PREFACE

The fertility tables of 1991 Census are mainly based on questions asked to all ever-married women They were asked about their age at marriage, number of children ever born alive and the number of children surviving. The currently married women were asked whether any child was born alive to them during last one year The fertility tables generated on computer provide distribution of currently married women by duration of marriage, age at marriage, religion, educational level, occupation and birth during last year by birth order. The ever-married women have been distributed by present age parity, religion, educational level, occupation, work status and cross classification on number of surviving children with their sex

2. In the 1991 Census 18 tables have been prepared on fertility All the tables are based on 10 per cent sample in the states with the population 10 million and above and on full count basis in the remaining States and Union Territories

3. These fertility tables have already been released on floppy disks usable on personal computer These are now being brought out in printed form This volume contains the tables for India The state and district level tables will be published in the state volumes

4. A general note on the fertility tables of 1991 Census which gives detailed information regarding presentation of tables, concepts used and the relevant questions along with the relevant extracts from the manual of instructions to enumerator is given for ready and comprehensive reference of the user

5. A separate fly-leaf is also given for each table regarding the contents of the table

6. The 1991 Census Operations were conducted under the overall guidance of my predecessor Shri A R Nanda The work of coding and editing of Individual Slip records were completed in the Directorates of Census Operations and the job of data entry was done in the fifteen Direct Data Entry Centres of this organization Thereafter editing and tabulation on computer was done in the Data Processing Division at the headquarters The dissemination of data on computer media and preparation of camera ready copy of the publications were also done in the Data Processing Division

7. The scrutiny of the computerised tables was done in the Demography Division The job of preparation of notes of this publication and arranging the printing of this publication was ably carried out under the overall supervision and guidance of Shri S P Sharma, DRG (C&T) The scrutiny of the quality of tables was done by a Task Force of officers of this office specially constituted for this purpose

8. I hope this publication will prove useful to administrators, demographers, research scholars and other data users

New Delhi
December 1997

Dr.M.Vijayanunni
Registrar General and Census Commissioner, India.

GENERAL NOTE ON THE FERTILITY TABLES

This volume contains F- Series (Fertility) tables These tables are based on 10 percent sample of Individual Slips for all the states except smaller states like Arunachal Pradesh, Goa, Himachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura and the union territories for which the tables have processed on full count basis In all the tables, except tables F-15 to F-18, Part A relates to Urban areas and Part B to Rural areas All the tables are at State level except tables F-15 to F-18 which are presented at the district level The titles of the tables presented in this Volume are as follow

Table F-1 (Part A&B)	Currently married women by duration of marriage, age at marriage and religion- Urban/Rural
Table F-2(Part A&B)	Currently married women by duration of marriage, age at marriage and educational level - Urban/Rural
Table F-3(Part A&B)	Currently married women by duration of marriage, age at marriage, work status and occupation - Urban/Rural
Table F-4(Part A&B)	Currently married women by present age, religion and births during last year by birth order - Urban/Rural
Table F-5(Part A&B)	Currently married women by present age, educational level and births during last year by birth order - Urban/Rural
Table F-6(Part A&B)	Currently married women by present age, work status, occupation and births during last year by birth order - Urban/Rural
Table F-7(Part A&B)	Ever married women by present age, parity, religion and total children ever born by sex - Urban/Rural
Table F-8(Part A&B)	Ever married women by present age, parity educational level and total children ever born by sex - Urban/Rural
Table F-9(Part A&B)	Ever married women by present age, parity, work status, occupation and total children ever born by sex - Urban/Rural
Table F-10(Part A&B)	Women by age group ever married women by present age, number of surviving children religion and total number of surviving children by sex - Urban/Rural
Table F-11(Part A&B)	Women by age group, ever married women by present age, number of surviving children, educational level and total number of surviving children by sex - Urban/Rural
Table F-12(Part A&B)	Women by age group ever married women by present age, number of surviving children, work status occupation and total number of surviving children by sex - Urban/Rural
Table F-13(Part A&B)	Number of women, number of ever married women, total children ever born and children surviving by sex to ever married women by age, religion and educational level - Urban/Rural
Table F-14(Part A&B)	Ever married women by number of children ever born number of male children ever born and number of children surviving by sex - Urban/Rural
Table F-15	Ever married women by age at marriage currently married women by age at marriage and duration of marriage
Table F-16	Currently married women by present age and births during last year by birth order

Table F-17	Ever married and currently married women by present age and parity and total number of children ever born by sex
Table F-18	Ever married and currently married women by present age, number of surviving children and total surviving children by sex.

The F-series tables in 1991 census are based on the following questions of the Individual Slip The data have been cross-classified by present age (recorded in completed years) age at marriage, marital status, religion, educational levels and occupation. The specimen of the Individual Slip is given in Appendix-I. The instructions to enumerators for recording the answers to concerned question of Fertility tables are given in Appendix-II. A note on sampling and estimation procedure adopted in 1991 census is given in Appendix -III.

Q.22 : For all ever married women only

(a) Age at marriage

(b) Number of children surviving at present

(c) Number of children ever born alive

Q.23 : For currently married women only

Any child born alive during last one year

APPENDIX-I

CENSUS OF INDIA 1991 INDIVIDUAL SLIP CONFIDENTIAL

Location Code.....( ) Sl. No. of Household [ ] Pad No.....
Code No. of Development Block..... Slip No.....

---

1 Name.....

2 Relationship to head.....
.....

3 Male (1)/Female (2).....

4 Age.....

5 Marital status.....

6 Mother tongue.....
.....

7 Two other languages known
.....
.....

8 Religion.....
.....

9 Whether S.C. (1) or S.T. (2).....

10 Name of Scheduled Caste/Tribe
.....

11 Literate(1)/Illiterate(2).....

12 Educational attainment.....
.....
.....

13 Attending school/college, Yes(1)/No(2)

14A Did you work any time at all last year? Yes / No(H/ST/D/R/B/I/O) .....
(including unpaid work on farm or in family enterprise)

14B If 'Yes' in 14A, did you work for major part of last year? Yes (1)/No(2)..... .....

15A Main activity last year? 'Yes' in 14B (C/AL/HHI/OW) / ' No' in 14B (H/ST/D/R/B/I/O) .....

If HHI/OW in 15A
(i) Name of establishment.....
(ii) Nature of industry, trade or service.....
.....
(iii) Description of work.....
(iv) Class of worker.....

15B 'Yes' in 14B—Any other work any time last year? Yes(C/AL/HHI/OW)/No
'No' in 14B—Work done any time last year? (C/AL/HHI/OW) .....
If HHI/OW in 15B
(i) Name of establishment.....
(ii) Nature of industry, trade or service.....
.....
(iii) Description of work.....
(iv) Class of worker.....

16A If 'No' in 14A, seeking/available for work ? Yes(1)/No(2).....

16B If 'Yes' in 16A, have you ever worked before ? Yes (1)/No(2).....

17A Whether you are an Ex-serviceman ? Yes(1)/No(2) ☐

17B If 'Yes' in 17A, Pensioner(1)/Non-Pensioner(2) ☐

18 Birth Place
- (a) Place of birth
- (b) Rural(1)/Urban(2) ☐
- (c) District .....
- (d) State/Country

19 Last residence
- (a) Place of last residence
- (b) Rural(1)/Urban(2) ☐
- (c) District .....
- (d) State/Country

20 Reasons for migration from place of last residence (Code)* ☐

21 Duration of residence at the village or town of enumeration ☐

22 For all ever married women only
- (a) Age at marriage ☐
- (b) Number of children surviving at present

  Male ☐ Female ☐ Total ☐
- (c) Number of children ever born alive

  Male ☐ Female ☐ Total ☐

23 For currently married women only
Any child born alive during last one year

Employment (1) | Business (2) | Education (3) | Family moved (4)

Marriage (5) | Natural calamities like drought, floods, etc. (6) | Others (7)

APPENDIX-II

INSTRUCTIONS TO ENUMERATORS FOR RECORDING THE ANSWERS TO THE CONCERNED QUESTIONS RELATING TO FERTILITY TABLES

Q. 3: Male (1)/Female (2)

For male, write `1' and for female write `2' in the box provided against this question. For eunuchs and hermaphrodites, write `1' in the box. Verify with reference to the name and relationship to head recorded under columns 2 and 3 respectively of the Household Schedule that you have noted the sex correctly.

Q. 4: Age

Record the age of the person in total years completed last birthday in the rectangle provided against this question. The age should be recorded in international numerals. Very often, there is a tendency on the part of individuals to return `years running' rather than `years completed'. Make sure that only the actual number of years completed is recorded. In respect of infants who might not have completed one year by the day of enumeration, their age in completed years must be shown as `0' as they have not yet completed one year of age. Make sure that infants even if one day old are invariably enumerated. You should not enter the age in months. The age of an infant who has not yet completed one year should invariably be noted as `0' only.

Q. 5: Marital Status

In answering this question use the following abbreviations:

For never married, write **`NM'**

For currently married, write **`M'**

For widowed, write **`W'**

For separated or divorced, write **`S'**

The entry is to be made in the manner indicated below:

(a) For a person who has never been married at any time before, write `NM'

(b) For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write `M'. Write `M' also for persons who are recognised by custom or society as married and for the persons in stable de facto union. Even if a marriage is disputed in the locality, write `M' if the person concerned says he or she is married or is in stable de facto union

(c) For a widowed person whose husband or wife is dead, and who has not been married again, write `W'

(d) For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been divorced either by decree of a law court or by an accepted social or religious custom but who has not re-married, write `S'.

(e) For an independent woman return her marital status as declared by her.

This question must be answered for all persons irrespective of age. For very young children, though we may know that they are not married, the appropriate abbreviation must be entered `M' is the abbreviation for `currently married'. The word `currently' does not mean `recently'. It only means `at

present' For example, a man may be 80 years old and may have been married 50 years ago, if his wife is still alive and the marriage subsists, they are `currently married'

The only conditions for the marital status to be reckoned as `currently married' are that the man and woman are both alive and that their marriage subsists i e , they are not divorced or separated Please note that we are not concerned with the legality of a union

The entry as above will have to be made on the line and not in the dotted box

Q.8: Religion

In answering this question, use the following abbreviations

For Hindus, write `H'

For Muslims, write `M'

For Christians, write `C'

For Sikhs, write `S'

For Buddhists, write `B'

For Jains, write `J'

For the others, record the actual religion as returned fully

If the person says that he has no religion the answer may be recorded accordingly Do not mistake religion for caste which will not be recorded here You should also not try to establish any relationship between religion and mother tongue Do not write anything in the dotted boxes, but write on the line

Q. 11: Literate (1)/Illiterate (2)

Definition of a literate: A person who can both read and write with understanding in any language is to be taken as literate A person who can merely read but cannot write, is not literate It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard

For a person who is literate, i e , who can both read and write with understanding in any language write 1' in the box provided against this question If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator ' s Instruction booklet (provided the person is familiar with the Language used in the booklet) and similarly, for writing, he/she should be able to write a simple letter Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent 's word has to be taken as correct Other members of the household may also be able to testify to the literacy of the person enumerated

For a person who is illiterate, i e , who can neither read nor write or can merely read but cannot write in any language, write `2' in the box against this question All children of the age of 6 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words

Q. 12: Educational Attainment

This question will be asked of only those who are literate and for whom 1' has been recorded against Question 11 For a person who is illiterate and for whom `2' has been recorded in the answer to Question 11, there is no question of ascertaining the educational attainment even if he/she had at some stage attended school and passed a standard and had relapsed into illiteracy In such a case you should

put a dash (—) We are insisting that a dash (—) should be put if there is no educational attainment and not a cross (X), because we want to avoid confusion with 10th standard which a cross may signify You will have to ascertain and record the highest educational level attained by a person for literate, i e , for whom `1' is recorded in answer to Question 11

For a person who is still studying in a particular class, the highest educational level attained by him/her will be one that he/she has actually passed and not the one in which he/she is studying For example, a person studying in Ist year B A should be recorded as only `PUC' or `Higher Secondary or Senior Secondary (10+2)' as the case may be. Similarly, for a person studying say, in the 4th year of M B B S , his/her educational attainment should be 3rd year of M B B S , which is the highest level he/she has actually attained You must record the actual standard passed such as, III standard, VIII standard, Ist year B Com etc , However, if a person merely says that he/she has passed primary, middle, matriculation, school final, higher secondary or senior secondary (10+2) or other definite levels, record him/her as such

The highest educational level attained by the person enumerated should be recorded When a person holds both general and technical qualifications, both of which are of equivalent level or of varying levels such as B Sc (Zoology) and M B B S or B A (Maths) and B E (Bachelor of Engineering), both the technical and general qualifications should be recorded against this question In the case of pass courses, indicate the degree only

In recording the educational level of a graduate or a post-graduate, the major subject such as B Sc (Maths), M A (Economics), M Sc (Botany), B Sc (Agriculture), etc should be noted You should not use abbreviations which are not in common use In such cases, the degree or diploma should be spelt out fully For example, M A (Hindi) and Diploma in Library Science or M A (Sociology) and Diploma in Labour Relations Adequate space has been provided in the slip and you are urged to record the qualification accurately and in sufficient detail This information is vital for manpower planning and should receive your careful attention

The Post-graduates and also those with a technical degree or technical diploma and those with certificates from the Industrial Training Institute(ITI) were asked during the census to fill 'Post-graduate degree holders' and 'technical personnel schedule' and filled in schedules were collected during revisional round between March 1 to 5, 1991 This information was readily available to ascertain information regarding educational attainment against question 12 of the Individual Slip While issuing the Post graduate degree holder and technical personnel schedule for each eligible person in the household, the location code was noted on the schedule and tick (✓) was put against question 12 of the person concerned for whom a post graduate degree holder and technical personnel schedule had been issued A statement was prepared giving the number of blank schedules received, number of schedules issued to eligible persons, number of filled in schedules collected and number of blank schedules returned by enumerator to his/her supervisor The persons have been identified with the help of tick (✓) against question 12 of the Individual slip of person concerned for whom a schedule had been issued The account of schedules issued to eligible persons was maintained During the revisional round between March 1 and 5, 1991 all the post graduate degree holder and technical personnel schedules issued to the member of the households, in the jurisdiction of enumerator were collected by him/her and handed over to the supervisor, while collecting these schedules a reverse stroke (\) was put on the tick (✓) against question 12 of the Individual concerned The marking appeared as (X) to signify that the filled in schedule in respect of that individual had been collected The Individual had been told that if he/she was unable to return it to the enumerator then he had to fold the form, paste and post it and no postage was required as this was paid by the addressee

Q. 13: Attending School/College, Yes(1)/No(2)

After you have recorded the answer to Question 12, you have further to ask whether the person whom you are enumerating is attending any school or college If the answer is `Yes ' you have to record `1' in the box provided against this question If the answer is `No', you should record `2' in the box Please note that illiterates (code 2 against Question 11) can be found attending school Therefore, this question should be asked of all persons, including elderly men and women

In recording answers to this question you are not required to ascertain whether the school/college being attended by the person enumerated is a recognised or unrecognised institution The choice should be left to the respondent as to whether the person is attending school/college Thus, if a person is receiving education through a correspondence course or attending some vocational course or attending

the Adult Education Programme and returns himself as attending school/college, he/she will be entered as such and code `1 ' will be recorded in the box against this question

ECONOMIC QUESTIONS

In the 1991 Census we intended collecting information regarding the economic activity of the people in great detail so that those who use these data have the type of information they want The economic questions consist of the following

I. **Q. 14A Did you work any time at all last year ?** **Yes** / **No(H/ST/D/R/B/I/O)**

(including unpaid work on farm or in family enterprise)

Q. 14B If `Yes' in 14A, did you work for major part of last year? Yes(1)/No(2)

II. **Q. 15A Main activity last year ?** **Yes' in 14B (C/AL/HHI/OW)** / **`No' in 14B (H/ST/D/R/B/I/O)**

Q. 15B **`Yes' in 14B—Any other work any time last year? Yes (C/AL/HHI/OW)/No** / **`No' in 14B—Work done any time last year? (C/AL/HHI/OW)**

III **Q. 16A If `No' in 14A, *seeking / available for work?*** **Yes (1) / No (2)**

Q. 16B If `Yes' in 16A, have you ever worked before? **Yes(1)/ No(2)**

These questions must be canvassed for every person irrespective of age or sex Every person must be asked Question 14A, including the very young or very old and the answer to this question must be filled in The other questions will have to be filled in the case of those to whom they are applicable The instructions for filling these questions follow

These questions are meant to get details of the work done by the people with reference to last year We may, therefore, first consider what is meant by work' and what the `reference period' is

Definition of work

Work may be defined as participation in any economically productive activity Such participation may be physical or mental in nature Work involves not only actual work but also effective supervision and direction of work It also includes unpaid work on farm or in family enterprise

Reference Period

In all the questions except Question 16B, the reference period is the one year preceding the date of enumeration Certain types of work such as agriculture, household industry like, *Gur* making, etc , are carried on either throughout the year or only during certain seasons or parts of the year, depending on the local circumstances In such cases what we are concerned with is the broad time-span of the agricultural seasons preceding the enumeration For Question 16B, the reference period is any time before one year preceding the date of enumeration

Explanation

There should be no confusion regarding these questions What we are trying to find out is the number of workers and non-workers and among the workers those who had worked for the major part of the year and those who did not worked for the major part of the year Details of their activity are also collected The number of non-workers seeking/available for work and those among them who had not worked before are also collected

Question 14A seeks to find out if a person has done any work at all (including unpaid work on farm or in family enterprise) during the last year or whether he or she did not work at all and if it is the latter, how the person spend his/her time as a non-worker Then Question 14B seeks to find out who among the persons returning `Yes' in Question 14A had worked for the major part of the year By major part of the year is meant 6 months(183 days) or more Those who had worked for the major part of the year are termed as `Main workers' Those who had not worked for the major part of the year i e , those who had worked for less than six months (183 days) in the year are termed as Marginal workers' Those who had worked for 6 months or more, will answer `Yes' for Question 14B For them code 1' has to be recorded in the box But those who have worked for less than six months or 183 days will say `No', and for them code `2' is to be recorded in the box for this question Question 15A seeks to elicit information on the activity of the main workers in Question 14B i e , those for whom code 1' has been recorded in the box It will also elicit information about the main activity of the `marginal workers' covered in Question 14B, i e , those who have returned `No' and for whom code `2' has been recorded in the box against Question 14B

A person may have worked for six months or 183 days or more in one or more than one activity If he/she has worked for 3 months in cultivation, one month in *Gur* making and 3 months as an agricultural labourer in Question 15A, he/she is required to indicate which of these three activities according to him/her was his/her main activity, i e in which capacity he/she spent more time In the instant case since the person has spent three months each in cultivation and as agricultural labourer the choice as to which of these two would be his/her activity should be left to him/her The other work or the secondary work he/she was engaged which has not been entered in Question 15A would be entered in Question 15B Those who have returned `No' for Question 14B, i e those who have worked for less than six months or 183 days during the last year and for whom code `2' has been recorded in the box, will have to state whether according to them, they were engaged mainly in household duties, or a student, or dependent or as retired person, rentier, or beggar or inmates of institutions, and if not in any of these categories, the person(s) should be put under `Others' in Question 15A

In Question 15B, details of secondary work or marginal work are sought to be obtained Those who have worked for the major part of the year i e , those for whom code `1' has been recorded in the box against Question 14B, may have had secondary work and this should be entered in Question 15B The secondary work will be cultivation if agricultural labour has been returned as main activity in Question 15A and vice-versa Those who have not worked for the major part of the year and for whom code 2' has been recorded in the box against Question 14B, must have done some marginal work and these details will be entered in Question 15B It is important that probing questions are asked to elicit correct information

In Question 16A, it is proposed to ask all persons returning `No' in question 14A, i e , H/ST/D/R/B/I/O in question 14A, whether he or she has been seeking work or is available for work Question 16B seeks to find out who among the Non-workers returning `Yes' in question 16A had ever worked or not before Those who had worked any time before will answer `Yes' for question 16B and for them code `1' has to be recorded in the box But those who had not worked any time before will say No' and for them code `2' is to be recorded The main purpose of this question is to elicit information regarding the fresh entrants in the labour market Those returning code `2' for this question will be the fresh entrants in the labour market

It will thus be seen that these questions on economic aspects have been so designed as to identify all the workers, main or marginal and non-workers with reference to the activities during the last one year prior to the date of enumeration It is very important to remember that the period referred to in Question 14A, 14B, 15A and 15B is one year preceding the enumeration Thus, if in some areas, a person has been a cultivator or an agricultural labourer, or has worked in an industry, etc , only in one season, i e , less than 6 months/183 days, he/she is not to be treated as a worker for Question 14B His/her economic activity will be reflected in Question 15B Thus, all those returning `Yes' in Question 14A must be netted as `Yes' in Question 14B or in Question 15B or both

Certain important points that need special emphasis are the following and these should be kept in mind

(i) A person who normally works but has been absent from work during the reference period on account of illness, holiday, temporary closure, strike, etc , must be treated as engaged in the work he/she would otherwise have been doing but for his/her temporary absence

(ii) Persons under training such as apprentices, with or without stipends or wages, should be treated as workers

(iii) A person who has merely been offered work but has not actually joined yet, should not be treated as engaged in this work

(iv) If a person is engaged in some economic activity but at the same time does also attend to some household chores or attends a school, etc , he or she would be treated basically as a worker

(v) A person, who merely receives an income, such as a rent receiver or a pensioner who does not have to work for receiving the income, will not be treated as economically active unless the person is also engaged for some part of the year in some economic activity Similarly, beggars, pensioners, receivers of agricultural or non-agricultural royalty or of rents or dividends who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade profession business or commerce

(vi) A person who engages himself/herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle for wages or selling firewood or making and selling cowdung cakes or selling grass etc , or any other work like cultivation, etc , he/she should be treated as working under Question 14A However, any person who is engaged only in household duties but doing no other productive work to augments the family's resources should not be considered as working for the purpose of this question

Important

Women are often classified as Non-workers because of non-reporting of their work It also happens that women who work for the major part of the year are reported as working for less than six months Special efforts were made for capturing women's work by asking probing Questions

(vii) A man or a woman may be producing or making something only for the domestic consumption of the household and not for sale Such a person is not a worker, even though from his or her point of view the activity is productive

(viii) For an undertrial prisoner enumerated in a jail, he/she should be recorded for the work he/she was doing before he/she was apprehended Similarly, for a person temporarily in a hospital or similar institution he/she should be recorded for the kind of work he/she was doing before he/she was admitted into hospital or institution But for convicts in a prison or for long-term inmates of penal or charitable or mental institutions, the persons' previous work should not be recorded, but I' should be recorded For census purposes, inmates of penal or charitable or mental institutions if detained for 6 months or more should be treated as long term and I' should be recorded for them

(ix) A public or social service worker who is engaged in public service activity or a political worker who is also engaged in furthering the political activity of his/her party will be recorded as a worker and entered accordingly Such persons will include members of Parliament, State Legislatures, Local authorities, etc

Each of the economic questions can now be considered in detail

Q 14A Did you work any time at all last year ? (including unpaid work on farm or in family enterprise)

Yes

No(H/ST/D/R/B/I/O)

This question is intended to divide the population into two broad streams on the basis of a liberal definition of work . The reference period is one year. This question is expected to net all workers irrespective of the amount of time they have spent on work. In other words, this question will find out the number of all workers which will include both main and marginal workers. Please note that unpaid workers in farms or in family enterprises and even workers whose contribution would otherwise be considered insignificant should also be covered. But the workers in this question will not include those who produce goods for the self consumption of the members of the household like persons collecting wood, preparing cowdung cakes, etc., for the domestic consumption. Thus the term 'unpaid worker' may not be confused with those who produce or make goods for domestic consumption. The latter category is to be taken as non-workers.

NOTE: Please note that persons who cultivate land to produce for domestic consumption only will be treated as workers.

The reference period is one year and this includes the agricultural seasons also. A person may have worked as a cultivator or as an agricultural labourer throughout the year or in some season such as only Kharif or Rabi or only for a few days. In all these cases this person has worked at some time in the year and the answer to this question should be 'Yes'. 'Yes' should be written on the line and not in the dotted boxes. One may have been a cultivator, an agricultural labourer, or engaged in a household industry or any other work. The definitions of these terms are given later, but the important point is that we are determining the fact that one has done some work some time during the last one year.

Obviously, probing questions will have to be asked specially in the case of those who are not regular workers. It is particularly important to ask such probing questions regarding the work done at any time last year or any of the seasons in the reference period in the case of women and children in the rural areas. Women and children in the rural areas work in the fields in the sowing, harvesting or other seasons and this may be on their own land or as labourers on someone else's land. Unless questions are asked about such work, the usual answer may be that they do not work.

It must be remembered that a man or a woman who is doing only household duties or making something only for domestic consumption (and not for sale) is not doing any work in census terminology. It is true that housewife may be working harder than the others in the home because she has to cook, look after the children, run the house, etc., but for the purposes of census, she is not a worker.

In this question every worker (even marginal workers) will be identified and in their cases the answer will be 'Yes'. You must enquire regarding each person whom you enumerate, whether he or she has worked any time at all during the last year. Even if the person has worked only for a few days, you have to record him/her as 'Yes', against this question.

Important

Before making any entry, make sure whether he or she is engaged even if only for a few days in a year in the following activities:

Work on the family farm; sale of home-made dairy products; rearing of poultry and sale of the products; sale of fruits, vegetables, etc.; sale of fish, making of cowdung cakes or collecting wood for fuel, fodder, grass and other forest produce and selling some of it; engaged in household industry such as weaving, spinning, bee-keeping, sericulture, tanning and making of leather products, pottery, leaf plate making, block printing, making cane-bamboo products, rope making, etc.; providing services on payment for others such as laundry, domestic work, hair cutting, tailoring etc., or working on piece rate for making agarbathies, match boxes, bidi rolling, assembly of various parts, making and selling of garments, pickles, papad, masala, jam, snacks and other food products. Take care to net informal activities in urban and rural areas, e.g., rag-picking, making of stationery items, sari-fall and beading, sale of foods or snacks for festivals, running beauty parlor or giving secretarial assistance in family enterprise, giving tuition, running music, dance, cookery, arts, crafts, etc.; classes at home.

If the individual has not worked at all during the last year, the answer will be 'No'. Then ascertain how he or she spent his or her time and record 'H' or 'ST' or 'D' or 'R' or 'B' or 'I' or 'O' as the case may be, below the line against this question.

In Question 14A, we are trying to find out whether a person has worked any time or has been a non-worker throughout If he or she is a non-worker throughout, the category has also to be ascertained which is as follows

(i)	Household duties	**H**
(ii)	Students	**ST**
(iii)	Dependents	**D**
(iv)	Retired persons or rentiers	**R**
(v)	Beggars, etc	**B**
(vi)	Inmates of institutions	**I**
(vii)	Other non-workers	**O**

Q. 14B: If `Yes' in 14A, did you work for major part of last year? Yes (1)/No(2)

As mentioned earlier, through Question 14A you have classified all people into two broad streams of workers and non-workers Workers would include all those who have worked irrespective of the quantum of their contribution to the economy

Having found out that the person had worked any time at all during the last year (Yes in 14A), you have now to ascertain whether the person worked for the major part of last year By major part of last year is meant that the person had worked for 6 months or more, or in other words worked for 183 days or more If the answer to this question is in the affirmative you should record `1' in the box against Question 14B If the person has worked for less than six months or 183 days during the last year, you should record 2' for that person in the box against Question 14B Cross (X) may be put in the box for those persons for whom `No' has been recorded against Question 14A

Important

Generally women and children who have actually worked for major part of the last year are recorded or reported as having worked for less than six months or 183 days You should, therefore, ask probing questions in this regard to elicit the correct information

A person may have worked in different capacities during last year For example, he/she may have worked as a daily wage labourer for 4 months, as an agricultural labourer for 1 month and as a cultivator for 2 months There could even be breaks in between the different types of work performed by him/her In computing whether the person worked for major part of the year, you should reckon all the three spells of economic activity and if it satisfies the concept of work for major part of the year, treat him/her as `Yes' for Question 14B and record `1' in the box Similarly if the total period of work falls short of six months or 183 days, treat him/her as `No' and record `2' in the box for that person

Q. 15A Main activity last year? **`Yes' in 14B (C/AL/HHI/OW)** / **`No' in 14B (H/ST/D/R/B/I/O)**

In Question 14B you would have ascertained whether a person had worked for major part of the year or not Now in Question 15A, you will be required to ascertain his or her main activity during last year That is to say how he or she engaged himself or herself mostly Main activity of a person who was engaged in more than one activity will be reckoned in terms of time disposition For example, if a person has worked as a daily wage labourer for 4 months, as an agricultural labourer for 1 month and as cultivator for 2 months and for him/her you have recorded 1' in the box against Question 14B then that person will be reckoned as daily wage labourer for Question 15A and you will record `OW' on the line (and not in the

boxes), since he/she spent more time in this activity than as a cultivator or as an agricultural labourer Similarly, for a person for whom you have recorded 2' in the box in Question 14B, you should ascertain how he or she spent his/her time mostly as a non-worker for the major part of the year and record the appropriate symbol below the line in the space provided and not in the boxes

The workers are classified into four categories, viz , cultivators, agricultural labourers, those engaged in household industry and other workers The symbols which should be used to indicate these categories are given below

(i)	Cultivators	**C**
(ii)	Agricultural Labourers	**AL**
(iii)	Workers in Household Industry	**HHI**
(iv)	Others Workers	**OW**

The definitions of the four categories of workers are given in the following paragraphs

Cultivator — C

For purposes of the census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money kind or share Cultivation includes supervision or direction of cultivation

A person who has given out his/her land to anotner person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as cultivator Similarly, a person working in another person's land for wages in cash or kind or a combination of both (agricultural labourer) will not be treated as cultivator in this question

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi etc , and other crops such as sugarcane, ground-nuts, tapioca, etc , and pulses, raw jute and kindred fiber crops, cotton, etc , and does not include fruit growing, vegetable growing or keeping orchards or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantations For a person who is a cultivator, write `C' above the line and not in the dotted boxes

Agricultural Labourer — AL

A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer He or she has no risk in the cultivation but he/she merely works on another person's land for wages An agricultural labourer has no right of lease or contract on land on which he/she works

For a person who returns his/her economic activity as agricultural labourer, write `AL' above the line and not in the dotted boxes

Important

For certain reasons, the growing of certain crops is not considered as agriculture If a person is engaged in the growing of such crops he or she will not be considered as a cultivator or agricultural labourer

You must remember that a person can be classified as a cultivator or as an agricultural labourer only on the basis of the crops grown The growing of the following crops is considered as cultivation

Therefore, a person who grows these crops or who works on land on which these crops are grown can be classified either as a cultivator or an agricultural labourer as the case may be

(i) **Cereal and millet crops:** Paddy, wheat, jowar, bajra, maize, ragi, barley, etc

(ii) **Pulses:** Arhar, gram, khesari, moong, masur, urd, etc

(iii) **Fibre crops:** Raw cotton, jute, mesta, sunhemp and kindred fibre crops

(iv) **Oil seeds:** Sesamum, ground-nut, rapeseed, mustard, linseed, castor, etc

(v) **Cash crops:** Sugarcane

The growing of the following crops will not be considered as cultivation

(i) **Plantation crops:** Tea, coffee, rubber, tobacco, pepper, cardamom etc

(ii) **Edible nuts (other than ground-nut):** Walnut, almond, cashewnut, etc

(iii) **Fruits:** Bananas, apples, grapes, mangoes, oranges, etc

(iv) Coconut

(v) Ganja, cinchona, opium and medicinal plants

(vi) Betel-nuts (areca)

(vii) Flowers

(viii) Roots and tubers, chillies and spices

(ix) Vegetables

(x) Other crops not included under cultivation

Please remember that you must use the abbreviations given in the instructions, namely, `C' or `AL' It will be evident that you will have to ask a specific question regarding the crops grown in all cases where one merely says he/she is a cultivator or an agricultural labourer

Workers in Household Industry — HHI

For a person who returns his/her main activity as engaged in some production, processing, servicing or repair articles or goods such as handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, bicycle repairing, blacksmithy, tailoring, etc , it has to be ascertained if it is a household industry, and if so, it should be indicated by the abbreviation `HHI' above the line and not in the dotted boxes

Household Industry is defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas The larger proportion of workers in a household industry should consist of members of the household including the head The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act

There may be an industry which is being run by a large joint family of more than 10 persons and where power is used or more than 20 persons where power is not used In such cases, though only family members are involved, this will not be treated as `HHI' Thus, the meaning of the term run on the scale of a registered factory' refers to such cases even if these are not registered as such

The main criterion of a Household Industry is the participation of one or more members of a household. This criterion will apply in urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the Household Industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered as a Household Industry. It should be located within the precincts of the house where the members live in the case of urban areas.

Household Industry should relate to production, processing, servicing, preparing or making and selling (but not merely selling) of goods. It does not include professions such as a Pleader, Doctor, Barber, Musician, Dancer, Waterman, Dhobi, Astrologer etc., or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Sometimes it is likely that the person who may not be working in his/her own Household Industry may be working in another Household Industry. You should, therefore, enquire whether the person who is not working in his/her own Household Industry is working in any other Household Industry and record as per instructions given above.

As mentioned earlier, Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. However, a household can be engaged in certain other activities collectively but these may not qualify for being considered as Household Industries.

Certain activities even though conducted by members of the same household will not constitute a Household Industry. These are indicated below and therefore the members of the family working in such industries will be classified as 'OW' and not 'HHI'.

(i) Plantation work.

(ii) Livestock maintenance and production such as cattle, goats, sheep breeding, poultry farms, bee-keeping, rearing of silk worm and production of cocoons and raw silk, production of milk, eggs, honey, wax, bones, etc.

(iii) Hunting, trapping and selling of the catch

(iv) Forestry and logging: log, fuel, charcoal production, gathering and selling of fodder and other forest produce, etc

(v) Fishing including rearing of fish, collection of pearls, shells, sea products, etc.

(vi) Mining and quarrying.

In our country Household Industry is a very important part of our economy. We must get accurate data regarding those engaged in 'HHI'. You must carefully read these instructions and understand them. The main points are again indicated below.

'HHI' stands for worker in Household Industry. The main characteristics of the Household Industry are the following

(a) One or more members of the household must participate. Participation by hired labour must be minimum

(b) The activity should relate to some production, processing, servicing, repairing or making and selling of goods.

(c) The goods produced should not be for consumption by the household itself but should be wholly or partly for sale

(d) In an urban area the industry must be carried on in the precincts of the house in which the household lives. In the rural areas, the industry may be carried on anywhere within the limits of the village.

(e) The activity should not be on the scale of a Registered Factory.

(f) Professions such as those practiced by Pleader, Doctor, Barber, Musician, Dancer, Dhobi, Astrologer, etc., will not be 'HHI'.

Other Workers — OW

All workers, i.e., those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or in Household Industry, are 'Other Workers'- 'OW'. The type of workers that come under this category of 'OW' include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc. In effect, all those who work in any field of economic activity other than cultivator, agricultural labourer or household industry, are 'Other Workers'. They will be entered as 'OW'.

You will recall that it was mentioned that the growing of certain crops is not agriculture. Those engaged in this activity would have to be classified as 'OW'.

FERTILITY

Q.22: For all ever-married women only

This question will be asked in the case of all ever-married women. It will not be asked for a woman who has never been married. Please note that the term 'Ever-married' does not necessarily mean 'Currently married'. The 'Ever- married' would include all women who may be currently married, the widowed, the separated and the divorced. This question, in other words, will be asked of all women except those who are 'Never Married'. For all women for whom 'M' or 'W' or 'S' is entered in Question 5 of the Slip, this question will be asked. In the case of women who are 'NM' in Question 5 of the Individual Slip, put cross (X) in the boxes in all parts of this question.

Q.22 (a): Age at marriage

You should ascertain the age at which the woman, whom you are enumerating, was married and record that age in completed years. If a woman has been married more than once, the age at which she got married for the first time should be recorded.

Q.22 (b): Number of children surviving at present

In this question, You will have to find out how many of the children born are still surviving, i.e., at the time of enumeration.

Please note that the children need not necessarily be staying with the mother i.e., the woman you are enumerating. They may be elsewhere due to any reason. What is important is whether they are alive, not where they live. They may be any where, even outside the country. The important point is the number alive.

Having ascertained this number, enter the details by sex and total in the boxes provided.

If there are no male or female children surviving at the time of enumeration, write '0' in the appropriate box or boxes

Q.22(c): Number of children ever born alive

You should ascertain the total number of children that the woman you are enumerating gave birth to from the time she got married If married, more than once, all the children born to her should be ascertained.

The number of children born would include all children born alive, even if later unfortunately any child died. Many persons, specially older people may only count children living with them. It is, therefore, essential to enquire about the number of children living at home, those living elsewhere and also those who were born alive but who are unfortunately not alive now. Even if the child died within a few hours of his/her birth, he/she should be included in the count. Still births, i.e., children born dead should not be included in counting this number of children ever born. You will have to ask politely but appropriate questions for getting this information.

You should ensure that all live births are ascertained irrespective of whether the children are alive now.

It is our experience that the birth of a child may not be reported readily if the child is not actually living at the time of enumeration. The children who are born but may have died before the enumeration may not be indicated by the respondent unless you make detailed esquires. This would be particularly true in the case of children who may have died as infants. There is, therefore, need for a detailed probe to ensure that you get the correct number.

Ascertain the number of children ever born alive by sex and write the figures in international numerals in the boxes provided. Also give the total in the box provided.

If the woman reports that she has had no male or female children born alive, write `0' in the appropriate box or boxes.

Q.23: For currently married women only

This question has to be answered in respect of all currently married women only, i.e., all women whose marital status is shown as `M' against Question 5 of the Slip. For all others, a cross (X) may be put against this question on the line.

Any child born alive during last one year

You should ascertain if the currently married woman, whom you are enumerating, gave birth to a child in the last one year prior to the date of enumeration. If the respondent is not able to reckon one year, you can find out if a child was born alive in 1990-91 to the woman you are enumerating on or after any of the festival indicated to you by the Director of Census Operations. Only if the child was born alive; and even if the child had died soon after birth, the answer should be `Yes', to this question. Still birth, i.e , a child which is born dead should not be taken into account for this purpose. So while you should make sure that every case of birth of a child born alive, even if it is not alive on the date of enumeration, is reported, you should not reckon it if the child was born lifeless.

It is common experience that the birth of the child may not be reported readily if the child is not actually surviving at the time of enumeration. Infant deaths are still high in the country. There is a chance of a number of such cases being missed unless specifically questioned about. It is necessary to record all live births even if the child has died soon thereafter or had not survived to the day of enumeration. Therefore, where the initial answer to this question is `No', you should ask a specific question if there has been a case of a child having been born alive in the last one year and later dying before the enumeration date. This is a delicate question and should be asked with tact in a manner not to offend the sentiments of the respondent. Where a currently married woman first answers that she had no child born in the last one year, you may perhaps question her as follows:

"It has been found in some houses that a child was born and had died soon after or a few days or months later and such cases had not been reported. It is my hope that there are no such cases here. Am I right?"

This may bring in the required response. If she reports `No' then you can be sure that no birth has been missed. You have to make sure that any live birth that has occurred to the currently married woman in the last one year is netted whether the child is surviving till the date of enumeration or not. A similar probe to eliminate still births may also be necessary. For example, when the answer is `Yes', under this question, you might ask if the child is here in the house. If the answer is `Yes', no further question is needed. If `No', you might ask where the child has gone. The answer may be `dead' or that he/she has gone elsewhere. If dead, then you might ask when the child died and this will bring out the fact whether or

not it was a still birth. If the answer is 'Yes', then enter 'Yes' in the space below the question; if the answer is 'No' enter 'No' in the space. Do not write in the dotted box.

In a case where the woman has had twins or multiple births, please write 2,3, etc., next to 'Yes' as the case may be thus 'Yes' (2) or 'Yes' (3).

NOTE : You may find on your revisional round from March 1 to March 5, 1991 a child is born to a currently married woman in a household after your last visit but before the sunrise of March 1, 1991. You will have to take this into account and correct the answers against Question 23 accordingly. You must enquire specifically, if any such birth has taken place. While ignoring still births all other births where the child was born alive even if it did not survive long should be taken into account.

IMPORTANT

1. The 1991 census could not be conducted in 33 villages of Akrani and Akkalkuwa tahsils of Dhule district in Maharashtra state, which form part of the area falling under Sardar Sarovar Project due to an agitation against the project. Therefore, the figures presented in this volume do not include the data in respect of these 33 villages.

2. The figures for literates and age group 0-6 in respect of Greater Bombay district of Maharashtra State have been revised subsequent to their publication in the Primary Census Abstract and therefore, the figures presented in this volume differ from the figures published for Greater Bombay District, Maharashtra State and India in the Primary Census Abstract.

APPENDIX - III

A NOTE ON SAMPLING AND ESTIMATION PROCEDURE ADOPTED IN 1991 CENSUS

In the 1991Census Sampling was adopted for preparing certain tables based on the Individual Slips. A 10 per cent sample of Individual Slips was used in all states with a population of 10 million and above i.e., Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. In all other states and union territories the tabulation has been done without resorting to sampling. The sample slips were selected linear systematically in each enumeration block with a random start. The detailed instructions issued for sampling are reproduced below.

INSTRUCTIONS FOR SELECTION OF A 10 PER CENT SAMPLE OF INDIVIDUAL SLIPS

General Instructions to Deputy Directors/ Assistant Directors/Officers in charge of the Edit and Coding Cells where sample is to be drawn.

A 10 per cent sample of Individual Slips is to be drawn for the purpose of tabulation. The sampling fraction will be same for both rural and urban areas. The sample would be drawn separately from each Enumeration Block. For this purpose separate random numbers for each Enumeration Block to be used as random start for sample selection would be assigned.

2. The process of sample selection would be carried out by one or more teams constituting of Statistical Assistants, Supervisors and Samplers/ Checkers. A team will consist of one Statistical Assistant, 3 Supervisors and 9 Samplers/Checkers. Each team will have to perform two essential tasks. The first will be the physical checking of the number of filled in slips in each Enumeration Block, pad wise and filling up the identification particulars and the relevant columns of the Control Sheet (Annexure II). The second would be the assigning of the random number for each block and selection of the sample. It would be essential to assign the work relating to these items to specific Supervisors/Checkers/Samplers.

3. The records should be handled charge by charge. It should be noted that the procedure for sample selection will not involve handling of Household Schedules and other records Only Individual Slip pads will be used for sample selection.

4. The instructions for the Statistical Assistant, Supervisor and Checker/Sampler should be explained to these levels in training classes. Normally one day training would be enough. Please ensure that the training is intensive. You should also make sure that the persons have understood the instructions thoroughly. A close supervision during the first few days is essential to ensure that the team understands the procedure well.

5. Before the sampling starts, you should ensure that sufficient number of Control Sheets for Sampling - Enumeration Block level (Annexure-II) are available with the Supervisors, Checkers/Samplers. You will also have to provide sufficient number of rubber stamps to mark (1). Once the sample is picked, the selected sample slips have to be edited, coded and sent for data processing, with suitable identifications.

6. You will notice that every Enumeration Block has to be assigned a Random Start for the purpose of sample selection and this Random Start has to be incorporated in the Control Sheet for Sampling-Charge level before the records go to the concerned Sampler. Please note that the Random Start will be a number between 1 and 10.

7. When records are issued to the Statistical Assistant they should be checked with the inventory for their completeness. If any bundle is by chance not issued the Sampling may not be undertaken in the Enumeration Block(s) in that bundle.

8. The Sampler would have to identify each sampled Individual Slip. The checker after thorough checking will have to affix the Stamp (I) on each such slip at the place indicated in these instructions later. You should ensure that sufficient number of such stamps are available. Since, in the first stage only the sampled slips would have to be edited, coded and keyed in, on the cover page of each pad against the

entry Stage-I, the total number of sample slips in that pad should be recorded by the Checker You should ensure that this is done without fail so that data entry proceeds without any difficulty

Instructions to Statistical Assistant

Since a number of tables based on Individual Slips of the 1991 Census will be prepared on a 10 per cent sample, it is necessary that the sample is selected correctly As the head of a team which is doing the sample selection you are having a great responsibility It is necessary for you to ensure that the sample is selected as per the instructions and all the checks as mentioned have been carried out before the records leave your section for further processing

2 You will be heading a team of 3 Supervisors and 9 Checkers/Samplers Each Supervisor will normally have 3 Checkers/Samplers under him This team will be responsible for selecting the sample, stamping the sampled slips for easy identification at data entry stage and filling up the Control Sheets

3 You should read these instructions very carefully and understand them thoroughly You should also be familiar with the instructions to the Supervisors, Checkers/Samplers before you start your work If at any stage you have any doubt or if your Supervisors, Checkers/Samplers consult you on any point which you are unable to solve then you should immediately consult your Investigator/Assistant Director/Deputy Director for instructions Your basic duties will be the following -

(i) Receiving records from the record room of the charge assigned to you

(ii) Distributing these records in the manner prescribed to the units under you for sampling and checking,

(iii) Assigning the Random Start for each Enumeration Block,

(iv) Carrying out test checks for sampling, and

(v) Returning the records to the record room after the sampling is over in the same manner in which you got them

4 Before you start your work you should have sufficient number of blank Control Sheet Forms, rubber stamps, ink pads and some blank forms of the Index Slips for Enumeration Blocks as well as bundles to be used in case the original Index Slip has been mutilated You will be handling the following records

(i) The bundles of Individual Slip pads of the charge assigned to you

(ii) The list of Enumeration Blocks which will be given along with the charge records

(iii) The Control Sheets for Sampling Charge Level for assigning the Random Start to each block

5 You should ensure that you have received the records of all relevant Enumeration Blocks for the charge You may check this with the list of Enumeration Blocks provided to you

6 You should issue a few bundles at a time to one Supervisor The inventory should be kept with you One bundle may contain the records of one or more Enumeration Blocks You should ensure that the Supervisor issues only one bundle at a time to a Sampler You should also make sure that the Supervisor fills up the location particulars and the Random Start in the Control Sheet for Sampling-Enumeration Block level for each of the Enumeration Blocks contained in the bundle before issuing the bundle to the Sampler

7 You will also maintain Control Sheets for Sampling-Charge Level The format of this Control Sheet is given in the Annexure 1 After you receive the records for a charge, fill up the first and second columns of this Control Sheet The second column of the Control Sheet contains the Random Start for each Enumeration Block to be allotted by you This may be filled up as described in the next paragraph While handing over the records of the bundle to the Sampler you should also give him the Random Start for the Enumeration Blocks contained in that bundle

8 From the random number table you should select a Random Start between 0 and 9 for sample selection for each block For this purpose you may select any particular row or column of the table Select a single digit random number for the first Enumeration Block of the charge This number will be a number between 0 and 9 (both inclusive) The number zero will stand for Random Start 10 Write the number in column 2 Whenever you get a random number zero, write 10 in column 2 Thereafter you may allot random starts for the next and subsequent Enumeration Blocks sequentially from the first random number selected in the random number table

9 You should supply adequate number of Control Sheets for Sampling- Enumeration Block Level to the Samplers and ensure that the identification particulars of the Enumeration Blocks are properly filled in the Control Sheet

10 While sampling is in progress you should supervise the work closely and ensure that the instructions are carried out properly by the Supervisors, Checkers/Samplers working under you

11 If a Supervisor informs you about any pad of Individual Slip not having pad number then you have to assign a pad number to that pad For this purpose you may assign the pad number as 99001 as the pad number for the first such pad in that charge Pad numbers may be assigned sequentially within the charge to any other pad which does not have pad number

12 When you get back the records after the sampling operations are over, you should carry out arithmetical checks and satisfy yourself that the sample has been drawn properly You should also fill up the relevant columns of the Control Sheet for Sampling- Charge level

13 After you have received all the records pertaining to all Enumeration Blocks of the charge and carried out the necessary checks you should return the records to the record room You should also complete the Control Sheet for Sampling- Charge level at this point

14 You should inform the record keeper well in advance as to when you are likely to complete the charge so that records of fresh charge may be issued to you This will ensure regular flow of work and no time will be unnecessarily lost in getting the records You should take care to see that the records of one charge do not get mixed up with those of another

15 It is possible that during the handling, the Index Slip pasted or kept on the first pad of the Enumeration Block may get mutilated In such a case you should ensure that a fresh Index Slip is written up and pasted at proper place

Instructions to Supervisor

One Supervisor will be in charge of the work of 3 Checkers/Samplers Initially all the persons working under a Supervisor may be assigned the work of sampling After the work of sampling has been completed for a sufficient number of Enumeration Blocks one or two of the Checkers may be assigned the job of checking the sample selection In this way it may be ensured that the Checker does not remain idle for want of work

2 You will be receiving a few bundles of Individual Slip pads at a time One bundle will sometimes contain the records for more than one Enumeration Block You should issue only one bundle at a time to a Sampler You should fill up the location particulars on the top of the Control Sheets for Sampling - Enumeration Block level for each of the Enumeration Blocks in the bundle and copy of the Random Start from the Control Sheet-Charge level available with the Statistical Assistant These sheets should be issued along with the bundle to the sampler

3 You should go through the instructions to the Samplers and Checkers and ensure that the work is being done according to instructions You should take care to see that a Checker or a Sampler is dealing with only one Enumeration Block at a time You should also assist the Statistical Assistant in the record management During sampling operations if the Sampler reports that the pad does not have a pad number then you will have to consult the Statistical Assistant to assign a pad number The work of the Checkers and Samplers should be thoroughly checked at every stage This involves the following steps

(a) Before starting the sampling, check

(i) Whether the location code particulars given at the top of the Control Sheet for Sampling Enumeration Block Level tally with those in Index Slip of the concerned Enumeration Block;

(ii) Whether all the Individual Slip pads as per the Index Slip are available in the bundle; &

(iii) Whether the pad number has been entered in the pads properly

(b) After the sample selection has been completed in an Enumeration Block you must check the following

(i) The entries in columns 4, 5 and 6 of each line of the Control Sheet for Sampling - Enumeration Block level;

(ii) Whether the total number of sample slips in the pad and the serial number of the selected sample slips have been entered on the cover page of each pad against the entry(1).

(iii) The total number of sample slips in an Enumeration Block as given in the total of column 4 should be equal to either (total of column 3)/10 or the (total of column 3/10)+1 ignoring the remainder in both the cases. This checking should be done for each of the Enumeration Block and wherever there are errors the sampling should be got re-done. In such cases the stamps put on the wrongly sampled slips should be crossed out in red ink;

(iv) The column 4 of each line of the Control Sheet for Sampling--Enumeration Block level must be checked in a similar way; and

(v) You should check whether all the sample slips have been stamped and check the number of sampled slip by actual counting of the stamped slips;

4. After carrying out all the checks and ensuring that every thing is in order you should hand-over the records and Control Sheets to the Statistical Assistant.

Instructions to Checker

Your duties are to check the sampling done by the Sampler and to stamp on the sampled slips for identification. You should read and understand the instructions to the Sampler. When the sampling is over the Sampler will hand over to you the bundle of Individual Slip pads with its Index Slip and Control Sheets for each enumeration block listed in the list of enumeration blocks.

2. You should check the following in the order given below:

(i) You should check whether all the pads as per the Index Slip have been entered in the Control Sheet for Sampling-Enumeration Block level and whether the total number of valid slips entered in the cover page of each pad tallies with what is entered in the Control Sheet for Sampling -- Enumeration Block level. In case of discrepancies corrections must be made after counting the slips again.

(ii) Take the first pad of the block. Count the number of valid slips from the beginning to the first slip (including it) that has been selected by the Sampler. This slip would have been folded now. This number should be equal to the random start assigned to the block. If the Sampler has counted properly affix Stamp(1) on the right hand bottom corner of the Individual Slip. Then count the number of valid slips between the first sampled slip and the second sampled slip (excluding both the folded slips). The number should be equal to 9. If the sample slip has been identified properly affix Stamp (1) on the right hand bottom corner of each sampled slip. Similarly check the number of valid slips between the second sampled slip and the third sampled slip and so on till you reach the last sampled slip of the pad. While doing this you should also ensure that the sampled slips are also valid filled in slips. When you have reached the last sampled slip of the pad count the number of valid

filled in slips left after the last sampled slip. This number should be equal to the number entered in column 5 of the "Control Sheet for Sampling -Enumeration Block Level" against this pad. This number should never be above 10. Repeat these checks for each pad of that block.

(iii) The procedure for sample selection suggested is simple and straight forward. Normally there should be no mistakes. However, if you find that Sampler has not counted the slips properly, either at the starting point or subsequently, you should correct it. The "Control Sheet for Sampling-Enumeration Block Level" must also be corrected. The rubber stamp (1)Should be affixed only after ensuring the accuracy of sample selection.

(iv) Count the number of folded slips in each pad and ensure that the entries made in the "Control Sheet for Sampling-Enumeration Block Level" are correct. You should also enter the number of sampled slips in each pad on the cover page of the pad against the item "(1)_____". In case this is not printed on the cover page then you should write at the left hand bottom corner of the cover page the following:

Number of slips stamped

Stage 1:_____

Stage 2:_____

Stage 3:_____

Then enter the number of sampled slips in that pad against the entry (1).

(v) After entering the number of selected slips write the serial numbers of the selected slips of that pad in brackets on the same line.

3. If at any stage you find that some mistakes have occurred then do not fail to make necessary corrections in the Control Sheet for Sampling-Enumeration Block level After all the Enumeration Blocks in one bundle are checked you should hand over the records to your Supervisor

Instructions to Sampler

Selection of 10 per cent systematic sample of Individual Slips within each Enumeration Block will be done by the Sampler. Unfilled or cancelled slips should be ignored while selecting sample. Only valid filled in Individual Slips will be taken into consideration.

2. Before starting sample selection, you must be in possession of the following documents.

(i) Bundle containing pads of filled in Individual Slips This bundle may contain the records for one or more Enumeration Blocks depending on the size of the Enumeration Block. The bundle will have an Index Slip which will tell you about the Enumeration Blocks, the records of which are present in that bundle.

(ii) A control sheet for Sampling-Enumeration Block level form for each Enumeration Block of that bundle with the location particulars and the Random Start already filled in.

3. After receiving the above documents you must do the following

(a) Check whether all the pads in the Enumeration Block have a pad number. If a pad does not have a pad number, bring it to the notice of your Supervisor who will give a number to it after consulting the Statistical Assistant This pad number must be written by you on the pad cover and all the slips in that pad.

(b) If, by any chance, a pad does not have a cover page, you must stick a piece of paper to the first slip of that pad at the top edge and write the location particulars and pad number

(c) Check whether the Individual Slip pads for all the Enumeration Blocks included in this bundle are available by comparing Index Slip for the Enumeration Block kept with the records for each block Take care that the pads of Individual Slips of one Enumeration Block do not mix with those of another

4 If some discrepancies are observed while checking the above points, you must bring these to the notice of the Supervisor and get them corrected before proceeding further

Procedure for sample selection and filling up Control Sheet for Sampling- Enumeration Block Level

5 The Control Sheet for Sampling - Enumeration Block Level plays a vital role in accurate sample selection This should, therefore, be filled in with great care Separate Control Sheet for Sampling - Enumeration Block level should be used for each Enumeration Block

Step 1: (Columns 1, 2 and 3 of the Control Sheet for Sampling- Enumeration Block level) Open the bundle of the filled in Individual Slip pads and with the help of location code make sure that all the pads belong to same Enumeration Block Arrange the pads in ascending order with the help of "Pad No " given on the top right of the cover page Take pads one by one and make the entries in columns 1, 2 and 3 Before making entries in columns 2 and 3 of Control Sheet please ensure that the entries made on cover page of each pad are correct and Individual Slip have been properly scrutinized and edited If the Individual Slips in the pad have not been edited while preparing the Primary Census Abstract in Regional Tabulation Office please consult your Supervisor In edited slips industrial category would have been written in Roman numerals on the left side of Q 15A and in case of slips relating to Scheduled Caste/Scheduled Tribe persons Stamp (3) would have been affixed Make a total of column 3 of Control Sheet and tally it with the corresponding entry in Index Slip If it is not tallying consult your Supervisor before going ahead

Step 2: (columns 4, 5 and 6) Take the first pad and select the first sample slip of the Enumeration Block with the help of Random Start given on the top right of the Control Sheet The Random Start will be in the range 1 and 10 (both inclusive) If Random Start is 7 then the first sample slip will be 7th valid filled in slip of the first pad If the Random Start is 10, then the first sample slip will be the 10th valid filled in slip of the first pad Fold this slip upwards so that edges of the slip do not stick out of the pad so that the sample slip selected by you is easily identified by the Checker Thereafter select every tenth valid filled in slip and fold it If the Random Start is 7, then the folded slips would be 7th, 17th, 27th etc (excluding the cancelled and unfilled slips that may occur in between) The sample selection from this pad will stop when less than 10 valid filled in slips are left Now count the number of slips that you have folded and enter this number in column 4 of the Control Sheet for Sampling Enumeration Block level against the concerned pad number

Count the number of filled in slips left over at the end of the pad, after the last folded slip This should lie between 0 and 9 (both inclusive) Enter this number in column 5

Entry in column 6 of the Control Sheet for Sampling Enumeration Block Level identifies the starting slip for the next pad If, for example, two slips are left over in the first pad after the last sample slip folded, you will continue sample selection from the 8th slip (10-2) of the next pad The number 8, i e (10-2) will be entered in column 6 of the block level Control Sheet for Sampling Enumeration Block level as well as on the front cover page of the next pad

6 Continue sample selection from all the pads of the Enumeration Block in the above manner Please note that the pads must be taken up by you in the same order in which they have been entered in column 2 of the Control Sheet The entries in columns 4 to 6 will have to be carefully made on the line against the pad you are dealing with

7. Even if in a pad there are less than 10 valid filled in slips, you must consider such a pad for sample selection. For example, if in pad No. 1508 of Enumeration Block No. 91, after sample selection, **four slips are left over**, you would have entered 4 in column 5 and 6 **in column 6**, against pad No. 1508. This indicates that the first slip to be selected in the next pad i.e . , pad No. 1509 is 6. If in pad No. 1509 you find 6 or more slips you will obviously select the 6th slip. If, however, in pad No. 1509 you find only two filled in slips you will not be able to select any sample in this pad, but the particulars of pad No. 1509 must be entered against this pad number in the Control Sheet. You will enter in column 3 of the entry corresponding to pad No. 1509 the number 2, the total number of filled in slips in that pad. In column 4, you will enter 0 because no slip has been selected as a sample. In column 5, you will enter 6, which will be the number of slips left over after the last sampled slip. This number actually consists of the four slips left over in pad No. 1508 and the two slips which are the only ones found in pad No. 1509. The starting point for the next pad, i.e. pad No. 1510 of this Enumeration Block would be 4 which is (10-6) in this case. This type of situation would be an extremely rare one as normally only the last pad in an Enumeration Block would have less than 10 valid filled in slips. The procedure in such rare cases must be noted and followed carefully.

8. In some rare cases, in an Enumeration Block there may be only one filled in pad and the number of valid filled in slips in the pad may be less than 10 In this case also you should attempt to select a sample. If the number of filled in Individual Slips in this Enumeration Block is less than the Random Start then no slip will be selected. However, the Control Sheet Sampling- Enumeration Block level has to be filled up in this case also. For example, if the number of individuals in the block is 4 and Random Start is 5 or 6 or 7 or 8 or 9 or 10, no sample slip will be identified. If however, the Random Start is 1 or 2 or 3 or 4 one sample slip will be identified.

9. After you have identified the sample slips in a pad and filled in column 4, 5 and 6 of the Control sheet, you must now bundle these pads in the same order as in column 2 of the Control Sheet. When you have completed the sampling in all blocks that were given to you, hand them over to the Checker after checking that the Index Slip is at the top of each bundle. If the Index Slip is missing prepare a new Index Slip and paste it. The Control Sheet for Sampling - Enumeration Block level will also be kept along with the first pad of the Enumeration Block.

Important:

One bundle may contain the Individual Slip pads for more than one Enumeration Block. In such cases you should take care to see that each Enumeration Block is dealt with separately and the pads for more than one block are not mixed up.

ESTIMATION PROCEDURE:

Tables prepared from the 10 percent sample were inflated to get the final estimates. This estimation was done at rural, non-city urban and city levels of each district keeping the sex wise figures of literate, population in the age group 0-6 years, main workers engaged in either cultivation, agricultural labourer, household industry or other work as controls. This was done to ensure that the figures in these tables are consistent with those in Primary Census Abstract.

The figures other than those available in Primary Census Abstract are subject to sampling variations. The levels of standard errors for different cell values are given in the Annexure-IV to Appendix-III.

Annexure - I to Appendix-III

Control Sheet for Sampling-Charge Level

TABLE F-1 : CURRENTLY MARRIED WOMEN BY DURATION OF MARRIAGE, AGE AT MARRIAGE AND RELIGION

FLY-LEAF

This table presents the distribution of currently married women by duration of marriage, age at marriage and religion for India. This table is useful in deriving the differentials in age at marriage for different marriage cohorts. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

Religions have been shown as Hindus, Muslims, Christians, Sikhs, Buddhists, Jains and Other religions. Data for 'All religions' includes those of 'religion not stated'.

Duration of marriage of the currently married women is shown under 'All durations', 0-4, 5-9, 10-19, 20-29 and 30+ years and each duration of marriage has been presented by 'age at marriage ' All ages', 10-11, 12-13, 14-15, 16-17, 18-19, 20-21, 22-23 and 24+ years. Cases of duration not classifiable due to either 'age not stated' or 'age at marriage not stated' or both are included in ' All durations'. The 'age at marriage not stated' has been included in 'All ages'

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 8 and 22 of the Individual Slip. These questions along with instructions have been reproduced in the General Note.

TABLE F-2 : CURRENTLY MARRIED WOMEN BY DURATION OF MARRIAGE, AGE AT MARRIAGE AND EDUCATIONAL LEVEL

FLY-LEAF

This table gives the distribution of currently married women by duration of marriage, age at marriage and educational level for India. The table is useful in deriving the differentials in age at marriage by duration of marriage and educational level. This table has been presented in two parts, i.e., Part A (urban areas) and Part B (rural areas).

Educational level for both the parts A & B are as:

(i) Illiterate;
(ii) Literate but below middle;
(iii) Middle but below matric;
(iv) Matriculate but below graduate;
(v) Graduate and above

Literate but below middle includes the figures for literate without any formal schooling and educational level not classifiable.

Duration of marriage of the currently married women are adopted as 'All durations', 0-4, 5-9, 10-19, 20-29 and 30+ years and each duration of marriage has been presented by age at marriage ' All ages', 10-11, 12-13, 14-15, 16-17, 18-19, 20-21, 22-23 and 24+ years. Cases of duration not classifiable due to either 'age not stated' or 'age at marriage not stated' or both are included in ' All durations'. The 'age at marriage not stated' has been included in 'All ages'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 11, 12 and 22 of the Individual Slip. These questions along with instructions have been reproduced in the General Note.

F-2 PART A: CURRENTLY MARRIED WOMEN BY DURATION OF MARRIAGE, AGE AT MARRIAGE AND EDUCATIONAL LEVEL - URBAN

TABLE F-3 : CURRENTLY MARRIED WOMEN BY DURATION OF MARRIAGE, AGE AT MARRIAGE, WORK STATUS AND OCCUPATION

FLY-LEAF

This table presents the distribution of currently married women by duration of marriage, age at marriage, work status and occupation for India. The table is useful in deriving the differentials in age at marriage for currently married women by duration of marriage and occupation. This table has been presented in two parts, i.e., Part A (urban areas) and Part B (rural areas).

The work status has been classified as main workers, marginal workers and non-workers and main workers have been further classified as cultivators, agricultural labourers and other main workers, 'manual' or 'non-manual'. Non manual workers covers occupational divisions 0-1, 2, 3 & 4 and manual workers covers occupational divisions 5,6,7, 8 & 9.

Duration of marriage of the currently married women are shown under 'All durations', 0-4, 5-9, 10-19, 20-29 and 30+ years and each duration of marriage has been presented by age at marriage ' All ages', 10-11, 12-13, 14-15, 16-17, 18-19, 20-21, 22-23 and 24+ years. Cases of duration not classifiable due to either 'age not stated' or 'age at marriage not stated' or both are included in ' All durations' The 'age at marriage not stated' has been included in 'All ages'

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 14A, 14B, 15A, 15B and 22 of the Individual Slip. These questions along with instructions have been reproduced in the General Note.

TABLE F-4 : CURRENTLY MARRIED WOMEN BY PRESENT AGE, RELIGION AND BIRTHS DURING LAST YEAR BY BIRTH ORDER

FLY-LEAF

This table presents births during last year by birth order and by present age and religion of mother for India. The currently married women by present age and religion are also given in this table. The table is useful in deriving the age-specific fertility differentials by religion and also by birth order pattern. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas)

Religions have been shown as Hindus, Muslims, Christians, Sikhs, Buddhists, Jains and Other religions. Data for 'All religions' includes those of 'religion not stated'.

The present age of the mother has been given for the age groups 'less than 15', '15-19', '20-24', '25-29','30-34', '35-39', '40-44', '45-49' and '50+'. The figures of `age not stated' have been included in `All ages'. The last year's births have been presented as birth order 1, 2, 3, 4, 5+ and `not stated'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 8, 22 and 23 of the Individual slip. These questions along with instructions have been reproduced in the General Note.

This table corresponds to Table F-4 of the 1981 Census.

TABLE F-5 : CURRENTLY MARRIED WOMEN BY PRESENT AGE, EDUCATIONAL LEVEL AND BIRTHS DURING LAST YEAR BY BIRTH ORDER

FLY-LEAF

This table presents births during last year by birth order and present age and educational level of mother for India. The distribution of currently married women by present age and educational level are also given in the table. The table is useful in deriving the age-specific fertility differentials by educational level and also by birth order. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

Educational level for both the parts A & B are as:

(i) Illiterate;
(ii) Literate but below middle;
(iii) Middle but below matric;
(iv) Matriculate but below graduate;
(v) Graduate and above

Literate but below middle includes the figures for literate without any formal schooling and educational level not classifiable.

The present age of the mother has been given for the age groups 'less than 15', '15-19', '20-24', '25-29', '30-34', '35-39', '40-44', '45-49' and '50+'. The figures of `age not stated' have been included in `All ages'. The last year's births have been presented as birth order 1, 2, 3, 4, 5+ and `not stated'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 11, 12, 22 and 23 of the Individual Slip. These questions along with instructions have been reproduced in the General Note.

This table corresponds to Table F-5 of the 1981 Census.

TABLE F-6 : CURRENTLY MARRIED WOMEN BY PRESENT AGE, WORK STATUS, OCCUPATION AND BIRTHS DURING LAST YEAR BY BIRTH ORDER

FLY-LEAF

This table presents the births during last year by birth order and by present age, work status and occupation of mother for India. The distribution of currently married women by present age and occupation are also given in the table. The table is useful in deriving the age-specific fertility differentials by work status, occupation and birth order. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

The work status has been classified as main workers, marginal workers and non-workers and main workers have been further classified as cultivators, agricultural labourers and other main workers, 'manual' or 'non-manual' Non manual workers covers occupational divisions 0-1, 2, 3 & 4 and manual workers covers occupational divisions 5,6,7, 8 & 9.

The present age of the mother has been given for the age groups 'less than 15', '15-19', '20-24', '25-29', '30-34', '35-39', '40-44', '45-49' and '50+'. The figures of `age not stated' have been included in `All ages'. The last year's births have been presented for the birth order 1, 2, 3, 4, 5+ and `not stated'

This table has been compiled on the basis of information collected through question numbers 3, 4 5, 14A, 14B, 15A, 15B, 22 and 23 of the Individual Slip. These questions along with instructions have been reproduced in the General Note.

This table corresponds to Table F-7 of the 1981 Census

TABLE F-7 : EVER MARRIED WOMEN BY PRESENT AGE, PARITY, RELIGION AND TOTAL CHILDREN EVER BORN BY SEX

FLY-LEAF

This table gives the distribution of ever married women by present age, parity and religion for India. The table also gives the total number of children ever born by sex to ever married women by present age and religion. The table is useful in deriving the differentials in average number of children ever born at different ages by religion. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

Religions have been shown as Hindus, Muslims, Christians, Sikhs, Buddhists, Jains and Other religions. Data for 'All religions' includes those of 'religion not stated'.

The present age of the mother has been given for the age groups 'less than 15', 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79 and 80+. The figures of 'age not stated' have been included in 'All ages'. The data have been classified by parity 1, 2, 3, 4, 5+ and 'not stated'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 8 and 22 of the Individual slip. These questions along with instructions have been reproduced in the General Note.

This table corresponds to Table F-12 of the 1981 Census.

TABLE F-8 : EVER MARRIED WOMEN BY PRESENT AGE, PARITY, EDUCATIONAL LEVEL AND TOTAL CHILDREN EVER BORN BY SEX

FLY-LEAF

This tables presents the distribution of ever married women by present age, parity and educational level for India. The table also gives the total number of children ever born by sex to ever married women by present age and educational level. The table is useful in deriving the differentials in average number of children ever born at different ages by educational level. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

Educational level for both the parts A & B are as:

(i) Illiterate;
(ii) Literate but below middle;
(iii) Middle but below matric;
(iv) Matriculate but below graduate;
(v) Graduate and above

Literate but below middle includes the figures for literate without any formal schooling and educational level not classifiable.

The present age of the mother has been given for the age groups 'less than 15', 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79 and 80+. The figures of `age not stated' have been included under `All ages'. The data have been classified by parity 1, 2, 3, 4, 5+ and 'not stated'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 11, 12 and 22 of the Individual slip. These questions along with instructions have been reproduced in the General Note.

This table corresponds to Table F-13 of the 1981 Census.

TABLE F-9 : EVER MARRIED WOMEN BY PRESENT AGE, PARITY, WORK STATUS, OCCUPATION AND TOTAL CHILDREN EVER BORN BY SEX

FLY-LEAF

This table presents the distribution of ever married women by present age, parity, work status and occupation for India. It also gives the total number of children ever born by sex to ever-married women by present age and occupation. The table is useful in deriving the differentials in average number of children ever born at different ages by occupation. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

The work status has been classified as main workers, marginal workers and non-workers and main workers have been further classified as cultivators, agricultural labourers and other main workers, 'manual' or 'non-manual'. Non manual workers covers occupational divisions 0-1, 2, 3 & 4 and manual workers covers occupational divisions 5,6,7, 8 & 9.

The present age of the mother has been given for the age groups 'less than 15', 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79 and 80+. The figures of `age not stated' have been included under `All ages'. The data have been classified by parity 1, 2, 3, 4, 5+ and 'not stated'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 14A, 14B, 15A, 15B and 22 of the Individual slip. These questions along with instructions have been reproduced in the General Note.

This table corresponds to Table F-15 of the 1981 Census.

TABLE F-10 : WOMEN BY AGE GROUP, EVER MARRIED WOMEN BY PRESENT AGE, NUMBER OF SURVIVING CHILDREN, RELIGION AND TOTAL NUMBER OF SURVIVING CHILDREN BY SEX

FLY-LEAF

This table presents the distribution of women by present age and ever married women by present age, number of surviving children and religion for India. The table also gives the total number of surviving children by sex by present age and religion of their mother. The table is useful in deriving the differentials by religion in average number of surviving children of ever married women. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

Religions have been shown as Hindus, Muslims, Christians, Sikhs, Buddhists, Jains and Other religions. Data for 'All religions' includes those of 'religion not stated'

The present age of the mother has been given for the age groups 'less than 15', 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79 and 80+. The figures of `age not stated' have been included under `All ages'. The data have been presented for surviving children 0, 1, 2, 3, 4, 5+ and `not stated'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 8 and 22 of the Individual slip. These questions along with instructions have been reproduced in the General Note.

This table corresponds to Table F-12 Parts C & D of the 1981 Census.

TABLE F-11 : WOMEN BY AGE GROUP, EVER MARRIED WOMEN BY PRESENT AGE, NUMBER OF SURVIVING CHILDREN, EDUCATIONAL LEVEL AND TOTAL NUMBER OF SURVIVING CHILDREN BY SEX

FLY-LEAF

This table presents the distribution of women by present age and ever married women by present age, number of surviving children and educational level for India. The table also gives the total number of surviving children by sex born to ever married women by present age and educational level. The table is useful in deriving the differentials by educational level in the average number of surviving children of ever married women. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

Educational level for both the parts A & B are as:

(i) Illiterate;
(ii) Literate but below middle;
(iii) Middle but below matric;
(iv) Matriculate but below graduate;
(v) Graduate and above

Literate but below middle includes the figures for literate without any formal schooling and educational level not classifiable.

The present age of the mother has been given for the age groups 'less than 15', 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79 and 80+. The figures of 'age not stated' have been included under 'All ages'. The data have been presented for surviving children 0, 1, 2, 3, 4, 5+ and 'not stated'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 11, 12 and 22 of the individual slip. These questions along with instructions have been reproduced in the General Note.

This table corresponds to Table F-13 Parts C & D of the 1981 Census.

* The figures for India do not include data for Jammu & Kashmir as the 1991 census could not be conducted in the state due to disturbed conditions.

Notes: 1. 'All ages' includes' age not stated'.

2. 'Literate but below middle' includes figures for literates without educational level and educational level not classifiable.

TABLE F-12 : WOMEN BY AGE GROUP, EVER MARRIED WOMEN BY PRESENT AGE, NUMBER OF SURVIVING CHILDREN, WORK STATUS, OCCUPATION AND TOTAL NUMBER OFSURVIVING CHILDREN BY SEX

FLY-LEAF

This table presents the distribution of total women by present age and ever married women by present age, surviving children, work status and occupation for India. The table also gives the total number of surviving children by sex born to ever married women by present age and occupation. The table is useful in deriving the differentials by occupation in average number of surviving children of ever married women. This table has been presented in two parts i.e., Part A (urban areas) and Part B (rural areas).

The work status has been classified as main workers, marginal workers and non-workers and main workers have been further classified as cultivators, agricultural labourers and other main workers, 'manual' or 'non-manual'. Non manual workers covers occupational divisions 0-1, 2, 3 & 4 and manual workers covers occupational divisions 5,6,7, 8 & 9.

The present age of the mother has been given for the age groups 'less than 15', 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79 and 80+. The figures of `age not stated' have been included under `All ages'. The data have been presented for surviving children 0, 1, 2, 3, 4, 5+ and `not stated'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 14A, 14B, 15A, 15B and 22 of the Individual slip. These questions along with instructions have been reproduced in the General Note.

TABLE F-13 : NUMBER OF WOMEN, NUMBER OF EVER MARRIED WOMEN, TOTAL CHILDREN EVER BORN AND CHILDREN SURVIVING BY SEX TO EVER MARRIED WOMEN BY AGE, RELIGION AND EDUCATIONAL LEVEL

FLY-LEAF

This table presents the distribution of total number of women by present age, religion and educational level for India. The table also gives the number of children ever born and the number of children surviving by sex to ever married women by different educational levels within each religion. This table is useful in deriving child mortality differentials by educational levels in different religions. This table has been presented in two parts, i.e., Part A (urban areas) and Part B (rural areas).

The present age of the mother has been given for the age groups 'less than 15', 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70-74, 75-79 and 80+. The figures of `age not stated' have been included under `All ages'.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 8, 11, 12 and 22 of the Individual slip. These questions along with instructions have been reproduced in the General Note.

TABLE F-14 : EVER MARRIED WOMEN BY NUMBER OF CHILDREN EVER BORN, NUMBER OF MALE CHILDREN EVER BORN AND NUMBER OF CHILDREN SURVIVING BY SEX

FLY-LEAF

This table presents the distribution of ever married women by number of children ever born, number of male children ever born, number of male children surviving and number of female children surviving for India. The table presents information on child survival in relation to total children born and sex differentials in child survival of different parities. This table has been presented in two parts, i.e., Part A (urban areas) and Part B (rural areas).

This table has been compiled on the basis of information collected through question numbers 3, 4, 5 and 22 of the Individual slip. These questions along with instructions have been reproduced in the General Note.

TABLE F-16 : EVER MARRIED AND CURRENTLY MARRIED WOMEN BY PRESENT AGE, NUMBER OF SURVIVING CHILDREN AND TOTAL SURVIVING CHILDREN BY SEX

FLY-LEAF

This table presents distribution of ever married and currently married women by present age and number of surviving children. The number of surviving children by sex of ever married and currently married women by present age is also given. The data are presented for rural and urban areas separately for India.

Tables F-16, F-17 and F-18 together are useful in deriving fertility and child mortality levels and differentials by age.

This table has been compiled on the basis of information collected through question numbers 3, 4, 5, 22 and 23 of the individual slip. These questions along with instructions have been reproduced in the General Note.
