Preface

The final population data presented in this publication is based on the processing and tabulation of actual data captured from each and every 202 million household schedules. In the past censuses the final population totals and their basic characteristics at the lowest geographical levels popularly known as the village/town Primary Census Abstract was compiled manually. The generation of Primary Census Abstract for the Census 2001 is a fully computerized exercise starting from the automatic capture of data from the Household Schedule through scanning to the compilation of Primary Census Abstract.

This publication titled "Final Population Totals" is only a prelude to the Primary Census Abstract. The publication, which has only one table, presents data on the total population, the Scheduled Castes population and the Scheduled Tribes population by sex at the state, district, taluk and town levels. The village-wise data is being made available in electronic format. It is expected to be a useful ready reference document for data users who are only interested to know the basic population totals.

This publication is brought out by Office of the Registrar General, India (ORGI) centrally. I am happy to acknowledge the dedicated efforts of Mr H. Shashidhar, Director of Census Operations, Karnataka and his team and my colleagues in the ORGI in bringing out this publication. Finally, I would like to acknowledge the active cooperation of the people of Karnataka and support of the state government and all its officials, as without their assistance it was not possible to complete the mammoth exercise of Census 2001.

New Delhi
December 2003

Jayant Kumar Banthia
Registrar General &
Census Commissioner of India

Census of India 2001
Summary : Karnataka State

Number of Administrative Units

Number of districts	27
Number of taluk	175
Number of villages	29,406
Inhabited	27,481
Un-inhabited	1,925
Number of towns	270

Population

Total Population:

Persons	52,850,562
Males	26,898,918
Females	25,951,644

Total Scheduled Castes Population:

Persons	8,563,930
Males	4,339,745
Females	4,224,185

Total Scheduled Tribes Population:

Persons	3,463,986
Males	1,756,238
Females	1,707,748

Introduction

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another. This data will form the benchmark for framing of the welfare and development policies for billion plus human resources living in this country.

2. The Census Act, 1948, forms the basis for the conduct of population censuses in independent India. The Census of India, 2001 was conducted in two distinct but inter-related phases. The first phase, the Houselisting Operation was conducted between April - September, 2000 in different states and union territories as a prelude to the exercise of undertaking the decennial Population Census. The houselisting exercise provided the basis for uniform and unambiguous frame to undertake the Population Enumeration with the ultimate objective of achieving as full a coverage as is humanly possible without any omission of an area or household. During this Houselisting Operation, data on housing conditions, amenities and assets available to the households were also collected. The second phase of census i.e. Population Enumeration, was undertaken between February, 9-28 2001 (both days inclusive) with a revisional round from 1st to 5th March, 2001. The Census moment was **00.00 hours of 1st March, 2001**, the referral time at which the snapshot of the population of the country was taken. This was a departure from the earlier census tradition, as until the 1991 Census (except 1971), the sunrise of 1st March of the relevant Census year was the census moment. The enumeration of houseless population was carried out on the night of February 28th, 2001.

3. In certain inaccessible and snow bound areas of the country, population enumeration was preponed for administrative and technical convenience and carried out non- synchronously. Thus in Jammu & Kashmir and certain snow bound areas of Himachal Pradesh and Uttranchal the Population Enumeration was conducted during 11th to 30th September, 2000 with a revisional round from 1st to 5th October, 2000. In Kinnaur district of Himachal Pradesh, the Population Enumeration had to be deferred due to flash floods in August, 2000 and was conducted from 12th to 31st May, 2001 with reference date as 1st June, 2001. In Jammu and Kashmir, due to certain constraints, the enumeration period was extended from 1st October, 2000 to 15th November, 2000 with a reference date of 16th November, 2000 in the six districts viz., Srinagar, Badgam, Anantnag, Baramulla, Kupwara and Pulwama of Kashmir Valley and four blocks namely, Banihal, Ramso, Marwa and Wardwan of Doda district in Jammu Division. It was further extended in Srinagar town and Pulwama districts until 15th December, 2000 with reference date being 16th December, 2000.

4. Further, due to the devastating earthquake in Gujarat on 26th January, 2001 just two weeks prior to the commencement of the nation wide Population

Enumeration, this schedule in the affected areas of Gujarat had to be postponed. These areas included the entire district of Kachchh, Morvi, Maliya-Miana and Wankaner talukas of Rajkot district and Jodiya taluka of Jamnagar district. The Population Enumeration in these areas was undertaken during 9th-28th February, 2002 with 1st March, 2002 as the reference date. Although enumeration in certain areas of the country have been undertaken at different points of time and with different reference dates, no adjustments have been made to the enumerated population so as to bring all of them to the common reference date of 1st March, 2001. This, if at all, will have a very minor, almost negligible bearing on the population totals for the country or state or even the districts in most cases.

5. This gigantic operation (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,470 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation (Annexure-I). The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration. To facilitate quick tabulation for bringing out Provisional Population Totals, provision for page totaling were made in the schedule itself for a few items namely population, males, females, population aged 0-6 years by sex, literates, illiterates and workers and their categories by sex. The Provisional Population Totals were put in the public domain on 26th March, 2001 within three weeks of the completion of the enumeration. Provisional Population Totals, Paper-1 of 2001 and Supplement to Provisional Population Totals of 2001 provided the basic statistics of the population, literates up to district level classified by sex. The Directorates of Census Operations also released provisional data at the district, sub-district and town levels for their respective States/Uts through the publication of Paper 1, 2 and 3 of Provisional Population Totals. Subsequently, the distribution of population by rural and urban areas and economic activity characteristics of the population by rural and urban areas at district/sub-district/town level were also released in electronic format at the national level and print form at the state level. All the provisional population totals released so far are also available on census website : **<http://www.censusindia.net>**

6. In addition to the provisional population totals, the final results of the Houselisting Operations were released in April, 2003 which provided valuable information on the housing stock, amenities and assets available to the household. Houselisting data is available in the hard copy form in 'Tables on Houses, Household Amenities and Assets by India and States'. Similar publications are also available for the Scheduled Castes and the Scheduled Tribes households separately. This data is also available in hard copy and electronic format for India and all the States/Union territories at district, sub-district and town level. The Houselisting data is immensely useful to the policy makers, planners and administrators to improve the quality of life for countrymen as well

to the corporate sector for formulating marketing strategies in reaching the rural masses.

Data Processing

7. A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Schedules for both the phases were scanned through high speed scanners in fifteen data centres across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential prerequisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

8. After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas specially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

9. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

10. There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of an individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

11. The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

12. The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division. In this volume the final population figures are being released as a precursor to the Primary Census Abstract which will be released subsequently. These final figures relating to the total population including the houseless and institutional population, the Scheduled Caste population and the Scheduled Tribe population for the Country/State/Union territory/District/Tahsil/Town by sex and residence will be of immense use to the data users. The data will be presented in the Table titled : Final Population Totals-1 (FPT-1) - Total Population, Scheduled Caste and Scheduled Tribe Population by sex and place of residence - State/Union territory/District/Tahsil/Town: 2001. It may be noted that the total population includes the population of the Scheduled Castes and the Scheduled Tribes.

Basic Census Concepts and Definitions

It is important for the data users to familiarize themselves with the concepts and the definitions of the terms used for proper evaluation of the data contained in this publication. At the same time, it is all the more important to understand the implications of the terms used at the Census of India 2001, for making meaningful comparisons of the similar data generated by various other agencies within the country and with the data produced by other countries in the world. The concepts and definitions adopted at the Census of India, 2001 are as given below:

Rural-Urban Areas

2. The final population data are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

- a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.
- b) A place satisfying the following three criteria simultaneously:
 - i) a minimum population of 5,000;
 - ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
 - iii) a density of population of at least 400 per sq. km. (1,000 per sq. mile).

3. For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b)(ii), the data relating to main workers were taken into account.

4. Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations': Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc. that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, includes the data for outgrowths separately of such towns and also town plus outgrowth(s) population.

City

5. Towns with population of 1,00,000 and above are called cities

Household

6. A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household

7. A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Households

8. Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc. were treated as Houseless households.

Scheduled Castes and Scheduled Tribes

9. Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Similarly, Article 342 provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are deemed to be for the purposes of the Constitution the Scheduled Tribes in relation to that State or Union territory. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

10. It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they

professed the Hindu or the Sikh religion. Subsequently, in September, 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the population professing the Hindu and the Sikh religions were placed on the same footing with regard to their inclusion as Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist professing population were placed on the same footing with regard to the recognition of the Scheduled Castes.

11. For finalizing the list of Schedule Castes/Scheduled Tribes notified in each state/union territory, all the constitutional amendments that have taken place prior to the conduct of 2001 census were taken into account. Since there is no Scheduled Castes list for the state of Nagaland and the union territories of Andaman & Nicobar Islands and Lakshadweep; and no Scheduled Tribes list for the states of Delhi, Haryana and Punjab and the union territories of Chandigarh and Pondicherry, the Scheduled Castes and Scheduled Tribes population figures are furnished for only the relevant category in respect of these states and union territories.

12. The instructions to the enumerators for recording the individual responses on religion and the Scheduled Castes and the Scheduled tribes were more or less the same as in the past censuses. Each enumerator was provided with a notified list of Scheduled Castes and Scheduled Tribes in respect of his/her state/union territory. The religion for each individual was first of all determined. Then it was ascertained from the respondent for each individual whether she or he belonged to a Scheduled Caste or a Scheduled Tribe through Question No.8 and 9 of the Household Schedule. If in reply to either of this question, the answer was in the affirmative, the name of caste / tribe to which the individual belonged was ascertained. If the name of caste / tribe returned by the respondent appeared in the approved list for the state the enumerator was expected to treat the individual, as belonging to Scheduled Caste or Scheduled Tribe and record the appropriate entry.

Location Code structure adopted in Census 2001

13. In the Census 2001, the following location code structure has been adopted:

<i>Area</i>	<i>Number of digits</i>
State/ Union territory	Two digits (within the country)
District	Two digits (within the state/ut)
Sub-district	Four digits (within the district)
Village	Eight digits (within the state/ut)
Town	Eight digits (within the district)
Ward	Four digits (within the town)

14. The general pattern followed in coding of any geographical unit was a serpentine one, beginning from the North-west corner and completing at the farthest South-east corner within the defined higher level of the geographical hierarchy. In so far as the state/union territory is concerned Jammu & Kashmir has code number 01 and code number 35 has been allotted to the union territory of Andaman & Nicobar Islands. Generally, the administrative jurisdiction below a district is a sub-district, for example Tahsil or Taluk. However, in certain states and union territories exceptions had to be made since the nomenclature for sub-districts is not uniform throughout the country. For example, in Orissa Police station is the sub-district, in West Bengal it is the Community Development Block and so on. The geographical units adopted as sub-districts in various states and union territories are listed in Annexure-II.

15. After the completion of house listing operation, three new states namely Uttaranchal, Chhattisgarh and Jharkhand were created in November 2000 barely three months before the commencement of Population Enumeration. These States were carved out of Uttar Pradesh, Madhya Pradesh and Bihar respectively. This resulted in redoing of the coding exercise in all the jurisdictional units of these six affected states

16. In Assam, Mizoram and Orissa there are a few sub-districts which cut across the district jurisdictions. In such situations the sub-districts have been provided a separate series of code numbers viz. 9000, 9001 etc.

17. One of the major initiatives taken in the Census 2001 was the allotment of Permanent Location Code Number (PLCN) to each and every village within the State and not within a tahsil as in the earlier censuses. PLCN was thus assigned as one continuous number from the first village in the first district to the last village in the last district. PLCN is an eight digit unique location code number with the first six digits representing the code number of the village and the last two digits depicting two zeros '00'. These zeros are reserved as buffer to be used for coding any new village(s) that may come up between two villages in future. For example, if a new village comes up between two villages with PLCNs 01254600 and 01254700, the new village will be allotted PLCN 01254601 and so on.

18. The location code number for a town is also an eight digit number starting with the digit 4 situated at the extreme left acting as the unique identifier. The next two digits depict the code number of the district in which the town falls followed by two digits representing the town serial number in the district. There are three zeros at the end as buffer, mainly to meet the requirement for bringing the number of digits to eight to match the number of digits in the PLCN for the villages. Thus a town location code number 40305000 represents the town serial number 5 of the district number 03 in a State.

19. The Out-Growths of towns have not been given any independent location code numbers. These have been given notional ward codes after the last ward code of the respective towns to which these OGs relate to.

Presentation of data

20. In this special publication the presentation has been made in the following format:

State	Total Rural Urban
District 1	Total Rural Urban
Sub-district 1	Total Rural Urban
Sub-district 2	Total Rural Urban
Sub-district n	Total Rural Urban
Town 1	Urban
Town 2	Urban
Town 3	Urban
Town m	Urban

21. In case of towns having Out-Growth(s) the presentation style is as follows:

Town (M+OG) (*Here M is the abbreviation for Municipality*)
Town (M)
OG 1
OG 2

OG p

22. There are ten cities /towns in India whose jurisdictions cut across district boundaries, for example, Delhi M.Corp (in Delhi), Dev Prayag NP (in Uttaranchal), Siliguri M. Corp (in West Bengal), Imphal, M.Cl (in Manipur), Hyderabad M.Corp (in Andhra Pradesh), Greater Mumbai M.Corp (in Maharashtra). In such cases the populations of parts of such towns have been included in the urban populations of the concerned districts.

Abbreviations of civic status of cities/towns

C.B.	-	Cantonment Board/Cantonment
C.M.C.	-	City Municipal Council
E.O	-	Estate Office
G.P.	-	Gram Panchayat
I.N.A.	-	Industrial Notified Area
I.T.S.	-	Industrial Township
M	-	Municipality
M.B.	-	Municipal Board
M.C.	-	Municipal Committee
M.Cl.	-	Municipal Council
M.Corp.	-	Municipal Corporation/Corporation
N.A.	-	Notified Area
N.A.C.	-	Notified Area Committee/Notified Area Council
N.P.	-	Nagar Panchayat
N.T.	-	Notified Town
N.T.A.	-	Notified Town Area
S.T.C.	-	Small Town Committee
T.C.	-	Town Committee/Town Area Committee
T.M.C.	-	Town Municipal Council
T.P.	-	Town Panchayat
T.S.	-	Township
C.T.	-	Census Town
O.G.	-	Outgrowth

ANNEXURES

Annexure I CENSUS OF INDIA 2001: HOUSEHOLD SCHEDULE

Confidential when filled **A**

Use only Arabic Numerals as indicated below

0	1	2	3	4	5	6	7	8	9
---	---	---	---	---	---	---	---	---	---

Part I - Locality particulars :

Name of State/UT Code No.

Name of Town/ Village Code No.

Name of Tahsil/ Taluk/ P.S./ Dev. Block/ Circle/ Mandal etc. Code No.

Number and/or Name of Ward Code No.

Name of District Code No.

Name of Town/ Village Code No.

Enumeration Block Number Code No.

Schedule number

Type of household (Give appropriate Code number)

Normal-1 / Institutional-2 / Houseless-3

Part II - Individual particulars :

Serial number	Q.1 Name of the person	Q.2 Relationship to head (record the relationship in full)	Q.3 Sex Male-1 / Female-2	Q.4 Age last birthday (in completed years)	Q.5 Current marital status (Give Code number from the list below)	Q.6 Age at marriage (in completed years) If Code 2 or 3 or 4 in column 5	Q.7 Religion (write name of the religion in full) For following religions, also give Code number in box Hindu.....1 Muslim.....2 Christian.....3 Sikh.....4 Buddhist.....5 Jain.....6 For other religions, write name of the religion in full but do not give any Code number	Q.8 Caste, write name of the Scheduled Caste from the list supplied (Scheduled Castes can be only among Hindus, Sikhs and Buddhists)	Q.9 If Scheduled Tribe, write name of the Scheduled Tribe from the list supplied (Scheduled Tribes can be from any religion)	Q.10 Mother tongue	Q.11 Other languages known (enter up to two languages in order of proficiency)	Q.12 Literacy status: M F	Q.13 Highest educational level attained (for diploma or degree holder, also write the subject of specialisation)	Q.14 If attending educational institution: School / College / Vocational Institute / Literacy Centre or if not attending	Q.15 If the person is physically disabled, give appropriate Code number from the list below
