum discharge of 60 cubic cusec. It is about 17 kms. in length and when fully developed would irrigate 2,771 hectares or 6,845 acres of land through ten distributories. At the moment, of the ten distributories eight are complete. The left bank canal carries a maximum discharge of 50 cubic cusec and its total length being 24 kms. which irrigates 2,492 hectares of land through eight distributories and the canal has been completed uptil 14 kms. so far. The total length of the distributories of the right and left bank canals is 66 kms. Considerable cultivated area of land has been brought under Tubewell and lift irrigation particularly in Paonta Sahib and Nahan tahsils.

Animal Husbandry : Livestock is a chief wealth next to agriculture only to the predominant population of the district. Every house invariably keeps a few cows or buffaloes, sheep, goats, pigs and ponies. According to livestock census in 1966 there were 389,889 animal including mules and camels in the district. This number according to 1972 and 1977 census are 394,477 and 412,795 respectively. In addition large flock of sheep and goats are brought during the winter from Kinnaur and Chamba districts and the Gujjars who mostly are migrants carry large flock of buffaloes and cows around the Dun valley and Nahan during winter.

2. The improvement of breed livestock is the main concern of the department of Animal Husbandry in the district which indeed has taken a considerable stride in its improvement. There were 17 Veterinary Hospitals and 31 Veterinary Dispensaries in the district as in 1981. Tahsilwise, Nahan Block has two Veterinary Hospitals and three Veterinary Dispensaries, Pachhad tahsil has six Veterinary Hospitals and nine Veterinary Dispensaries. Sh*lai block has two Veterinary Hospitals and four Veterinary Dispensaries. Paonta Sahib has four Veterinary Hospitals and four Veterinary Dispensaries. There are as many as 12 Artificial Insemination Centres in the district located at Bhagani, Salwala, Shivpur, Nihalgarh, Paonta, Sahib. Jaminwala. Behral, Puruwala, Kolar, Rampur, Banjaran and Simbalwada. Sangrah block has four Veterinary Hospitals Stationed at Dadahu, Sangrah and Nohra and eleven Veterinary Dispensaries.

Dairy : In order to improve the overall standard of living the Animal Husbandry Department has

been focussing its attention for increasing the dairy milk in the district. With the aforesaid thing in view the department had initially started milk supply scheme to Nahan Town by keeping some cross breed animals at Dhaula Kuan. Thereafter, in September, 1965 the collection of milk was commenced from Kala Amb and a first chilling plant with 1800 litres. capacity was installed at Kanshiwala (Nahan) in September, 1972 with the help of UNICEF. Second chilling plant of 2,000 litres capacity was installed at Nahan in April 1975. This plant was supplied by the Small Farmers Development Agency of District Sirmaur. During the same year, another chilling plant with the aforesaid capacity was set up at Paonta Sahib again supplied by the Small Farmers Development Agency, Sirmur district. This apart, another chilling plant with 2,000 litres capacity was installed at Bagthan by the Animal Husbandry Department in July, 1975. In March, 1980, the third chilling plant with 5,000 litres. capacity was installed at Kanshiwala, Nahan by the Animal Husbandry Department. In the year 1981-82 a target of milk collection was fixed at 14,00,000 litres, whereas during 1980-81 it was 15,50,000 ltrs. The Animal Husbandry Department was optimist of achieving the 1981-82 target through they could not achive the target for 1980-81 due to variety of reasons. It has further been decided to shift the milk chilling plant of Paonta Sahib to Renuka during 1982 where the land for installing the chilling plant has been acquired.

Poultry Farming : For the first time in December, 1960 central poultry farm was established by the Animal Husbandry Department with a view to rear improved breed /strains of poultry birds and distribute these birds to the farmers of the district as well as of the State. During 1961, two additional centres called poultry extension centre at Paonta and poultry rearing and marketing centre at Ranital, Nahan were set up. Further, the extension work was entrusted to the development blocks in the initial stage. However, in the second stage duckyard poultry units in the ratio of one male and four females were propagated and distributed through the development blocks under the scheme applied nutritious programme (ANP).

2. During 1967-68 a crash programme for poultry development in the district was taken up and loans upto Rs. 1,00000 were granted by the Animal Husbandry Department to people interested in poultry breeding. The basic intention of this subsidy was to educate the people to adopt egg and chicken as a source of nutrition diet. This apart, the interested farmers who had taken to poultry farming were imparted training in poultry husbandry at Nahan and Paonta Sahib. Eversince, the scheme is repeated every year where considerable number of farmers have been benefitted by training.

3. During 1972-73, 23 poultry units of 100 layer each were established under the Small Farmers Development Agency, Nahan. During 1980-81 the aforesaid units have been entrusted with production of commercial broiler chicks (a table strain) and the production has been started since December, 1980. Eversince, 4,500 chicks have been produced and distributed round the district and the State. Presently, the entire activity is being supervised and implemented by the Polutry Development Officer stationed at Nahan with the compliment of staff with him. The budget provision is Rs. 3,20,000 for the year 1980-81.

Fisheries : As already discussed, the Sirmaur district has been extensively criss-crossed by the rivers and the streams and most of them having perennial water flow of considerable volume. With the result, fishing in the rivers and the streams has been a pretty old past time in the district. It is stated that the rivers Yamuna, and Giri were known for their abundence of fish, though, the other streams were also not far behind. The fishing grounds in Yamuna river are Naoghat and Ganguwal in Paonta Tahsil where Mullee, Mahseer and Gid varieties of fish are available. Mirror carp was introduced in the pucca tank of Nahan for the first time in 1955. Eversince, it has spread considerably, with the result, Himachal Pradesh is one of the big suppliers of this fish to the rest of the country. This variety of fish has been extended to other districts also where the finger-lines have been distributed.

2. Under the Fishing Act, fishing in Renuka Lake and certain areas in Yamuna river have been prohibited.

3. The major attempt for fish activity in the district has been the management of riverine fisheries resources extending over 250 kms. river/stream length comprising the Yamuna river 35 kms., the Giri river 90 kms., the Bata river 30 kms. and other rivulets seasonal/ rivulets 100 kms. through effective enforcement of legislation restricting fishing to the maximum sustained yield only. At the moment, around 700 to 800 fishermen have been subsisting their income by fishing. During 1971-72 there were 697 registered fishermen in the district who had estimated yield of 160 metric tonnes of fish of the value of about Rs. 8,00,000. A decade hence in 1980-81 the registered fishermen in the district were 867 with a yield of 300 metric tonnes of fish valued that about Rs. 24,00,000. During the previous year the yield was equal. However, the value was Rs. 21,00,000 only.

4. This apart, there are about 50 hectares of water sheets seasonal/perennial scattered all over the district. Some of the panchayats took up fish culture in about 15 hectares of water sheets, but, due to lack of personal interest insignificant benefit has been derived so far. However, with the multiplication of water supply schemes in the villages and construction of irrigation canals and channels and also adoption of policy by the Government to subsidise pisci-culture by individuals to augment their earnings, the development fisheries appears to be indeed brightening. During 1980-81, the panchayats have produced 28 kgs. of fish valued at Rs. 140 only which is insignificant. But, with the Government's subsidy being spent in the improvement of ponds and purchase of essential inputs, it is hoped that the people will take added interest in this field.

Industries : Sirmaur district indeed has not much of industrial past. However, a few industries were introduced during the time of Raja Shamsher Singh, one of them is the Nahan Foundry Ltd. which was set up for the first time in 1875 AD. Now the industry has been taken over by the Himachal Pradesh Government in 1964. The chief items of the production of

this foundry are cane-crusher, cast iron and black sheet panes, flour mills, centrifugal pumps, mono-block pump sets and other agricultural implements and accessories.

2. Another oldest factory in Nahan is the Rosin and Turpentine Factory which has its raw material from the extraction of cheel trees which are in abundance in the district. This factory was opened in 1945. It has come into operation from 1949 onwards. The control and administration of the factory has been completely taken over by the State Government in 1957.

3. The Cement Corporation of India has set up cement factory at Rajban with an installed capacity of 600 metric tonnes per day which has generated an employment to about 600 persons. Other important factories being Himachal Mineral & Chemical Paonta Sahib, Himachal Shoddy Mill Ltd. Paonta Sahib, Nahan Ceramics Paonta Sahib, Farm Fresh Fruit Pvt. Ltd. Bata Mandi Paonta Sahib, Himachal Pradesh Surgicals Paonta Sahib, Govt. Ayurvedic Pharmacy Majra, Himachal Turpentine Products Ltd. Kala Amb, Himachal Mine Quarries Bata Mandi. In fact, there are as many as over 450 units registered with the Industries Department which includes industries like saw mills, leather units, utensil repairs and making, weaving and atta chakkies which employ nearly 2,000 persons and have annual production of over Rs. one crore with the fixed capital of Rs. 70,80,000.

4. There are industrial tailoring institutes for girls at Nahan and other centres at Trilokpur, Paonta Sahib, Rajgarh, Badaur in Renuka and Bajon in Shalai and Barag at Sangrah. There is an industrial Training Institute at Nahan which imparts training in various fields like fitter, turner, electrician, radio/TV mechanic, draughtman civil, welder and stenography etc. The session begins every year in the month of August. The rural industrial training institutes at Paonta Sahib and other places have been transferred to Himachal Pradesh Village and Khadi Board. Further, the Government has set up silk rearing farm at Dhaula Kuan, Devinagar and Puruwala. The Government with the intention to popularise silk farming provide subsidy and loan to the individuals for rearing cocoon.

5. During the year 1980-81, the Government have advanced industrial loans to aid the parties to the extent of Rs. 1,00,000. During the previous year 1979-80, six parties were advanced loans to the extent of Rs. 75,000.

6. The traditional cottage industries indeed play their vital role in the rural economy which are ban making, handloom weaving, basket making, etc.

Trade, Commerce & Banking : The Sirmaur district has never been a great trading centre. The trade and commerce is confined to the local requirements only. The chief centres of wholesale business are Nahan, Paonta Sahib, Dadahu and Sarahan where the local cash agricultural products such as ginger, potato, sugarcane are exported. It is only the Dun Valley which is surplus in grains and exports the grains and surgarcane. Trade in apples and stone fruits have fast picked up during the past decade and would continue to add momentum in the years to come.

2. The goods produced by the local industries in small quantity are displayed for sale in various urban centres like Nahan, Paonta Sahib and the Himachal Emporium at Shimla also arranges sale of goods produced in the district by the small scale industries. Most of the imported items for the local consumption are kerosene, grains, sugar, crockery, clothes, ormanents, hosiery, toil goods, cigarettes, utensils and vegetables etc.

3. In fact, in the mela days lot of temporary shopping complexes are established where considerable transaction takes place in all important centres of the district.

4. The first bank in Sirmaur was called Nahan National Bank which was established in 1893 which later on was renamed as bank of Sirmaur in 1944. In 1955 the Bank of Sirmaur was merged with Himachal Pradesh State Cooperative Bank Ltd. and the branches of the Bank of Sirmaur in Sirmaur district likewise were made the branches of the Himachal Pradesh State Cooperative Bank.

5. At present the United Commercial Bank has been declared as lead bank in Sirmaur district. As such it acts as a liaison between the public and the other banks on the one hand and between the Government and the beneficiaries on the other. The lead bank prepares the credit plan of the district to be implemented for the developmental activities by various Government departments. Also identification of the places for opening the new branches is the responsibility of the lead bank. For the year 1978 the lead bank had fixed target of Rs. 76.10 lacs credit whereas the achievement was only Rs. 27.37 lacs. In 1979, however, the credit target was fixed at Rs. 80.20 lacs and achievement far exceeded to Rs. 104.11 lacs.

6. Following are the tahsilwise various banks functioning in the district :

Name of tahsil/ Sub-tahsil	Name of Bank	Location
1	2	3
1. Nahan	1. State Bank of India	Nahan
	2. United Commercial Bank	Nahan
	3. Central Bank of India	Nahan
	4. Punjab National Bank	Nahan
	5. H. P. State Co-operative Bank	Nahan
	6. State Bank of India	Kala Amb
	7. United Commercial Bank	Kala Amb

1	2	3
2. Paonta Sahib	1. State Bank of India	Paonta Sahib
	2. State Bank of India (Agriculture Branch)	Paonta Sahib
	3. Punjab and Sind Bank	Paonta Sahib
	4. United Commercial Bank	Paonta Sahib
	5. Union Bank of India	Paonta Sahib
	6. H. P. State Co-operative Bank	Paonta Sahib
	7. State Bank of India	Taruwala
	8. State Bank of India	Majra
	9. United Commercial Bank	Sataun
	10. State Bank of India	Rajban
	11. State Bank of Patiala	Paonta Sahib
3. Renuka	1. United Commercial Bank	Dadahu
	2. H. P. State Co-operative Bank	Dadahu
	3. United Commercial Bank	Sangrah
	4. United Commercial Bank	Nauhra Dhar
4. Pachhad	1. State Bank of India	Sarahan
	2. H. P. State Co-operative Bank	Sarahan
5. Rajgarh	1. United Commercial Bank	Rajgarh
	2. H. P. State Co-operative Bank	Rajgarh
6. Shalai	1. United Commercial Bank	Shalai
	2. H. P. State Co-operative Bank	Shalai

Transport : The district is not connected with any railway line and the nearest railway station is 60 kms. away from Nahan, the headquarters of the district. The district has been extensively linked with the roads where regular buses ply. Almost all the roads are nationalised except the roads emerging from Nahan towards Haryana and Uttar Pradesh where some of the private buses also ply. But the transportation of goods in the district and the state headquarters and outside the state is mainly done through private transport agencies.

2. The total road length in Sirmaur district as on the 31st March, 1981 was 1,684 kms. Of this, 190 kms. were double lane motorable road, 1,141 kms. single lane motorable road, 3 kms. jeepable lane only and 350 kms. less than jeepable.

Fairs & Festivals: People celebrate festivals with considerable gusto in the entire district. Bishu is celebrated in March-April every year. in June-July is celebrated Haryali fair. Diwali coincides with Government calendar. Magh festival is the greatest of all which is celebrated by all sections of people with tremendous enthusiasm, Janamashtmi celebrated by visiting temples. In November, they hold Renuka fair on the banks of lake. Other usual festivals being Dussehra, Navratas, Trilokpur fair and Hola in Paonta Sahib.

Administrative Changes: Uptil 1955 Rajgarh and Shallai formed part of the Pachhad and Renuka tahsils respectively and it was in this year only that they were created independent sub-tahsils. Further, in 1980 the status of both the sub-tahsils was upgraded to fulfledged tahsils. Rajgarh tahsil has been placed under Rajgarh revenue sub-divsion which covers Pachhad tahsil also. Shalai tahsil has been included in Paonta revenue sub-division.

Places of archaeological, historical and tourist interest

Nahan: Nahan the presently district headquarters of the Sirmaur district was founded in 1621 AD by Raja Karam Parkash. In the heart of the city the old palace is still in good condition. This apart, there is another palace called Shamsher Villa constructed by Raja Shamsher Singh. Just below the palace is the Ranital Bagh which was constructed in memory of one of the Ranis of the palace.

2. From the tourist point of view also the town is very salubrious in climate and has all the modern amenities with Tourist Bungalow and Circuit House nicely furnished. The word Nahan appears to have been derived from Sanskrit word 'Nahan' which means 'tiger' or Nah (King) and Ain (Abode).

Sirmauri Tal. It is situated around 14 kms. north west of Paonta on the right bank of river Giri. It was at one time the state capital known as Sirmur. It is believed that the word Sirmaur for the district originated from this place. The ruins are still visible which speak of the old princely grandeur. Among the ruins of the Sirmauri Tal is the stone with deep hole lying on the top of the small hillock on the bank of river Giri. In this hole the pole is said to have been fixed for the rope on which the enchantren girl by whose curse the town was destroyed, danced and a similar stone is pointed out on the other side of the river Giri.

Majra: It lies 35 kms. east to Nahan. It was the headquarters of the tahsil uptil 1893 when it was tranferred to Paonta. The famous Jambu Khala bungalow is closed by which was constructed for Lord Lytton who had come on a tiger hunt.

Rajgarh : It is famous for its fort on a natural terrace with a tower on each corner. During 1893 it was nearly demolished by Gorkhas. Now the Rajgarh is the centre of sub-divisional and tahsil headquarters.

Haripur : It was the fort on the border of Jubbal state at the height of 8,802 ft. from sea level. At one time this is said to have been state capital for a short-while.

Jaitak : This is about 10 kms. from Nahan. During the Gorkha war of 1814 it was occupied by Gorkhas and with the general treaty with Nepal by British India Government the fort was vacated by Gorkhas.

Paonta Sahib : Paonta Sahib is a place of great religious sanctity for the Sikhs and Hindus alike. Guru Gobind Singh, the 10th Sikh Guru had resided at this place from 1742 to 1745 and he had fought victorious battle against the combined forces of Rajas of Garhwal and Bilaspur and it is at the victory point where Gurdwara has been constructed.

Trilokpur: It is situated nearby Nahan and is known for its temple of Goddess Balasundri. An annual fair is held here in the month of April.

Sarahan : It is situated on a ridge which commands a massive view of the Trans-Giri area and the Dun Valley uptil Ambala. It also is the headquarters of tahsil Pachhad.

Chur Peak : Its elevation is about 12,000 ft. above sea level and is a meeting point of tahsil Renuka and Chaupal. It, indeed, is a paradise for hikers and mountainers.

Renuka: It is both a place of religious and tourist interest. It is situated on Nahan-Renuka-Rajban road. Its sacred oval shaped lake, has a circumferance of 2.4 kms. with the excellent boating facilities. It indeed is a tourist paradise amidst the quiet surroundings of the Cis-Giri ranges. It is believed that Parshu Ram's mother consecrated into water out of which this lake is formed and close by this lies Parshu Ram Tal which is another sacred spot. It has a open sanctuary where variety of pheasants are kept. Also a pair of lions and bear and large number of sambal, chital and deer.

District Census Handbook & its Scope : The District Census Handbook is the innovation of 1951 Census which brought down the census data to the town/village level. Until then, census presented data mostly upto the district/tahsil/sub-tahsil/town level only. This innovation, perhaps, was prompted by the realisation of the need of data at the grass-root level for data users, both for administrative planning and academic studies.

2. The District Census Handbook innovation of 1951 continued undisturbed in 1961 presentation with a few additions to it. However, in 1971 it was further realised that the combination of the census and non-census data in a single publication as was the prece dent from 1951 onwards became unwieldy and delayed the timely publication of census results. Therefore, it was felt that the census data should be delinked from the non-census data and the publication should be brought out in two volumes. First volume dealt with the village and town directory and also the village/townwise Primary Census Abstract of the district. The second volume dealt with the non-census data and social, economic and cultural tables.

3. In 1981 Census there has been a further slight innovation wherein the District Census Handbook consists of only one volume which contains village and town directory in Part A, and in Part B, village/town-wise Primary Census Abstract of the concerned district.

4. The District Census Handbook of 1951 contained, apart from census data, the other general information about the district, like physical, socio-cultural and administrative aspects of the district which included both the census and the non-census data. In 1961 the scope of the District Census Handbook was sought to be made more comprehensive by including certain additional items and dividing the entire presentation into four parts. First part dealt about the land and the people. Second part contained census tables. Third part the information regarding agriculture, medical and health etc. Fourth part consisted village/town directory.

5. As already stated, the District Census Handbook underwent further innovation in 1971 Census wherein it was split up into two volumes. First, dealing with the village and town directory and also town/villagewise Primary Census Abstract of the district. Second part dealt with non-census data and other socio-cultural and economic tables.

6. In 1981 Census, with a view to avoid delay in bringing out the publications and also to streamline the publication programme the second part of 1971 Census Handbook has been omitted. Thus, the present volume of the District Census Handbook will bring about the village/town directory in Part A, and in Part B town/ villagewise Primary Census Abstract of the concerned district. Part A, village Directory will contain information about the name of the village, total area of the village, total population and number of households in the village, amenities like education, medical, drinking water, post and telegraphs, communication, power supply, village market and the distance from the town etc. This part also contains information about socio-cultural aspects like food habits of the people, land use in the village, forests, irrigational resources, cultivable waste and the places of religious, historical and archaeological interest. Similarly, the town directory contains seven statements which would deal with area of the town, number of households population, and rate of growth of the town during the last eight decades, density of population of the town, sex ratio, status of civic administration, its finances and other socio educational, cultural and developmental activities and the amenities that might have been undertaken or provided. As already stated Part B would contain the town/villagewise Primary Census Abstract which includes information/data about the total area of the village, occupied residential houses, total number of households, population and its sex-wise break-up, so also the break-up of Scheduled Castes and Scheduled Tribes, literacy and the break-up of the population by sex into four broad industrial categories like cultivators,

agricultural labourers, household industries and other workers. Apart from the aforesaid data, the Primary Census Abstract will contain data on the marginal workers and non-workers also.

7. It would be pertinent to mention here that the sources of information for the town and the village Directory have been mainly the revenue agency supplemented by the concerned departments like education, medical, co-operation and the local bodies. The information so collected from the various sources have been thoroughly scrutinised so as to ensure its authenticity.

Census Definitions and Concepts: In order to understand the precise import of the meaning of words used in the analysis of data in this publication, it would be pertinent to briefly explain the census concepts and definitions of various words and phrases used herein.

Urban Area : The Census definition of an urban area is given as under :—

(a) All places with a municipality, corporation, cantonment board or Notified Area Committee etc.

(b) All other places which satisfy the following criteria:—

(i) a minimum population of 5,000

(ii) at least 75 percent of male working population engaged in non-agricultural pursuits; and

(iii) a density of population of at least 400 persons per sq. km. (1,000 persons per sq. mile).

In the absence of the any of the aforesaid characteristics the place will be treated as rural.

Urban Agglomeration and Standard Urban Area- The urban agglomeration represents a continuous urban spread containing a town and its adjacent urban out-growth or more physically contiguous town together with contiguous urban out-growth which may actually fall within revenue limits of a village /villages. These 'urbanised' villages or out-growths deserve to be reckoned alongwith the town in conformity with the contiguous urban spread. The urban agglomeration represents a spatial urban spread at a given time. The Standard Urban Area, on the other hand, is the projected growth area of a city or town as it would be in 1991, taking into account not only the towns or villages which are expected or get meregd with it but also intervening rural areas which are potentially urban. This covers all extra municipal out-growth such as suburb (industrial and residential), railway colonies, civil lines, cantonments and villages and rural area which are likely to be urbanised by 1991.

2. Like the urban agglomeration, the standard urban area is also an area unit which extends beyond the main city or town limit-municipal or otherwise. However, unlike in the case of urban agglomeration which represents the actual urban spread at a given time the standard urban area is a larger area unit which includes not merely urban areas lying in close proximity to all surroundings and intervening rural pockets which are likely to be urbanised by 1991 and those serve the role of constant statistical reporting unit for three censuses viz. 1971, 1981 and 1991 irrespective of the change in local administrative boundaries of the area unit within the standard urban area. In fact, the urban agglomeration involving a core town of population of 50,000 or above are submerged in the standard urban area involving with core town. The utility of this concept basically lies in the fact when the limits of existing town change, the standard urban area as such is not expected to undergo any change. As a consequence, the data generated by census for standard urban areas becomes more meaningful as it is comparable with different decades.

3. The characteristic features of a standard urban area is (i) it should have a core town of a minimum population of 50,000 (ii) contiguous area made of all other urban as well as of rural administrative unit should have close mutual socio-economic linkage with the core town and (iii) probability that the entire area will get urbanised within a period of 2/3 decades.

Village : In Himachal Pradesh, as elsewhere, the smallest rural habitation is the village. It generally follows the limits of a revenue village *i.e.*, recognised by the district administration. The revenue village need not necessarily be a single agglomeration of habitation. It may have one or more hamlets. But the revenue village has a definite surveyed boundary and each village is a separate administrative unit with separate village account.

1. In Himachal Pradesh following rural units are treated as revenue village or equivalent :—

1. Revenue Village	In the districts of Chamba, Mandi, Bilaspur, Shimla, Kinnaur, Sirmaur and Solan, Una excepting Bangana tahsil and Lahul & Spiti district (in respect of villages transferred from Pangi tahsil).
2. "Tikka" having a distinct sub-hadbast number	Kangra and Hamirpur districts and Bangana tahsil of Una district.
3. "Phatti" having a distinct sub-hadbast number	Kulu and Lahul & Spiti districts (except villages transferred from Pangi).

Census House : A census house is a building or part of a building having separate entrance from the road or court-yard or staircases etc. used or recognised as a separate unit, it may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household : A household is a group of persons who commonly live together and would take their meal from the common kitchen unless exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household unrelated persons or having a mix of both. Examples of unrelated households are Boarding Houses, Messes, Hostels, residential Hostels, rescue Homes, Jails and Ashrams. These are called "Institutional" households. There may be one member households, two member households or multi-member households. For census purposes, each one of these types is regarded as

82-M/J(D)442DCOHP—3

'Household'. The important link in finding out whether there is a household or not is a common kitchen.

Scheduled Castes & Scheduled Tribes : The scheduled castes and scheduled tribes are those castes and tribes which have been notified as such by the Presidential Order in pursuance of the Article 341 and 342 of the Constitution. The lists of the scheduled castes and scheduled tribes were notified for the first time under the Constitution (Scheduled Castes) Order, 1950 and the Consititution (Scheduled Tribes) Order, 1950. These lists have been modified or amended or supplemented from time to time. On the re-organistaion of the States the Scheduled Castes and Scheduled Tribes (Modification) Order came into force from October, 1956. However, the first one affecting the Himachal Pradesh has been the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976. The main purpose of this Amendment Act was to remove the area restrictions in respect of Scheduled Castes and most of the Scheduled Tribes with the result most of the Scheduled Castes and Scheduled Tribes are now notified as such throughout the State, unlike in the 1956 Order where these were notified in relation to different regions of the state registering area restrictions.

2. In pursuance of the latest Presidential Order referred above, following castes have been treated as Scheduled Castes throughout the state :—

1. Ad Dharmi
2. Badi, Nagalu
3. Balmiki, Bhangi, Chuhra, Chura, Chuhre
4. Bandhela
5. Bangali
6. Banjara
7. Bansi
8. Barad
9. Barar, Burar, Berar
10. Batwal
11. Bauria, Bawaria
12. Bazigar
13. Bhanjra, Bhanjre
14. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi, Ravidasi, Ramdasia, Mochi
15. Chanal
16. Chhimbe, Dhobi
17. Dagi
18. Darain
19. Darai, Daryai
20. Daule, Daole
21. Dhaki, Toori
22. Dhanak
23. Dhaogri, Dhuai
24. Dhogri, Dhangri, Siggi
25. Doom, Doomna, Dumna, Dumne, Mahasha
26. Gagra
27. Gandhila, Gandil, Gondola
28. Hali
29. Hesi
30. Jogi
31. Julaha, Julahe, Kabirpanthi, Keer
32. Kamoh, Dagoli
33. Karoack
34. Khatik
35. Kori, Koli
36. Lohar
37. Marija, Marecha
38. Mazhabi
39. Megh
40. Nat
41. Od
42. Pasi
43. Perna
44. Phrera, Pherera
45. Rehar, Rechara
46. Sanhai
47. Sanhal
48. Sansi, Bhedkut, Manesh
49. Sansoi
50. Sapela
51. Sarde, Sarera, Sarare, Saryare, Sarehde
52. Sikligar
53. Sipi
54. Sirkiband
55. Teli
56. Thathiar, Thethera

3. Similarly, the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1976 as promulgated under the Presidential Order declares the following tribes as the Scheduled Tribes throughout the state :—

1. Bhot, Bodh
2. Gaddi (excluding the territories specified in sub-section (1) of the Punjab re-organisation Act 1966 (31 of 1966), other than the Lahul & Spiti district).
3. Gujjar (excluding the territories specified in sub-section (1) of Section 5 of the Punjab re-organisation Act, 1966 (31 of 1966)).
4. Jad, Lamba, Khampa
5. Kannaura, Kinnara
6. Lahaula
7. Pangwala
8. Swangla

4. Thus, from preceding para, it is clear that the tribes at serial No. 1, 4, 5, 6, 7 and 8 have been treated as Scheduled Tribes throughout the state of Himachal Pradesh wherever they live , whereas, in case of Gaddi and Gujjar the area restrictions still persist as given in the preceding paragraph.

Literate : A person who can both read and write with understanding in any language is to be treated as literate. A person who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. Children upto the age of four years have been treated as illiterate irrespective of whether they attend the school or not.

Work : Work is defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work

Main Worker : A person who has primarily worked for a major period of the year is a main worker. By major part of the year, it is intended to find out that the person has worked for 183 days or more or in other words worked for 6 months or more.

Marginal Worker ; A person who has worked for ess than six months or 183 days but worked atleast a day during the year before enumeration is considered as marginal worker.

Non-Worker : A person who has not worked at all during the preceding one year from the date of enumeration is non-worker.

Cultivator : A person is a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or Institutions for payment of any money, kind, or share. Cultivation includes supervision or direction of cultivation.

Agricultural Labourer : A person who works in any person's land for wages and money, kind or cash is regarded as an agricultural labourer. He or she has no risk in cultivation but he or she merely works in another person's land for wages. An agricultural labourer has no right to lease or control on land on which he/she works.

Household Industry : It is an industry which involves atleast manufacturing, or processing, or servicing,or repairing conducted by the head of the household himself/herself and or by member of the household at home or within the village in rural area and only within the premises of the house where the household lives in the urban area. The large proportion of the workers in a household industry should consist of members of the household including the head. The industry should not be run on a scale of a registered factory which should qualify or has to be registered under the Indian Factories Act.

Other Workers : All workers i.e. those who have been engaged in socio-economic activities during the last one year who are not cultivators or agricultural labourers or in household industry are other workers. The type of worker that comes under this category includes factory workers, plantation workers, those in trade and commerce, business, transport, mining, constructions, all government servants, municipal employees, etc. In fact, all those who work in field of economic activities other than cultivation, agricultural labour or household industry are other workers.

Employer : An employer is a person who has to employ other persons in order to get work performed i.e. such person is not responsible for his or her personal work but also for giving work to others for carrying out the economic activities.

Employee : An employee is a person who usually works under some other persons for salary or wages in cash or kind . There may be persons who are employed as Managers, Superintendents, Agents etc. and in that capacity employ or control other workers on behalf of their own employers, such persons are only employees and not employers.

Single Worker : A single worker is a person who works by himself /herself. He/she is not employed by anyone else and in his/her turn does not employ anybody else. This definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees and also a member of producers cooperative which one of the partners or members of said producers cooperative is a single worker.

Family Worker : A family worker is a member who without receiving wages in cash or kind, in an industry, business, in a trade or service. For example, the working member in a family of Dhobi where they all work and each does not receive wages separately will be family worker. There may be family workers in industry, trade. Family worker must be related by ties of blood or marriage but such workers can belong to different households. Thus, what is important is that such workers must necessarily be related even though they may be living in different households. The family workers may or may not be entitled to share and the profit in the work or business carried on either by person or head of the household or the relative.

82-M/J(N)442DCO(HP)—3(a)

ANALYSIS OF THE DATA

Population : The table given below indicates the growth of population during the last 80 years commencing from 1901 to 1981. As revealed by this table the district has seen over all growth rate of 126.22 percent during the last 80 years compared to the state growth rate of 122.92 percent during the same period.

2. In the table two things are evident enough. One, there has been always predominance of male population compared to the female. Second, on the whole the district has seen the constant increase of population growth except little aberration in 1921 and 1941 when the population growth rate has slightly dipped down in comparison to the previous decade. At this length of time, no precise reason can be attributed for this. Yet, another distinct feature is the phenomenal overall growth rate of population of the district from 1961 Census onwards where the growth rate of the population have suddenly shot up and reached a level in 1981 Census which can be called alarming. This phenomenal growth rate, perhaps, can be attributed to greater medical care available to the people and overall health and hygenic consciousness amongst the people which has resulted in decline of mortality whereas tempo of control of family size has not yet tricked up to counter-balance the growth.

Decadal variation in population since 1901

Year	Persons	Males	Females	Decade variation	Percentage decade variation
1	2	3	4	5	6
1901 . .	135,687	75,461	60,226	..	..
1911 . .	138,520	76,044	62,476	2,833	+2·09
1921 . .	140,448	77,003	63,445	+ 1,928	+ 1·39
1931 . .	148,568	82,384	66,184	+ 8,120	+ 5·78
1941 . .	156,026	85,837	70,189	+ 7,458	- 5·02
1951 . .	166,077	92,271	73,806	+10,051	+ 6·44
1961 . .	197,551	108,093	89,458	+ 31,474	+18·95
1971 . .	245,033	133,500	111,533	+47,482	+ 24·04
1981 . .	306,952	163,840	143,112	+61,919	+ 25·27

3. The table given below deals with the female ratio compared to per 1,000 males. The ratio of females per 1,000 males appear to be pretty erratic. While in 1901 there were 798 females per 1,000 males. In the next two censuses the ratio narrowed down by marginal increase of female ratio compared to male. But, again, in 1931 Census the ratio had widened with the fall of females popualtion per 1,000 males. But, from 1961 onwards the table would reveal that there is a steady increase of female population per 1,000 males.

Sex Ratio since 1901

Year	Females per 1,000 Males
1901	798
1911	822
1921	824
1931	803
1941	818
1951	800
1961	828
1971	835
1981	873

Table 1 deals with the population and the number of villages and towns in the district in 1981 Census . As can be seen from the table the popualtion of the district as on the sunrise of the Ist March, 1981 has been 306,952, male population being 163,840 and female 143,112. As elsewhere in the state, the district is predominantly rural and of the aforesaid total population 280,120 persons live in the rural areas compared to the urban population of 26,832 in the district. The entire rural population is spread over in 967 villages and the urban population settled in three towns. There is only one uninhabited village in the district.

TABLE 1

Population, number of Villages and Towns, 1981

Sl. No.	Name of Tahsil	Population									No. of villages		No. of Town
		Total			Rural			Urban			Total	Inhabited	
		P	M	F	P	M	F	P	M	F			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1	Rajgarh . . .	30,438	15,819	14,619	30,438	15,819	14,619	..	..	..	140	140	..
2	Pachhad . .	32,466	16,872	15,594	31,523	16,348	15,175	943	524	419	261	261	1
3	Nahan . . .	52,515	28,064	24,451	32,426	17,213	15,213	20,089	10,851	9,238	149	149	1
4	Renuka . . .	45,697	23,789	21,908	45,697	23,789	21,908	..	..	..	167	166	..
5	Shalai . . .	40,303	22,115	18,188	40,303	22,115	18,188	..	..	..	65	65	..
6	Paonta Sahib . .	105,533	57,181	48,352	99,733	54,059	45,674	5,800	3,122	2,678	186	186	1
	Total	**306,952**	**163,840**	**143,112**	**280,120**	**149,343**	**130,777**	**26,832**	**14,497**	**12,335**	**968**	**967**	**3**

2. Tahsilwise Rajgarh tahsil which is entirely rural has a population of 30,438 persons spread over in 140 villages. The male population is marginally higher than female where 15,819 are males and 14,619 females. Pachhad tahsil has the population of 32,466 persons, male population being 16,872 and female 15,594. It has a rural population of 31,523 spread over to 261 villages and urban population of 943 in Sarahan town.

3. Nahan tahsil has a population of 52,515 persons, male population being 28,064 and female 24,451. It has a rural population of 32,426 inhabited in 149 villages and urban population of 20,089 i.e. the population of Nahan town.

4. In Renuka tahsil, the population is 45,697, male population being 23,789 and female 21,908 spread over in 166 villages and the entire tahsil is rural.

5. Like Renuka, Shalai tahsil is also entirely rural with the total population of 40,303 persons, male being 22,115 and female 18,188 inhabited in 65 villages.

6. Paonta tahsil indeed is the biggest tahsil of the district with a population of 105,533, males being 57,181 and females 48,352. It has a rural population of 99,733 inhabited in 186 villages and urban population of 5,800 in Paonta Sahib town.

TABLE 2

Decadal Change in Distribution of Population

Sl. No.	Name of Tahsil	Population						Percentage decadal (1971—81) variation		
		1971			1981					
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
1	Rajgarh	24,992	24,992	..	30,438	30,438	..	+5,446 (21·79)	+5,446 (21·79)	..
2	Pachhad	25,546	24,540	1,006	32,466	31,523	943	+6,920 (27·09)	+6,983 (28·46)	—63 (6·26)
3	Nahan	40,072	24,055	16,017	52,515	32,426	20,089	+12,443 (31·05)	+8,371 (34·80)	+4,072 (25·42)
4	Renuka	38,931	38,931	..	45,697	45,697	..	+6,766 (17·38)	+6,766 (17·38)	..
5	Shalai	34,335	34,335	..	40,303	40,303	..	+5,968 (17·38)	+5,968 (17.38)	..
6	Paonta Sahib	81,157	77,465	3,692	105,533	99,733	5,800	+24,376 (30·04)	+22,268 (28·75)	+2,108) (57·10)
	Total	245,033	224,318	20,715	306,952	280,120	26,832	+61,919 (25.27)	+55,802 (24.88)	+6,117 (29.53)

Table 2 reveals the decadal change in the distribution of population with rural/urban break-up and percentage variations therein.

2. The aforesaid table indicates that Sirmaur district has the total population of 245,033 persons in 1971 Census compared to 306,952 persons in 1981 Census. This indicates that there has been net addition of 61,919 persons during the deacade under review thereby registered overall growth rate of 25.27 percent during the decade whereas rural population has registered a growth rate of 24.88 percent. The urban population has registered a higher growth rate of 29.53 percent during the decade.

3. Tahsilwise, Rajgarh tahsil has registered a growth rate of 21.79 percent with absolute increase of 5,446 persons, whereas Pachhad tahsil has registered a still higher growth rate of 27.09 percent. Contrary to the general trend the tahsil has registered rural population growth rate of 28.46 percent and the minus urban growth rate of 6.26 percent.This is basically because of its only town namely Sarahan has not much governmental and commercial activities, hence, the negative growth rate.

4. Nahan tahsil has registered 31.05 percent growth rate during the decade. Here also, the rural growth rate with 34.80 percent is much higher compared to the urban growth rate of 25.42 percent of its only town i.e. Nahan. Evidently the town has not a vibrant economy.

5. Renuka tahsil has registered a growth rate of 17.38 percent and so also is Shalai tahsil. In the district these tahsils have shown lesser growth rate compared to the rest of the tahsils of the district.

Lastly, contrary to the common trend in other tahsils, the rural population growth rate in Paonta Sahib tahsil during the decade has been 28.75 percent and the urban growth rate as high as 57.10 percent.

6. Table 3 deals with the distribution of villages by population ranges in the district. There are 545 villages comprising more than 50 percent of the total villages in the district which have less than 200 population. Percentagewise 56.36 percent of the villages have a population less than 200, yet another 266 or 27.51 percent of the villages have a population ranging between 200-499. Another 150 or 15.51 percent villages have a population ranging from 500-1,999. There are only 6 villages comprising 0.62 percent of the total number of villages in the district in the population range of 2,000-4,999. This would reveal that the entire district

is largely studded with very tiny villages with a very modest population which generally is the case with the rest of the districts also.

TABLE 3

Distribution of Villages by Population Ranges

Range of Population	No. of villages in each range	Percentage of villages in each range
1	2	3
Less than 200	545	56·36
200—499	266	27·51
500—1,999	150	15·51
2,000—4,999	6	0·62
5,000—9,999	..	..
10,000+	..	..
Total	967	100·00

7. Table 4 indicates the distribution of villages by density and percentage of villages in each density range. There are 5 villages in the district which have a population upto 10 persons per sq. km. This comprises 0.52 percent of the villages in this density range. Next, there are 13 or 1.34 percent villages in the range of 11-20 persons per sq. km. Next higher level being 104 villages comprising 10.76 percent of the total number of villages in the range of 21-50 persons per sq. km. Still higher being 345 villages comprising 35.68 percent of the total villages having a range of 51-100 persons per sq. km. Slightly lower than this are 300 villages comprising 31.02 percent having a population range of 101-200 persons per sq. km., 68 villages or 7.03 percent of the total villages have a population range of 201-300 persons per sq. km. Another 79 villages comprising 8.17 percent of the total villages with population range 301-500 persons and 53 villages comprising 5.48 percent of the total number of villages having a population 501 persons or above per sq. km.

The above figures indicate that the maximum number of villages i.e. 645 villages constituting 66.70 percent of the total villages are in the density range of 51-200.

8. Table 5 deals with the proportion of scheduled caste population to the total population in the district. There are 104 villages comprising 10.76 percent of the total villages in the district having no scheduled caste population. 57 villages have a scheduled caste population ranging upto 0-5 percent. 68 villages have scheduled caste population ranging from 6-10 percent. 52 villages have scheduled caste population ranging between 11-15. 77 villages have scheduled caste population ranging between 16-20. 154 villages comprising 15.93 percent of the total villages have a scheduled caste population ranging between 21-30. The maximum number of villages i.e. 237 covering a total number of villages to the extent of 24.51 percent have a scheduled caste population ranging from 31-50. Next to it, another 164 villages constituting 16.96 percent of the total villages in the district have a scheduled caste population between 51-75. 5.58 percent of the villages or in absolute terms 54 villages have scheduled caste population of 76 percent or above.

9. Table 5A gives the proportion of scheduled caste population to the total populaton during the last three censuses in the state and the district. In 1961 Census, there were 22.89 percent scheduled caste population to the total population of the state whereas for the same period Sirmaur district had a scheduled caste population of 32.84 percent. So also the above figures were 22.24 percent and 30.18 percent respectively in 1971 Census. In 1981 Census the comparative figures are 24.62 percent for the state and 30.02 percent for the district. The aforesaid figures give a contrasting picture. Whereas, overall the scheduled caste population in the state has gone up. The Sirmaur district has registered a marginal decline in the scheduled caste population during the last three decades. No precise reason can be attributed. However, one may hazard to say that due to increased job opportunities and the general awakening the erstwhile traditionally static population might have become more mobile which led them to venture outside district in search of better avenues for living.

TABLE 5A

Proportion of Scheduled Castes Population to total Population during the last 3 Censuses in Himachal Pradesh and Sirmaur District

Year	Himachal Pradesh			Sirmaur District		
	Total Population	Scheduled Castes Population	Proportion of Scheduled Castes Population to total Population	Total Population	Scheduled Castes Population	Proportion of Scheduled Castes Population to total Population

10. Table 6 gives the proportion of scheduled tribe population to the total population. In fact, the scheduled tribe population in the district has been just negligible. There are as many as 867 villages comprising overwhelming percentage of 89.66 percent in the district having no scheduled tribe population. Another 57 villages constituting 5.89 percent of the total villages have a scheduled tribe population upto —5 only. Next 17 villages comprising 1.76 percent of the total villages have scheduled tribe population in the range of 6-15 percent. The remaining only 26 villages have a scheduled tribe population ranging between 16 percent and above.

TABLE 6

11. Table 6A deals with the proportion of scheduled tribes population during the last three censuses in Himachal Pradesh and Sirmaur district. According to 1961 Census the scheduled tribe population in the state was 4.35 percent whereas in Sirmaur district it was 1.43 percent. This got reduced to 4.09 percent in the state and 1.29 percent in the Sirmaur district respectively in 1971 Census. Again, in 1981 Census there appears to be some spurt in scheduled tribe population with 4.61 percent scheduled tribes in the state and 1.61 percent scheduled tribe in Sirmaur district. The absolute figures of the scheduled tribe population in the state and district being 197,263 and 4,943 persons respectively.

TABLE 6A

Proportion of Scheduled Tribes Population during the last 3 Censuses in Himachal Pradesh and Sirmaur District

Year	Himachal Pradesh			Sirmaur district		
	Total Population	Scheduled Tribes Population	Proportion of Scheduled Tribes Pouplation to total Population	Total Population	Scheduled Tribes Population	Proportion of Scheduled Tribes Population to total Population

1961	2,812,463	122,326	4·35	197,551	2,830	1·43
1971	3,460,434	141,610	4·09	245,033	3,155	1·29
1981	4,280,818	197,263	4·61	306,952	4,943	1·61

12. Table 7 gives the proportion of scheduled castes and scheduled tribes population in the towns of the district. Nahan Municipal Committee with a population of 20,089 persons has 4,357 scheduled castes and 31 scheduled tribes which constitutes 21.69 percent and 0.15 percent respectively. Paonta Sahib Municipal Committee with the population of 5,800 has 866 or 14.93 percent of scheduled caste population and 6 or 0.10 percent scheduled tribe population. Sarahan Notified Area Committee with the population of 943 has a scheduled caste population of 134 or 14.21 percent and a token representation of 1 or 0.11 percent scheduled tribe population. All three towns combined have 19.96 percent urban scheduled castes population and 0.14 percent urban scheduled tribes population.

TABLE 7

Proportion of Scheduled Castes/Scheduled Tribes Population in Towns

Name of the Town	Total Population	Total Scheduled Castes Population	Total Scheduled Tribes Population	Percentage of Scheduled Castes Population to total population	Percentage of Scheduled Tribes Population to total population
1	2	3	4	5	6
Nahan (M.C.)	20,089	4,357	31	21·69	0·15
Paonta Sahib (M.C.)	5,800	866	6	14·93	0·10

13. Table 8 gives literacy rate by population ranges of the villages. There are 545 villages with the population of less than 200 persons in each village which has a combined literacy rate of 34.00 percent. Another 266 villages in the population range of 200-499 have a literacy percentage of 29.63 percent. Next 150 villages in the population range of 500-1,999 have a literacy of 25.90 percent and the last 6 villages in the population range of 2,000-4,999 have a literacy percentage of 26.62 percent. The aforesaid percentages reveal that smaller villages have a higher percentage of literacy whereas larger villages have lower percentage of literacy.

TABLE 8

Literacy rate by Population ranges of villages

Range of Population	No. of villages in each range	Literacy Rate
1	2	3
Less than 200	545	34·00
200—499	266	29·63
500—1,999	150	25·90
2,000—4,999	6	26·62
5,000—9,999	..	..
10,000+	..	..
Total	967	28·73

14. Table 8A gives the proportion of sexwise literates to total population since 1901. The district has made a considerable strides in the field of literacy. In 1901 there was only 3.5 percent literacy in the district, male literacy being 6.1 percent and female negligible 0.3 percent. Strangely enough, in 1921 and 1931 Censuses, the literacy had fallen to 2.9 percent and 3.2 percent respectively. The female literacy continued to be below 1.00 percent uptil 1931. In 1951 Census there has been a perceptible rise in the literacy percentage of the population where the total literates were 7.5 percent, male 9.8 percent and female 3.6 percent. In 1961 Census this figure had considerably risen to the total district literacy of 15.6 percent, male being 23.3 percent and famale 6.3 percent. In 1971 Census the literacy of the district had risen to 24.4 percent, male literacy being 34.0 percent and famale 12.9 percent. According to 1981 Census the district literacy is 31.8 percent, male literacy being 42.3 percent and famale 19.8 percent. However, compared to rest of the districts, Sirmaur has overall very low percentage of literacy.

TABLE 8A

Proportion of literates to total Population by Sex since 1901

Year	Proportion of Literates		
	Total	Males	Females
1	2	3	4
1901	3·5	6·1	0·3
1911		N.A.	
1921	2·9	4·9	0·4
1931	3·2	5·3	0·6
1941		N.A.	
1951	7·5	9·8	3·6
1961	15·6	23·3	6·3
1971	24·4	34·0	12·9
1981	31·8	42·3	19·8

15. Table 9 deals with the literacy rate for the towns. Nahan Municipal Committeee has 64.00 percent literacy. Paonta Sahib Municipal Committeee has 61.07 percent literacy and Sarahan Notified Area Committee has 71.79 percent literacy which is the highest amongst the three towns. All three towns combined, the urban literacy percentage comes to 63.64 percent.

TABLE 9

Literacy rate for Towns

Name of Town	Literacy Rate
1	2
Nahan	64·00
Paonta Sahib (M.C.)	61·07
Sarahan (N.A.C.)	71·79
All Towns	63·64

16. Table 10 deals with the literates, workers, non-workers and scheduled castes/scheduled tribes population in the district. As already stated in the preceding tables the scheduled castes population in the district comprises 30.02 percent of the total population of the district and scheduled tribe 1.61 percent of the total population of the district. The rural/urban scheduled caste population is 30.99 and 19.96 percent respectively. The rural/urban tribes population being 1.75 percent and 0.14 percent respectively.

17. Tahsilwise Rajgarh tahsil has the highest percentage of scheduled caste population with 42.10 percent but it has a very marginal tribal population with 0.21 percent.

18. Pachhad tahsil has 39.03 percent scheduled caste population. The rural/urban ratio of scheduled castes being 39.78 percent and 14.21 percent respectively. The tribal population in the tahsil is 0.13 percent and rural/urban tribal population is 0.13 percent and 0.11 percent or in absolute terms 41 and 1 respectively.

19. Nahan tahsil has a scheduled caste population of 27.52 percent, rural/urban ratio being 31.13 and 21.69 percent. The tribal population percentage for the tahsil and rural/urban is 6.64 percent, 10.66 percent and 0.15 percent respectively.

20. Renuka tahsil has 40.81 percent scheduled castes population and 0.25 percent scheduled tribes population to the total population.

21. Shalai tahsil has 27.56 percent of scheduled castes population and only one scheduled tribe.

22. Lastly, Paonta Sahib tahsil has scheduled caste population of 21.28 percent and the rural/urban ratio of scheduled caste population being 21.65 percent and 14.93 percent respectively. Similarly, the total scheduled tribe population in the tahsil and the rural/urban ratio percentage being 1.17 percent, 1.23 percent and 0.10 percent respectively.

23. The total literacy in the district, as already stated, is 31.78 percent, rural literacy being 28.73 percent and urban literacy 63.64 percent. The total male literacy in the district and the percentage rural/urban breakup is 42.25 percent, 39.62 percent and 69.44 percent respectively. The female literacy and percentage in the district and rural/urban percentage breakup being 19.79 percent, 16.30 percent and 56.81 percent respectively.

24. Tahsilwise, Rajgarh tahsil has the total literacy of 39.16 percent, male literacy being 49.39 percent and female 28.09 percent. Pachhad tahsil has a total literacy percentage of 39.69 percent, rural literacy being 38.73 percent and urban 71.79 percent. Male literacy in the tahsil and rural/urban breakup being 52.67 percent, 51.84 percent and 78.63 percent respectively. Similarly female literacy for tahsil/rural/urban breakup is 25.66 percent, 24.62 percent and 63.25 percent respectively. Nahan tahsil has a literacy percentage of 46.03 percent, rural literacy being 34.91 percent and urban literacy 64.00 percent. Similar break of the male literacy is 55.26 percent, 46.25 percent and 69.54 percent respectively. Similar female breakup being 35.45 percent, 22.07 percent and 57.48 percent respectively. Renuka tahsil has a literacy percentage of 25.11 percent male literacy being 35.51 percent and female literacy 13.82 percent respectively.

25. Shalai tahsil has the lowest literacy percentage of 15.56 percent, male literacy being 25.12 percent and female 3.93 percent.

26. Paonta Sahib tahsil has a total literacy percentage of 29.21 percent, the rural/urban breakup being 27.35 percent and 61.07 percent respectively. Males and rural/urban literacy breakup of the tahsil being 40.26 percent, 38.68 percent and 67.55 percent respectively. Similarly the female percentages are 16.14 percent, 13.94 percent and 53.51 percent respectively.

27. In absolute terms, out of the total population of 306,952 persons in the district 123,454 persons comprising 40.22 percent are main workers. The rural main workers being 115,583 or 41.26 percent and the urban main workers being 7,871 or 29.33 percent of the total urban population. Of the aforesaid figures 95,717 or 58.42 percent are male main workers and 27,737 or 19.38 percent are female main workers. The rural/urban main workers are 59.42 percent and 48.11 percent for the males and 20.52 percent and 7.26 percent for the females. Both in urban and rural, the male main workers are much higher than female.

28. Tahsilwise, Rajgarh tahsil has 39.94 percent main workers in the tahsil. The male/female main workers breakup being 59.73 percent and 18.52 percent respectively.

29. In Pachhad tahsil , the total main workers are 49.85 percent of the total population and rural/urban breakup being 50.09 percent and 41.68 percent respectively. The male main workers being 57.84 percent and female main workers 41.20 percent.

30. In Nahan tahsil, the total main workers are 30.52 percent, male main workers being 49.97 percent and female main workers 8.20 percent.

31. In Renuka tahsil, the total main workers are 47.26 percent and the male main workers are 64.67 percent and female 28.36 percent.

32. Similarly in Shalai tahsil the total main workers are 46.50 percent, male main workers being 64.43 percent and female 24.70 percent.

33. In Paonta Sahib tahsil, the total main workers are 36.72 percent, male main workers being 57.46 percent and female 21.19 percent.

34. In the aforesaid figures two things are distinctly clear, one, female population has a very low percentage of main workers and second, even in the case of male the main workers slightly go beyond 50.00 percent of the total male population only. This clearly ives i ndication of the population being too young or too old. Apparently, the former appears to be the case because in India old age mortality is considerably high.

35. There are 6.12 percent marginal workers in the entire district, the rural/urban marginal workers breakup being 6.65 percent and 0.63 percent respectively. The male marginal workers comprise 1.65 percent of the total population of the district, rural/urban breakup being 1.73 percent and 0.83 percent respectively. The female marginal workers in the district are 11.25 percent, rural/urban breakup is 12.27 percent and 0.39 percent respectively.

36. Tahsilwise Rajgarh tahsil has 13.00 percent marginal workers, male marginal workers being 2.52 percent and female 24.83 percent.

37. Pachhad tahsil has 5.34 percent marginal workers, male/female breakup of marginal workers being 2.25 percent and 8.69 percent respectively.

38. Nahan tahsil has 7.10 percent marginal workers, male marginal workers being 2.20 percent and female 12.74 percent.

39. Renuka tahsil has 8.93 percent marginal workers, male marginal workers being 1.48 percent and female marginal workers 17.02 percent.

40. Shalai tahsil has 4.27 percent marginal workers, male marginal workers being 1.00 percent and female marginal workers 8.24 percent.

41. Paonta Sahib tahsil has 3.39 percent marginal workers, male marginal workers are 1.29 percent and female 5.87 percent respectively.

42. The aforesaid figures in the table clearly indicate that female marginal workers are much higher in percentage than male marginal workers and the percentage of urban marginal workers are much lower compared to the rural marginal workers. This is apparently because the female population in the district apart from attending to domestic chores assist rest of the members of the family either in agricultural operations or in other non-agricultural activities. Therefore, mostly they are part-time workers. In urban areas the people have the wholetime work primarily because of the predominant official and business communities habiting there and in between fall the young and the aged who constitute the non-workers.

43. In Sirmaur district 46.34 percent of the population constitute the total workers. The total workers to the total population and the males and females in the district being 60.07 percent and 30.63 percent respectively. The rural/urban ratio being 47.91 percent and 29.96 percent respectively. Same figure for male being 61.15 percent and 48.95 percent respectively. The aforesaid figures for the females are 32.79 percent and 7.65 percent respectively.

44. Tahsilwise Rajgarh tahsil has 52.94 percent total workers to the total population, male and female workers being 62.25 percent and 42.86 percent respectively. In Pachhad tahsil it is 55.19 percent and male and female breakup being 60.09 percent and 49.88 percent respectively. In Nahan tahsil the total workers to the total population are 37.62 percent, male being 52.17 percent and female 20.93 percent. Renuka tahsil has total workers of 56.19 percent male being 66.15 percent and female 45.39 percent. Same figure for Shalai tahsil are 50.77 percent, 65.43 percent and 32.93 percent respectively. In Paonta Sahib tahsil 40.11 percent are total workers to total population, male being 58.75 percent and female 18.07 percent.

45. The district has a non-working population of 53.66 percent, male non-working population being 39.93 percent and female 69.37 percent. The rural/urban breakup of the district of non-working population is 52.09 percent and 70.04 percent respectively. The male rural/urban non-workers breakup is 38.85 percent and 51.05 percent respectively. For females it is 67.21 percent and 92.35 percent respectively.

46. Tahsilwise Rajgarh tahsil has a non-working population of 47.06 percent. Of this male non-working population is 37.75 percent and female 57.14 percent. Pachhad tahsil has non-working population of 44.81 percent, male being 39.91 percent and female 50.12 percent. Nahan tahsil has a non-working population of 62.38 percent, male non-working population being 47.83 percent, and female 79.07 percent. Renuka tahsil has non-working population of 43.81 percent, male non-working population being 33.85 percent and female 54.61 percent. Shalai tahsil has 49.23 percent non-working population, male/female non-working population breakup being 34.57 percent and 67.07 percent respectively. Paonta Sahib tahsil has non-working population of 59.89 percent, male and female breakup of the non-working population being 41.25 percent and 81.93 percent respectively.

47. The aforesaid figures partly explain the overall socio-economic backwardness of the district and explicitly one can safely see that in all the tahsils of Sirmaur district there is a high dependency ratio which has a direct impact in the poor economy of the district resulting in consequent modest standard of living.

48. Appendix I of the Village Directory gives the tahsilwise abstract of educational, medical and other amenities provided in the villages, during the last decade. In Sirmaur district out of 967 inhabited villages, 459 villages have got 499 primary schools. 125 villages have got 125 middle schools and 39 villages have got equal number of high schools. One village has higher secondary school and in 6 villages there are 7 adult literacy centres. In another 4 villages there are 4 other institutions. 505 villages have no educational facilities of any sort.

49. Tahsilwise in Rajgarh tahsil 62 villages have got 62 primary schools. 16 villages have middle schools one in each and 6 villages have got high schools in each village. In Pachhad tahsil 70 villages have got a primary schoool each. 12 villlages have got a middle

school each and 3 villages have got a high school each. In Nahan tahsil 70 villages have got 72 primary schools, 19 villages have got a middle school each and 4 villages have got a high school each and there is a village which has got institution covered under others. Renuka tahsil has 95 primary schools spread over in 91 villages, 28 middle schools in 28 villages, and 12 high schools, in equal number of villages. Shalai tahsil has 74 primary schools in 52 villages, 18 middle schools in 18 villages and 4 high schools one each in each village. In 6 villages 7 adult literacy centres are also functioning and there are two villages where 2 institutions of other type are functioning. Paonta Sahib tahsil has 126 primary schools in 114 villages, 32 middle school one in each village and 10 high schools one in each village and one higher secondary school and one other institution.

50. There are 78 villages in Rajgarh tahsil, 191 villages in Pachhad tahsil, 79 villages in Nahan tahsil, 72 villages in Renuka tahsil, 13 villages in Shalai tahsil and 72 villages in Paonta Sahib tahsil consisting altogether 505 villages having no educational amenities whatsoever.

51. There are 49 villages having a dispensary in each village and 3 villages having a hospital in each village, 3 villages having 3 maternity and child welfare centres, 11 villages having primary health centres one in each village, 40 villages having primary health sub-centres one in each village. 28 villages have 31 community health workers and 20 villages have 27 other institutions. There are 848 villages in the entire district which have no medical facilities of any sort.

52. Tahsilwise Rajgarh tahsil has 9 villages with a dispensary each, 2 villages with hospital, 1 village having maternity and child welfare centre, 3 villages with primary health sub-centres, 19 villages having 21 community health workers and 4 villages having 5 other institutions.

53. In Pachhad tahsil 1 village has got dispensary, 2 villages have got primary health centres, 13 villages have got primary health sub-centres. 2 villages have other institutions, one in each village.

54. In Nahan tahsil 4 villages have got dispensaries one in each. One village has one primary health centre. 7 villages have one primary health sub-centre in each village. There is one other institution in the tahsil.

55. In Renuka tahsil 9 villages have got a dispensary each. One village has got a hospital. 6 villages have got primary health centres in each village. 3 villages have got primary health sub-centres, 1 village has family planning centre and 1 village has 1 other institution.

56. In Shalai tahsil 6 villages have got dispensaries in the village itself. 1 village has 1 maternity and child welfare centre and 1 village has got primary health centre. 8 have got primary health sub-centres, 9 villages have got 10 community health workers and 2 villages have 4 other institutions.

57. In Paonta Sahib tahsil 20 villages have a dispensary each. 1 village has 1 maternity and child welfare centre. One village has got primary health centre. 6 villages have got primary health sub-centres one in each village and 10 villages have got 14 other institutions.

58. There are 108 villages in Rajgarh tahsil, 244 villages in Pachhad tahsil, 137 villages in Nahan tahsil, 154 villages in Renuka tahsil, 50 villages in Shalai tahsil and 155 villages in Paonta Sahib tahsil which have no medical facility of any sort mentioned above.

59. Again taking other all district figures regarding drinking water, 351 villages have got tap water, 139 villages have got well water, 71 villages have tank water for drinking purposes, 62 villages have tube-well water and 181 villages depend upon river water for drinking purposes. 71 villages have fountains, 330 villages have canals available for drinking water. 992 villages have other sources of drinking water and 747 villages have got drinking water source more than one. All the villages of the district have drinking water facilities of one type or the other available in the village itself.

60. Tahsilwise Rajgarh tahsil has got 67 villages having tap water, 2 villages have well-water, 30 villages having tank drinking water, 18 villages having drinking water from rivers, 67 villages having drinking water from canals /kuhls, 178 villages having other sources of drinking water and 123 villages have drinking water source more than one.

61. In Pachhad tahsil 78 villages have tap water, 29 villages have well water, 14 villages have tank water, 40 villages having river water, 74 villages having canals/, kuhls water, 313 villages having other sources of water and 206 villages having source of water more than one for drinking water.

62. Nahan tahsil has 43 villages with tap water, 24 villages with well water, 4 villages with tank water, 11 villages with tube-well water, 35 villages with river water, 30 villages with canals/kuhls water, 146 villages have other sources of drinking water. 103 villages have drinking water source more than one.

63. Renuka tahsil has 54 villages with tap water, 7 villages with tank water, 27 villages with river water, 71 villages with canals/kuhls water, 167 villages having other sources of water, 121 villages having more than one source of drinking water.

64. Shalai tahsil has 37 villages with tap water, 30 villages with canal water, 58 villages with other sources of water and 54 villages having drinking water from more than one source.

65. In Paonta Sahib tahsil there are 72 villages with tap water, 69 villages with well-water, 16 villages with tank water, 50 villages with tube-well water, 60 villages with river water, 58 villages with canal/kuhl water, 130 villages having other source of drinking water facilities and 140 villages having drinking water source more than one.

66. In the entire district, there are 138 villages with post offices, 9 villages with post offices and telephone, 5 villages with post and telegraph offices and one with post and telegraph office and phone and 6 villages are having telephone facilities.

67. Tahsilwise Rajgarh tahsil has 23 villages with post offices and 2 villages with post and telegraph offices and 3 with telephones. Pachhad tahsil has got 27 villages with post offices and one with post and telegraph office. Nahan tahsil has got 14 villages with post offices and 2 villages with post offices and telephone. Renuka tahsil has got 32 villages having post offices, one village having post and telegraph office and one village having telephone facility. Shalai tahsil has 17 villages with post offices and one with post and telegraph office and 1 with telephone. Paonta Sahib tahsil has 25 villages with post offices, 7 with post offices and phones, one with post and telegraph office with phone and one village only with phone.

68. Communicationwise there are 321 villages with bus stops in the district, 50 villages with bus stops in Rajgarh tahsil, 83 villages with bus stops in Pachhad tahsil, 60 villages with bus stops in Nahan tahsil, 42 villages with bus stops in Renuka tahsil, 24 villages with bus stops in Shalai tahsil and 62 with bus stops in Paonta Sahib tahsil. There are no villages having railway station in the district.

69. There are 727 villages in the district which have got power/electricity connections, and 240 villages have yet to have electricity benefits.

70. Tahsilwise Rajgarh tahsil has 124 villages, Pachhad 173 villages, Nahan 80 villages, Renuka 118 villages, Shalai 54 villages and Paonta Sahib tahsil 178 villages having electricity. 16 villages in Rajgarh tahsil, 88 villages in Pachhad tahsil, 69 villages in Na han tahsil, 48 villages in Renuka tahsil 11 villages in Shalai tahsil and 8 villages in Paonta Sahib tahsil have yet to get electric connections.

71. There is no village in Sirmaur district which may not have any one of the educational, medical, drinking water and post and telegraphs facilities in the village itself. All the 967 villages have been covered under one facility or the other.

72. Tables 11 and 12 deal with the distribution of villages according to the availability of different amenities and proportion of rural population served by different amenities respectively.

73. Sirmaur district has 967 habited villages with the population 280,120. Of this 462 villages in the district or 47.78 percent of the villages covering a total population of 72.02 percent have got educational facilities of one type or the other. Similarly, another 119 villages constituting 12.31 percent of the total inhabited number of villages in the district covering a population of 79,592 or 28.41 percent have got medical facilities of one type or the other. All the 967 inhabited villages of the district have got drinking water facilities of one type or the other. In respect of post and telegraphs facilities 154 or 15.93 percent of the villages covering a population of 93,465 or 33.36 percent of the total population have either post offices or post and telegraph offices with phone or without. Communicationwise 321 villages or 33.20 percent of the villages in the district covering a population of 124,254 or 44.36 percent of the total population have been connected by bus service. This apart, 159 villages or 16.44 percent of the villages covering a population of 65,781 or 23.48 percent of the total population have been connected by pucca roads. Regarding power/electricity supply 727 villages comprising 75.18 percent of the total number of villages with a population of 243,810 or percentagewise 87.04 percent of the population have got electricity supply available.

74. Tahsilwise in Rajgarh tahsil out of 140 inhabited villages 62 villages or 44.29 percent of the villages covering a population of 58.40 percent have got the educational facilities of one sort or the other. 32 villages or 22.86 percent of the total villages in the tahsil covering a population of 34.29 percent have got medical facilities of one type or the other. As far the drinking water is concerned, the entire villages in the tahsil have been covered and there is no village which has been deprived of the drinking water facility so far. But only 26 or 18.57 percent of the villages comprising population of 30.85 percent have got post and telegraph facilities. 50 villages comprising 35.71 percent of the total number of inhabited villages in the tahsil covering a population of 46.78 percent have been linked with bus service facilities. Out of these 19 villages making 13.57 percent of the total villages in the tahsil covering a population of 22.21 percent have been linked with the pucca roads. Lastly 124 villages constituting 88.57 percent of the total number of villages in the tahsil covering population of 92.90 percent have got electricity supply in the villages.

75. In Pachhad tahsil out of 261 villages 70 villages constituting 26.82 percent of the total number of villages in the tahsil covering a population of 39.13 percent have been covered under educational facilities of one type or the other. 17 villages or 6.51 percent of the villages covering a population of 11.91 percent have got medical facilities of one type or the other in the village. All the 261 villages have been covered under drinking water facilities. 28 villages covering 10.73 percent of the total number of villages in the tahsil with a population of 17.75 percent of the total population in the tahsil have got post and telegraph facilities. 83 villages or 31.80 percent of the villages covering a population of 39.71 percent have got communication facilities in the villages and 32 or 12.26 percent of the villages covering a population of 13.66 percent have got pucca roads. 66.28 percent of the villages or in absolute terms 173 villages covering a population of 76.99 percent have got electricity supply.

76. In Nahan tahsil out of 149 villages 46.98 percent or in absolute terms 70 villages covering a population of 66.14 percent have been covered under educational facilities of one type or the other. With regard to medical facilities 8.05 percent of the total villages or in absolute terms 12 villages covering a population of 18.53 percent have got medical amenities of one type or the other. Like Rajgarh tahsil all villages in Nahan tahsil also have been covered under the drinking water scheme. Regarding postal facilities 10.74 percent of the villages or in absolute terms 16 villages in the tahsil covering a population of 22.80 percent have got the aforesaid facilities of one type or the other. Further, in matter of communication

40.27 percent or in absolute terms 60 villages with a population of 55.43 percent have been linked by bus service and 34 or 22.82 percent of the villages covering a population of 31.09 percent have been linked with pucca roads. 80 villages constituting 53.69 percent of the villages in the tahsil covering a population of 75.13 percent have been provided with the electricity.

77. In Renuka tahsil out of total of 166 villages, 94 villages constituting a percentage coverage of 56.63 percent with a population of 80.82 percent have been provided with educational facilities of one type or the other. 7.23 percent or in absolute terms 12 villages covering a population of 21.21 percent have got the modicum of medical facilities of one type or the other. As regards drinking water all the 166 villages have been covered under this scheme. In respect of post and telegraph facilities 19.88 percent or 33 villages with a population of 21.99 percent have been covered. Communicationwise 42 villages or 25.30 percent of the total number of villages covering a population of 38.16 percent have been covered. 4 or 2.41 percent of the villages covering a population of 7.44 percent have been linked with pucca roads. Lastly, 71.08 percent or in absolute terms 118 villages with a population 76.99 percent have been electrified.

78. In Shalai tahsil out of total number of 65 villages, 52 villages constituting 80.00 percent of the total number of villages having a population of 89.88 percent have been covered under the educational facilities of one type or the other. 15 villages covering 23.08 percent of the total number of villages having a population of 40.05 percent have been covered under the medical facilities of one type or the other. All the villages in Shalai tahsil have been covered under the drinking water scheme. 17 villages covering 26.15 percent of the total number of village with a population of 41.41 percent have been covered under the post and telegraph facilities. 24 or 36.92 percent of the villages covering a population of 44.02 percent have been linked with road communications and no village has so far been linked with pucca roads in this tahsil. 54 villages covering 83.08 percent of the total number of villages having a population of 87.17 percent have been electrified.

79. In Paonta Sahib tahsil out of total number of 186 villages, 114 villages covering 61.29 percent of the total number of villages of the tahsil with a population of 77.25 percent have the educational facilities of one type or the other. 31 villages covering 16.67 percent of the villages in the tahsil having a population of 33.65 percent have got medical facilities of one type or the other. All the 186 villages in the tahsil have been covered under the drinking water scheme. 34 villages covering 18.28 percent of the total number of villages with a population of 35.40 percent have got post and telegraph facilities or either of them. 62 or 33.33 percent of the villages covering a population of 44.46 percent have been linked with communication and 70 villages comprising 37.63 percent of the total number of villages with a population of 41.34 percent have been linked with pucca roads. Last but not the least, 95.70 percent or in absolute terms 178 villages with a population of 96.84 percent have been electrified.

TABLE 13

Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available

Villages not having the amenity of	Number of villages where the amenity is not available and available at the distance of			
	—5 kms.	5—10 kms.	10+ kms.	Total (Cols. 2—4)
1	2	3	4	5
1. Education . .	485	19	1	505
2. Medical . . .	489	272	87	848
3. Drinking water . .	..	..	..	..
4. Post & Telegraph .	610	174	29	813
5. Market/Hat . .	..	..	..	..
6. Communication . .	401	182	63	646

80. Table 13 deals with the distribution of villages having certain amenities arranged by distance range from the places where these are available.

81. As already stated in the preceding pages there are 505 villages in the district without any sort of educational facilities. Out of these 485 villages have this facility of one type or the other within a distance of less than 5 kms. from the respective villages. Another 19 villages have the facility within 5—10 kms and the 1 village has this facility at a distance of more than 10 kms.

82. So also, out of 848 villages which have no medical facilities of any sort in the village itself, 489 villages have the medical facility within the range of less than 5 kms. and another 272 villages have the facility within the range of 5—10 kms. and remaining 87 villages have it beyond 10 kms.

83. All the inhabited villages of district have drinking water facility within the village.

84. Post and telegraphs facilitywise, as is the case in medical facility, the district appears to be badly placed, in that 813 villages have no post and telegraph facility in the village itself. But the overwhelming number of villages numbering 610 have this facility at a distance of less than 5 kms. range and another 174 villages have it within 5—10 kms. and the rest of the 29 villages have it beyond 20 kms.

85. Communicationwise, 646 villages have no communication facility. Of this, 401 villages have bus facility at less than 5 kms. distance and next 182 villages have bus service within 5—10 kms. and the remaining 63 villages have to travel beyond 10 kms. to catch the bus.

86. Table 14 deals with the distribution of villages according to distance from the nearest town and availability of different amenities. In the district 52 villages which are within 5 kms. distance from the nearest town. Of this, 22 or 42.31 percent of the villages have the educational facility within the village itself. 4 villages have the medical facility. All villages have the drinking water facility. 7 villages have the post and tele-

graph facility. 25 villages have the bus stand. 29 villages have approach by pucca roads and 47 villages have been electrified. Another 156 villages are situated within the distance range of 6—15 kms. from the nearest town. Out of this 72 villages have educational facility, 17 villages have medical facility, all the 156 villages have drinking water facility, 20 villages have post and telegraph facility, 65 villages have communication facility in the village itself, 55 villages have approach by pucca road and 117 villages have been electrified. 517 villages are within the distance range of 16—50 kms. from the nearest town. Of this, 216 villages have educational facility, 60 villages have medical facility, all 517 villages in this range have drinking water facility, 169 villages have post and telegraph facility and 154 villages have communication facility within the village itself. 66 villages have approach by pucca road and 373 villages have been electrified.

87. Lastly, there are 242 villages which are situated beyond 50 kms. from the nearest town, Out of the aforesaid total villages, 152 have educational facility, 38 have medical facility, all the 242 villages have drinking water facility, 58 villages have post & telegraph facility, 77 villages have communication facility to the village itself, 9 villages have approach to the village by pucca road and 190 villages have been electrified.

88. Table 15 deals with the distribution of villages according to population range and amenities available. There are overwhelming number of 118 villages having a population upto 499. Of them, 326 villages have educational facility in the village itself, 64 villages have medical facility, all the 811 villages have drinking water facility, 83 villages have post and telegraph facility, 244 villages have communication facility and 113 villages have approach by pucca road and 583 villages have been electrified.

89. There are 150 villages in the population range of 500-1,999. Of this, 130 villages have educational facility, 50 have medical facility, 150 villages have drinking water facility, 66 villages have post and telegraph facility, 73 villages have communication facility, 45 villages have approach by pucca road and 139 villages have been electrified. Remaining 6 villages in the district have the population range between 2,000-4,999. All of them have got the educational facility. 5 of them have medical facility. All the villages have the dinking water facility. 5 of them have post & telegraph facility, 4 of them have communication facility, 1 of them have approach by pucca road and 5 villages have been electrified.

TABLE 16

Main Staple food in the Majority of Villages in each Tahsil

Sl. No.	Name of Tahsil	Main Staple Food
1	2	3
1	Rajgarh	Wheat, Maize
2	Pachhad	Maize, Wheat, Rice
3	Nahan	Wheat, Maize, Rice
4	Renuka	Maize, Wheat, Rice
5	Shalai	Maize, Wheat, Rice
6	Paonta Sahib	Wheat, Maize, Rice

90. The table 16 deals with the main staple food in the majority of the villages in each tahsil. As can be seen from the table, the staple food of the district as a whole has been maize and the wheat. This is supplemented off and on by rice which mostly is imported from outside except the Dun valley region.

TABLE 17

Distribution of Villages according to Land use

Sl. No.	Name of Tahsil	No. of Inhabited villages	Total area (in hect.)	Percentage of cultivable area to total area (Hect.)	Percentage of irrigated area to total cultivable area (Hect.)
1	2	3	4	5	6
1	Rajgarh	140	41,249	24,704 (59·89)	1,741 (7·05)
2	Pachhad	261	40,753	30,423 (74·65)	1,400 (4·60)
3	Nahan	149	18,061	13,329 (73·80)	931 (6·98)
4	Renuka	166	53,946	36,364 (67·41)	2,403 (6·61)
5	Shalai	65	32,289	22,987 (71·19)	1,323 (5·76)
6	Paonta Sahib	186	37,050	28,103 (75·87)	3,518 (12·52)
	Total	967	223,348	155,915 (69·81)	11,316 (7·26)

91. Table 17 deals with the distribution of villages according to land use. In Rajgarh tahsil all the villages put together have a total area of 41,249 hectares. Of this, cultivable area is 24,704 hectares or 59.89 percent of the total area is cultivable. Of the aforesaid cultivable area, 1,741 hectares are irrigated, thus constituting 7.05 percent of the total cultivable area of the tahsil. In Pachhad tahsil the total area is 40,753 hectares. Of this, 30,423 hectares are cultivable area which comprises 74.65 percent of the total cultivable area. Of this cultivable area, 1,400 hectares are irrigated which comes to 4.60 percent of the total cultivable area being irrigated. Nahan tahsil is the lowest in matter of area having 18,061 hectares. Of this, 13,329 hectares of 73.80 percent are cultivable area out of which 6.98 percent or 931 hectares are irrigated. Renuka tahsil has a total area of 53,946 hectares. Out of this, 36,364 hectares or 67.41 percent is cultivable and of

TABLE 18

Growth, Density and Sex-ratio of Urban Population in the District in relation to the State

1	2	3	4	5	6	7	8	9	10	11	12	13
1951	166,077	10,377	6·25	+30·71	N.A.	719	2,385,981	153,827	6·45	+78·66	N.A.	664
1961	197,551	14,272	7·22	+37·53	1,187	734	2,812,463	178,275	6·34	+15·89	1,254	650
1971	245,033	20,715	8·45	+45·14	1,355	821	3,460,434	241,890	6·99	+35·68	1,556	749
1981	306,952	26,832	8·74	+29·53	1,731	851	4,280,818	325,971	7·61	+34·77	1,535	795

this 2,403 hectares or 6.61 percent is irrigated. Shalai tahsil has a total area of 32,289 hectares. Out of this, 22,987 hectares or 71.19 percent of the total area is cultivable of which 5.76 percent of the area or 1,323 hectares is irrigated. Paonta Sahib tahsil has a total area of 37,050 hectares out of which 28,108 hectares or 75.87 percent are total cultivable area and out of which 12.52 percent or 3,518 hectares are under irrigation.

92. Taking the inhabited villages of the district as a whole, it has 223,348 hectares of total land area spread in 967 inhabited villages. Out of this, 155,915 or 69.81 percent of the land is cultivable. Out of aforesaid total cultivable area 11,316 hectares or 7.26 percent of the total cultivable area is under irrigation.

93. Table 18 indicates the growth, density and sex ratio of urban population in the district in relation to the state during the last four censuses. Sirmaur district had a percentage of urban population of 6.25 percent, 7.22 percent, 8.45 percent and 8.74 percent respectively during the last four censuses commencing from 1951 to 1981. The corresponding state urban population was 6.45 percent, 6.34 percent 6.99 per cent and 7.61 percent respectively. The aforesaid figures would show that during the decade 1961-71, Sirmaur district has seen the highest urban growth rate of 45.14 percent compared to the rest of the censuses. This apparently was because of the addition of Sarahan as town which hitherto was a village. During 1971-81, the percentage of urban growth rate in the district has been 29.53 which is lower than the previous three decades figures. This is because the towns of the district are economically vibrant with the result the growth is slow and the towns suffer from out flux of the population in search of better livelihood. So, is the case in respect of the state as a whole which is just inching up in respect of growth of urban population. The density of the population of the urban areas of the district are 1,187 persons per sq. km. in 1961 census, 1,355 persons per sq. km. in 1971 census and 1,731 persons per sq. km. in 1981 census. In respect of state, the density of population per sq. km. being 1,254 in 1961, 1,556 in 1971 and 1,535 in 1981 census. The decline in the density per sq. km. appears to be due to conversion of many villages in the urban areas which have a very thin population thereby effecting the density ratio.

94. The sexwise ratio in urban areas in the district as well as in the state is always overwhelming in favour of the males compared to females. The precise sex ratio per 1,000 males is 719, 734, 821 and 851 compared to state ratio of 664, 650, 749 and 795 in 1951 1961, 1971 and 1981 census respectively.

95. Table 19 deals with per capita receipt and expenditure in the towns of the district. In all the three towns as a whole the per capita total receipts are Rs. 69.49. Of this, total receipt through taxes is 49.94 and receipt from other sources are 19.55 and the expenditure side the per capita total expenditure is Rs. 61.49. Of this, the per capita expenditure on the general administration being 19.59 on public health and conveyance Rs. 15.83, on public works Rs. 11.37, on public institutions Rs. 4.44 and on rest of the items Rs. 10.26. The class III town of Nahan Municipal Committee has per capita receipt of Rs. 69.36. Out of this the per capita receipt from taxes are Rs. 52.05 and from other sources Rs. 17.31. Total per capita expenditure of the town being Rs. 57.72. Of this, per capita expenditure on administration being Rs. 15.58, on public health and conveyance Rs. 17.45, on public works Rs. 9.08, on public institution Rs. 5.53 and on others Rs. 10.08. Paonta Sahib Municipal Committee though class-V town has the highest per capita receipt and expenditure of all the three towns in the district. The total per capita receipts are Rs. 79.69, the per capita receipt being Rs. 49.21 through taxes, Rs. 30.48 through other sources. On the expenditure side total per capita expenditure is Rs. 81.31. Of this the per capita expenditure on general administration being Rs. 36.40, on public health and conveyance Rs. 12.00, on public works Rs. 19.29, on public institutions and others Rs. 1.40 and 12.22 respectively. Sarahan Notified Area Committee of course is class VI town which can be best called town technically. The

TABLE 19

Per Capita Receipt and Expenditure in Towns

Class, name and civic status of the town	Per Capita								
	Receipt			Expenditure					
	Total receipt	Receipt through taxes	Receipt from all other sources	Total Expenditure	General Administration	Expenditure on Public health and conveniences	Public Works	Expenditure on Public Institutions	Other aspects
1	2	3	4	5	6	7	8	9	10
III. Nahan (M.C.) . . .	69·35	52·05	17·31	57·72	15·58	17·45	9·08	5·53	10·08

VI. Sarahan (N.A.C.) . . .	9·54	9·54	..	19·83	1·80	4·88	11·24	..	1·91
Total .	69.49	49.94	19.55	61.49	19.59	15.83	11.37	4.44	10.26

per capita receipt being Rs. 9.54. Of this the per capita receipts from the taxes are Rs. 9.54 There is no other source of income for the Notified Area Committee The expenditure side, the per capita expenditure is Rs. 19.83. Of this per capita expenditure on general administration is 1.80 public health and conveyance Rs. 4.88, public works Rs. 11.24 and others Rs. 1.91.

96. It is observed that both in Paonta Sahib and Sarahan town the per capita receipts are lower than per capita expenditure. The deficiency obviously is met through the state grants and aids.

TABLE 20

Schools per ten thousand population in Towns

Class, name and civic status of the town	No. per ten thousand population			
	Higher Secondary/ Intermediate/ PUC/ Junior College	Secondary/ Matriculation	Junior Secondary/ Middle	Primary

Total .	0·75	1·86	3·35	6·71

97. Table 20 gives the number of schools per 10,000 population in the town of the district. In all the three towns in the district as a whole the higher secondary schools per 10,000 population are 0.75. So also, the high schools being 1.86, middle schools 3.35 and primary schools 6.71. Nahan Municipal Committee has higher secondary schools per 10,000 population to the extent of 0.50, high schools 1.00, middle schools 1.99 and primary schools 6.47. Similarly, Paonta Sahib has higher secondary schools 1.72, high schools 3.45, middle schools 5.17 and primary schools 5.17. Sarahan Notified Area Committee has high schools 10.60, middle schools 21.21 and same is the number in respect of primary schools also.

TABLE 21

No. of beds per one thousand population in Medical Institutions in Towns

Class, name and civic status of the town	No. of beds in medical institutions per one thousand population
1	2
III. Nahan (M.C.)	10·75

VI. Sarahan (N.A.C.)	6·36
Total .	9.99

98. Table 21 deals with the number of beds in medical institutions in the towns. Towns of the district as a whole have number of beds in medical institutions per 1,000 population to the extent of 9.99. Number of beds per 1,000 population in Nahan Municipal Committee is 10.75. In Paonta Sahib Municipal Committee 7.93 and in Sarahan Notified Area Committee it is 6.36.

99. Table 22 deals with the most important commodity manufactured, imported and exported in the towns. Nahan Municipal Committee manufactures foundry products like sugarcane crushers, electric motors, pumps and cast iron products. It is deficient in foodgrains which it imports from Paonta Sahib and Haryana. The most important export item being foundry products as mentioned already. Paonta Sahib town manufactures wooden furniture only. The most important export items it is having are the foodgrains and quality rice and the import item being sugar. Sarahan to some extent manufactures wooden furniture and exports ginger and imports foodgrains.

TABLE 22

Most important Commodity manufactured, imported and exported in Towns

Class, name and civic status of the town	Most important commodity		
	Manufactured	Exported	Imported
1	2	3	4
III. Nahan (M. C.) . . .	Foundry products like sugarcane Crushers, Electric Motors, Mono Block Pumps and Cast Iron products	Foundry products like sugarcane Crushers, Electric Motors, Mono Block Pumps and Cast Iron products	Foodgrains
V. Paonta Sahib (M. C.) . .	Wooden Furniture	Foodgrains mainly Wheat and Rice	Sugar
VI. Sarahan (N.A.C.) . . .	Wooden Furniture	Ginger	Foodgrains

100. Statement I deals with status and growth history of the towns in the district. As it is, Nahan is the biggest town with a total area of 10.56 sq. kms. There are 4,114 households which include the houseless households. This town is the oldest in the district and continues to be so since 1881. The population of the town since 1901 Census has been given as 6,256 and during 1901-11 it registered a growth rate of 1.36 percent. But the population declined in 1921 Census by 9.23 percent. Eversince, the town has been constantly registering upward growth rate uptil 1981 Census. The actual growth rate had been varying in each decade. Though the growth rate of 1931 Census has been the highest at 35.65 percent closely followed by 1961 Census figures which was 31.89 percent and in 1971 it was 28.76 percent and in 1981, 25.42 percent. The density of population of the town according to 1981 Census has been 1,902 persons per sq. km. and the sex ratio during the last three censuses of 1961, 1971 and 1981 being 731, 827 and 851 females per 1,000 males respectively.

101. Paonta Sahib became town in 1951 Census. It has an area of 2.53 sq. kms. with 1,209 households including houseless households. During 1951-61 the town has registered a phenominal growth rate of 93.76 percent. This has further shot up in 1971 Census with a growth rate of 101.42 percent. In 1981 Census the growth rate stands at 57.10 percent. The high growth rate is basically because the valley is very flat and fertile and with the prosperity people prefer to live in the town to avail urban facilities. The density of the town has been 2,292 persons per sq. km. and the sex ratio in 1961, 1971 and 1981 being 749, 801 and 858 females per 1,000 males respectively.

102. Sarahan Notified Area Committee was declared town in 1971 Census for the first time with an area of 2.40 sq. kms. and has 267 households including the houseless households. In 1981 Census this town has registered a negative growth rate of 6.26 percent and density of population of 393 persons per sq. kms. The negative growth rate is basically because the town has nothing to offer for socio-econonic development. The sex ratio of the town in 1971 and 1981 Census has been 806 and 800 females per 1,000 males respectively.

103. Statement II deals with physical aspects and location of the town as in 1979. Nahan town experiences annual rainfall of 1,636.4 mm. It is located at the distance of 137 kms. from Shimla and 82 kms. from Ambala city. It is the district headquarters and also the sub-divisional and tahsil headquarters are situated in the town itself. It has all the road convenience like bus stops and well connected with other areas of Punjab and Himachal Pradesh states through bus and taxi route. Nearest railway station is Barara which is 58 kms. away from the town in Haryana state.

104. Paonta Sahib experiences annual rainfall of 1,379.6 mm. It is located at the distance of 182 kms. from Shimla —the state headquarters and 48 kms. from Dehra Dun city. From the district headquarters, it is 45 kms. east wards to Dehra Dun road. It is the seat of sub-divisional and tahsil headquarters of the Paonta Sahib tahsil. It has navigable river water flowing besides and the railway station is at the distance of 48 kms. at Dehra Dun.

105. Sarahan experiences higher rainfall than Paonta Sahib but less than Nahan with 1,424.3 mm. annual rainfall. It is picturesquely situated on the Nahan-Shimla road 96 kms. downwards from Shimla and 41 kms. upwards from Nahan. Its sub-divisional headquarters is situated at Rajgarh which is 87 kms. away but it has the tahsil headquarters of Pachhad tahsil in the town itself. Chandigarh is the nearest city which is 100 kms. away via Kumharhatti and Kumharhatti is the nearest railway station for Sarahan town at the distance of 41 kms.

106. Statement III deals with the municipal finances as in 1978-79. In matters of finances, Nahan Municipal Committee appears to be the richest amongest the three with a total annual receipt of Rs. 1,393,480. Of this, Rs. 10.45 lacs are receipts from the taxes and Rs. 1.10 lacs through municipal property and power and Rs. 2.25 lacs through Govt. grants. On the expenditure side, it has the total annual expenditure of Rs. 1,159,500 in 1978-79. The breakup of the expenditure under various heads are Rs. 3.13 lacs on general administration, Rs. 1.10 lacs on public safety, Rs. 3.50 lacs on public health and conveniences, Rs. 1.82 lacs on public institutions and the rest on other items like water supply, unforeseen charges and miscellaneous etc. Similarly, Paona Sahib Municipal Committee has total annual receipts of Rs. 462,200. The breakup of the receipts are Rs. 2.85 lacs from taxes, Rs. 0.20 lacs through municipal property and power, Rs. 1.15 lacs through Govt. grants and remaining

being from miscellaneous sources. On the expenditure side it has annual total expenditure of Rs. 471,600 in 1978-79. The break-up of the expenditure is Rs. 2.11 lacs on general administration, Rs. 0.22 lacs on public safety, Rs. 0.70 lacs on public health and conveniences, Rs. 1.11 lacs on public works and Rs. 0.08 lacs on public institutions and the rest on other items like water supply and miscellaneous etc. Sarahan Notified Area Committee has a total annual receipt of Rs. 9,000 and the entire amount is recovered through taxes alone. It has an annual expenditure of Rs. 18,700. The breakup of the expenditure being Rs. 1,700 on general administration, Rs. 1,500 on public safety, Rs. 4,600 on public health and conveniences, Rs. 10,600 on a public works and the rest on miscellaneous during the year 1978-79.

107. Statement IV deals with the civic and other amenities available upto 1979. Nahan Municipal Committee has a pucca road length of 37.81 kms. and katcha road length of 15.28 kms. The severage system in the town is open surface drains and sewer. There are 26 water borne public latrines and 1,225 water borne private latrines and number of service latrines in the town are 1,917 privately maintained. The method of disposal of night soil being head loads and septic tank latrines. There is no common sewerage system for disposing of the night soil. The source of protected water supply of the town being overhead tank with the capacity of 1,499,355 litres. The town has been provided with fire-fighting service too. There are 3,204 domestic electric connections, 36 industrial connections and 958 commercial electric connections in the town. 825 street light points have been fixed up in the town and there are 9 other types of electric connections.

108. In Paonta Sahib the total pucca road length is 9.50 kms. and katcha road length is 2.00 kms. The sewerage system is vogue being open surface drains. There are 7 water borne public latrines and 150 private water borne latrines. Service latrines number 270 maintained privately. The system of disposal of night soil in the town is headloads and baskets only. The source of protected water supply for the town is overhead tank with the capacity of 318,045 litres and rest of the supply through wells. Paonta Sahib depends upon Nahan for its firefighting service. There are 1,269 domestic electric connections, 79 industrial connections, 398 commercial connections and 13 others. The town has 164 road light points.

109. Sarahan town has a total pucca road length of 2.30 kms. Sewerage system is open surface drains. There are no public latrines provided. Howerer, there are 12 private latrines in the town and rest use open space for nature's call. However, there are 66 service latrines. The method of disposing of night soil in the town being through the baskets and septic tank latrines. The protected water supply in the town is throu tankgh of service reservoir with the capacity of 119,948 litres. For fire-fighting it depends upon Nahan which has it. The town has 207 domestic electric connections, 7 industrial connections, 109 commercial connections and 2 other types. The civic body provides 46 road light points in the town.

110. Statement V deals with medical, educational, recreational and cultural facilities available as in 1979. Nahan town has one Ayurvedic Hospital, one Allopathic Hospital, one ayurvedic dispensary, one family planning centre and one other medical institution. The allopathic and ayurvedic hospitals have a total bed facility of 186. The town has one arts and science college and one evening arts college only. The nearest medical college from Nahan is the post-graduate medical institution at Chandigarh which is 90 kms. away. For engineering and polytechnic also the nearest station being Chandigarh only. The town has one Industrial Training Institute, 1 Girls Industrial Training Institute, 1 Craft Training Centre, 1 Tailoring Centre and 1 ANMS, 1 higher secondary school, 2 high schools, 4 middle schools, 13 primary schools and one nursery school. There are two cinema theatres, one reading room and one public library.

111. In Paonta Sahib town there is one hospital with 46 beds and one family planning centre. For college, the nearest station is Nahan which has arts and science college and the nearest medical college is at Rishikesh in Uttar Pradesh at the distance of 94 kms. For engineering college, the town depends upon Chandigarh which is the nearest at a distance of 135 kms. Nearest polytechnic available is Dehra Dun at the distance of 48 kms. There is one Rural Industrial Training Institute, one Craft Training and one Tailoring Centre. The town has one higher secondary school and two high schools, 3 middle schools, 3 primary schools and one nursery school. The town has one cinema for recreational, one community hall, one public library and one reading room.

112. Sarahan has one health centre with 6 beds and one family planning centre. For arts and science degree college, it depends upon Nahan. The nearest medical college is at Shimla at the distance of 96 kms. and the nearest engineering college and polytechnic is Chandigarh which is at the distance of 100 kms. The town has one tailoring centre only. Nearest higher secondary school is at Nahan but it has got one high school, 2 middle schools, 2 primary schools and one nursery school and a modest public library.

113. Statement VI deals with trade, commerce, industry and banking as in 1979. Nahan imports foodgrains, sugar, milk and the most important commodities exported from the town are foundry products like sugarcane crushers, electric motors, mono block pumps and cast iron products. It also exports rosin and turpentine and washing soap. The town manufactures again foundry products as mentoined already and rosin and turpentine and washing soap. The town has 5 banks and 10 non-agricultural credits societies.

114. Paonta Sahib imports sugar, edible oils and cloth and exports foodgrains mainly wheat and rice, brown-sugar and wooden furniture. Most important items manufactured are wooden furniture, carpets and handloom products and lime. It has 7 banks and one agricultural credit society.

115. Sarahan town, in fact, imports every thing of daily requirements like foodgrains, kersoene, sugar etc. Seasonally, it exports ginger, tomatoes and fruits. It modestly manufactures wooden furniture and fruit-crates. It has 2 banks and one agricultural credit society.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I—VILLAGE DIRECTORY

Village Directory :

Village Directory which is one of the traditional documents of the census has been canvassed during 1981 Census too. On the basis of the information the village directory schedule can broadly be divided into three parts. The first deals with the basic amenities available to a village like the education, medical, drinking water, post and telegraph, communication, power supply and market etc. In this part, it has been sought to ascertain whether the above facilities exist in a village and if it does then to what extent/level. If the above amenities are not available then nearest village/town with a distance where the aforesaid facilities/amenities have been made available.

2. The second deals with the land use which has been endeavoured to conform to the pattern of classification of land use as recommended by the Ministry of Food & Agriculture, Government of India. The Government of India, Ministry of Food & Agriculture has recommended the maintenance of records of land use pattern under five categories which are :-

1. Forests
2. Not available for cultivation
   (a) Land put to non-agricultural uses.
   (b) Barren and uncultivable lands.
3. Other uncultivated lands excluding fallow lands
   (a) Permanent pastures and other grazing lands.
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown.
   (c) Culturable wastes.
4. Fallow lands
   (a) fallow land other than current fallows.
   (b) Current fallows.
5. Net area sown

The source of information for the aforesaid items had been the revenue record shown/converted into hectares.

3. The third part of the village directory deals about the information of the places of historical, archaeological and religious importance in a village. This apart, it also deals with the socio-economic level of the people. It also endeavours to gauge social and economic level of the people by para-meters like the number of motor cycles, scooters, jeeps, cars and tractors available in the village and the number of news papers inflow to the village.

4. The first part dealing with the amenities needs elaboration which is given as under :—

(a) *Educational Amenities* : The various levels of the educational amenities provided in a village has been shown for the sake of convenience in the abbreviations given as under :—

1. Primary and elementary schools upto 4th Class.	P
2. Junior Secondary or Middle Schools upto 8th Class.	M
3. High Schools/Secondary Schools upto 10th Class.	H
4. Higher Secondary Schools/Pre-University/ Junior College/Intermediate (including 10+2 system).	PUC
5. Colleges of all types upto Graduate level and above.	C
6. Industrial School	I
7. Training School	Tr.
8. Adult education class/centre	AC
9. Other educatinal Institutions like Sanskrit Pathshala, Senior Basic School, Maktab etc.	0

Where there are more than one Institution of same type in a village, the same has been indicated in figures against the appropriate abbreviation e.g. P(3), M(2), H(2) etc. Where no educational facility in the village was available, the distance inb road ranges of the nearest village where such educational facilities exist has been given in bracket with a dash viz.— (—5), —(5—10) and —(10 +).

(*b*) *Medical Amenities* : Anyone of the following amenities available in the village has been shown in abbreviations against the name of each medical institution :—

1. Hospital	H
2. Maternity and Child Welfare Centre	MCW
3. Maternity Home	MH
4. Child Welfare Centre	CWC
5. Health Centre	HC
6. Primary Health Centre	PHC
7. Primary Health Sub-Centre	PHS
8. Dispensary of all types	D
9. Family Planning Centre	FPC
10. T.B. Clinic	TB
11. Nursing Home	NH
12. Registered Private Practitioner	RP
13. Subsidised Medical Practitioner	SMP
14. Community Health Worker	CHW
15. Others	O

2. In the aforesaid health centres of various levels family planning advice and clinical facilities may also be available which have not been shown separately. If there are more than one Institution of same type in the village, the same have been indicated in numbers against the abbreviation e.g. H(2), D(3) etc. In view of a variety of medical amenities for which a number of codes as above have been suggested, it would not be possible to provide too many details under each such amenity. Thus all registered Medical Practitioners whether Ayurvedic, Unani or Allopathic have been covered under the code 'RP'. It would be appropriate to mention that the terms 'Community Health Worker' does not refer to workers in extension programmes like Maleria eradication, Agriculture etc. It refers to only those para-medical personnel who have been trained for dispensing medicines for minor ailments. Where no

facility is available within the village a dash (—) has been shown in the relevant column. But next to it in brackets, the distance in broad ranges viz. —5 kms. 5—10 kms. and 10+ kms. of the nearest place where the most modest medical amenity like Dispenary, Community Health Worker, Primary Health Centre or Primary Health Sub-Centre or Hospital is available has been given.

(c) *Drinking Water Amenities* : The types of the potable drinking water supply sources available within the village have been given in the abbreviations as under :—

1. Tap water	T
2. Well water	W
3. Tank water	TK
4. Tubewell water	TW
5. Hand Pump	Hp.
6. Fountain	F
7. Canal/Kuhls	C
8. River water	R
9. Lake	L
10. Nullah	N
11. Other sources (like baories etc.)	O

(d) *Post & Telegraph Amenities* : Post & telegraph has been given in the abbreviations as under :—

1. Post Office	PO
2. Telegraph Office	TO
3. Post & Telegraph Office.	PTO
4. Telephone Connection	Phone

(e) *Day/Days of the Market/Hat* : No such traditional practice exists in the entire district.

Communications : This indicates the type of communication amenities either by bus, railways or navigable water way available to the village, the abbreviations adopted are given as under :—

1. Bus	BS
2. Railway Station	RS
3. Navigable water way (including river/ canal)	NW

2. If any one of the these amenities were not available to the village then the nearest such facility available with a distance in brackets is given viz. —(—5), (5—10) and (10+).

(*f*) *Approach to Village* : The approach to village refers to the state of road etc. leading to the village. This is to see whether the village is approachable by pucca road or katcha road or by navigable canal or water way or both. The approach to village is to be indicated by the following codes :—

1. Pucca Road	PR
2. Katcha Road	KR
3. Navigable River	NR
4. Navigable Canal	NC
5. Navigable Water way (other than river or canal)	NW
6. Foot Path	FP

If there is more than one such facility the same has been indicated separately by individual codes.

(*g*) *Nearest Town and distance* : The distance of nearest town is given in kms. in brackets. This has been filled in purely on the basis of local enquiry. The nearest town so indicated need not be within the state itself. The nearest town even in another states have been indicated wherever necessary alongwih the name of the state. Further, operational convenience has been taken into consideration while showing the nearest distance of town.

(*h*) *Electricity Supply* : If the electricity is actually available whatever may be the form of its use it has been shown as available. The codes used for various category of electricity are as under :—

1. Electricity for domestic purpose only	ED
2. Electricity for agriculture purpose only	EAg.
3. Electricity for other purposes like industrial, commercial etc. only	EO
4. Electricity for all purposes listed above	EA

(i) *Staple Food* : Here the terms staple food has been used only in terms of grains and no other food material. The name of the grain consumed by the inhabitants for the major part of the year has been treated a staple food of the inhabitants, where it was not possible to pin-point the foodgrain or in other words, where the inhabitants have been using more than one type of foodgrain more than one names has been given.

Land Use : As already stated the total area of the land in its 5 broad categories has been compiled from the revenue records. In the first category, types of land under forests has been indicated and in the second and third information about cultivated area, irrigated or un-irrigated has been shown. The irrigated area has been further split up as per the sources of irrigation. Fourth being the area under cultivable waste which includes meadows, groves and pastures etc. Lastly, the area not available for cultivation such as residential area, paths and unculturable waste etc. has been given.

Abbreviations used for various sources of irrigation are detailed below :—

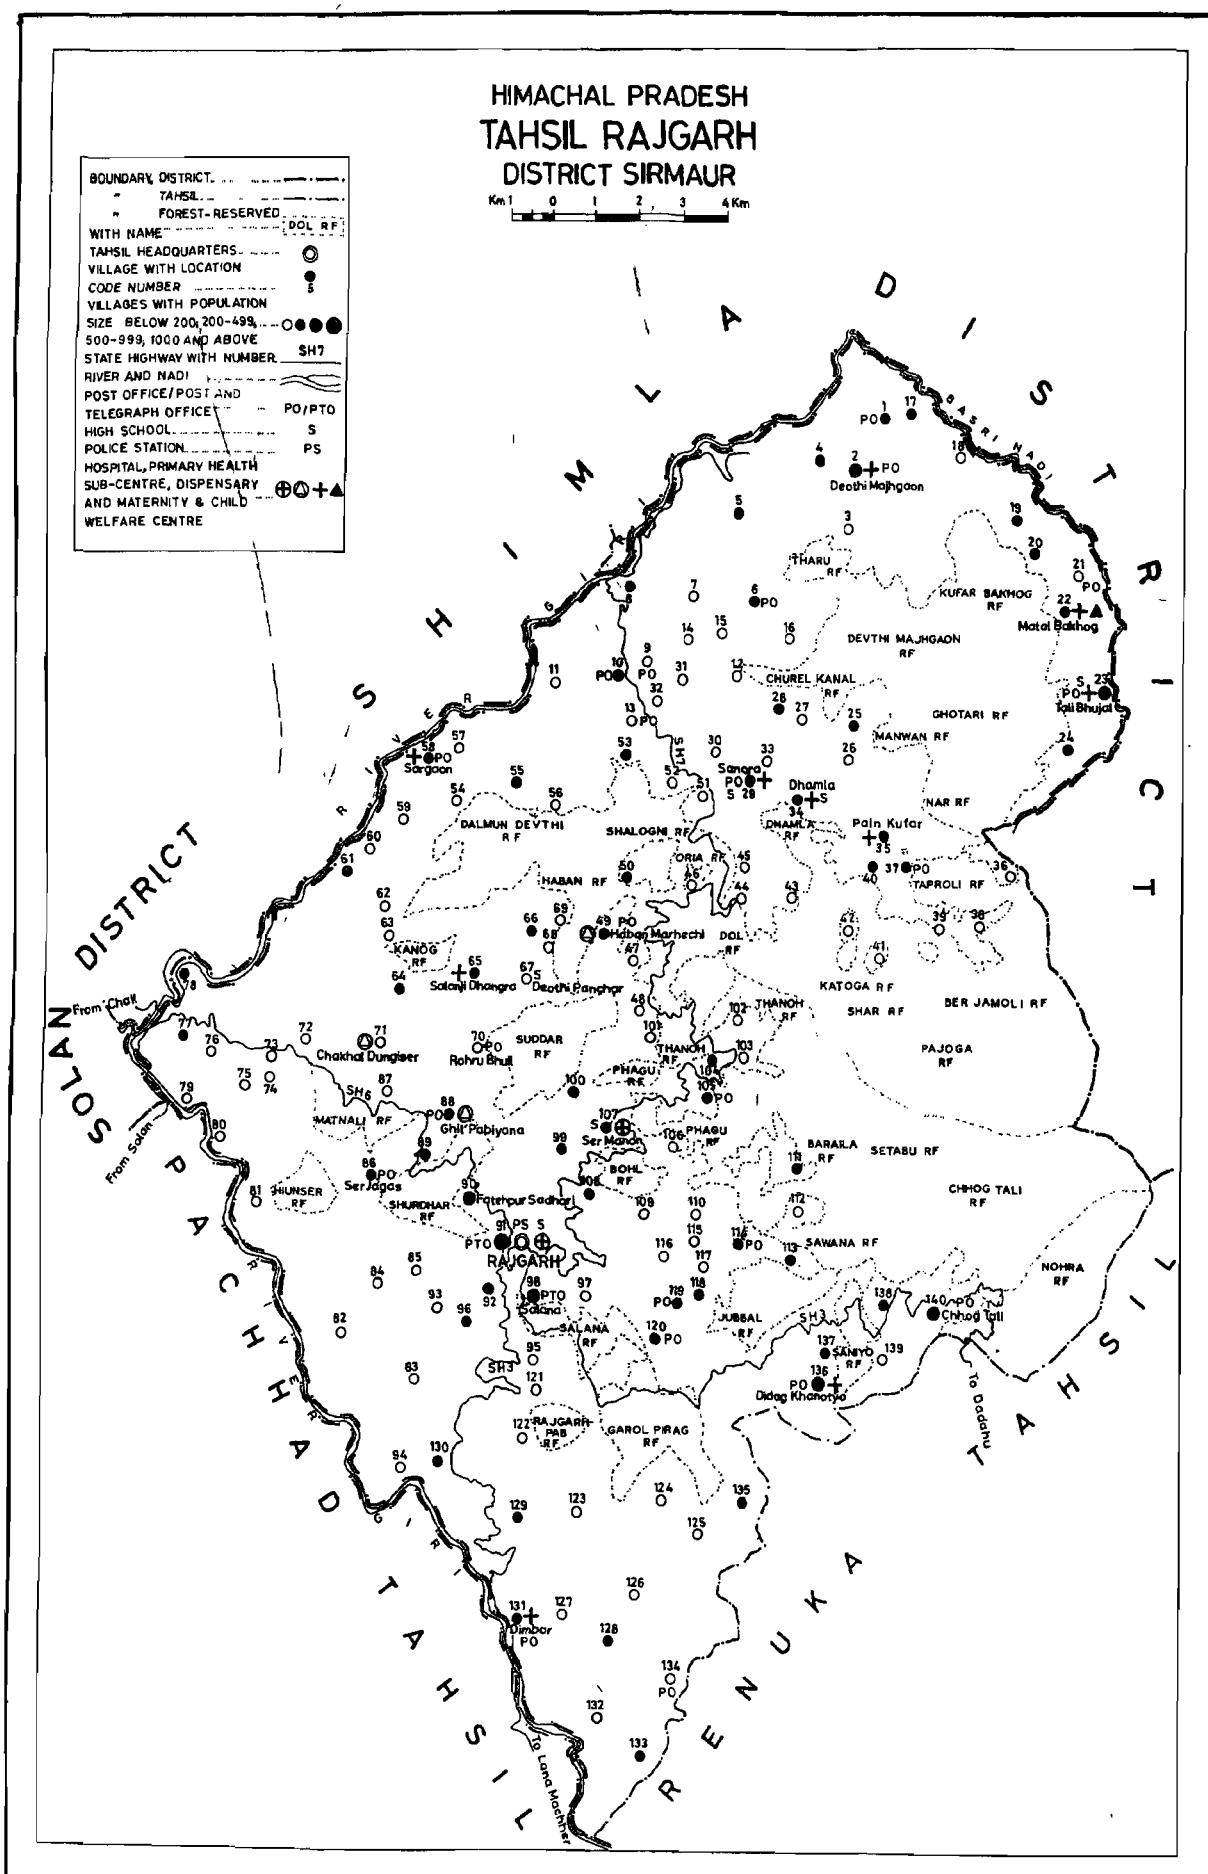

1. Government Kuhl/Canal	GC
2. Private Kuhl/Canal	PC
3. Well (without electricity)	W
4. Well (with electricity)	WE
5. Tubewell (without electricity)	TW
6. Tubewell (with electricity)	TWE
7. Tank	TK
8. River	R
9. Lake	L
10. Waterfall	Wf.
11. Others	O

Abbreviations used for the information collected in Part C of the Village Directory are explained below :—

1. Copies of newspapers coming in the village	N
2. Motorcycles/Scooters available in the village	M
3. Cars/Jeeps available in the village	C
4. Tractors available in the village	T

SECTION II—TOWN DIRECTORY

As already dealt in the preceding pages, the information about Town Directory is being presented in six statements each deling with a particular set of information in respect of all the urban areas of the district. In addition to these statements another statement IV-A depicting the data for the slum areas of the towns having a population of 50,000 or more has also been included. Certain improvisations have been carried out in comparison to 1971 Town Directory in most of the statements keeping in view the requirement of the data for various purposes and convenience for its analysis.

2. The statement I relates to status and growth of the towns since 1901 Census. This statement has been divided into two parts. The first from column 1 to 5 deals with the locational and area particulars, whereas columns 6 to 19 deal with the demographic particulars. The column 6 gives number of households including houseless households, whereas columns 7 to 15 give population of the towns since 1901. The columa 16 gives density of population per sq. km. as per 1981 Census. Columns 17 to 19 depict sex ratio in three Censuses since 1961 Census. In this statement class of the town, area in sq. kms. and number of households, density and sex ratio since 1961 are the new additions.

3. Statement II deals with the physical aspects and location of towns. Broadly, this statement can be divided into two parts, first dealing with rainfall and temperature data (columns 3—5) while, in the second part (column 6—12) name and distance from state headquarter, District headquarter, Sub-division/ tahsil headquarter, nearest city with a population one lakh and more, Railway Station, Bus route and Navigable river/canal (if within 10 kms) have been presented in respect of each town. In column 2, the class of the town has been added this time to facilitate the analysis.

4. The Rainfall data has been obtained from the Rainfall Table published by the Revenue Department and is based on the average of last 10 years from 1971 to 1979. Information for other columns have been obtained from the local bodies.

5. Statement III Relating to civic administration status and municipal finance for the year 1978-79 has been presented in this statement. In column 3, the civic administration status in 1980 has been given whereas in columns 4 to 10 income of the local body from various sources has been presented and in columns 11 to 17 expenditure on various items is given. These figures have been given in '00' with a view to save the printing space. The class of the town has been added in column 2. Information for this statement has been collected from the concerned local body.

6. Statement IV—The statement contains 19 columns. Columns 2 to 6 are the new additions of this statement. The statement on the one hand depicts general information about the towns like, class of the town, population, scheduled castes and scheduled tribes population and road length in Kms., on the other hand elicit information relating to system of sewerage, No. of different types of latrines, method of disposal of night-soil, protected water supply, availability of fire fighting service and number of electric connections of different types. System of sewerage and method of disposal of night soil are being presented upto two methods wherever available in order of importance and information on number of private latrines is based on estimates as no actual information was available with the local authorities. The categorization of electric connections is based on the record maintained by the Himachal Pradesh, Electricity Board. The source for this information, being the Public Works Department, local bodies and Himachal Pradesh Electricity Board.

7. Statement IV-A—Information relating to civic and other amenities in respect of slum areas of those towns where the population exceeds 50,000 has been presented. Shimla is the only town which falls under this categary. This information is required to be presented in respect of each slum seperately. The information relates to population of the slum, paved roads, system of sewerage, number of latrines, method of disposal of night soil, number of tap points/public tyrants and number of domestic connections, road lighting points and others. The main source for this information is the concerned local body. Since there is no such town in the district as such this statement has not been included here.

8. Statement V—In this statement information relating, medical facilities, educational facilities to recreational and cultural facilities has been presented. Broadly this statement can be divided into 4 parts. In part one, particulars relating to class and population has been given. Part two which contains column 4 and 5, relates to various types of medical facilities and number of beds in each type of medical institution. Column 6 to 15 deals with the various types of educational facilities available. Where these facilities were not available the distance from the nearest place where it is available has been given. It may also be mentioned here that in case of composite schools like Hr. Secondary Schools having high, middle and Primary Classes the same have been considered against each level. In column 15 the other includes institutions like Sanskrit institutions etc. The fourth part deals with the columns 17 to 20 wherein particulars relating to recreational and cultural facilities have been presented.

9. Columns 2 and 3 deal with class of town and columns 15 and 16 deal with Adult Literacy Centres and working women's hostel with number of seats are the new additions this time. Information for this statement has been collected from the Chief Medical Officer, District Education Officer, Industries department, Social welfare department and the respective local bodies.

10. Statement VI—The statement depicts information relating to three most important commodities imported, exported and manufactured, number of banks and number of agricultural and non-agricultural Credit Societies. All the columns of the 1971 Town Directory have been retained and column relating to class of the town has been added this time. The commodities have been mentioned in order of volume. Information for this statement has been primarily collected from the Industries Department, concerned banks, cooperative department and the concerned local body.

11. For determining the class of towns the population of each town during 1981 Census has been considered. The following are the ranges for determining the class of the town.

Population range	*Class*
1	2
Less then 5,000	VI
5,000-9,999	V
10,000-19,999	IV
20,000-49,999	III
50,000-99,999	II
1 Lakh and above	I

PART B—PRIMARY CENSUS ABSTRACT

Primary Census Abstract : In this part basic population figures in respect of each village in case of rural areas and for each block in case of urban areas have been presented in 28 columns for each tahsil/town separately. Information relating to persons seeking/ available for work is not being presented as contemplated earlier in columns 29 and 30 of this statement. In Census terminology this statement is called Primary Census Abstract.

2. This Abstract can broadly be divided into five parts. In the first part which contains first two columns, locational particulars in respect of each village/ block have been given. The first column relates to code number which has been assigned to each village within each tahsil in a particular geographical order and for each block within a town. In the second column, name of each village in English and Hindi, has been given alongwith its Hadbast Number. In urban areas, the block number has been given in this column.

3. The second part of the statement relates to the information pertaining to total area, number of occupied residential houses, number of households, sexwise distribution of population, sexwise population of Scheduled Castes/Tribes and literacy figures of each village and for each block in case of urban areas. In other words, this part primarily deals with demographic and social aspect. The 3rd column deals with the total area of the village in hectares as maintained in the village revenue records. For urban areas total area in sq. kms. down to ward has been presented. In column 4, total number of occupied residential houses have been presented. In this column information relating to vacant and other houses which are being used for non-residential purposes, has not been included. This information is based on Abridged Houselist of 1981 enumeration unlike such other particulars which are based on Houselist. Column 5 deals with the total number of households in the village/block. Columns 6—8 deals with the 1981 Census total and sexwise population figures of that village/block. These columns include houseless and institutional population also. In columns 9—12 sexwise population of Scheduled Castes and Scheduled Tribes have been presented. Columns 13—14 deals with sexwise literacy figures.

4. The fourth part from columns 15—26 deals with the working population. In columns 15—16 sexwise main workers have been given whereas from columns 17—24 information relating to these workers into 4 broad categories of workers by sex have been presented. These categories include workers engaged as cultivators, agricultural labourers, household industry and the remaining workers which fall under the industrial classification in category III, IV, V(b), VI to IX. It may be noted here that particulars about these categories of workers are not being presented in the Primary Census Abstract itself separately. In columns 25—26 sexwise particulars of marginal workers have been presented. These workers are other than the main workers and were engaged in economic pursuits for only some portion of the year. The definition of which has been given in the analytical portion of this book. This information is being presented in the Primary Census Abstract for the first time.

5. The fifth part deals with the persons who are economically inactive and are dependent on others. This information has been presented in columns 27 and 28.

6. The district abstract of this information has been presented first and thereafter data in respect of each tahsil has been presented by rural and urban components separately.
