Banawali Mound Fatehabad

Banawali is an archeological site that is located at a distance of about 15 kms from Fatehabad city. This place was earlier called as Vanawali. There is not much habitation today at this site and it is a mound more famous as a tourist spot for those interested in historical and archeological excavations.

Excavators have related the site to the Harappan and Pre-Harappan civilization. Archaeologists have found the existence of a full-fledged town existing dating back to the pre-Harappan age (2800 BC - 2300 BC) and Harappan era (2300 BC - 1800 BC). It is discovered that agriculture was predominantly done in the site. Crops like barley, mustard, sesame seems to have been grown. Evidences of use of wooden plough have also been found.

The mound covers an area of about one sq. km, and is raised at a height of about 10 meters.

FOREWORD

1. The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socioeconomic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and `most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified Slums.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre,

Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns,(ii)-Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)-Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Smt. Neerja Sekhar, IAS, Director of Census Operation, Haryana. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

New Delhi.
Dated :- 16-06-2014

(C.Chandramouli)
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook (DCHB) is one of the important and most valuable publications of Census Organisation which is brought out for each district. It contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructural facilities etc.

DCHB reflects an overview of the district and is widely used by administrators, planners, academicians, researchers, various departments and general public. For DCHB publication, population data was taken from Census 2011, whereas non-census data was collected with the active collaboration of State Govt.

The Census 2011 was conducted under the able guidance of Dr. C. Chandramouli, IAS, Registrar General & Census Commissioner, India. The credit of the successful accomplishment of this huge task goes to him for his tremendous and spontaneous work. On behalf of this Directorate I am highly grateful to him and also extend my thanks to Sh. Deepak Rastogi, Additional Registrar General for timely guidance. I extend my thanks to Dr. Pratibha Kumari, Assistant Registrar General (Social Studies), under whose guidance this publication was finalised. Further I extend my special thanks to Sh. A. P. Singh, Deputy Registrar General (MAP) and Sh. A.K. Arora, Joint Director, EDP, who took great pains in bringing out this publication.

I am very grateful on behalf of this Directorate to Smt. Neerja Sekhar, IAS, the then Director under whose able guidance the specified task was mostly completed and I would like to acknowledge all the staff members of DCO Haryana, particularly the team headed by Sh. Vinod Kumar Babbar, DDCO, Sh. B.V.L. Sai Sekhar, the then ADCO and the entire team of DCO Haryana. Lastly I record my appreciation for the best efforts put in by the staff of DCHB, Map and Census Sections.

I hope this publication will provide more useful information for all the data users.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socioeconomic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and `most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its

coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i)-Status and Growth History of towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)- Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief History of the District

The areas comprising Fatehabad district made a valuable contribution to the Haryana heritage. Antiquity of the area can be established on the basis of discovery of pre-historic and historical sites at Banawali (14 kms north-west of Fatehabad) and Agroha. The evidence of the excavations at Banawali (on the lost course of the Saraswati) provides the earliest phases of history of the district. The earliest settlers in the district were pre-Harrapans who in the first half of the 3rd millennium B.C. are supposed to have migrated to Banawali from north Rajasthan. They built houses of kiln-baked bricks. They were skilled in producing pottery with a wide range of decorative shapes, knew copper smelting, used ornaments of beads, gold, semi-precious stones, terracotta, steatite and bangles of clay, shell and copper. The region was closely associated with the political and cultural life of the Bharatas, the Purus and the Kurus, the prominent tribes of the Aryans.

As per the account of Panini, a few towns of the region Aisukari, Taushayana and Roni which have been identified with Hisar, Tohana and Rori respectively. Agroha seems to have come to prominence about the time of Alexander's invasion. Discovery of Ashokan pillars at Hisar and Fatehabad suggests that the region was included in Mauryan empire.

Areas of the district became more prosperous under Tughlaq dynasty. Ghiyas-Ud-din Tughlaq was succeeded by the well known Muhammad Tughlaq. No significant event was recorded veering round the district of Fatehabad. But in the time of Muhammad's successor Firuz (1351-88) the area shot into prominence. The ruler had an unusual fancy for the tract which was on direct road from Multan to Delhi. He did many good turns to the region by establishing new towns of Fatehabad and Hisar and also built two canals; one taking off from the Ghaggar up to the new town of Fatehabad and the second from the Yamuna to the towns of Hansi and Hisar.

After Firuz's death (1388) chaos and confusion prevailed all around. The situation deteriorated after the invasion of Timur in 1398 when he captured Fatehabad town after entering through the Ghaggar valley and Sirsa town. Wealth was looted and large number of inhabitants were killed and he came to the forts of Rajab-nur (Razabad) and Ahruni (present Aharwan village), where he pitched his camp. Here, the Ahirs offered resistance but they were overpowered by Timur's army and set fire to the fort, plundered the houses, not a single house was left standing, from here Timur went to Tohana. After plundering Tohana, he proceeded to Samana (Patiala). In A.D. 1406, Khizr Khan captured Hisar. Behlol Lodi gave these areas to Muhabbat Khan, who controlled its affairs until 1526, when the Lodi's were knocked down by the Mughals.

The great Mughals- Babar and Humayun swayed these areas but no significant event took place in Fatehabad though Babar made Hisar an important cavalry garrison. During Akbar's period Fatehabad was one of the important Mahals.

After Aurangzeb's death (AD 1707) Nawab Shahdad Khan was Nazim of Hisar and controlled the district till 1738, the region enjoyed peace and prosperity. Later on Bhattis took permanent hold of the pargana of Fatehabad. But in 1754, the Sikh Chief of Patiala over

ran the mahals of Tohana, Jamalpur, Dharsul and Shikarpur belonging to Bhatti chiefs. In 1774 Maharaja Amar Singh of Patiala laid seize to the strong hold of Bighar near Fatehabad. The Raja then took Fatehabad and Sirsa. Later on by the treaty of Jind in 1781, Fatehabad and Sirsa were made over to the Bhattis.

After 1803, these areas were under the Britishers. In 1832, the areas of Fatehabad district including other surrounding districts were brought under the Regulations of the East India Company and included in North-Western Provinces.

In the uprising of 1857, the people of the region played a significant role. The sturdy Jats, brave Ranghars and bellicose Rajputs, Bishnois and Bhatt is rose up against the British as soon as they heard the news of the fall of Delhi on 11th May, 1857. Their contribution towards the country in the National Movement is not under-estimated. After the uprising, people of the district suffered a great deal. They were denied almost all the benefits of the Raj, as a result of that they became backward in all respects.

ANALYTICAL NOTE

(i)Physical Features:
Location and Size :

Fatehabad district lies between 29° 15′ 00″ North and 29° 49′ 15″ North latitude and 75° 13′ 15″ East and 75° 57′ 54″ East longitude. It has a geographical area of 2,538.00* square kilometres comprising 2503.26 square kilometres of rural area and 34.74 square kilometres of urban area.

The district is compact shaped bounded by Punjab State in the north and touching Rajasthan in the South-west. Sirsa district makes boundary with the district in the west, to its east lies Jind district and a big stretch of the boundary on south eastern side is made by Hisar district.

*Area figures supplied by the Surveyor General, India are provisional.

Physiography :

The district is an alluvial plain of Indo-Gangetic basin. The bed rock topography over which the alluvial and aeolian deposits rest slopes towards north east. Alluvial deposits can be sub divided as newer and older. The aeolian deposits of sand blown from Thar Desert of Rajasthan are mostly confined to the southwestern parts of the district. These heaps of sand occupy vast stretches of land forming sandy flats, mounds and ridges at places attaining dunal shapes over the sandy flats. Kankar occurs at several places in the sandy tracts of the district, which is used for metalling roads. There is no perennial river flowing through the district but a seasonal river i.e. the Ghaggar which flows through Jakhal and Ratia. We can sub-divide the district physiographically as Ghaggar Flood Plain, Fatehabad plain and Fatehabad Bagar areas. The Ghaggar Flood Plain covers the northern parts of the district along the Ghaggar river, covering Ratia, Tohana and Fatehabad tahsils. The flood plain is gently sloping from northeast to southwest in which direction the Ghaggar river flows. Soils in this part are silty clay and relatively sandy loam. The soils are poorly permeable and their moisture holding power is less. Fatehabad Plain covers the major central part of the district and is totally a plain area. Loam and sandy loam are main soils formed in this region. Plantation of trees has checked the growth of advancing sand dunes in this part. Fatehabad Bagar covering the small south western part of the district makes limits with Sirsa district and Rajasthan State. Soils of the region are sandy and loamy sand. Due to its very permeability, drained and deep light characteristics, the crop yield is poor. Coarse grains are grown here. Scrubs and bushes are found in large areas. The sand dunes, which are found on large scale are of moving nature.

Drainage :

The Ghaggar, the largest seasonal river of Haryana State, enters the district as deeply incised alluvial channel near Jakhal mandi and makes an exit near Bira Badi village covering the distance in a meandering course some 70 kilometres long. The river maintains a rough parallelism with most of the northern boundary of the district and deviating from it by a margin of seven kilometres and at times delineating the northern limits of the district.

The Ghaggar is a misfit stream since the scant volume of discharge stands in marked contrast to its large channel .The river drains large volumes of flood flow during the rainy season mostly between July and September. It is generally dry in summer. However, the inflow of groundwater takes place till as late as October.

Climate :

The climate of the district is characterised by its dryness and extremes of temperature and scanty rainfall. The district has a sub-tropical continental monsoon climate where we find seasonal rhythm, intensely hot summer, cool winter, unreliable rainfall and great variation in temperature. Air is generally dry during the greater part of the year. Scorching dust laden winds which blow during hot season render the weather very tiring. Dense fog sometimes occurs during winter months.

Four seasons are observed in a year. Mid-March to end of June is summer season, followed by rainy season from July to mid-September, after which a transition period of two months follows. Then the cold season comes from mid-November to mid-March. With the start of cold season, temperatures begin to decrease rapidly. January is the coldest month when mean daily maximum temperature is about 21.5°C and mean daily minimum at 5.9° C. Cold waves affect the region in the wake of passing western disturbances and the minimum temperatures drop down to about 2.2°C occasionally. The highest maximum temperature recorded at Hisar was 48.5° C on May 29, 1984 and the lowest minimum temperature was -3.9°C on January 31, 1929. Records of Meteorological Observatory at Hisar, the neighbouring district, may be taken as representative of the meteorological conditions prevailing in the district in general.

With the onset of summer season temperatures begin to rise rapidly. May and June are the hottest months. The mean daily maximum temperatures during June is 41° C On individual days the day temperature may occasionally exceed 45.2°C. Hot westerly winds locally known as 'looh' begin to blow from the month of April. With the beginning of monsoon season, day temperatures drop appreciably whereas nights continue to be as hot as in summer. During rainy season, weather is unpleasant due to increased moisture in the air. After the monsoon season, day temperatures remain high but night temperatures go down rapidly.

Rainfall records reveal that average annual rainfall (2005-09) in the district is 355.2 cms. and about 72.71 percent of the normal annual rainfall in the district is received during June to September, July and September being the rainiest months. Rainfall generally increases from west to east. Rainfall in the month of June is significant mostly in the form of thundershowers. The variation in the annual rainfall from year to year is very large. On an average there are 28.2 rainy days in a year in the district at Tohana. The heaviest rainfall in 24 hours recorded in the region at Hisar was 346.7mm at Hisar on August 16, 1926.

Winds are generally light in the district with some strengthening in force during late summer and monsoon seasons. Cloudiness is moderate to heavy during monsoon season, rest of the year skies are generally clear or lightly clouded. Easterly or South Easterly winds blow during monsoon season but for the rest of the year winds are westerly or North-westerly. Air is dry for most part of the year. Relative humidity is generally high in the mornings, during monsoon season and from December to February. During summer season relative humidity is as low as 30 percent in the afternoons. Thunderstorms occur throughout the year but the highest incidence is during monsoon season.

Natural Economic Resources:

Forestry:

The district covers Tohana and Fatehabad forest ranges which are headed by the Range Forest Officers. These ranges come under Hisar Forest Division headed by the Deputy

Conservator of Forests stationed at Hisar. The district falls in West Forest Circle with headquarters at Hisar.

Forest Department has initiated control programmes to halt the march of the desert from Rajasthan and to protect the agricultural economy. Forests play an important place in the rural as well as urban economy of the district. Forests supply much required wood for fuel and timber for building purposes and wood for forest based industries. Area under forests has slightly increased from 39 sq kms to 40 sq kms in the last decade in the district. It makes about 1.6 percent of the district total area and contributes about 5.7 percent of the State forest area.

FOREST TYPE IN FATEHABAD DISTRICT, 2010-11

Sr. No.	Type of Forest	Area (Sq. kms.)
1	**2**	**3**
1	Reserved Forests	____
2	Protected Forests	39.67
3	Unclassed Forests	0.48
4	Forests under section 38 of IFA, 1927	0.06
5	Forests under section 4&5 of LPA, 1900	_____
	Total Forest area	40.21

Source: HFD overview Haryana Panchkula 2010-11

The forests of the district fall under the category of tropical desert. Thorn species of Xerophytes predominate. Flora is scanty and sparse. Important tree species of the area are Jand (Prosopis cineraria), Rohera (Tecomella undulata), Khairi (Acacia senegal), Beri (Zizyphus mauritianla), Jal or Van (Salvadora oleoides) Badh (Ficus bengalensis) Peepal (Ficus religiosa), Pahari Kikar (Prosopis juliflora) Kachnar (Bauhinia racemosa), Lasura (Cordia dichotema), Imli (Tamarindus indica), Shisham (Dalbergia sissoo), Neem (Azadirachta indica) etc. Safeda is being planted in agricultural fields and along the roads, canals etc which help mainly soil conservation and are an addition to forest wealth. Jand, Farash, Khairi, castor, kana and khera have been planted to check soil erosion by high velocity winds. Common shrubs like kins, bansa, panwar, babool, mallah, karir, phoa, khip and akk are found in the district. Medicinal herbs found in the district are bansa,indirain, asgandha, glo, kharuthi bhakhra, dhatura, etc. Important grasses found in the district are anjan, dhaman and dub which are palatable fodder grasses dwindling on account of uncontrolled grazing. The grasses in waste lands are poor in quality and quantity.

Bandar and common langur represent primates in the district. Big cats like tiger and leopard are no more seen which were in plenty in the past. Jungle cat, small Indian civet, common mongoose, jackal, Indian hare and the Indian fox are also becoming rare with the extension of cultivated lands. Chinkara or ravine deer is seen in the region but its number is decreasing. Black buck or nilgai are common in the district. These are common in Bishnoi villages where shooting or killing them is prohibited.

A large number of game birds like Brahminy duck, shoveller bareheaded goose, Pintail,

common teal, mallard, gadwall, are seen around tanks in winter. But cotton teal, spotbill duck, dabchick are found throughout the year. Partridges and quail are common. Pigeons and dove are found in vicinity of villages. Birds of economic importance like pariah kite, vulture, eagle, crow etc keep the district cleared of dead animals by feeding on them. Indian shikra, falcon, redheaded marline and kestrel are residential birds. Swifts, swallows, shrikes, myna, babblers and warblers feed on varied insects. Colourful Birds like blue Jay, woodpecker, golden oriole, parakeet, pheasant kingfishers, Bulbul are seen in orchards, fields and gardens. The National bird of India, Common peafowl is quite common in fields. Attractive birds as hoopoe, bee-eater, baboona, etc. are seen in and around the villages. Different type of storks, cranes, egrets, lapwigs are also found in the district. Various spices of terns can be seen in river bed. Poisonous snakes and other snakes like blind snake, rat snake, sand snake, wolf snake and john‘s sand boa are found. Kirla and girgit is found in lawns and hedges. Sanda is found in sandy areas.

Minerals and mining:

The geological structure of the district is composed of Alluvium (Recent) which overlaid the hard rocks. Hard rock geology of the district is concealed under alluvial and Aeolian deposits. Alluvial deposits are divisible as newer and older. The sub soil water of the district is overall brackish. Sweet water is found from wells located along the existing canal or old stream courses. The water table is within 15 metres along the Ghaggar river and command area of Ratia branch of Bhakhra Canal.

Saltpetre occurs as thin white encrustation on the surface of the earth during the hot months of May and June, if not raining, in July also. It is primarily used in the production of nitrates and potash. The best use of the refined product is in the manufacturing of gun powder and agricultural fertilizers and also used on a small scale in enamel and fireworks industries. Large tracts of land infested with saltpetre are found in whole of the district. The mineral is publicly auctioned every year by the authorities at district headquarters. Brick earth/ordinary clay is found in plenty in the district.

Mining in Haryana State is lying closed since March, 2010 due to Environmental non-clearance.

Soil and Cropping Pattern:

The main soils in the district are loam (Bhangar and Nardak), Sand and loamy sand (Bagar) relatively sandy loam and silty clay (Naili and Chhachhra Dakar). As classified by National Bureau of Soil Survey and Land Use Planning (ICAR), Nagpur the district has mainly Ustalf-Ochrepts, Psamments-Fluvents-Orthids and aquepts-Ochrepts types of soils.

The crops grown in the district are divided into two main categories viz. Kharif and Rabi, locally called as Sawani and Sadhi. The former is the summer season harvest and the latter the winter season harvest. Any crop which does not strictly fall within these two harvests is known as a zaid crop and its harvest is called the zaid kharif or zaid rabi, according to the harvest with which it is assessed. Toria (an oilseed) is cultivated as zaid kharif and vegetables, melon and green fodder as zaid rabi.

The major Kharif crops of the district include Paddy, Cotton, and Bajra, while the minor ones included sugarcane, kharif pulses and vegetables.

The major Rabi crops of the district are wheat, gram, barley and oilseeds such as rapeseed and mustard whereas the minor ones are vegetables and fresh fruits.

Land and land-use pattern:

In the year 2010-11, against a geographical area of 2538.00* sq.kms (includes 34.8 sq.kms. of urban area); the area of the district according to village papers supplied by the revenue authorities is 2499.47 sq. kms (rural area only). This shows difference in two sets of areas arrived at by different methods of measurement adopted by two separate agencies. However, we will discuss here landuse as per village records. Of the total area of 249,947 hectares, 224,773 hectares is net sown area; 765 hectares is culturable waste land (including gauchar and groves) and 55 hectares area is not available for cultivation to which we may call barren and un-cultivable land. Net area sown in the district is 89.93 percent of the total rural area.

Fatehabad tahsil has a rural area of 1412.58 sq.kms. whereas Tohana and Ratia tahsils possess 585.32 sq.kms and 501.57 sq.kms of rural area respectively.

*Area figures supplied by the Surveyor General, India are provisional.

Tenancy:

Tenancy system was the outcome of insecure days after the decay of Mughal empire owing to conflict between two classes viz - the landlords and the tenants. Taking into consideration, the deteriorating state of agriculture and the cultivator, the Punjab Tenancy Act of 1887 was enacted providing the right of occupancy.

After Independence, the government decided to bring land reforms especially to carry out its policy of 'Land to tillers' in order to improve the condition of cultivators and increase agricultural production. Haryana State comprised areas which were earlier either in Punjab or in Pepsu (Patiala and east Punjab States Union) and had two different sets of legislation applicable to the State areas which were as follows:

Punjab Laws

(1) The East Punjab Utilisation of Lands Act, 1949

(2) The Punjab abolition of Ala Malikiyat and Talukdari Rights Act, 1952

(3) The Punjab Occupancy Tenants Act, 1952

(4) The Punjab Security of Land Tenures Act, 1953

(5) The Punjab Bhudan Yagna Act, 1955

Pepsu Laws

(1) The Pepsu abolition of the Ala Malkiyat and Talukdari Rights Act, 1954

(2) The Pepsu Occupancy Tenancy Act, 1952

(3) The Pepsu Tenancy and agricultural Lands Act, 1955

(4) The Pepsu Bhudan Yagna Act, 1955

After the merger of Pepsu with Punjab two more Acts, the Punjab Resumption of Jagirs Act, 1957 and Punjab Village Common Lands (Regulation) Act, 1961 were enacted.

Under the East Punjab Utilisation of Lands Act, 1949, the government enforced the utilisation of every inch of available culturable land. Under this Act a notice to take over the land is served on every land owner who allows his land to remain uncultivated for 6 or more consecutive harvests and the land taken over is leased out to others for a term ranging 7 to 20 years, priority being given to Scheduled Caste.

Abolition of Ala Malikiyat and Talukdari Rights Acts of 1952 and 1954, the rights of ala

malik in the land held by adna malik were abolished.

Occupancy Tenants Acts of 1952 and 1954 declared all occupancy tenants as the owners of the land. The Punjab Security of Land Tenures Act, 1953 and the Pepsu Tenancy and Agricultural Lands Act, 1955 contained provisions relating to ceiling on agricultural land holdings, utilization of surplus area and security for tenants against exploitation and ejectment were in force in different parts of Haryana. Government was further empowered to utilise the surplus area of both land-owners and tenants for the resettlement of ejected tenants, landless labourers and small land-owners. All areas owned by a local owner above 30 standard acres and by a displaced person above 50 standard acres were considered as surplus area.

Haryana Ceiling on Land Holdings Act, 1972 was enacted as recommended by the Central Land Reforms Committee, which provided for the assessment of permissible area in relation to a family instead of an individual and reduced the permissible area limit to 7.25 hectares of land under assured irrigation capable of growing at least two crops in a year, 10.9 hectares of land under assured irrigation capable of growing at least one crop in a year or 21.8 hectares in respect of any other land including banjar and land under orchards.

Owners of land generally cultivate their land themselves known as khudkasht (self cultivation). Sometimes the land is leased to small/marginal/landless farmers on theka (contract) or batai (Share-cropping). The normal rate of batai is one-third depending upon the provision of irrigation, fertilisers, seeds etc. However the rate of contract varies from time to time depending upon the quality of land and facility of irrigation system etc. Between the two, theka (contract farming) is more prevalent. As large number of farmers own modern machinery, they prefer to offer services for various types of agricultural operations against payment. This system is gaining popularity.

Average size of land holding during 1995-96 in Haryana was 2.1 hectares, which is relatively higher than the all India average of 1.6 hectares. 27.8 percent of the land holdings were below 0.5 hectares, more than 50 percent holdings were of the size between 0.5 and 3.0 hectares. Only 0.4 percent land holdings were of the size 20 hectares and above. 2.4 and 1.9 percent of the landholdings were respectively of the size of 5 to 7.5 hectares and 7.5 to 10 hectares.

In Haryana State, as per Agricultural Census 2010-11, the marginal operational land holdings were 48.4 percent i.e. below one hectare, small land holdings were 19.4 percent (1 to 2 hectares), semi-medium land holdings were 17.2 percent (2 to 4 hectares), medium land holdings (4 to 10 hectares) were 12.1 percent and the large holdings (10 to 20 hectares & above) were 2.9 percent as per data supplied by the Director Land Records, Haryana. Average size of the land holding is 2.21.

Fatehabad district was part of Hisar district during Agricultural Census of 1995-96. Hence statistics is available for Hisar district only.

Average size of operational landholdings in the district was 2.4 hectares as per Agricultural Census, 2010-11. Proportion of marginal landholdings (less than 1 hectare) was 37.7 percent, small sized landholdings (1-2 hectares) was 22.8 percent, semi medium landholdings (2-4 hectares) were 21.0 percent, medium sized landholdings (4-10 hectares) contribution was 15.5 percent and that of large size landholdings (10 hectares & above) were merely 3.0 percent.

Agriculture:

With 59.37 percent of the main workers engaged in agricultural activities (cultivators and agricultural laborers), Fatehabad district falls in the belt where majority of population on derive its livelihood from agrarian pursuits in the State during 2011 Census. Even 72.8 percent of the marginal workers are also engaged in agricultural activities. Tertiary activities are the lowest in the district among the districts of the State.

However, the government is making all efforts to encourage agricultural production by distributing improved seeds, fertilizers, pesticides, providing latest developments in modern techniques, multiple cropping pattern techniques increasing irrigation facilities, providing easy loans for modern agricultural machinery etc.

AREA AND PRODUCTION UNDER RABI AND KHARIF DURING 2009-10, FATEHABAD DISTRICT

Sr. No.	Crops	Area Sown(in hectares)	Production(in tonnes)
	Rabi		
1	Wheat	185,700	952,000
2	Jowar	NA	NA
3	Gram	1,100	1,000
4	Rapeseed and Mustard Seeds	8,700	15,000
5	Potatoes	100	3,700
6	Seasmum	100	NA
	Kharif		
1	Paddy	77,800	339,000
2	Other Pluses	100	100
3	Bajra	10,300	27,000
4	Barley	4,700	21,000
5	Cotton (American)	76,400	357,000
6	Cotton (Desi)	7,900	21,000
7	Sugarcane	800	7,300
8	Chillies (dry)	100	400
9	Vegetables	1,130	NA
10	Fresh fruits	754	NA
11	Ground nuts	400	400
12	Moong	900	500
13	Garlic	154	NA

Source: Statistical Abstract of Haryana, 2009-10

Paddy is number one kharif crop of the district. Area under this crop was 77,800 hectares with a production of 339,000 tonnes and having fourth position in production among the districts of the State. It is quite astonishing that the district with sand dune topography has attained such a good position. This has been made possible by the extension of irrigation in the area through Bhakra Canal Project.

Sugarcane and cotton are the major cash crops of the kharif season in the district. Hisar district, of which Fatehabad district was part, was number one cotton grower during 1977-78. But after bifurcation, Sirsa has become number one, Hisar number two and Fatehabad district number three in area in production during 2008-09 18.5 percent of the cotton area of the State lies in Fatehabad district. American Cotton was grown on 76,400 hectares and desi cotton on 7,900 hectares in the district giving a total production of 378,000 bales of 170 kg

each.

Sugarcane is grown on 800 hectares only giving a production of 7,300 tonnes of gur during 2009-10.

Bajra is another important kharif crop grown on 10,300 hectares in the district and obtained a production of 27,000 tonnes.

Wheat is the most important rabi crop of the district. During 2009-10, wheat was grown on 1.9 lakh hectares. With 9.5 lakh tonnes of production of wheat the district was ranking fourth among the districts of the State. It is grown under irrigated conditions.

Gram, which was once a major rabi crop of the district, has been grown on a quite shrinked area. During 2009-10 area under gram was 1,100 hectares and production was merely 1,000 tonnes in the district. Gram is a very useful crop, forms a good diet both for human beings and cattle and consumed right from germination to grain ripening stage and used for a variety of purposes. It is grown mostly under barani conditions.

Barley is also grown under barani conditions in an area of 4,700 hectares which gave a production of 21,000 tonnes.

Potatoes, vegetables and fresh fruits are among the minor crops of the district. Potatoes were grown on 100 hectares, vegetables on 1,130 hectares and fruit trees covered an area of 754 hectares.

As there has been a great decrease in permanent pastures and grazing land. Hence the area under forage crops has increased. New varieties of forage crops like chari, barseem and Lucerne were introduced to make fodder available round the year to make white revolution a success.

Intensive use of agricultural machinery is observed in the district. 13,340 tractors, 589 combine harvestors, 25,564 tubewells and 38 sugarcane crushers were in use in the district during 2003.

Apart from compost, cattle dung and green manures, chemical fertilizers are being used increasingly. During 2009-10 chemical fertilizers (NPK) were used to the tune of 98,509 tonnes in the district. Out of this 73,890 tonnes was Nitrogenous (N), 22,170 tonnes Phosphatic (P) and 2,448 tonnes Potassic(K).

Irrigation :

The district is situated in the arid region and has very inadequate and uncertain rainfall which necessitates development of artificial sources of irrigation. Irrigation in the district was limited to a very small area prior to 1950-51. The irrigated areas increased to considerable extent after commencement of irrigation from Bhakhra Nangal Project. Apart from increase in canal irrigation, well irrigation was introduced along canals and Ghaggar river where sweet water was available and after sufficient availability of power from Bhakhra Nangal Project. Now wells are almost replaced by tubewells.

During 2010-11, net irrigated area in the district was 2.22 lakh hectares. Out of this 1.25 lakh hectares was irrigated through government canals and 0.97 lakh hectares through tubewells. Whereas during 2009-10 there was 4.1 lakh hectares of gross irrigated area which formed 98.3 percent of the total cultivable area. With 7.4 percent of the State's gross irrigated area, it ranked 4th. As per intensity index, irrigation intensity in the district was

183.8.

There is an intricate network of canals all over the district emanating from Bhakhra Canal (Main Branch, Ratia Branch and Fatehabad Branch) and Western Yamuna Canal (Sirsa Branch) Systems. Important among the distributaries include Badalgarh, Rattangarh, Ghaggar, Dharsul, Khundan, Rattankhera, Birdhana, Rangoi Canal, Bhirana, Fatehabad, Samain, Khajuri, Dehman, Mohamadpur, Kohli, Siswala etc.

During 2010-11 there were 38,012 tube-wells and pumping sets. Out of these 9,191 were diesel sets and 28,821 were electric sets.

Animal husbandry:

With 5.7 percent of the total area of the State, it is fifth ranking district whereas with 5.0 percent of the livestock as per Quinquennial Livestock Census of 2007 of the State, the district is at 10th place. As compared to the 1997 livestock, the position in every category of animals is dismal. Even Poultry farming has got a setback.

LIVESTOCK AND POULTRY IN FATEHABAD DISTRICT, 2007

Category	Number of Animals		Percentage of State
	Haryana	Fatehabad	
1	2	3	4
Cattle	1,552,361	81,545	5.25
Buffaloes	5,953,228	300,344	5.05
Horses & Ponies	25,834	1,178	4.56
Donkeys	4,838	117	2.42
Mules	10,600	202	1.91
Sheep	601,379	32,158	5.35
Goats	538,320	16,121	2.99
Camels	38,608	3,595	9.31
Pigs	133,521	2,321	1.74
Poultry Birds	28,785,497	290,454	1.01

Livestock in the district numbered 6.67 lakhs in 1997 which decreased to 4.54 lakhs in 2007, a decrease of 32.9 percent. Similarly, number of poultry birds decreased from 4.67 lakhs in 1997 to 2.90 lakhs in 2007, a decrease of 38 percent. We can assign the reasons for decrease in livestock & poultry to fast mechanisation of agricultural activities to decrease the use of animal power, faster use of mechanical means of transport than the animal power; changing lifestyles of people semi-arid climatic conditions of the region and decrease in fallow lands where marginal farmers and land less used to graze their animals.

Inspite of the decrease in livestock numbers, the district comprises of good quality stock of various categories of animals. Buffaloes in the district numbering 3.0 lakh are 5.0 percent of the total buffaloes of the State and cattle numbering 0.8 lakhs are 5.3 percent of cattle stock of the State.

Through the number of sheep has decreased by 54 percent in the last decade (1997-2007) yet they form 5.4 percent of the State stock; horses and ponies decreased 47 percent in the last decade, are 4.6 percent of the State stock. Pigs forming 1.7 percent of the State stock in

the district have decreased by 89 percent and Camels have decreased by 49 percent still they are 9.31 percent of the State stock. In 1997 poultry birds were 5.1 percent of the State stock but now in 2007, they are merely 1.0 percent. Goats have decreased by 50 percent, forming 3.0 percent of the State stock.

This area is known for its Haryana breed of cows and murrah breed of buffaloes and holds unique position in India. As per Livestock census 2007, there were 3.0 lakh buffaloes and 0.8 lakh cattle, 29.4 percent of these cattle and buffaloes were mulching animals in the district. Fathabad district ranked 16th with this proportion among the districts of the State.

During 2009-10, there were 128 Dairy and Milk supply co-operative societies in the district.

Sheep rearing is traditionally followed by weaker sections and has good economic potentiality in the district. Subsidies are given on loans to encourage sheep rearing units for the success of sheep rearing programme and to supplement the income of small/marginal farmers and landless labourers.

The Deputy Director, Animal Husbandry is overall incharge of the district regarding activities like cattle breeding, artificial insemination, control of outbreak of contagious diseases among livestock; improvement of livestock and provision of veterinary aid. In this task he is assisted by the District Animal Husbandry Officer, Cattle Development Officer, 46 Veterinary Surgeons and 135 Veterinary and Livestock Development Assistants.

During 2009-10 veterinary institutions functioning in the district included 49 Govt. Veterinary Hospitals and Veterinary Dispensaries to provide breeding facilities promptly, to penetrate the benefits effectively to interior rural areas, to implement sheep development schemes, training persons in raising poultry on scientific lines and supplying improved breed of poultry etc.

During 2009-10, there were 20 recognised and development Gaushalas in the district to house unproductive, stray, old, infirm and useless cattle. To give new meaning to the old concept of Gaushala, some institutions have been converted into cattle breeding-cum-milk producing centres with some financial and technical assistance. There are 3 recognized Slaughter Houses in the district where during 2009-10, 4000 sheep, 2000 goats and 800 pigs were slaughtered and after slaughtering it is ensured their fitness for human consumption.

Fishery :

The district has unfavourable climatic conditions for fisheries development. However, 686 hectares of area had been stocked for fisheries development during 2009-10 in the district. During 2009-10, 4187 tonnes of fish production was achieved which was valued at Rs.16.7 crores. Fisheries development is looked after by Fisheries Department, Haryana. Fisheries Development Officer functions at district level. Fishing rights in canals and rivers are controlled by the State Government and Village ponds by the concerned Panchayats. Fishing licenses 100 were issued.

Industry :

The district economy is mainly agrarian in nature and least developed industrially. 59.4% of the total workers derived their livelihood from agriculture pursuits in 2011. Till the

formation of Haryana State in 1966, very little progress was there in setting up of modern industries. Only a few large and medium industrial units existed in the district. First industrial set up was M/s Ram Partap Bansal & Co. (P) Ltd. Tohana in 1981-82. Then Major industrial unit set up in the district was in 1984-85 at Ratia, namely, M/s Hafed Ginning & Cotton Seed processing complex manufacturing refined mustard seed oils and cotton bales. Then another big unit M/s Bhuna Co-op. Sugar Mills Ltd. Bhuna with an investment of Rs 24.3 crore was established in 1991-92. Next year in 1992-93 still bigger units with investment of Rs 80 crores started functioning at Tohana i.e M/s Nuchem Ltd. (MDF Div.) In small scale sector also industrial activity was dominated by agro based industries like Dal-making, oil mill, cotton ginning and pressing, paddy and rice husking. Cotton ginning and pressing units were at Jakhal mandi, Badopal and Tohana, Paddy and rice husking at Tohana, Dal-making at Fatehabad, Tohana and Badopal. Small scale industries have developed after the State Govt. provided various facilities to entrepreneurs. These industries have concentrated in Fatehabad, Tohana, Bhuna, Ratia, and Badopal. Khadi and Village industries meet the daily requirement of villages.

INDUSTRIAL PRODUCTION IN FATEHABAD DISTRICT, 2010-11

Sr. No.	Item	Production
1	Agricultural Implements	Rs. 3000 lakhs
2	Handloom Weaving	Rs. 4000 Sq. mtrs.
3	Cotton Ginning	Rs. 250 Thousand bales

Source: Statistical Abstract of Haryana, 2010-2011.

In 2010 there were 119 registered working factories in the district employing an estimated number of 3,853 workers. On the basis of number of registered working factories, workers employed and production we can conclude that the concentration of industrial activity was in the field of cotton textile; wood & wood products; food products; etc. Smaller concentration is in the fields of non-metallic mineral products; Electrical machinery; etc.

Large and Medium Industrial Units in the district, 2010-11

Sr.No	Name of Unit	Year of Establish-ment	Products	Invest--ment (in Rs. Crores)
1	M/s Ram Partap Bansal & Co Pvt Ltd, Tohana, Fatehabad	1981-82	Rice Bran oil, Musterd oil, oilcake, sun flower oil cake	0.9
2	M/s Hafed Ginnings Cotton seed processing complex Ratra, Fatehabad	1984-85	Refined musterd seeds oil cotton bales	6.5
3	M/s Bhuna Co-Op. Sugar Mills Ltd., Bhuna, Fatehabad	1991-92	White crystal sugar	24.3

4	M/s Nuchem Ltd., Tohana, Fatehabad (MDF Division)	1992-93	Nuwud medium density board	80.0

Source: Director, Industries, Haryana, 2013-14.

Trade and Commerce:

During 19th century, all trade between Rajasthan and the districts around Delhi went along Delhi-Sirsa road which passed through the towns of Hansi, Hisar and Fatehabad. All these towns were centres of this through trade. Towards the close of 19th century, with the construction of Rewari-Ferozepur Railway, these trade centres lost their importance. However, these towns remained principal markets where surplus produce of local areas was collected and people collected their necessities such as cloth, salt and other items. In times of scarcity and high prices the farmers used to purchase gram from adjacent Punjab areas and carry home for domestic consumption, sometimes even to earn profit.

After Independence, especially after formation of Haryana State, the district made rapid progress. In order to eliminate unhealthy market practices and to ensure fair prices to the growers, regulated markets were set up in the district at Fatehabad (1966) Tohana (1964), Jakhalmandi (1965), Bhuna (1971), Bhattu Kalan(1971) and Ratia (1976). Main arrivals during 1977-78 in these markets included cotton, wheat, gram, bajra, gowar, sarson, chillies and oilseeds. Now the district is well equipped with marketing facilities. Proper storage facilities have been provided at all the focal points.

During March, 2011 the following principal agricultural markets existed in the district:

1. Fatehabad
2. Bhattu Kalan
3. Ratia
4. Jakhalmandi
5. Tohana
6. Dharsul
7. Bhuna

Apart from these, there were fifteen sub-yards. Average area served per regulated market in the district was 360 Sq kms. whereas number of villages served per regulated market was 35. Usual course of trade in agricultural produce is conducted through wholesalers, retailers and commission agents or arhtias.

Total arrivals of agricultural produce during 2010-11 in these principal agricultural markets and sub-yards in the district were 13.9 lakh tonnes. Heaviest arrival was of paddy which accounted for 630,400 tonnes, wheat arrival was 582,900 tonnes, barley 3,100 tonnes, Gowar 18,500 tonnes, maize 500 tonnes, bajra 1000 tonnes, gram 200 tonnes, cotton 73,000 tonnes, cotton seed 500 tonnes, groundnut 300 tonnes, potatoes 13,100 tonnes, chillies 100 tonnes, onions 3,600 tonnes, gur, shakkar, khandsari 2,000 tonnes, pulses 700 tonnes,

oilseeds 5,600 tonnes, vegetables and fruits 36,700 tonnes and other agricultural produce 13,800 tonnes.

Under the food grain procurement scheme during 2010-11 purchases were made by the following agencies in the district: Wheat (total 595,323 tonnes) – State Government (164,272 tonnes), Food Corporation of India (35,684 tonnes), Hafed (199,769 tonnes) Haryana Warehousing Corporation (31,065 tonnes), Agro (136,895 tonnes) and Confed (27,638 tonnes). Paddy (total 477,960 tonnes) – State Government (187,363 tonnes), Food Corporation of India (13,216 tonnes), Hafed (192,480 tonnes), Rice millers (4,880 tonnes) Haryana Warehousing Corporation (26,673 tonnes), Agro (42,898 tonnes) and confed (10,450 tonnes). There were 6 cold stores with a capacity of 10,000 tonnes storage during 1998-99 in the district.

During 2001-02, one export oriented unit was functioning in the district which earned Rs.3.8 lakhs to the State exchequer.

Total establishments/enterprises in the district, as per Economic Census, 2005 were 47,630. Non-agricultural enterprises formed 66.1 percent of the total establishments. Only 23.6 percent of the total enterprises employed one or more hired workers. 88.7 percent establishments were functioning under own premises whereas 5,387 establishments were without premises. 88.2 percent of the enterprises functioned throughout the year whereas 5,610 enterprises were seasonal. Ownership of 96.6 percent enterprises was in private hands. 78.8 percent of the enterprises did not make use of power or fuel.

Employment in these enterprises was 102,163 persons, of these 20,661 were females and 3,115 children. Hired workers numbered 36,111 which included 7,502 females and 980 children. During 19th century when the facilities of modern banking and co-operative credit were not available, the money lending was controlled by the sahukars in towns and petty shopkeepers in villages. They exploited the poor land holders.

Institutional finance is a must for development of any area. It is available through both commercial and co-operative banks. In Fatehabad district there were 124 banking institutions including 54 Co-operative banking institutions in March 2011. Fatehabad tahsil possessed 51 banks while Tohana tahsil had 40 and Ratia tahsil possessed 33 banks only.

Transport :

Transport and communications is the nervous system of the economy of a particular area. Not much is known about the ancient route passing through the district. Barwala is said to be one of the important trading centres and linked with inland trade routes. Means of communication were very poor though the foundations of imperial towns of Fatehabad and Hisar in 14th century gave an encouragement to these places .North west frontier to Delhi through Pak Pattan Dipalpur, Fatehabad, Aharwan and Tohana to Delhi was most important route before the advent of the Mughals. Fatehabad district has good net work of roads. Broad Gauge Railway Line in the eastern part of the district and Metre Gauge Railway Line in the south western part of the district make little presence. The district with 182 kilometres of road length per lakh of population is number one among the districts of the State but is at 7th place with 59 kms. of road length per 100 Sq. km. of area in the year 2001-02. Except

one, all the villages are approached by metalled roads in the district. National Highway-10 known as Maharaja Aggarsain Marg, Delhi –Sirsa passes through the district having a length of 38 kilometres within the district. State Highway-21Budhlada- Ratia-Fatehabad-BhattuKalan- Bhadra Road passes through and major part of which lies in the district. S.H.-2 Surewala chowk to Fatehabad and SH.-17 Nizampur-Narnaul-Mahendragarh-Dadri-Bhiwani-Hansi-Barwala-Surewala Chowk-Tohana road pass through the district. Other district roads include Tohana-Ratia, Ratia- Sardulgarh, Jakhalmandi-Bhuna, Bhuna-Hisar and Bhattu Kalan-Nathusari Chopta. Important focal points of the district are Ratia, Jakhalmandi, Tohana, Bhuna, Fatehabad, and Bhattu Kalan.

Railway stations falling on the Broad Gauge Railway Line Jakhal-Narwana and Jakhal-Hisar are Jakhalmandi, Himmatpura, Tohana, Jamalpur Shekhan, Pirthala-Lalauda and Gajuwala. As per Statistical Abstract of Haryana during 2000-01, the length of National Highway in the district was 37 kilometres and that of State Highways as 1,494 kilometres in 2010-11. On the Meter Gauge Railway Line Rewari -Bhatinda passing through the district Bhattu Kalan and Khabra Kalan railway stations exist.

Transport statistics as supplied by the Transport Commissioner, Haryana during 2010-11, motor vehicles registered in the district were as 1,809 Cars, 254 Jeeps, 1,344 Tractors, 9,864 Motor cycles/Scooters/Auto cycles 119 trucks, 17 taxies, 51 buses, 71 auto-rickshaws and 353 miscellaneous vehicles. Whereas motor vehicles on road in the district during the same period were 90,169 Auto cycles/Scooters/Motorcycles, 4,140 Jeeps, 9,978 Private Motor Cars 31,061 Tractors. 703 auto rickshaws, 64 taxies, 347 other public service vehicles, 3,052 goods vehicles and 295 miscellaneous vehicles.

Electricity and Power:

Power availability in the State has improved drastically over the last four decades which was 601 million KWH during 1966-67 and 26,466 million KWH during 2007-08. During 1966-67 per capita consumption was 48 units KWH which increased to 507 units per capita KWH during 2000-01 and 905 units per capita KWH during 2009-10. There were 47.9 lakh total electric connections in the State, out of which 36.8 lakh were domestic connections in 2010-11 whereas in Sirsa circle including Fatehabad district there were 1.91 lakh domestic connections out of total 2.61 lakh connections.

In Fatehabad district, power supply position is quite good. As regards use of electricity for domestic purposes, cent percent of the villages in the district are electrified. Out of 245 inhabited villages, all the villages make use of electricity for domestic purposes, agricultural purpose and for other purposes as per information supplied by the revenue authorities in Village Directories during 2009-10.

Gram Panchayats, composition, jurisdiction and role in Development of Village and its economy

Village has been the basic unit of administration and instrument of development of Indian Society since ancient times, the institute of **'Panchayat'** being an integral part of self-governance at grass-root level. The term 'Panchayati Raj' refers to the process of governance at the lowest level i.e. Panchayat. There is a three tier system of governance in the State; 'Gram Panchayat' at the village level, 'Panchayat Samiti' at the community development block level and 'Zila Parishad' at the district level.

Haryana state has been in front line by effecting the 73rd amendment in the consititution Act of Parliament, 1992 with a view to make Panchayti Raj institution, (PRI) especially the Gram Panchayats, a centre of decision making machinery at the local level and viable to plan, execute and monitor various projects of development at their own level in accordance with law. During 2008-09 state govt .launched four new schemes, namely, Mahatma gandhi Granin basti yojana, special development works scheme, Mukhya Mantri Anusuehit jati Nirma besti yojana, Grant – in aid to Panchayats in lier of abolition of house tax. An amount of Rs 866.1 crore was allocated to development for Panchayats department, out of which 683.1 crore was made over and other bodies in the state as grants under various schemes like matching Grants Scheme, Revenue Earning scheme, state Finance Commission Grants Scheme, Honorarium to village chowkidars and representatives of Panchayati Raj Institutions, Health and sanitation, Education, Rural Roads and communication schemes, constructions of Anusuchit jati/ Backward class/General class chaupals (subsidiary scheme), Total sanitation campaign, pavement of streets, etc. Besides states budgetary allocation, the PRI's were allocated Grants –in-aid by Govt. of India as per recommendations of the Central Finance Commission and annual lease money of village shamlat lands had been other major sources of income of the Gram Panchayats.

Haryana Panchayati Raj Act 1994, provides that the Government shall by election establish a **Gram Panchayat** by name in every **Sabha Area** constituted for any village or a part of village or group of contiguous villages with a population of not less than five hundred and the Gram Panchayat shall consist of a Sarpanch elected by Gram Sabha from amongst its Voters, by secret ballot and **Six** to **Twenty Panches** from wards in a Gram Panchayat area. Haryana Panchayati Raj Election Rules, 1994 further provide that the minimum number of seats/wards in a Gram Panchayat having population upto 500 shall be Six and for every additional five hundred populations or fraction thereof one extra seat shall be provided subject to a maximum of Twenty seats.

The last general elections of Panchayats in the State were held in March, 2010 under the provisions of Act of 1994. Every Gram Panchayat, Panchayat Samiti and Zila Parishad has adequate seats reserved for Scheduled Castes and also for the women. The district has 245 Gram Panchayats, 6 Panchayat Samitis and the Zila Parishad.

It is obligatory on the part of a Gram Panchayat to make adequate arrangements in the field of agriculture, animal husbandry, dairy milk, poultry, fisheries, social and farm forestry, minor forest produce, fuel, fodder, village and cottage industry, drinking water, rural electrification and non-conventional energy sources, poverty alleviation programme, education, adult and non formal education, public libraries, cultural activities, markets and fares, rural sanitation, public health and family welfare, women and child development, social welfare which also includes welfare of the handicapped and mentally retarded, welfare of the weaker sections, public distribution system, maintenance of community assets, construction and maintenance of dharamshalas and similar institutions, cattle sheds, ponds, cart-stand/bus stop, regulation of manure pits in public places, etc. Panchayat Samitis are meant to oversee the activities being undertaken by Gram Panchayats and assist them in achieving their goals. At the district level, it is the Zila Parishad which coordinates and advises the government on the issues relating to developmental activities in the villages,

allocation of work to Gram Panchayats and Panchayat Samitis and also approves the budget required for Gram Panchayats and Panchayat Samitis in carrying out developmental programmes.

(ii) Census concepts :

Building: A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca houses: Houses, the walls and roof of which are made of permanent materials. The material of walls can be anyone from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kutcha houses: Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kutcha house.

Dwelling Room: A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and veranda which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census house.

Village: The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village

is treated as one unit for presentation of data. In un surveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area: The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The urban area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns : All places with a municipality, corporation, cantonment board or notified town area committee, etc are known as statutory towns.

(b) Census owns: All other places satisfying the following three criteria simultaneously are treated as Census Towns.

i) A minimum population of 5,000;

ii) At least 75 percent of male working population engaged in non-agricultural pursuits; and

iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 percent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

Urban Agglomeration: An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the exiting town as their continuous urban spread (i.e., an Out Growth).Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'urban agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(a)The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b)The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG): The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc and physically contiguous with the core town of the UA.

City: Towns with population of 100,000 and above are called cities.

Household: A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a

household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household: A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggar's homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household : Households who do not live in buildings or census houses but live in the open or roadside, pavements, inhume pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

HARYANA
हरियाणा
SCHEDULED TRIBES
अनुसूचित जनजातियां
NIL
शून्य

Language and Mother tongue: As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate: A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate: Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level: The highest level of education a person has completed.

Work: Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker: A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker: A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker: A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as

'Non worker'.

Cultivator: For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like– tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under "other workers".

Agricultural labourer: A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker: Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker: A person, who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work participation rate: Percentage of Workers (Main + Marginal) to total population.

Population density: Population density is the number of persons inhabited per square kilometre of the area.

Age: Age is measured in terms of the completed number of years.

Sex Ratio: Number of females per 1,000 males in a population.

(iii) Non-Census Concepts :

Civic status of urban units: Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of U.A./town: Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population are classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000- 19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area: The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city : The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities and the same criteria of population have been adopted in 2011 census.

(iv) 2011 Census findings – Population, its distribution :

Fatehabad district having a population of 942,011 consists of 495,360 male population and 446,651 female population. Decadal growth rate of 16.9 percent has been recorded in the district during 2001-2011 period.

The density of population in the district has gone up to 371 persons per square kilometer in 2011 as against 318 persons in 2001. As per Census 2011 in Haryana the rank of density is 19thout of 21 districts of Haryana.

The literacy rate of the district is 67.9 percent as compared to the State literacy rate of 75.6 percent and it is ranking 20thamong the districts of the State. The literacy rate is higher in urban area as compared to rural area. It is 78.0 percent in urban area and 65.5percent in rural area. The male literacy rate (76.1) is also higher than that of female literacy rate (58.9). The gap between male and female literacy rate is of 17.2 points during 2011. In female literacy the district ranks at 19thposition.

Out of a total population of 942,011 in the district, 762,423 persons live in rural area whereas 179,588 persons live in urban area. About19.1 percent of the total population of the district lives in urban area but accounts for 2.0 percent of the total urban population of the state in 2011. The decadal growth of population in the district is 16.9 percent during 2001-2011and it is 14.8 percent in rural area and 26.3 percent in urban area.

Sex Ratio is defined as number of females per 1000 males. It is surprising that the sex ratio in all the districts of Haryana is below the National Average (943) in 2011 Census. For the State as a whole, the sex ratio was 867 in 1901, 871 in 1951, 865 in 1991, 861 in 2001 and 879 in 2011, but Fatehabad district has recorded sex ratio varying from 877 in 1991 to 884 in 2001 and 902 in 2011. As per Census 2011 the rank of Fatehabad District in respect of sex ratio is 496 out of 640 districts which speak of its poor performance on this front. If we talk about tahsil sex ratio in 2011, Ratia tahsil possesses a sex ratio of 918 and Tohana tahsil possesses a sex ratio of 897 and Fatehabad tahsil possesses a sex ratio of 898.

The strength of population in 0-6 age group in Fatehabad district has decreased to 121,024 in 2011 from 129,744 in 2001 and the proportion of population in 0-6 age group is 12.85 percent in 2011. The child sex ratio of the district is 854 in 2011 as compared to 828 of 2001. The child sex ratio in Ratia tahsil is 862 and it is 829 in Tohana tahsil and it is 865 in Fatehabad tahsil.

Population of the Scheduled castes has been reported as 284,357 persons in the district out of which 149,111 are males and 135,246 females. The percentage of Scheduled

Castes population to total Population in the district is 30.2 percent as compared to 20.2 percent of the State.

In Fatehabad district total 369,083 persons have been reported as workers in 2011 out of which 312,610 persons reside in rural area and 56,473 persons reside in urban area. In the district 30.39 percent have been reported as main workers, 8.79 percent have been reported as marginal workers and 60.82 percent have been reported as non-workers. The Work Participation Rate (WPR) of the district is 39.2 percent, the rural Work Participation Rate is 41.0 percent and the urban Work Participation Rate is 31.4 percent as per Census 2011whereas the WPR as per 2001 Census was 45.0 percent, the rural WPR was 48.0 percent and the urban WPR was 31.1 percent. Out of the total workers (Main & Marginal) 35.8 percent have been reported as Cultivators, 26.6 percent have been reported as Agricultural Labourers, 1.8 percent have been reported as HHI workers and 35.8 percent have been reported as Other Workers.

When we talk about Work Participation Rate at tahsil level, Ratia tahsil possesses a WPR of 38.6 percent, male WPR is 54.5 percent and female WPR is 21.2 percent. There is a gender gap in the WPR of 33.3 points in the tahsil which is noticeable. Tohana tahsil possesses a WPR of 36.5 percent, male WPR is 52.1 percent and female WPR is 19.2percent. There is also a noticeable gender gap in the WPR of 32.9 points in this tahsil which is noticeable. Fatehabad tahsil possesses a WPR of 40.8 percent, male WPR is 53.3 percent and female WPR is 26.9 percent. There is also a noticeable gender gap in the WPR of 26.4 points in this tahsil.

The house listing data of Census 2011 reveals that there are 258,380 census houses in the district out of which 243,105 are occupied and 15,275 are vacant. As such the proportion of vacant houses in Fatehabad district (5.9 percent) is lower than that of the State (8.7 percent) which is a cause of concern. Further, among the occupied census houses 72.4 percent are under use for residential or partly residential purposes.

Separate Kitchen is available to 61.7 percent of the households in this district. This percentage, being 16th highest in the State, is significantly lower than that of the State (66.5 percent) and slightly higher than that of the country (61.3 percent) too. 0.2 percent of the households do not cook in the house.

The use of LPG as fuel for cooking in the district is 29.4 percent which is significantly lower than that of the State (44.0 percent) and slightly higher than India (28.6 percent).

The use of electricity as the source of lighting is fairly high in all the districts in the State as such. In Fatehabad87.1 percent of the households use electricity as the main source of lighting in comparison to 90.5 percent of the State and 67.3 percent households in India.

Availability of bathroom and latrine within the household are critical indicators for measuring women's health status in society. Fatehabad district with 86.4 percent of the households having separate bathroom is better placed than the State (82.5 percent) and India (58.4 percent) as such. Likewise, the percentage of households with no latrine in Fatehabad (23.6 percent) is less than that of the State (31.4 percent) and India (53.1 percent). The position of Fatehabad district with regard to waste water out-let connected to drainage, closed or open, is encouraging. Only 22.7 percent of the households in the district have no drainage for the waste water out-let in comparison to the State with 13.7 percent and India with 48.9 percent.

63.9 percent of the households in Fatehabad district are availing banking services which is higher than that of the State (68.1 percent) and India (58.7 percent).

As regard availability of specified assets, Fatehabad district is one of the best equipped in the State. 60.8 percent of the households in the district have the availability of television which is lower than that of the State (67.9 percent) and higher than India (47.2

percent). Likewise, telephone is available to 77.3 percent of the households which is again lower than that of the State (79.3 percent) and higher than India (63.2 percent). Furthermore, in the district the availability of the computer to the household is 7.5 percent in comparison to 13.2 percent of the State and 9.5 percent of India. Further, in Fatehabad district29.9 percent of the households possess Scooter/Motor Cycle/Moped and it is the highest in the State. In terms of the luxury of car/jeep/van, in the district 8.0 percent of the households have the availability of these assets in comparison to 10.5 percent of the State and 4.7 percent of India.

Interestingly, only 11.1 percent of the households have reported none of the specified assets availability in comparison to 9.4 percent of the State and 17.8 percent of India.

(v) Brief analysis of PCA data based on insets tables 1 to 35

Table 1: Decadal change in population of Tahsils by residence, 2001-2011

Table 1 shows decadal change in population of tahsils by residence. The district has experienced decadal growth of 16.85 percent during 2001-2011. In absolute terms, there has been an addition of 135,853 (from 806,158 in 2001 to 942,011 in 2011). Tohana tahsil has experienced decadal growth of 15.23 percent which is less than that of Fahehabad tahsil (17.77 percent) and Ratia tahsil (16.73 percent). Urban population of the District has registered an increase of 26.33 percent where as rural population registered an increase of 14.82 percent during 2001-2011.

Table 2: Number and percentage of inhabited villages in specified population size ranges with the related population, 2011 (Rural)

Table 2 details number and percentage of inhabited villages in specified population size ranges in the district. In Tohana CD block, 2 villages fall in the range of less than 200 and followed by 1 village in Ratia C.D. block and 1 village in Jakhal C.D. block. In district highest number of villages (101) is noted in population range of 2000-4999 followed by 57 villages in population range of 1000-1999, 33 villages in population range of 500-999, 28 villages in population range of 5000-9999, 4 villages in population range of less than 200 and 14 villages in population range of 200-499. In population range group of 5,000-9,999, there are 28 villages having population 191,843 persons in the Fatehabad district.

Table 3: New towns, de-notified, declassified and merged town in 2011 census

(a)	New
	(i) Statutory town
	Nil
	(ii) Census town
	1.Jakhalmandi(8044)
(b)	Denotified (i)Statutory towns of 2001 census denotified and also did not satisfy the criteria to be treated as census towns.
	Nil
	(ii)Statutory towns of 2001 census denotified but identified as census towns based on demographic and economic criteria.
	1. Jakhalmandi(8044)
	(iii)Census towns of 2001 census are notified as statutory town in 2011 census.
	Nil
(c)	Declassified
	Nil
(d)	Wholly merged with other town(s).
	Nil

*Declassified means the census towns of 2001 census which failed to satisfy the demographic and economic criteria.

Table 3 depicts new towns, denotified, declassified and merged towns in 2011 Census. In Fatehabad district, there is no new statutory town notified after census 2001. The new Census Town of the district is Jakhal Mandi (8044).

TABLE 4 : SEX RATIO OF STATE AND DISTRICT, 1901-2011

Census year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	867	861	908	-	-	-
1911	835	834	842	-	-	-
1921	844	848	811	-	-	-
1931	844	851	792	-	-	-
1941	869	879	806	-	-	-
1951	871	877	845	853	850	881
1961	868	874	842	852	850	864
1971	867	870	853	870	869	881
1981	870	876	849	881	882	875
1991	865	864	868	877	877	878
2001	861	866	847	884	885	879
2011	879	882	873	902	902	899

Note :- Sex ratio has been defined here as the number of females per 1000 males

Table 4 gives us information regarding sex ratio in the district and the State from 1901 to 2011. Sex ratio of the district varies from 853 to 902 as per the data available from 1951-2011 as against the sex ratio of the State between 867 and 879 for the period 1901 to 2011. As far as Rural Urban break-up is concerned sex ratio in rural areas was much better up to 1991 than the urban areas and after 1991 trend increases during 2001 and 2011. In rural areas sex ratio of the district remained higher than the State it was 902 for the district and 882 for the state during 2011 Census.

Table 5: Sex ratio by Sub-district, 2011

Sr.No.	Name of Sub-district	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	00386-Ratia	918	920	911
2	00387-Tohana	897	898	896
3	00388-Fatehabad	898	898	896
	District: 078-Fatehabad	902	902	899

Table 5 presents sex ratio by tahsils. The district has an overall sex ratio 902 which is higher than the sex ratio of 879 in the State. The disparity in the sex ratio between the rural and urban areas is also significant. The rural areas have a sex ratio of 902 compared with 899 in their urban counter part.

Table 6: Sex ratio by CD Blocks, 2011

Sr.No.	Name of CD block	Sex ratio
1	2	3
1	0053-Ratia	920
2	0054-Jakhal	924
3	0055-Tohana	891
4	0056-Bhuna	888
5	0057-Bhattu kalan	891
6	0058-Fatehabad	907
7	0071-Uklana	880
	Total	902

Table 6 shows sex ratio by C.D. blocks. Among the C.D. blocks, sex ratio shows considerable disparity. It is the highest in Jakhal C.D. block (924) and the lowest in Uklana C.D. block (880) and thereby exhibiting a gap of 44 points. Tohana (891), Bhuna (888) and Bhattu Kalan (891) C.D. blocks in the district remain to be quite low in itself.

Table 7: Sex ratio of rural population by ranges, 2011

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2011	Percentage distribution of population
1	2	3	4	5
Less than 700	2	0.82	248	0.03
700 - 749	1	0.41	31	0.00
750 - 799	3	1.22	2261	0.30
800 - 849	13	5.31	26519	3.48
850 - 899	87	35.51	317231	41.61
900 - 949	110	44.90	373326	48.97
950 - 999	25	10.20	40254	5.28
1000 - 1099	4	1.63	2553	0.33
1100+	0	0.00	0	0.00
District: Fatehabad (078)	245	100	762423	100

Sex ratio District (Rural):902

Table 7 exhibits sex ratio of rural population by ranges. In the district 4 villages are female biased, having an excess of females over males and another 25 villages have a very high sex ratio in the range of 950-999. Rural sex ratio is fairly high (900-949) in as many as 110 villages of the district.

By contrast, the sex ratio is low (below 850) in 19 villages, and it is excessively low (below 800) in 6 villages of the district. The remaining 87 villages have a rural sex ratio in the range of 850-899.

Table 8: Sex ratio of towns, 2011

Sr.No.	Name of town	Urban status of town	Sex ratio
1	2	3	4
1	800396-Ratia (MC)	(MC)	911
2	800397-Tohana (M Cl)	(M Cl)	895
3	060411-Jhakal Mandi (CT)	(CT)	905
4	800398-Fatehabad (M Cl)	(M Cl)	896
	Sex ratio (Urban) district:		899

Table 8 gives town wise sex ratio. Urban sex ratio (899) is lower than the rural sex ratio (902) in the district. Town wise sex ratio is highest in Ratia MC (911) and lowest in Tohana Mcl (895) followed by Jakhal Mandi CT (905) and Fatehabad Mcl (896).

Table 9: Sex ratio of population in the age group 0-6 for Sub-district, 2011

Sr.No.	Name of Sub-district	Total/ Rural/ Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	00386-Ratia	Total	23384	12558	10826	862
		Rural	18701	10021	8680	866
		Urban	4683	2537	2146	846

		Rural	25169	13715	11454	835
		Urban	8819	4869	3950	811
3	00388-Fatehabad	Total	63652	34137	29515	865
		Rural	55389	29690	25699	866
		Urban	8263	4447	3816	858
	District: 078-Fatehabad	Total	121024	65279	55745	854
		Rural	99259	53426	45833	858
		Urban	21765	11853	9912	836

Table 9 presents Sex Ratio of population in age group 0-6 for tahsils. The district has a child sex ratio of 854 which is significantly lower than the over all rural sex ratio of 882 in the State. Contrary to the general trends rural child sex ratio (858) in the district is higher than the urban (836), and similar pattern is observed for all the 3 tahsils. Between the two tahsils, the rural child sex ratio in Ratia and Fatehabad tahsil is (866) which is significantly higher than that of Tohana tahsil (835), while in urban areas it is (858) in Fatehabad tahsil , (846) in Ratia tahsil and (811) in Tohana tahsil.

Table 10: Sex ratio of population in the age group 0-6 for CD Blocks, 2011

Sr.No.	Name of CD Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	0053-Ratia	19490	10409	9081	872
2	0054-Jakhal	6802	3706	3096	835
3	0055-Tohana	14480	7917	6563	829
4	0056-Bhuna	16420	8884	7536	848
5	0057-Bhattu kalan	12687	6757	5930	878
6	0058-Fatehabad	27231	14587	12644	867
7	0071-Uklana	2149	1166	983	843
	Total	99259	53426	45833	858

Table 10 reveals C.D. block wise sex ratio of population in the age group 0-6. Bhattu Kalan C.D. block (878) is ahead of the other C.D. blocks. It is closely followed by Ratia C.D. block (872), Fatehabad C.D. block (867), Bhuna C.D. block (848), Uklana C.D. block (843), Jakhal C.D. block (835) and the lowest in Tohana C.D. block (829). Interestingly, Bhattu Kalan C.D. block which has child sex ratio (878) is marked with fairly high child sex ratio in comparison to district child sex ratio (858).

Table 11: Sex ratio of rural population in the age group 0-6 by ranges, 2011

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2011	Percentage distribution of population

Sex ratio District (Rural):858

Table 11 presents sex ratio of rural population in the age group 0-6 by ranges. As many as 23 villages have a sex ratio of less than 700 in the district. 44 villages have a sex ratio varying from 700-799. Among them 13 villages fall in the range of 700-749 and 31 villages fall in the range of 750-799. These villages together constitute 17.96 percent of the total villages and 15.07 percent of the total population of the district. More than one half (96) of the villages have a sex ratio varying from 800-899 and they comprise 52.85 percent of the rural population of the district. As many as 43 villages have a high sex ratio in the range of 900-949. Females out numbered males in 24 villages and in another 15 villages the sex ratio varies between 950 and 999 and these villages contain 10.82 percent of the total population.

Table 12: Sex ratio of population in the age group 0-6 of towns, 2011

Sr.No.	Name of town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group

	District (Urban): 078-Fatehabad		21765	11853	9912	836

Table 12 shows town wise sex ratio of population in the age group 0-6. Urban area in the district has child sex ratio of 836. Fatehabad MCL (858) is placed at the top while Jhakal Mandi CT (788) is placed at the bottom. Ratia MC (846) is the other town which have the urban child sex ratio more than that of the district average (836). Tohana MCL also possesses the child sex ratio as 814.

Table 13: Number and percentage of scheduled castes and scheduled tribes population in Sub-districts, 2011

Table 14 presents C.D. block wise number and percentage of Scheduled Castes and Scheduled Tribes population. There is no population notified as Scheduled Tribes in the State. Out of the total rural population of (762,423), 31.38 percent belong to Scheduled Castes population in the district. Among the C.D. blocks in the district, the percentage of Scheduled Castes population is the highest in Jakhal (45.58 percent) and is closely followed by Ratia (41.64 percent). The Scheduled Castes population in Tohana, Bhuna, Bhattu Kalan, Fatehabad, Uklana C.D. blocks is 36.76 percent, 26.1 percent, 19.68 percent, 27.2 percent, 24.44 percent respectively.

Table 15: Proportion of scheduled castes population to total population in villages, 2011

Table 15 portrays the proportion of Scheduled Castes population in the total population by ranges. Among the 245 inhabited villages, 5 have no Scheduled Castes population. The proportion of Scheduled Castes population constitutes less than 5 percent in 4 villages, 5-10 percent in 11 villages and 11-20 percent in 52 villages. Thus, Scheduled Castes population constitutes less than 20 percent in 72 villages of the total 245 inhabited villages. 31 villages in the district have proportion of Scheduled Castes population in the range of 51-75 percent, and in another 4 villages this percentage exceeds 75 percent. In the remaining 138 villages the share of Scheduled Castes population varies between 21 and 50 percent.

Table 16: Proportion of scheduled tribes population to total population in villages, 2011

Table 17 provides town wise number and percentage of Scheduled Castes and Scheduled Tribes population. There is no population notified as Scheduled Tribes in the State. In urban areas, 25.14 percent of the population belongs to Scheduled Castes which is less than that of rural areas of the district (31.38 percent). Jhakal Mandi CT has lowest population (18.71 percent) belongs to Scheduled Caste. Ratia MC has highest population (29.75 percent) belongs to Scheduled Castes followed by Tohana MCL 29.26 percent and Fatehabad MCL 19.71percent .

Table 18: Sex ratio among scheduled castes and scheduled tribes (rural) in CD Blocks, 2011

Sr.No.	Name of C.D.block	Scheduled castes sex ratio	Scheduled tribes sex ratio
1	2	3	4
1	0053-Ratia	921	0
2	0054-Jakhal	936	0
3	0055-Tohana	893	0
4	0056-Bhuna	888	0
5	0057-Bhattu kalan	900	0
6	0058-Fatehabad	907	0
7	0071-Uklana	855	0
	Total	907	0

Table 18 shows C.D. block wise sex ratio among Scheduled Castes and Scheduled Tribes. There is no population notified as Scheduled Tribes in the State. Among the C.D. blocks the sex ratio of Scheduled Castes population is the highest in Jakhal (936) and the lowest in Uklana C.D. block (855). The sex ratio of Scheduled Castes population in Ratia C.D. blocks is 921 and followed by Fatehabad C.D. block 907, Bhattu Kalan C.D. block 900, Tohana C.D. block 893, Bhuna C.D. block 888 respectively.

Table 19: Sex ratio among scheduled castes and scheduled tribes in towns, 2011

Sr.No.	Name of town	Scheduled castes sex ratio	Scheduled tribes sex ratio
1	**2**	3	4
1	800396-Ratia (MC)	936	0
2	800397-Tohana (M Cl)	884	0
3	060411-Jhakal Mandi (CT)	964	0
4	800398-Fatehabad (M Cl)	916	0
	District (Urban): 078-Fatehabad	909	0

Table 19 presents town wise sex ratio among Scheduled castes and Scheduled Tribes. There is no population notified as Scheduled Tribes in the State. It is significantly higher in Jhakal Mandi CT (964) and in Ratia MC (936). However, it is 916 in Fatehabad M CL, and 884 in Tohana M CL.

Table 20: Number of literates and illiterates, literacy rate by sex in sub-districts, 2011

Table 20 shows tahsil wise number and percentage of literates by sex in the district. More than three-fifth (67.92 percent) of the population in the district is literate; the corresponding figure for males and females is 76.14 and 58.87 percent respectively signifying that male-female differential in literacy 17.27 percent.

The literacy rate in Fatehabad tahsil is 69.66 percent followed by Tohana tahsil 67.65 percent and Ratia tahsil 63.46 percent. Similarly, the same trend follows for sex-wise literacy rates in Fatehabad tahsil (male 78.76 percent, female 59.58 percent), Tohana tahsil (male 75.08 percent, female 59.46 percent) and Ratia tahsil (male 70.33 percent, female 56.04 percent). 77.97 percent of the urban population and 65.52 percent of the rural population in the district is literate. Interestingly, urban literacy rate in Fatehabad tahsil (81.96 percent) is higher than that of Tohana tahsil (76.61 percent) and Ratia tahsil (72.89 percent).

Table 21: Number of literates and illiterates, literacy rate by sex in CD Blocks (rural), 2011

Literacy rate for District:	**65.52**			

Table 22 shows distribution of villages by literacy ranges. Villages in the district, in general, have relatively high literacy rate. Out of 245 inhabited villages, 5 villages fall in the range 81 to 90 percent literacy level. In addition, 35 villages fall in the literacy range of 71-80 percent and another 152 villages have literacy rate varying between 61 and 70 percent. This is to say that more than half of the villages have a literacy rate exceeding 60 percent. By contrast, low literacy rate (less than 50 percent) is the characteristic of only 2 villages. 51villages fall in the range of 51-60.

Table 23: Number of literates and illiterates, literacy rate by sex in towns, 2011											
Sr. No.	Name of town	Number of literates and illiterates						Literacy rate			Gap in male-female literacy rate
		Number of literates			Number of illiterates

Table 23 provides town wise number and percentage of literates by sex. 77.97 percent of the urban population is literate in the district. Jakhal Mandi CT (85.69 percent) is marked with the highest literacy rate among the towns. On the other hand Ratia MC has lowest literacy rate (72.89 percent). Overall trend shows that there is not much variation in literacy rate in the district. 83.03 percent of males and 72.39 percent of females of urban area are literates. Male Literacy rate is highest in Jakhal Mandi CT (89.45 percent) and lowest in Ratia MC(78.28 percent). Likewise female literacy rate is highest in Jakhal Mandi CT (81.62 percent) and lowest in Ratia MC (67.04 percent). In percentage point there is a gap in male-female literacy rate of 10.64 percent in the district and this gap is the maximum in Ratia MC (11.24 percent) and the minimum in Jakhal Mandi CT (7.83 percent).

Table 24 details C.D. block wise number and percentage of Scheduled Castes literates by sex. 55.29 percent of the rural population is literate in the district. Bhattu Kalan C.D. block (59.48 percent) is marked with the highest literacy rate among the C.D. blocks. On the other hand Ratia C.D. block has lowest literacy rate (50.25 percent). Overall trend shows that there is not much variation in literacy rate in the district. Male- Female differentials in Rural literacy rate is of 18.02 points. 63.88 percent of males and 45.86 percent of females of rural area are literates. Male literacy rate varies between 69.06 percent in Bhattu Kalan C.D. block and 57.66 percent in Ratia C.D. block. Similarly female literacy rate varies between 50.33 percent in Uklana C.D. block and 42.21 percent in Ratia C.D. block.

District Scheduled castes Literacy rate:	**55.29**			

Table 25 gives distribution of villages by literacy ranges for Scheduled Castes population. In the district 5 out of 240 villages have a literacy rate less than 40 percent. Majority of the villages (115) have a literacy rate of 51-60 percent and another 62 villages fall in the range of 61-70 percent. In other words, 47.92 percent of the villages which contain 57.86 percent of Scheduled Castes population have a literacy rate in the range of 51-60

percent. Further, 54 villages constitute 20.22 percent of the Scheduled Castes population and have a literacy rate in the range of 41-50 percent.

Table 26: Number of scheduled castes literates and illiterates, literacy rate by sex in towns, 2011

Table 26 presents town wise number and percentage of Scheduled Castes literates by sex. 58.41 percent urban Scheduled Castes population is literate in the district, out of which 65.55 percent are males and 50.59 percent are females. Literacy among Scheduled Castes population was found highest (65.04 percent) in Jakhal Mandi CT and lowest (51.54 percent) in Ratia MC. Gap between male-female literacy among Scheduled Castes in all the towns varies between16.49 in Fatehabad M CL to 10.66 in Jakhal Mandi CT.

Table 27, 28 and 29 pertain to Scheduled Tribes. There is no population notified as Scheduled Tribe in the State.

		Females	446651	55069	12.33	50516	11.31	105585	23.64	341066	76.36

Table 30 details tahsil wise number and percentage of total workers, main workers, marginal workers and non-workers by sex. In the district, (39.18 percent) persons are recorded as worker either main or marginal. Notwithstanding the spurt in female work participation rate during this decade, the proportion of male workers (53.19 percent) in the

district is greater than 2 times that of females (23.64 percent). The work participation rate in Fatehabad tahsil (40.81 percent) is higher than that of Ratia (38.55 percent) and Tohana tahsil (36.53 percent) and the same is true in case of males and females also (60.82 percent) in the district are non workers; the incidence of non-workers among females (76.36 percent) is almost twice that of males (46.81 percent).

Table 31 provides C.D. block wise number and percentage of main workers, marginal workers and non-workers by sex. 41.00 percent of the rural population is recorded as worker (30.96 percent as main workers and 10.05 percent as marginal workers). This percentage is fairly high. The percentage of workers is the highest in Bhattu Kalan C.D. block (44.29 percent) and the lowest in Tohana C.D. block (37.25 percent). An interesting feature emerged is that the highest female participation rate is 33.11 percent in Uklana C.D. block and the lowest female participation rate is 20.84 percent in Tohana C.D. block.

Table 32 presents town wise number and percentage of main workers, marginal workers and non-workers by sex. More than one third (31.45 percent) of the urban population of the district is recorded as worker (main worker 27.98 percent and marginal worker 3.47 percent). The towns among themselves do not exhibit much disparity in this regard; Fatehabad M CL (31.91 percent), Jakhal Mandi CT (31.60 percent), Tohana MCL (30.48 percent) and Ratia MC (32.18 percent).

The male female differentials in participation rates are however quite striking; the male participation rate in urban area (51.29 percent) is more than 5 times that of the females (9.39 percent). All the towns in the district reveal significant variation in the work participation rate of the two sexes.

Table 33 details tahsil wise distribution of workers by sex in four categories of economic activity. Out of total workers in the district 35.83 percent are cultivators, 26.55 percent are agricultural labourers, 1.78 percent are household industry workers and 35.84 percent are other workers. This signifies that the district is primarily agriculural in character as 62.38 percent of the working force is engaged in this sector either in the field of cultivators or as agricultural labourers. It is only 37.62 percent of the work force which is engaged in non-agricultural activities. The percentage of non-agricultural workers is 40.74 percent in Ratia tahsil and 43.26 percent in Tohana tahsil and 34.38 percent in Fatehabad tahsil.

The participation of females in Tohana and Fatehabad in the agricultural sector either as cultivator or as agricultural labourer is greater in comparison to males. In the district, more than three fourth of the females (71.13 percent) are engaged in agricultural sector either as cultivator (38.07 percent) or as agricultural labourers (33.06 percent).

Table 34 gives C.D. block wise distribution of workers by sex in four categories of economic activity. 41.00 percent of the rural population is recorded as workers. In the rural areas of the district, 41.61 percent are cultivators, 30.31 percent are agricultural labourers, 1.51 percent are household industry workers and 26.57 percent are other workers. This signifies that the district is primarily agriculural in character as only 71.92 percent of the working force is engaged in agriculture sector either as cultivator or agricultural labour. 28.08 percent of the work force is engaged in non- agricultural activities. The participation of females in the agricultural sector either as cultivator or as agricultural labourer with 76.14 percent is greater in comparison to males with 70.01 percent. Among female workers 2.05 percent are engaged in household industry and 21.81 percent in other activities.

Post office includes post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

@ Bank includes Commercial Bank and Cooperative Bank.

** Telephone includes Telephone,PCO and Mobile.

Table 36 gives C.D. block wise distribution of villages according to availability of different amenities. Out of 245 inhabited villages in the district, 97.14 percent are served by educational amenity, 75.92 percent by medical amenity, 50.61 percent by postal, 100 percent by telephone and transport and communications, 25.31 percent by banks, 28.57 percent by agricultural credit societies, 85.71 percent approach by pucca road, 100 percent by improved drinking water. Power supply is available in all the villages. Educational amentiy ratio is the lowest in Tohana C.D. block (92 percent). All the villages of Bhuna, Fatehabad, Uklana C.D. block possess educational amenity. All villages of the district possess amenity of improved drinking, Telephone, Transport Communications, Power supply.

Table 37 presents C.D. block wise number and percentage of rural population served by different amenities. Major chunk of population is served by educational (99.73 percent), improved drinking water (100 percent), telephone (100 percent), transport and communication (100 percent), approach by pucca road (86.25 percent) and power supply (100.0 percent) amenities. Ratios of population served by medical (88.31 percent), postal (74.1 percent), banking (44.06 percent) and agricultural credit societies (50.37 percent) amenities are relatively lower. Jakhal C.D. block population is poorly served in respect of banks (20.89 percent) and postal (47.31 percent), agricultural credit society (6.31 percent).

Table 38: Distribution of villages not having certain amenities, arranged by distance ranges from the places where these are available, 2011

Table 38 depicts distribution of villages not having certain amenities arranged by distance ranges from the places where these are available**.** 6 villages in the district do not have primary school but have at a distance of up to 5 kilometres. In case of middle school, out of 56 villages not having this amenity, the same is available within 5 kilometres in 39 villages and in the remaining 12 villages available at a distance of 5-10 kilometres, only for 5 villages it is available at more than 10 kilometres. The degree college is not available in 243 of the villages in the district; the same is available at a distance of upto 5 kilometres in respect of 16 villages, at a distance of 5-10 kilometres in 79 villages and at a distance of more than 10 kilometres for 148 villages.

226 villages in the district do not have hospital within the village and the same is available to them at a distance of less than 5 kilometres in respect of 27 villages, at a distance of 5-10 kiliometres in respect of 92 villages and at a distance of more than 10 kilometers in case of 107 villages in the district. Out of 230 villages which do not have PHC available to them within the village, the same is available within five kms. in case of 44 villages, at a distance of 5-10 kms. for 131 villages and at a distance of more than 10 kms. in respect of 55 villages.

121 villages do not have Post Office within the village and the same is available to them at a distance of less than 5 kms. There is no village in the district which does not have telephone amenity and Bus service available to them within the village. 215 villages do not have the facility of Commercial Bank. Among them same is available within 5 kms. in case of 38 villages, at a distance of 5-10 kms. in case of 105 villages and at a distance of more than 10 kms. for 72 villages.

Table 39: Distribution of villages according to the distance from the nearest statutory town and availability of different amenities, 2011

** Telephone includes Telephone,PCO and Mobile.

Table 39 gives distribution of villages according to the distance from the nearest statutory town and availability of different amenities. Out of 19 inhabited villages which fall in the range of less than 5 kms. from nearest statutory town, 19 villages have education facility 15 villages have medical facility, 7 villages have postal facility, 19 villages have telephone and transport facility within the village. Out of 127 inhabited villages falling in 5-15 kms range, 124 Villages have the amenity of education, 94 villages have medical amenity, 56 villages have postal amenity, 127 villages have telephone and transport and communication amenity. Villages which are at a distance of 16-50 kms. from the nearest statutory town have better proportion of different amenities. Only two villages fall in unspecified.

Table 40 presents distribution of villages according to population range and amenities available. Proportions of villages having amenities available are better in higher ranges such as 2000-4999, 5000-9999 and 10000+. There are 8 villages in 10000+ range of population. Highest number of villages is in 2000-4999 population ranges. Proportion of villages having amenities is the lowest in the villages in the population range 1-499.

Table 41: Distribution of villages according to land use, 2011

Sr.No.	Name of CD Block	Number of inhabited villages	Total area (in Hectares)	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	0053-Ratia	67	52334.00	88.87	99.42

3	060411-Jhakal Mandi (CT)	8	8	4	4	0
4	800398-Fatehabad (M Cl)	5	4	4	2	0
	District: Fatehabad (078)	5	5	3	2	0

Note- * College includes

Arts/ Science/ Commerce College (Degree Level and above)

Table 42 presents schools/colleges per 10,000 population in statutory towns. Urban areas, in general, have 5 primary schools, 5 Junior Secondary/Middle schools, 3 Secondary/Matriculation schools, 2 Senior Secondary school per 10,000 population. As far as secondary/matriculation schools are concerned, Jakhal Mandi (CT), Tohana MCL and Fatehabad M Cl with 4 schools per 10,000 population leads among the urban areas of the district followed by 2 in Ratia MC. Overall position of colleges is that a college is available after every one lakh of urban population.

Table 43: Number of beds in medical institutions in towns, 2011

Sr. No.	Name of the town	Number of beds in medical institutions per 10,000 population (Approx. numbers)
1	2	3
1	800396-Ratia (MC)	8
2	800397-Tohana (M Cl)	11
3	060411-Jhakal Mandi (CT)	64
4	800398-Fatehabad (M Cl)	14
	District: Fatehabad (078)	14

Table 43 gives town wise number of beds in medical institutions. In Jakhal Mandi (CT) 64 BEDS, Fatehabad (Mcl) 14 beds, Tohana (Mcl) 11 beds and Ratia (MC) 8 beds serve the needs of urban as well as rural population of the district. Overall average in urban areas of the district is 14 beds per 10,000 population.

Table 44: Proportion of slum population in towns, 2011

Sr.No.	Name of the town having slum	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	800396-Ratia (MC)	37152	14316	38.53
2	800397-Tohana (M Cl)	63871	16281	25.49
3	800398-Fatehabad (M Cl)	70777	22439	31.70
	Total	171800	53036	30.87

Table 44 shows that there is slum population in three towns of the district which comes to 30.87 percent of the total population of these three towns. Ratia M.C. has 38.53 percent of population as slum population whereas Fatehabad M CL has 31.70 percent as slum population. Tohana MC has 25.49 percent of population as slum population.

Table 45: Most important commodity manufactured in towns, 2011

Sr. No.	Name of the town	Name of three most important commodities manufactured
1	2	3
1	800396-Ratia (MC)	Agri Tools, Ginned Cotton, Soap
2	800397-Tohana (M Cl)	Agri Tools, Rice Mill, Khal Binola
3	060411-Jhakal Mandi (CT)	Agri Tools, Cotton Seed Oil, Sela Rice
4	800398-Fatehabad (M Cl)	Agri Tools, Biscuits, Plastic Pipes

Table 45 gives information about the most important manufactured and exported items from the towns of the district. The district is predominantly agricultural. A few big industies like Hafed Ginnings Cotton seed exist in the district. Agri Tools, Plastic pipes, Soap, Rice, Biscuits are manufactured in the district. Most important items exported from Fatehabad district vary from agricultural products to heavy industrial machinery.

(vii) Major social and cultural events:

Important festivals celebrated in the district, are Diwali, Dussehra, Ram Naumi, Janam Ashtami, Shivratri, Gugga Naumi, Holi, Basant Panchmi, Teej and Sankrant. These festivals are celebrated here as in other parts of the country. However, Teej or Haryali Teej, Sankrant, Sanjhi, Goverdhan Puja, Phag and Kartik Snan are special festivals of the district and are celebrated with great festivity. Teej or Haryali Teej is a seasonal festival falling on Sawan Sudi 3 (beginning of August). The rainy season starts gathering momentum near about the said date and trees withered away by the scorching spell of summer put forth tender and green leaves. To celebrate the change of season, newly married girls go back to their parents for celebrating first Teej with their girl friends. On Teej, bevies of young girls attired in their best clothes and wearing new multi-coloured glass bangles start pouring in some open space or a tree-grove near the villages for the girls to swing. They swing with agility and sing songs. The humour, pathos and passions contained in these songs are really touching. The in-laws of the girl send gifts of ornaments, clothes and sweets and parents also give gifts when married girls go back to their in-laws.

Sakrant and Makar Sakranti is celebrated on Magh-1 (January-February) when people clean their houses and streets and take bath in the tank or canal. The jagana, the custom in which father-in-law poses himself to be asleep and is awakened by the daughter-in-law by striking two coconuts. The gifts are also given to the parents-in-law and other elderly people in the house. Friends also exchange clothes on this festival.

Sanjhi is celebrated before Dussehra. An idol of a woman is made on the wall of the house with mud and is decorated with clothes and ornaments. The festival starts 10 days before Dussehra and the girls sing songs in praise of Sanjhi for 10 days. On Dussehra the idol is removed from the wall and is placed in an earthen pot pierced with holes and having lighted earthen lamp. The girls carry the pot with idol on their heads along with the devotional songs and immerse it in a nearby tank or canal.

Goverdhan Puja is observed on the day following Diwali. Cow-dung cakes representing the Goverdhan Rock connected with Lord Krishna are worshipped.

Phag is celebrated on the day following Holi. Menfolk throw coloured water on women, women in turn beat men with korda (twisted cloth strips). The men act as if they are powerless or are unable to defend themselves. This leads to much fun and frolic.

Kartik Snan is observed for one month by girls and women in the month of Kartik (October-November). They go to the tank or canal early in the morning to take bath and worship Lord Krishna after the bath. The festival is connected with Lord Krishna who is said to have promised the gopis that he will meet them in future in the month of Kartik.

The festivals of Jains, Christians, Sikhs and Muslims are also celebrated in the district.

Community life is expressed through folk songs, dance and theatre. Despite increasing urban influence and westernisation influence, folk culture still continue to enliven the rural life. Radio stations and television channels play a vital role in the revival of folk culture in the region. Folk culture is preserved by women through folk songs connected with different occasions like Haryali Teej in the month of Srawana, Basant Panchmi in the month of Phalguna, folk songs on different ceremonies during marriages and songs connected with other festivals and religious occasions. Loor is popular female dance of the district connected with Holi.

Voluntary Orgnisations:

Voluntary Organisations play a pioneer role in the provision of welfare service to the vulnerable sections of society i.e. women, children and handicapped persons. Northern region

in the country is unfavourably placed as far as number of agencies working in this field is concerned as compared to the Southern region. However, there has been remarkable increase in the number of Voluntary Organisations after creation of Haryana State in 1966. These organisations not only undertake programmes with their own resources, but also implement projects sponsored by the State. Government also assigns importance to the welfare services and helps them by sizeable allotments.

As per Directory 2000, published by the Director, Social Justice & Empowerment, Haryana the following Welfare Organisations were functioning in different fields in the district:

1. District Council for Child Welfare, Fatehabad

Located in Bal Bhawan, Fatehabad, it runs programmes for the Welfare and Development of the children and also provides useful information to them.

2. Samaj Kalyan Avam Jagriti Sangh, Fatehabad

Located in Gali Ram Bagh, G.T. Road, Fatehabad, it helps in the welfare of the Aged Persons.

3. Distt.Red Cross Society, Fatehabad

Located Near Old Bus Stand, Fatehabad, it provides financial assistance to poor destitute women/orphan and also provides free medical check up facility. It has also set up a Rehabilitation Centre for the Handicapped.

(viii) Brief description of places of religious, historical or archaeological importance and places of tourist interest in the district

Banawali (Fatehbad Tahsil)

Banawali, an important Harappan site, lies 14 kms north-west of Fatehabad. The proto-historic mound spread over a quarter square kilometre was first occupied about the first half of the 3rd Millennium B.C. by a proto-urban chalcolithic community succeeded by the people of Harappan culture around 2300 B.C.

Banawali is the latest pre-Indus and Indus site of urban dimensions added to the archaeology of the Indian sub-continent and rivals in importance to sites like Kotdiji and Chanhudaro (Sind-Pakistan), Kalibangan (Rajasthan), Surkotda and Lothal (Gujarat), Rakhigarhi and Mitathal (Haryana).

Excavations have revealed a well constructed fort-town of the Indus times overlying an extensive proto-urban settlement of the pre-Indus culture. A fairly coherent picture can be conjured up after piecing together the ancient relics that have been discovered. The people here lived in brick houses and used pottery and implements made of copper, bone and stone. They used beads and bangles as ornaments.

The town planning at Banawali is similar to that of the other Indus cities. Two sub-joined fortified areas, have been sub-divided into various house-blocks. Broad uninterrupted north to south thorough-fares are met at right angles by east to west lanes and allays. Beautiful dishes-on-stand, fruitstands,'Kalash', jars with'S' shaped necks, storage or sanitary jars, perforated jars, numerous vases, cooking handies, beakers, basins, goblets, chalice cups, handled cups etc. are the principal items of Indus pottery recovered at Banawali.

Other interesting finds are the clay seals. One of those bears a three lettered epigraph and an engraved syncretic animal with a tiger's body and the bull's head. Other seals show a wild

goat and ibex while yet another seal contains an inscription. These seals were probably used for sealing packages of commercial goods or as passports or tokens of identity.

Fatehabad

Fatehabad, the district headquarters town is important for cotton market and historical monuments. It was named after Fateh Khan, son of Feroz Shah Tughlaq in A.D. 1352. An important monument is the 'lat' or a stone pillar of Feroz Shah measuring slightly less than 5 metres in height and 1.9 metres in circumference, at the base. It stands in the centre of the Idgah. About three and a half metres length of the pillar above the ground is a monolithic block of yellowish buff sandstone which has close resemblance to a similar portion of the pillar, now standing in front of a mosque at Hisar. It is more than likely that both these once made up a single monolithic pillar, which might have been erected by the Mauryan Emperor, Ashoka, who caused pillars to be set up all over. Epigraph that was once engraved on the pillar in Fatehabad has been systematically chiselled off for writing the Tughlaq inscription which records the genealogy of Feroze Shah, in beautiful Tughra-Arabic characters carved in high relief. The one and a half metre high upper part of the pillar is made of red sandstone pieces with partial use of marble.

Humayun Ki Masjid is another monument. It is a small and unassuming but proportioned and enamel docorated little mosque. According to a legend, the Mughal Emperor, on his flight to Amarkot, after his fateful defeat at the hands of Sher Shah Suri, happened to pass through Fatehabad on Friday, and is said to have prayed at the mosque. Humayun's inscription was originally found here and later studded into the screenwall of the Idgah.

Ratia:

The town is tahsil headquarters of the same name. It is located on the bank of the Ghaggar river, about 23 kms north of Fatehabad and it is situated on Fatehabad-Tohana road .Local traditions attribute the foundation of the town to Rattan Nath, a sadhu with extraordinary powers, who medicated at the sight and the town was named after him. The town was deserted during the famine of 1783 but was again populated in 1816 by Rattan Singh Jat and the Patiala chief eracted a fort and an out post here. In 1837, Ratia and Tohana parganas were added to Hisar district and were formed into a separate tahsil, namely, Tohana.In 1852, the pargana of Ratia was transferred from Tohana tahsil to Fatehabad tahsil. Ratia was constituted into a municipality in 1874-75 but was abolished in 1886-87. Now it is an upcoming town and is well provided with basic amenities. Again in 1976, it was declared as a notified area committee. Street lighting was provided to the town in 1978.

Tohana :

The town is tahsil headquarters of the same name. It lies at a distance of about 70 kms from Hisar and 56 Kms from Fatehabad. The town is located on Fatehabad–Ratia-Tohana-Munak road and Hisar-Barwala- Tohana-Munak road. The town is identified with ancient Taushyana mentioned by Panini. After the fall of Kurus, the town along with other towns like Hisar, Sonipat , Rohtak and Rodi seems to have come under Nandas and Mauryas. Local traditions attribute the foundation of the town to Anangpal and anangsar tank named after him still exists. There is an old Baoli, near tahsil building, said to be connected with Anangsar tank through a tunnel. An old Shiva temple exists here. The town was deserted during the famine of 1783 but was repeopled in 1801. In 1837, it was a tahsil of Hisar district comprising parganas of Ratia and Tohana. But Ratia pargana was transferred to Fatehabad

tahsil in 1852. Tohana was constituted as a municipality in 1874-75 but abolished in 1886-87.Then declared a notified area in 1898 and was converted into small town in 1924 and class III municipality in 1954, again notified area in 1973.

(ix) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district:

The areas comprising Fatehabad district made a valuable contribution to the Haryana heritage. Antiquity of the area can be established on the basis of discovery of pre-historic and historical sites at Banawali (14 kms north-west of Fatehabad) and Agroha. The evidence of the excavations at Banawali (on the lost course of the Saraswati) provides the earliest phases of history of the district. The earliest settlers in the district were pre-Harrapans who in the first half of the 3rd millennium B.C. are supposed to have migrated to Banawali from north Rajasthan. They built houses of kiln-baked bricks. They were skilled in producing pottery with a wide range of decorative shapes, knew copper smelting, used ornaments of beads, gold, semi-precious stones, terracotta, steatite and bangles of clay, shell and copper. The region was closely associated with the political and cultural life of the Bharatas, the Purus and the Kurus, the prominent tribes of the Aryans.

As per the account of Panini, a few towns of the region Aisukari ,Taushayana and Roni which have been identified with Hisar, Tohana and Rori respectively. Agroha seems to have come to prominence about the time of Alexander's invasion. Discovery of Ashokan pillars at Hisar and Fatehabad suggests that the region was included in Mauryan empire.

(x) Scope of Village and Town Directory:

Village Directory:

Concepts used in VD and TD of DCHB:

1. Educational Amenities:-The type of different educational facilities available in the village is given in numbers. Both Government and private educational facilities / institutions are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions, so also in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder:

1.1 Pre-primary (PP): Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from pre primary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

1.2 Primary School (P): Schools providing education from Standard 1 and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 Middle School (M): Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class 1 to VIII is treated as two units, i.e. one Primary School and one Middle School.

1.4 Secondary School (S): Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with 1 to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 Senior Secondary School (SS): Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6. Degree College: (i) **Arts/Science/Commerce**: These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) **Engineering College (E)**:It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M.Tech.

(iii)**Medical Colleges:** These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. Management College/ Institute (MI): It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt): An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI: It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC): Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled: There are Government and Government recognized institutions/organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities: 2.1 Hospital-Allopathic and Hospital-Alternative medicine: A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there are hospitals providing facilities under different systems of medicines such as, Allopathy, Ayuveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b)Ayurveda: Ayurveda means 'Science of life'. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combinations of these five elements are represented in the form of Tridosha: Vata, Pitta and Kapha. These three 'doshas' are physiological entities of living beings. Ayurveda developed into eight distinct specialities, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c)Unani: Treatment of Unani consists of three components, namely, preventive, primitive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Artharitis. Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d)Homoeopathy: Treatment in Homoeopathy, which is holistic in nature, focuses on an individual's response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30- bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3 Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer**.** A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4 Primary Health Sub- Centre (PHS): A Primary Health Sub-centre is the first contact point between the primary health care system and the community. As per the population

norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female heath worker.

2.5 Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counselling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7 Health Centre: Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8 Dispensary: Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9 Veterinary Hospital: Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc in rural areas.

2.10 Mobile Health Clinic: These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre: Check-up and counselling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12Nursing Home: A nursing home is a long –term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies, treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13Medicine Shop: A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are not taken as medicine shops.

3. Drinking water: The following are the main source of drinking water facility (ies) available in the village.

3.1 Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as 'Tap water from treated source'.

3.2 Tap Water-un-treated: If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as 'Tap water from un-treated source'.

3.3 Covered Well (CW): A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW): A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both.

3.5 Hand Pump (HP): Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube Well / Borehole (TW): Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self explanatory.

4. Community Toilet Complex: Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM): It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community bio-gas or recycle of waste for productive use: Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When recyclable solid wastes are subjected to decomposition, bio-gas could be produced under favourable

conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and transport Facilities:

7.1 Post Office (PO): Self-explanatory.

7.2 Sub-Post Office (SPO): Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO): Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (landlines): If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO: Self explanatory.

7.6 Mobile Phone Coverage: Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centres (CSC): If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH): These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH): These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighbouring States.

7.10 Major District Roads (MDR): These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main Highways.

7.11 Other District Roads (ODR): These are roads serving rural areas of production and providing them with outlet to market centres, taluka headquarters, block development head quarters or other main roads.

7.12 Village Road: The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR): A road provided with a bituminous surfacing.

7.14 Gravel (Kuchha) Road (GR): A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM): This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP): A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies: -Banking facility means a place where a person can operate a bank account.
8.1 Commercial Bank (CB): These may be banks wholly owned by the Government of India. or by Indian or Foreign Companies.
8.2 Cooperative Banks (Coop. B): A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Cooperative banks are often created by persons belonging to the some local or professional community or sharing a common interest. These banks are registered under the Cooperative Societies Act. The cooperative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949.
8.3 Agricultural Credit Society (ACS): Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery.
8.4 Non-Agricultural Credit Society (NCS): These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities:
9.1 Self-help Group (SHG): Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9. 2. Public Distribution System (PDS) shop: The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3. Mandis/Regular Market: These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4. Weekly Haat: These are those clusters of shops with or without fixed premises which are open once a week.

9.5. Agricultural Marketing Society: It is a common platform to analyse the issues among all the individuals and institutions in the field of agricultural marketing.

9.6. Nutrition Centre: Integrated Child Development Services (ICDS): The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7. Anganwadi Centre: Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8. Accredited Social Health Activist (ASHA): ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9. Sports Club/Recreation Centre: Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10. Cinema/Video Hall (CV): If a regular cinema house licensed by Government is available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.

9.11. Public Library: Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12. Public Reading Room: Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13. Newspaper Supply: The availability of the Newspaper(s), both in English or vernacular, in the village is considered to having the said facility.

10. **Availability of Electricity/Power.** If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that

domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for domestic use: This category includes electricity used only for domestic consumption.

10.2 Power supply for agricultural use: This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power supply for commercial use: This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power supply for all uses: This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern: The land use area of the villages is given in hectares. The land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of drainage : Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of latrines: The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.

(i) Pit System: The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

(ii) Flush/pour flush: A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage

of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used).

(iii) **Service:** Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under "Others" category.

14. Protected Water Supply- Source and capacity of Storage system: There are various sources of water supply and its storage system in the town.

14.1 Service Reservoir: A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery: Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for **intake screens**. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System: A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank: Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. Road lighting (Points): Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage: Orphanageis the name to describe a institution devoted to the **care** of **orphans**–children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a **ward of the state**, and orphanages are a way of providing for their care and housing.

17. **Working women's hostel:** These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. **Old Age Home:** There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. **Stadium:** A stadium is a place, or venue, for (mostly) outdoor **sports**, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall: These are the places where meetings, social functions etc. are organised.

Town Directory:

There are seven statements in the Town Directory. These statements have been compiled from the information supplied by the local bodies of the State and the contents thereof are as follows:

Statement I:

This statement gives class, name and civic administration status of the town and its location code which runs into eight digits, name of tahsil, name of C.D. block in case of non-municipal (Census) towns, number of households, population and decadal growth rate of the towns 1901 - 2011 density of population and sex ratio for the last three decadal Censuses.

Statement II:

This statement provides data on physical aspects viz; rainfall, temperature of towns, location of town with respect to its distance from State/district/ /tahsil headquarters, from the nearest city/railway station/ bus route, etc.

Statement III:

This statement indicates civic and other amenities available in each town of the district. The details given under civic and other amenities include availability of road leanth in km, both kutcha and pucca, system drainage, number of latrines and method of disposal of night soil, protected water supply, fire fighting service and number of electric connections available in the town.

Statement 1V:

Statement 1V explains the states of medical facilities in each town. The medical facilities cover number of hospitals (allopathics & other)/dispensaries/ health center / family welfare center/ matrinity and child welfare centers.

Statement V:

Statement V explains the status of medical, educational, recreational and cultural facilities in the town. The medical facilities cover number of hospitals/dispensaries/TB clinics. The number of beds available under each type of medical institutions is also given. Similarly, the educational facilities shown include availability of Arts/Science/Commerce/Law/Other colleges of degree level and above, medical colleges, polytechnics, shorthand, typewriting and vocational training institutions, higher secondary/intermediate/PUC/Junior college level, secondary/matriculation, junior secondary/middle school, primary school and adult literacy classes/centres. This statement also includes information on working women's hostels along with number of seats and number of recreational and cultural centres, like stadium, cinema, auditorium/theatre/community halls, public libraries reading rooms etc.

Statement V:

This statement deals with industry and banking data in 2009.Townwise information is depicted on three most important commodities manufactured, commercial, co-operative banks and number of agricultural and non-agricultural credit societies in each town.

Statement VII:

In view to collect exhaustive information in slum demography etc., this separate statement has been introduced. Slum data collected in this Statement will be used as an aid and tool for urban planning of the towns. Various types of information viz., name of the slum area, total number of households and population of the slum areas, availability of paved roads (in kms.) in the slum area, system of sewerage, number of latrines (private and community) available,

method of disposal of night soil, number of tap points installed for the supply of protected water and electric connections available for domestic road lighting and other purposes have been collected in this statement.

Village and Town Directory

Brief Note on the Village and Town Directory for the DCHB, Census of India, 2011.

Village Directory 2011 Census:-

The Village Directory is being compiled for both inhabited and un-inhabited villages. In the village directory both private and government facilities/institutions have been given. In case of un-inhabited /depopulated villages, the location code number, name and area of the village is being given universally in Village Directory and Village PCA. The columns relating to the amenities and land use pattern, etc. being left blank and it will be noted against the name of the village that it is un-inhabited/depopulated. The Appendices to Village Directory and Inset Tables based on village Directory data are also prepared for inhabited villages.

In the Village Directory format for 2011 Census there are 121 columns and the details thereon are as follows:

Columns 1: Serial Number**: -** Self explanatory. All the villages within the CD block are presented serially in the ascending order of their location code number.

Columns 2: Name of village**: -** Self explanatory. The name of the villages is shown against this column. This also includes the forest and uninhabited villages.

Columns 3: Location Code Number of village. The location code numbers of the villages are shown against this column.

Columns 4: Area of the Village: - The area of the villages has been given in hectares.

Column 5: Total Population: -The total population of the village as per 2011 Census has been given against this column.

Column6: Number of Households: -The numbers of households as per 2011 Census have been given in this column.

Amenities: - The availability of different infrastructural amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, recreation and cultural facilities, communication, power, etc. in each village have been given in the Village Directory. Wherever the amenities are not available in the village, the distance range code viz; 'a' for <5 Kms, 'b' for 5-10 Kms and 'c' for 10+ Kms of the nearest where facility is available is given. Column wise details are given below:

Columns No. 7 – 20 Educational Facilities: - All the different educational facilities available in the village have been given under these columns. Nursery/LKG//UKG classes are included in Pre-Primary Schools, Classes up to class V included in Primary School; Classes from VI to VIII are included in the Middle school. Classes from IX and X included in Secondary School. Classes from XI and XII are included in Senior Secondary School. In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively. The information on the entire educational institutes is given under these columns.

Columns No. 21 to 38 - Medical Facilities: - All the different medical facilities available in the village have been given under these columns.

Columns No. 39 to 46 -Drinking Water: - The information on availability of various types of the drinking water facility within the village has been given under these columns.

Columns No. 47 to 50 – Availability of Toilet and others:- The information on availability of toilet and Bio-Gas etc. available in the village has been given under these columns.

Columns No. 51 to 67 Communication (Post & Telegraph and transport):- The information on communication and Post Office, Sub-Post Office, & Telegraph Office, Village PIN Code number, Phone-Landlines, Mobile Phone, Private Courier Facility, Internet Café, etc; available in the village has been given under these columns. The information on all various transport facilities whether public/private transport like Bus, Railway Station, or Navigable waterways, Taxi , Van, Tractors etc. available in the village has also been given under these columns.

Columns No.68 to 79 – Village connected to High ways, Village Roads, Banks and Credit Societies: - The information on all roads connected to village has been given under these columns. These include National Highway, State Highway, District Roads and other district roads connected to the village, Pucca roads, Kutchcha Roads, Water Bounded Macadam Roads, Navigable Water Ways and Foot Paths has been given under these columns. Further, the information on availability of banks, ATM and Agricultural Credit societies in the village has been given under these columns.

Column No. 80 to 96 Miscellaneous Facilities: - The information on various miscellaneous facilities available in the village has been given under these columns. These includes Self - Help Group, Public Distribution Shop (PDS), Mandi /Regular Market, Weekly Haat, Agricultural Marketing Society, Nutrition Centre(ICDS), Anganwadi Centre, ASHA, Community Centre, Sports Fields, Sports Club/Recreation Centre, Cinema/Video Halls, Public Library, Public Reading Room, News Paper Supply, Assembly Polling Station, Birth and Death Registration Office.

Columns No. 97 to 100 – Electricity: - Availability of Power Supply in the village, whatever may be the form of its use has been given in these columns. These include Electricity for Domestic Use, Electricity for Agriculture Use Electricity for Commercial Use, and Electricity for all purpose Domestic Uses.

Column No. 101 and 102 -Nearest Town: - The name of the nearest town along with the distance range code has been in these columns.

Land use and Irrigation: - The land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the following 9 categories.

(i)-Column No. 103 -Forests:-This includes all lands classed as forest under any legal enactment dealing with forests or administered as forests, whether state-owned or private, and whether wooded or maintained as potential forest land. The area of crops raised in the forest and grazing lands or areas open for grazing within the forests remain included under the forest area.

(ii)-Column No. 104- Area under non-agricultural use:-This includes all lands occupied by buildings, roads and railways or under water, e.g. rivers and canals and other lands put to uses other than agriculture.

(iii)-Columns No. 105-Barren and un-culturable land:-This includes all barren and un-culturable land like mountains, deserts, etc. land which cannot be brought under cultivation except at an exorbitant cost should be classed as un-culturable whether such land is in isolated blocks or within cultivated holdings.

(iv)-Column No. 106- Permanent Pastures and other Grazing Lands:-This includes all grazing lands whether they are permanent pastures and meadows or not. Village common grazing land is included under this head.

(v)-Column No. 107-Land under Miscellaneous Tree Crops, etc.:- This includes all cultivable land which is not included in 'Net area sown' but is put to some agricultural uses. Lands under Causing trees, thatching grasses, bamboo bushes and other groves for fuel, etc. which are not included under 'Orchards' are classed under this category.

(vi)-Column No. 108- Culturable Waste Land: - This includes lands available for cultivation, whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or unassessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category at the end of the five years.

(vii)-Column No. 109- Fallow Lands other than Current Fallows: - This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years.

(viii)-Column No. 110- Current Fallows: - This represents cropped area, which is kept fallow during the current year. For example, if any seeding area is not cropped against the same year it may be treated as current fallow.

(ix)-Column No. 111- Net Area Sown: -This represents the total area sown with crops and orchards. Area sown more than once; in the same year is counted only once.

Column No. 112- Total Irrigated Land Area: - It includes all land which is cultivable and irrigated by any source of irrigation. The total irrigated area of the village has been given under this column.

Column No. 113- Total Un-Irrigated land Area: - Un-Irrigated area includes all land which is cultivable but not irrigated by any source of irrigation. The total un-irrigated land area of the village has been given under this column.

Column No. 114 to 118 Area Irrigated by source: - The area irrigated by various source of irrigation in the village have been given under these columns. The different source of irrigation facilities available in the village are as follows:

(i)-Canals(C)-Govt. or Pvt., (ii)-Wells/Tube-wells (W/TW), (iii)-Tanks/Lake(T/L), (iv)-Waterfall,(WF) and (v)-Others(O).

Columns No.119 to 121-Three most important commodities manufactured:-The names of three most important commodities manufactured in the village are indicated in this column.

C.D. Block level totals of the Village Directory:-

At the end of entries for the Village Directory of each C.D. Block, the totals of different columns are being given wherever possible. However, in case of some of the columns, it may not be possible to work out the CD Block level totals, in such cases the particular of relevant columns are being left blank against C.D. Block level.

Appendices to Village Directory: - The Village Directory also includes the following appendices:

Appendix –I: Summary showing total number of villages having Educational, Medical and other amenities in villages – C.D. Block level.

Appendix I A: Villages by number of Primary Schools.

Appendix I B: Villages by Primary, Middle and Secondary Schools.

Appendix I C: Villages with different sources of drinking water facilities available.

Appendix II: Villages with 5,000 and above population which do not have one or more amenities available.

Appendix -III: Land utilization data in respect of Census towns.

Appendix -IV: C.D. Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix -V: Summary showing number of Villages not having Scheduled Caste population.

Appendix -VI: Summary showing number of Villages not having Scheduled Tribe population.

Appendix -VII A: List of villages according to the proportion of the Scheduled Castes to the total population by ranges.

Appendix- VII B: List of villages according to the proportion of the Scheduled Tribes to the total population by ranges.

Appendix -VIII: Number of villages under each Gram Panchayat (C.D. block wise).

.....

Note explaining the abbreviations used in Town Directory 2011 Census:-

Statement I :- Status and Growth History:

Column 1 – Serial Number:- Self explanatory

Column 2:- Class, Name and civic status of town:- The Class is presented according to population of the towns in 2011 Census as follows:

Population	**Class**	**Population**	**Class**
100,000 and above	I	10,000 – 19,999	IV
50,000 – 99,999	II	5,000 – 9,999	V
20,000 – 49,999	III	Below - 5,000	VI

The following abbreviations are used to denote the Civic Status of the town.

Civic Status	**Codes**	**Civic Status**	**Codes**
i-Municipal Corporation	M.Corp.	xii – Notified Town Area	NTA
ii-Municipal Committee	MC	xiii – Industrial Notified Area	INA
iii-Municipal Council	M Cl	xiv – Industrial Township	ITS
iv-City Municipal Council	CMC	xv – Township	TS
v-Town Municipal Council	TMC	xvi – Town Panchayat	TP
vi- Municipal Board	MB	xvii – Nagar Panchayat	NP
Vii –Municipality	M	xviii – Town Committee/ Town Area Committee	TC
viii- Cantonment Board/Cantonment	CB	xix – Small Town Committee	ST
ix- Notified Area	NA	xx – Estate Office	EO
x –Notified Town	NT	xxi –Gram Panchayat	GP
xi - Notified Area Committee/ Notified Area Council	NAC	xxii – Census Town	CT

Column 3 - 25: - These columns are self explanatory

Statement II: - Physical Aspects and Location of town, 2009.

Column 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 5 - Physical Aspects:-In these columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Columns 6 to 12:- Name and road distance of the town (in kms.) from the State headquarters, District headquarters, Sub-divisional/Taluk/Tahsil/ Police station/Development Block/Island HQ., Nearest city with population of one lakh and more, Nearest city with population of five lakh and more, Railway station and Bus route is recorded in these columns respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Statement III – Civic and other Amenities, 2009:-

Column 1 - 2 Serial number and Name of town: - Self explanatory

Column 3 – Road length (in km.):- The information about the road length (in km.) within the limit of the town is recorded in this column.

Columns 4 to 7- System of drainage: - The system of drainage available in the town is indicated in these columns by the following codes:

System of drainage Codes

Open drains	OD
Closed drains	CD
Both drains	BD

Columns 8 to 11-Number of latrines: - The number of various types of latrines available in the town is indicated in these columns.

Columns No. 12 & 13 – Protected water supply: - The information on source of water supply and system of water storage with capacity available in the town are given in these columns in the following codes:

Column 12 (Source of water supply):-

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 13 (System of water storage):-

(i)	Over Head Tank	OHT
(ii)	Service Reservoir	SR
(iii)	River Infiltration Gallery	RIG
(iv)	Bore Well Pumping System	BWP
(v)	Pressure Tank	PT

The information on 2 major source of water supply is given in column 12 and the system of water storage with capacity against each in kilo-litres (in bracket) is presented in column 13.

Columns 14 Fire Fighting Service: - In case the fire fighting service is available in the referent town, `yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Columns 15 to 19- Electrification (Number of connections):-Different types of electric connections have been shown in these columns, i.e., Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement IV: Medical Facilities, 2009:-

Columns 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 13 :- The number of various medical institutions such as Hospitals, Dispensaries, Health Center, Family Welfare Center, Maternity and Child Welfare Center, Maternity Homes, T.B. Hospital/clinic, Nursing Homes, Charitable Hospital/Nursing Home, Mobile Health Clinic and Others as available in the town, are indicated in these columns (along with number of beds in brackets).

If a medical facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Column 14 - Veterinary Hospital:-The Number of Veterinary Hospitals available in the town is given in this column.

Column 15 - Medicine Shop:-The number of Medicine shops available in the town is given in this column.

Statement V: Educational, Recreational and Cultural Facilities, 2009:-

Columns 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 15 Educational Facilities:- The information on number of Primary school, Middle school, Secondary school, Senior Secondary school, Arts/Science/ Commerce colleges (of degree level and above), Medical colleges, Engineering colleges, Management Institute/Colleges, Polytechnics, Recognized Shorthand, Typewriting and vocational training Institutions, Non-formal Education Center (Sarva Shiksha Abhiyan Center), Special School for disabled and Others available in the town, are indicated in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometers from the town where the facility is available is mentioned.

Columns 16 to 23 – Number of Social, Recreational and Culture Facilities :- The information on No. of Home Orphanage, Working women's hostels (with No. of seats in bracket), No. of

Old Age Home, Stadium, Cinema Theatre, Auditorium/Community halls, Public libraries and Reading rooms available in the town are given under these column.

Statement VI: Industry and Banking 2009:-

Columns 1 - 2 Serial number and Name of town: - Self explanatory

Columns 3 to 5 - Names of three most important commodities manufactured:-The names of three most important commodities manufactured in the town are given under these columns.

Columns 6 to 8 - Number of banks: - The number of banks available in the referent town both Commercial and Co-operative banks are recorded against these columns.

Columns 9 & 10 – Number of Agricultural and Non Agricultural Credit Societies: - The number of Agricultural and Non Agricultural Credit Societies available in the referent town are given in these columns.

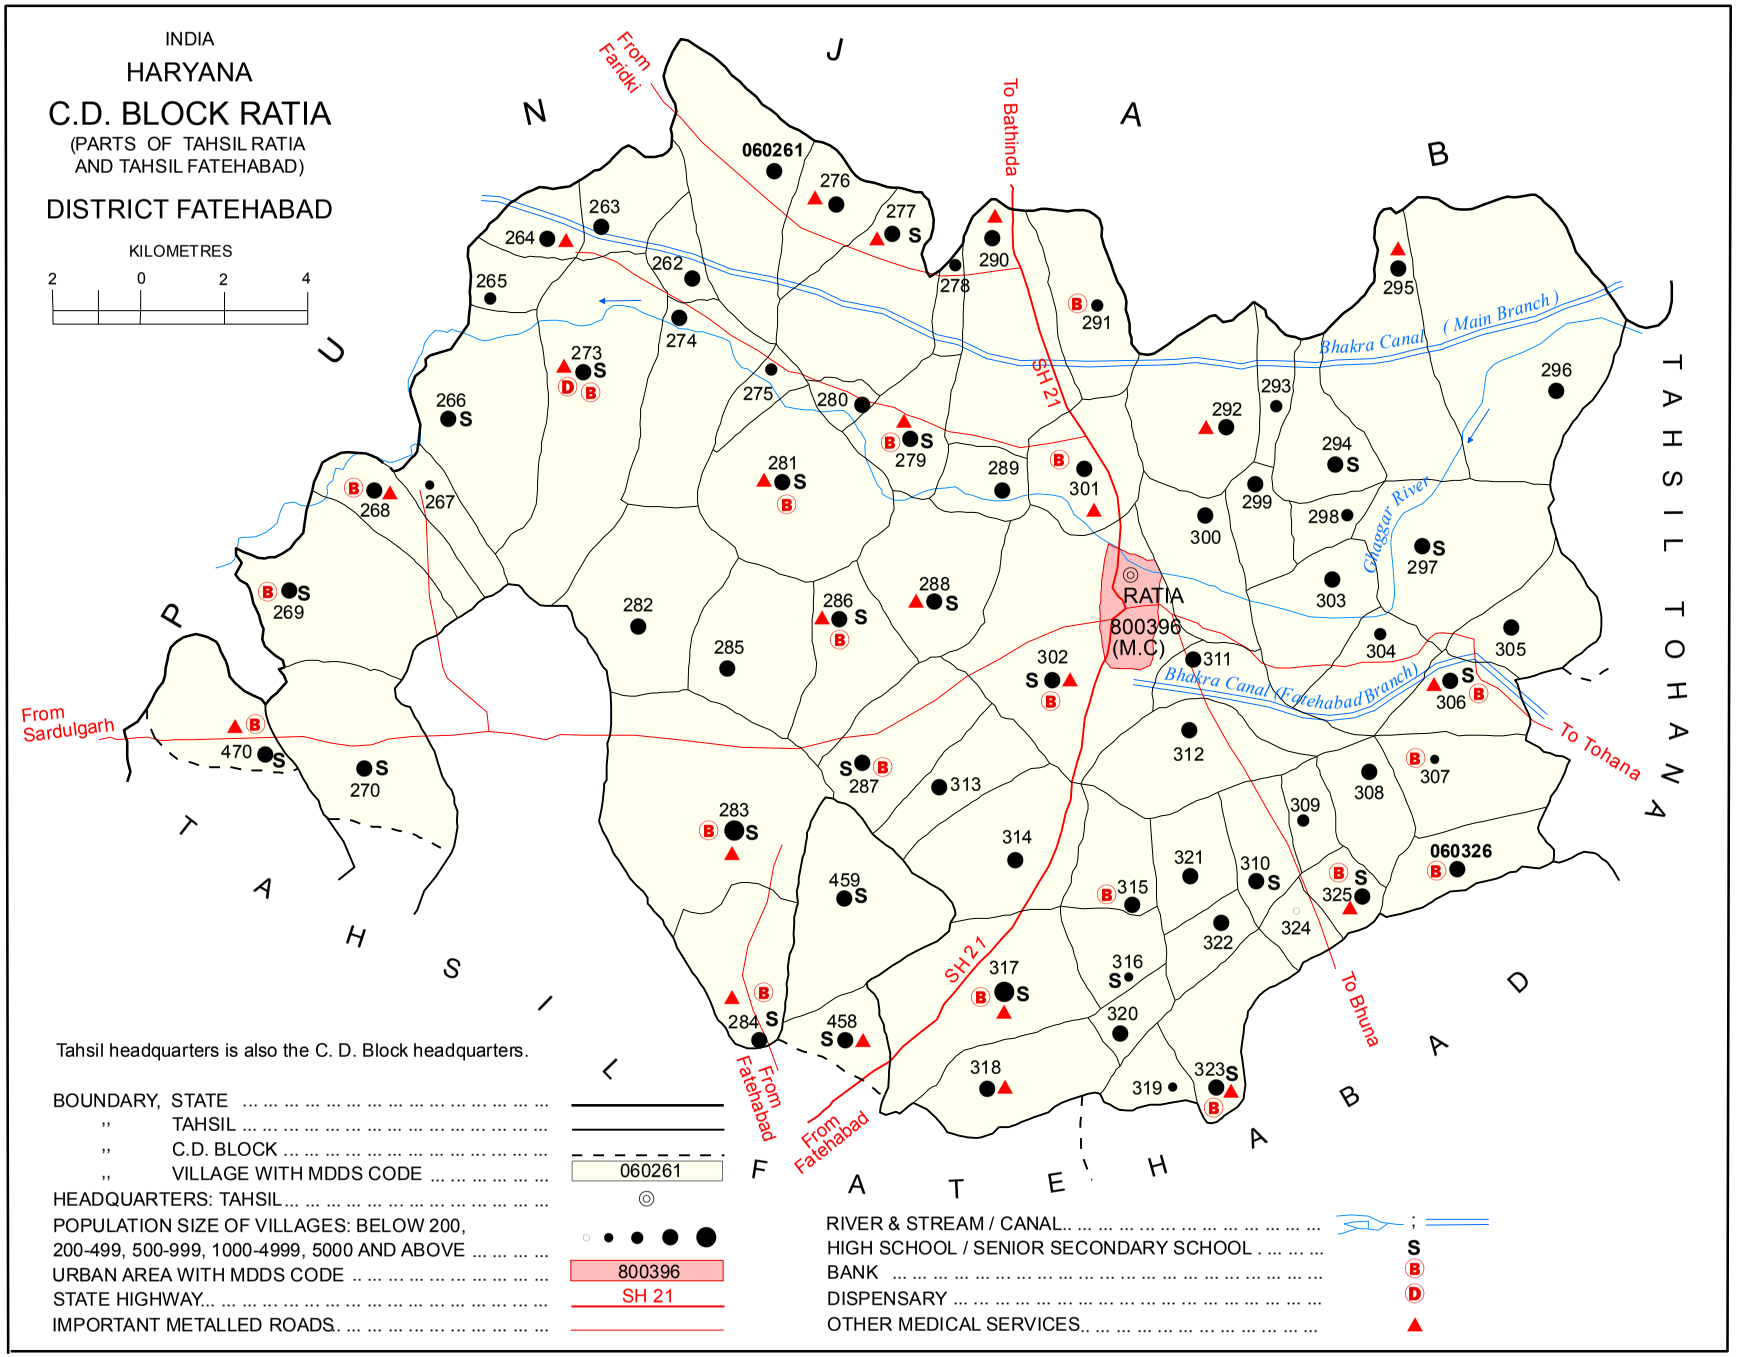

Statement VII: Civic and other Amenities in Slums, 2009:-

This statement VII provides information on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.
